American Railroad Journal.

Saturday, May 24, 1862.

The North Missouri Railroad.

The report of the North Missouri Railroad Co. which we publish elsewhere, shows a more satisfactory state of affairs than might have been anticipated. While there has been a large falling off in the gross earnings from ordinary sources, as compared with 1860 and 1859, the reduction in working expenses has more than kept pace with it, leaving the net profits fully up to the average of the two previous years. This sum, $78,219 82, will be further increased by $110,000 due by the general government for military services rendered by the road. The business, it will be seen, was the largest ever performed by the company, in spite of the difficulties and losses which befell them. As there is still a considerable portion of last year's crop to be taken to market, we do not apprehend so great a diminution in receipts for the current year as might be supposed.

The total losses of the company from insurrectionary raids are put at $86,312. The stockholders may felicitate themselves on their narrow escape. A much larger sum was expended on the construction of a single *bridge* on the Memphis and Clarkesville, the Louisville and Nashville, or the Baltimore and Ohio Railroad, whose destruction was only the work of an hour. The last named line, in locomotives, alone, sustained fourfold greater damages. But the North Missouri enjoyed an eminently favorable route, crossing no large river except the Missouri, which it passes by means of a ferry. Few roads in Virginia or Tennessee or even in Missouri will be able to show as satisfactory a condition at the year's end, as the one under notice.

The language used by President Sturgeon toward ex-Governor Jackson and his abettors is none of the mildest, but the circumstances will readily account for it. A question here presents itself of much importance to the railroad interests of the whole country. Who shall pay for the damages sustained by the company in this case? It would be preposterous to think that it should *not* be refunded in full, considering to how strict an account every railroad company is held by the public. If the community insist on corporations paying "the uttermost farthing" in the event of losses of life or property, the former most hold itself bound by an equally rigid rule. On ordinary occasions resort might be had to individual offenders; but in this case the work was that of an organized body, headed by the Governor of the State. While he was suffered to discharge the Executive functions, he involved in the consequences of his guilt the entire people of Missouri, and they should bear the burden, or at least the greater portion of it. It may be alleged that the general government, having failed to afford protection, should be held partly liable; but it must first be shown that a requisition for aid was made upon the latter by the State authorities and declined, before the misfortune can be laid to its door.

Under these circumstances, the State government of Missouri *owes* it to her railroad companies that they shall not be harrassed or even held to the letter of their engagements, as they might have been on ordinary occasions. The railroads of that State have been the means of saving millions of dollars to the people of Missouri, by affording timely aid to localities threatened with invasion. St. Louis might better have built the whole North Missouri road than have been besieged for a single week. The locomotive has been the messenger of peace and order in that State. The wealth that has been saved is taxable for all time to come. Let the railroad company be refunded every dollar; but from whatever sources this may be procured, the State of Missouri must remember the vast obligations under which she is placed to her railroads.

Leasing Railroads.

If it were possible to lease each of our railroads to private individuals for a term of years, we doubt not their value as a whole would be greatly improved by the change. The Philadelphia, Wilmington and Baltimore line first become productive by this method; and we have now the satisfaction of seeing the Long Island road placed on the list of dividend-paying interests, by the same agency. Mr. Stearns, formerly of the New Jersey Central, is a gentleman of eminent capacity and every way fitted to discharge the responsibilities which he has assumed. He will doubtless exert every energy to promote settlement along the line, thus developing a local business, upon which the road must depend, and which should be the chief dependence of all railroads leading to our large cities.

There is a too common prejudice against the light soils of Long Island and New Jersey, which are contrasted with the fertile prairies of the West. But everything to its own use. The counties lying contiguous to New York and Brooklyn have no object in competing with the West in raising grain and cattle. What is wanted, and what they are admirably fitted to produce, is *vegetables*, which remote regions cannot furnish us even by railroad. Within five miles of the City Hall nearly a million and a quarter of human beings are cooped up; and with the growth in numbers of this immense hive must be the increased demand for vegetables. Brooklyn of course has the first claim on the Long Island road, and the

number of her inhabitants is now close on three hundred thousand.

Should the leasing of that line prove satisfactory, as we think it will, other companies will follow the example. In the hands of individuals there is always found stricter attention to business on the part of employees, with less wastefulness, than in those of incorporated bodies, as the latter have the same advantages in comparison with a state or national government. To secure the maximum results at a minimum of expense, the management should first repose in the individual, next in the incorporated company, and lastly in the community.

Large Government Orders for Locomotives.

We understand that within a short time several heavy orders for locomotives have been received by the builders in New England and New Jersey for the general government. At the shops in Paterson thirty have been contracted for. The destruction of rolling stock at the South must call for a large number of engines and cars during the ensuing year, and tax the capacity of our existing shops to their utmost capacity. If the general government undertake to foot the bill, all the better for our manufacturing interests.

We learn also, that the locomotives ordered are to be of the 4 feet 8½ inch gauge, not the 5 feet which prevails in Virginia and the Southwest. The object of this alteration of the gauge was to enable the authorities to procure, with the least possible delay, engines and cars from the other roads, there being no time to await the construction of new stock. Mr. McCallum, formerly of the Erie, has charge of these works in Eastern Virginia, and finds it, as we are informed, better to place the rails a little closer together in reconstructing the roads, than to lose weeks or months before he could do anything at operating them. Heavy demands have, consequently, been made upon a number of our Northern lines for temporary supplies; but the orders to build look forward to permanent services.

Cleveland and Toledo Railroad Company.

The following circular of this company addressed to the bondholders, is given in connection with the advertisement of Messrs. VERMILYE & Co., in another column:

To the Bondholders of the Cleveland and Toledo Railroad Comany.

The almost unexpected degree of favor with which our issue of sinking fund mortgage bonds has been received induces us to call the attention of bondholders to the advantages afforded by the arrangement for converting the various issues of bonds into one class, under one comprehensive mortgage.

In 1855 an issue of three and a half millions, in one thousand dollar bonds, payable at the Corn Exchange Bank, New York, bearing interest at 7 per cent., payable semi-annually at the same place, was made under a new mortgage of the entire property of the company, a sinking fund of 1 per cent. being pledged for their redemption in 1855. None of these bonds have been sold, they being designed exclusively for the conversion of the various classes into one class of mortgage bonds. Exchanges are continually going on, and so great is now the demand for a good 7 per cent. first mortgage bond, with about twenty years to run, that these bonds are now selling in market for over 92 cents on the dollar, and few offering at that price, with a fair prospect of their reaching par. Already we have converted about $1,400,000 of the whole issue, and the sinking fund commissioners have in their hands over $175,000 of securities towards the ultimate liquidation of these bonds; and the prospect now is that before any very large proportion of our bonded debt matures we shall have issued those bonds in return for the principal part of our entire bonded debt. These bonds are superior to any class issued, except the T. N. and C. R. R. first and second mortgage, due in 1863, about $800,000 in amount. Being better known, they are more saleable; the security is ahead of all others, with the above exception, in value; there is a registry provided for them, which protects the holder, in case they are stolen from him, even although, as has been the case sometimes, in one known instance at least, the number may be altered by a chemical process to prevent identification. To improve the amount of mortgage security, therefore—to procure a more saleable bond; to get a bond capable of registry, so as to pass only by endorsement of the owner, like a certificate of stock—our bondholders will do well to bring in the old bonds and get sinking fund mortgage bonds for them. The exchange may be effected at the banking house of Vermilye & Co., No. 44 Wall street, New York, or at the company's office in Cleveland, when the old bonds are presented in sums of $1,000. The registry is at Cleveland. Bonds may be sent to Cleveland and returned by express: if by United States express at the expense of the company.

H. C. LUCE, Treasurer of C. & T. R. R. Co.

IRON PAINT.

To the thousand other uses made of "the King of Metals" in this age of iron, is to be added the manufacture of *paint*. The use of that metal as a basis suggests the idea of health, both on the part of the painter and the public. On this account alone it is invaluable for the coating of pipes to be used in conveying water for drinking purposes. This is not, however, the only advantage offered by the use of PRINCE'S METALLIC PAINT, advertised in another column. It has so much more body, and uses so much less oil than other preparations, that though costing more per pound than lead or zinc, it is admitted to be more economical in the end.

The article consists of seventy-two parts of oxide of iron and twenty-eight of cement lime stone, to the hundred. The ore, in this condition, was discovered in Carbon County, Pennsylvania, combined with sulphur. The last named ingredient is expelled by the agency of fire, when the stone turns from a bluish to a red color, feeling greasy to the touch. Much care is requisite in heating the stone properly, as too long continuance in the furnace would convert it into pig iron. After being taken out, it is crushed and ground to a very fine power, when it is ready to be mixed with the oil. For house-roofs, or articles made of iron, this paint is highly recommended, as being able to withstand a greater degree of heat, without scaling, than any other paint. It has been extensively used in railroad depots, repair shops, &c., in and about this city; also on sugar refineries and public buildings in general. Among these we might mention the New York and Brooklyn gas works, the Erie, Harlem and New Haven Railroad depots; in the Croton Aqueduct department; Stewart's new dry goods store, (first coat). Mr. DANIEL SLOAN, 71 Maiden Lane, is the general agent for this city.

☞ The Michigan Southern and Northern Indiana Railroad Company have commenced running through passenger trains between Chicago and Detroit, via Adrian, making direct connection at Detroit with trains on the Canadian roads.

Negotiability of Railroad Bonds.

LOST BONDS OF THE HUNTINGTON AND BROAD TOP RAILROAD COMPANY. A BONA FIDE PURCHASER OF THEM ACQUIRES A GOOD TITLE AGAINST THE FORMER OWNER.

A case has been reported in the District Court of Philadelphia, involving the question as to how far the title in them passes by the act of delivery to a purchaser who takes them without any notice of a defect of title in the party making the transfer, and parts with value for them. At common law no chose in action was assignable, but the demands of commerce finally induced the Parliament of Great Britain to enact a statute in the time of Queen Anne excepting from this rule, bills of exchange foreign and domestic and promissory notes. But as to all other choses in action, the rule remained the same; and the assignee was obliged to sue in the assignors name. This rule has been relaxed as the demands of commerce required greater facilities for the transfers of property, until as it is now settled the legal title passed with the assignment to the assignee. Still the defendant in a suit can set up that the defendant is not a *bona fide* holder for value; and if he establishes this fact, he may then set up any defense which he might have had against the assignor.

In this case, the complainant, one Carpenter, was the owner of certain bonds of the Huntington and Broad Top Mountain Railroad Company, payable to bearer, with coupons for interest attached. They were stolen from the possession of his attorney, and afterwards sold at the board of brokers, and purchased by the defendant, one Rommel at the market rate. The plaintiff now prayed for a decree of the court requiring the defendant to deliver up to him the bonds, so stolen and purchased by the defendant. It was not pretended that the defendant was not a *bona fide* purchaser for value, or that they were not negotiable as against the company; but the question was, whether as against any intermediate owner who may have lost or have been defrauded of them, the *bona fide* holder has a title.

The following is the opinion of the Court, delivered at the decision of the Court, denying the decree prayed for by the plaintiff, and holding the bonds to be negotiable, and that the purchaser had a good title to them against the plaintiff.

SHARSWOOD, P. J.—The bill prays that defendant may be decreed to deliver up the said bonds and coupons to the complainant.

It does not appear to be a question but that as against the company which issued these bonds in this form, they are strictly negotiable. They purport to be an agreement on their part to pay them

to the holder, and their evident design was that they should be negotiable; thus possessing an additional value from that character. They meant them to pass from hand to hand, and are estopped from setting up any equity which they might have against the party to whom they were originally issued. But the cases both in England and in this country go further and hold that not only as against the company originally issuing them, but as against any intermediate owner who may have lost or been defrauded of them, the *bona fide* holder has a perfect title. Thus in the Morris Canal and Banking Co. *vs.* Fisher, it is said that, "even as between third parties, we suppose the common usage to transfer by delivery, without inquiry as to the title of the transferee, would justify us in holding these securities, to differ from common obligations in being so far negotiable that the *bona fide* possessor, shall be held to have good title. And in Delafield *vs.* State of Illinois, it was held that "the bonds are negotiable instruments, the title to which will pass by mere delivery, and though void in the hands of the appellant (the party to whom issued) they will be valid securities in the hands of a *bona fide* holder. Such is the settled law of England; in Gorgier *vs.* Melville, such a bond was there held to be in its nature precisely analogous to a bank note payable to bearer, or to a bill of exchange endorsed in blank. Being an instrument, therefrom, of the same description, it must be subject to the same rule of law that whoever is the holder of it has power to give title to any person honestly acquiring it.

It is supposed that the case of Diamond *vs.* Lawrence Co. establishes a different rule of law in Pennsylvania. But the decision there is placed upon peculiar grounds—that the bonds were those of a municipal corporation, issued under the authority of an act of Assembly, of the terms of which the buyer was bound to take notice, and inquire whether they had been issued in conformity to its provisions.

The seal, it is said, prevents their ever being negotiable. At common law no chose in action was assignable. The commercial law and the Statute of Anne excepted from this, bills of exchange foreign and domestic, and promissory notes. But as to all other choses in action, under seal or not, the assignment was in equity a mere declaration of trust; the legal title was still in the original party, and the suit at law must be in his name. A court of chancery controlled it for the benefit of the assignee or *cestuique trust*, and even courts of law soon came to recognize the latter as the true plaintiff, and to protect his rights. While things were in this position, it followed from established equitable priciples, that the debtor having a legal defence, and equal equity with the assignee, stood on higher and better grounds than the latter. As soon, however, as it is settled that the legal title passes by the assignment to the assignee, then the condition of the parties is changed. The assignee has the law and equal equity with the debtor and ought to prevail. All that the defendant can then do, is to attack the equity of the assignee, and show that he is not a *bona fide* holder for value, and without notice. It may be asked then, why does not the legal assignee of a common money bond, assigned agreeably to the provisions of the act of May 28th, 1715, have the same advantage? The answer is, because the act says he shall not. His right is expressly confined to the recovery of so much "as shall appear to be due at the time of such assignment, in like manner as the person or persons to whom the same was or were made payable, might or could have done. As the act of 1715 included in its terms "notes in writing" as well as bonds and specialities, the Supreme Court decided in McCulloughs *vs.* Houston that the endorsee of a promissory note took it subject to all equitable considerations to which it was subject in the hands of the original payee. This led to some legislation providing that the principle should not apply to notes dated in Philadelphia, and expressed upon their face to be without defalcation, nor to notes discounted by banks, or placed in those institutions for collection. When after having stood unquestioned, though regretted, for forty-nine years, McCullough *vs.* Houston was overruled by the Supreme Court in Bullock *vs.* Wilcox, it was put expressly on the ground that the assignability of promissory notes, did not depend upon the act of 1715. As soon as the endorsee was recognized as the legal assignee or holder, unclogged with the restriction of the statute, it followed that his title was superior to any equities of the debtor, of which he had no notice prior to parting with the value he had given for the note.

When therefore the Supreme Court decided, as they did in Carr *vs.* Le Fevre, that the holder of such bonds as those in question, has the legal title in him, and can sue in his own name without any reference to the act of 1715, and independently of its provisions, they decided a principle which, in its logical results, rules the question now before us. The defendant in this bill has the legal title, and having purchased these bonds *bona fide* for value, without any notice or knowledge that they had been lost or stolen, his equity is equal to that of the complainant. When the equities are equal the law must prevail. Bill dismissed with costs.

The Resources of Canada.

(Continued from p. 368.)

According to the official statement of the Agricultural Bureau of Canada, the average yield of wheat in some townships exceeds 22 bushels per acre; and where an approach to good farming prevails, the yield rises to 30 and often 40 bushels to the acre. On new land, 50 bushels is not very uncommon; and Canadian wheat, grown near the city of Toronto, won a first prize at the Paris Exhibition. The quality of Canadian wheat is so superior, that the American millers buy it for the purpose of mixing it with grain grown in the United States, in order to improve the quality of their flour. The agricultual portion of Canada, which comprises four-fifth of the inhabited portion, and a vast area still in the hands of the Government, and now open for settlement, is unexceptionable; and when deterioration takes place, it is the fault of the farmer, and not of the soil.

The products of the forests in Canada are second only to those of agriculture in importance; and, including the ships built and sold, are nearly equal in value.

Amongst the monarchs of the forest may be found white and red pine, the former of which is frequently met with 100 feet high to the first branch, and will occasionally reach 200 feet in height. The average size of the timber cut for the Quebec market will be in logs of about 20 inches square and 60 feet in length; white oak will cut to about 18 inches square and about 50 feet in length, although sticks of both timbers are occasionally cut considerably larger. Of both these kinds of timber immense quantities are annually sent to England; and large quantities of white oak are split up into staves for the manufacture of puncheons, hogsheads, barrels, &c., for the supply of the English and West Indian markets.

The quantity of the timber exported is as follows:—25,000 to 30,000 tons of elm; 35,000 to 40,000 tons of oak; about 400,000 tons of white pine, and 50,000 or 60,000 tons of red pine; about 1,000 sticks of timber suited for masts; about 3,000 M standard staves, and 5,500 M other staves; 50,000 standard hundred of deals, and 350,000 M feet of planks and boards.

The white ash is valuable for making oars. The prickly or black ash, as it is sometimes called, is an ornamental wood, some of which is very handsome, and used for making furniture. Among the other useful cabinet woods are the butternut, which is highly ornamental; the well-known bird's-eye or curled maple; and the black walnut, which furnshes the most beautiful wood for cabinet work grown on the American continent. This wood is less known and appreciated in Europe than it deserves to be. Much of it is most beautifully veined, and some of it is richer in color and far more handsome in appearance than the finest specimens of rosewood. The wild cherry and the cedar are hard and durable woods for many purposes.

In the process of clearing the wood-lands for settlement, the ashes obtained from burning the trees felled often goes a long way toward enabling the settler to meet the first cost of his land. Thus, in 1859, there were exported from Canada 25,698 barrels of potash, and 12,221 barrels of pearlash of the aggregate value of £221,000. Our direct imports of these wood-ashes from Canada in five years ending with 1860, averaged 115,000 cwts., which may be valued at £180,000.

Many of the indigenous plants of Canada may yet become available in medicine and the arts. Ginseng root, which is considered a sovereign remedy for most diseases by the Chinese, and fetches a high price, was at one time an article of considerable export from Canada, but, owing to neglect in the preparation, the market was lost. The introduction and growth of chicory might be carried on with profit, and would prove highly remunerative. Attention could also be given with advantage to the growth of flax and hemp; and Canada should grow more tobacco, and be less dependent on foreign imports. Agricultural seeds, grass, clover, &c., and Indian corn, are very much neglected.

There are no recent statistics which furnish the number of live stock in Canada. By the census of 1851, it appears there were in the colony—horses 385,377; sheep 1,597,849; horned stock 741,106. These numbers, it is probable, have all nearly doubled since then. The Canadian horses are celebrated for their hardihood and useful paces, and especially as trotters.

Dairy produce must increase with the growth of the country, and embrace no inconsiderable part of the profitable labor of the farmer in Canada. Exclusive of the home consumption, the value of the butter, pork, wool, hides, &c., exported exceeds £300,000 per annum.

The fisheries of both Upper and Lower Canada are valuable, although not developed to anything like their extent. The value of the fish production in 1860 was stated at £300,000.

On a coast line of 100 miles in Lower Canada, the cod, herring, mackarel, salmon, and other fisheries are carried on successfully. There are about 70 salmon-fishing rivers in Lower Canada, which the Government are now fostering, with a view to enhance the commerce in this valuable fish. From the Bay of Chaleur above 10,000 barrels used to exported. Much remains yet to be done in smoking and drying choice fish for the British market.

Passing now to mineral products, we may state that no man has done more than Sir W. E. Logan to develop the subterranean treasures of Canada, which are scarcely yet fully appreciated in proper quarters. The large masses of magnetic and specular iron ore, and of the rare silicate of iron

the blocks of limestone and marble and other minerals and building stones shown at Paris, and those which will be exhibited in London in May, will serve to convey a fair impression of the economic value of the mineral resources of the province. The north-west extending from the Georgian Bay to the western portion of Lake Superior, presenting a range of coast of about 1000 miles, which is washed by the waves of the largest lakes in the world, is rich in copper ores—rich to an extent which cannot be yet estimated, simply because it has not yet been explored. It is in no sense inferior to the American side of the lakes in this respect, so far as slight examinations have proved.

The mineral oil-springs of Western Canada, which now furnish in abundance an important article of commerce, have developed a new source of wealth.

The following statement gives the gross value in dollars of articles of Canadian Produce and Manufactures exported in :—

	1855.	1860.
Produce of the Mines....	$125,835	$558,306
" Fisheries..	459,920	832,646
" Forests ...	7,947,923	11,012,253
Animals and their products	1,595,184	4,221,257
Agricultural products	13,630,400	14,259,225
Manufactures.....	476,077	502,037
Other articles, and Ships built at Quebec.....	1,288,107	1,475,736
Estimated short returned..	3,265,014	2,270,430
	$28,188,460	$34,631,890
	£5,637,692	£6,926,378

The value of the direct exports of British produce and manufactures to Canada now averages £2,250,000 sterling, whilst the computed value of the imports from Canada is over £4,000,000.

Canada made one of the best displays of colonial produce at Paris: 348 exhibitors occupied 3145 superficial feet of space. Improving upon the experience of 1851, when there were 220 exhibitors, and satisfied that the exhibition of its products on that occasion had been of immense value to its commerce, the Colonial Legislature voted a large sum of money. Very great exertions were made by the province to be properly represented at the Paris Exhibition of 1855, and the sum of £12,000 was expended with this view. It was thought by the colonists that this expenditure was not so judiciously made as it might have been, and that there much unnecessary outlay on commissioners and their expenses, prize essays printed, and other payments; and instead of the products being sold to defray some of the incidental expenses, they were handed over to the directors of the Crystal Palace at Sydenham.

In consequence of the exhausted state of the finances of the province, and the feeling prevalent respecting the large outlay incurred at Paris, although a most influential commission was appointed, no grant could be obtained from the Canadian Parliament, in the session of 1861, to enable the commission to procure the necessary articles to forward a complete collection to represent the mineral and industrial resources of Canada at the forthcoming Exhibition. Sir W. E. Logan, the chairman of the commission, however, undertook, upon his own responsibility, to procure a proper collection of specimens of Economic Minerals. The Boards of Agriculture and Manufactures of the two divisions of the province, represented by their presidents, who are members of the Colonial Commission, also agreed to furnish a collection of cereals and other agricultural products and manufactures, and a small grant of £1200 has been obtained from the Canadian Government to pay the incidental expenses; so that the collection will, after all, be creditable, if not so extensive as on the last occasion.

* * * The British provinces of North America, of which Canada is the chief, are steadily advancing in wealth and population. In the last ten years their population has increased by one million and a half of souls, and by the end of the next ten years it is probable they will have an aggregate population of six or eight millions. The communication between the agricultural districts of the west and the seaboard of the Atlantic, direct by railway, will ere long make them commercially independent. The large cities of Halifax and St. John will then rival some of those of the States. The average import trade of Canada in the five years ending with 1859 was £8,807,000, and its export £5,936,000. The territory of which Canada is the centre extends over an area equal to more than one-tenth part of the surface of the globe. Its resources, as our rough glance will have shown, even when every allowance has been made for the sterile and desert districts of the north and west, may be said, without any figure of speech, to be exhaustless.

The agriculture, commerce, and wealth of Canada will compare favorably with that of any other British colony, although unaided by any of the extraordinary advantages which Australia, British Columbia, and some others have enjoyed. To sum up in the words of one of its former governors, Lord Metcalf,—'Long may it be one of the most splendid gems of the British Crown!—long may it flourish, a land of liberty, loyalty, industry, and enterprise, increasing daily in population and wealth—a place of refuge and comfort for a large portion of the superabundant numbers which the genius of Britain sends forth to fertilise and civilise the untenanted regions of the earth!—long may the happy connection of the United Kingdom and this colony in the voluntary bonds of mutual affection, be an unfailing source of benefit and prosperity to both!—and long may Canada rejoice in aiding and upholding the grandeur, might, and integrity of the British empire!'—*The London Exchange, April*, 1862, *No.* 1.

HOWARD & MORSE.

CLEVELAND & TOLEDO RAILROAD BONDS, of all the various issues, including those of the Junction and the Toledo, Norwalk and Cleveland Railroad Companies, may be CONVERTED into the SINKING FUND MORTGAGE BONDS, when presented in sums of $1,000 to VERMILYE & CO., No. 44 Wall st., N. Y., or to the undersigned, at Cleveland, Ohio. The Sinking Fund Mortgage Bonds may be registered in the name of the owner, on application to H. C. LUCE, Treasurer.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, May 8, 1862.

THE ANNUAL MEETING OF THE SHAREholders of the Illinois Central Railroad Company, for the election of Directors and the transaction of any other business, will be held at the office of the Company, in the City of Chicago, on WEDNESDAY, May 28, 1862, at 10½ o'clock A. M. The transfer books will be closed on the 20th of May, and re-opened on the 2d of June.

2t20 W. M. PHILLIPS, Secretary.

THE RECEIVER OF THE CLEVELAND AND PITTSBURG RAILROAD COMPANY gives notice that the assets of the Company are in his hands, subject to the direction of the United States Court for the Northern District of Ohio; that by the order of the Court no portion of the earnings of the road can be applied to the payment of any of the unsecured indebtedness of the Company. All the earnings, after paying operating expenses, rent and mortgage interest, will be applied to the principal of those debts, which are due and secured, amounting at the present time to about a million of dollars.

The accrued interest on the three old mortgages has all been provided for from the earnings of the road, and the next interest to be paid is on the funded debt mortgage bonds (given in exchange for the unsecured indebtedness) on the 1st day of July, 1862. The holders of the River Line Bonds, Income Bonds, Dividend Bonds and Bills Payable, who have not yet accepted the terms of compromise offered them with the approval of the United States Court are notified to exchange their bonds and notes before the 25th day of June, 1862, or they will not be entitled to receive any portion of the earnings of the road. Interest will be paid only to those who accept the compromise.

The new bonds can be obtained in exchange for any unsecured indebtedness at the office of the Company in Cleveland, or at No. 25 William st., New York City, of H. C. KINGSLEY.

1m20 J. N. McCULLOUGH, Receiver.

Prince's Metallic Paint,
AN INDESTRUCTIBLE COATING
FOR
IRON, TIN AND WOOD.

IT consists of seventy-two parts **Oxide of Iron,** and twenty-eight parts **Cement Lime Stone** in the one hundred pounds.

It has much more body than red or white lead. It is warranted perfectly water and fire-proof and to withstand a greater heat on metals, without scaling, than any other paint in use.

It is a perfect cover for all kinds of iron, tin or woodwork, out-houses and canvas coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone as has been proven at the largest foundries in the country.

For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zinc, and much less than the ordinary mineral paints. It is free from any waste, and possesses a **spreading and covering power unequalled.**

TERMS,
By the Barrel or Half Barrel, } **FOUR CENTS per pound.**

A liberal discount made to parties purchasing by the ton.
A Barrel or Ton will be forwarded to any Railroad companies desirous of testing its qualities, for which there will be no charge if it does not give entire satisfaction.

CUMBERLAND COAL.

THE BORDEN MINING COMPANY

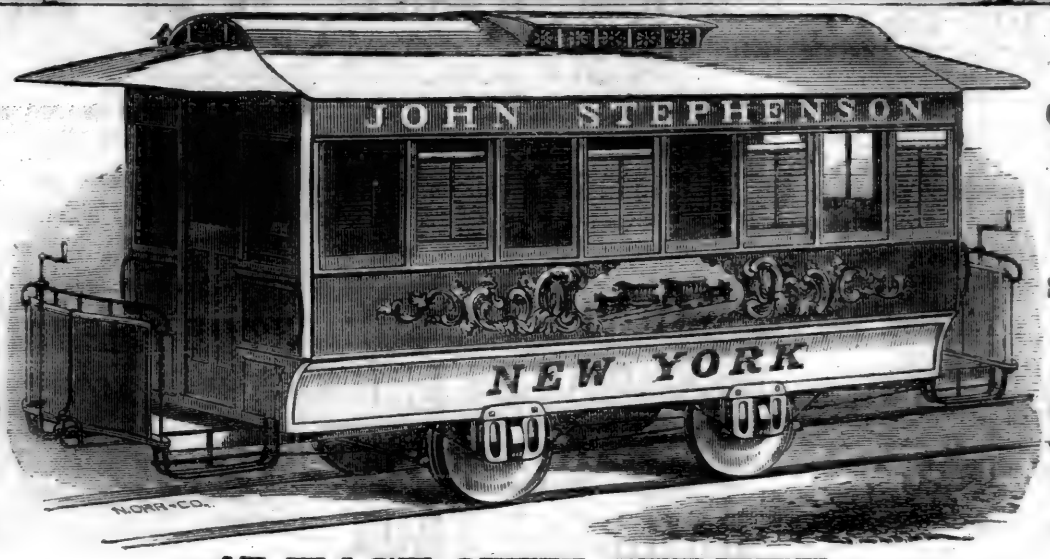
ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL,** DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGES CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to

WILLIAM BORDEN.
3m21 **Nos. 70 and 71 West st., New York.**



LEMUEL W. SERRELL,
SOLICITOR OF
AMERICAN & FOREIGN PATENTS,
No. 121 NASSAU ST.,
NEW YORK.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

CARS FOR TWO HORSES COMBINING ALL Valuable Inventions, **ELEGANT STYLE,** Light & Durable, **Full Size** AND REDUCED WEIGHT

CARS FOR ONE HORSE, WITH or WITHOUT **Platforms,** OR TO Swing on Trucks.

EVERY **STYLE AND** VARIETY OF CONSTRUCTION.

47 EAST 27TH STREET.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

PASCAL IRON WORKS,
ESTABLISHED 1821.
MORRIS, TASKER & CO.,
MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ¼ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas, Water or other purposes; also, fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—strong and durable, designed especially for water purposes.

Cast Iron Gas or Water Pipe—1½ to 24 inches in diameter, and branches for same, etc.

Gas Works Castings, etc., etc.

PHILADELPHIA.

TODD & RAFFERTY,
ENGINEERS AND MACHINISTS,
MANUFACTURERS of STATIONARY and PORTABLE STEAM ENGINES and BOILERS. Also, FLAX, HEMP, TOW, OAKUM and ROPE MACHINERY. MACHINISTS' TOOLS, MILL GEARING, SHAFTING, etc. IRON AND BRASS CASTINGS, and

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.				Sheet No			
1.	General Table for all Bases and all Slopes.			13.	for Base	18 ft.	Slop. 1½ to 1
2.	For Side Hill Cuts and Fills.			14.	"	20	" 1½ to 1
3.	Base	13 ft.	Slopes 1½ to 1	15.	"	24	" ¾ to 1
4.	"	14	" 1½ to 1	16.	"	24	" 1½ to 1
5.	"	15	" ¾ to 1	17.	"	25	" 1½ to 1
6.	"	15	" 1 to 1	18.	"	26	" 1½ to 1
7.	"	15	" 1½ to 1	19.	"	28	" ¾ to 1
8.	"	16	" ¾ to 1	20.	"	30	" 1 to 1
9.	"	16	" 1 to 1	21.	"	30	" 1¼ to 1
10.	"	18	" ¾ to 1	22.	"	30	" 1½ to 1
11.	"	18	" ¾ to 1	23.	"	32	" 1 to 1
12.	"	18	" 1 to 1	24.	"	32	" 1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

New York, Saturday, May 31, 1862.

Business Prospects after the War.

Is there not too common a belief that with the restoration of peace there must be a general prostration of business, such as has not been witnessed for many years? It seems to us there is. We would be slow to maintain that there may not be a good deal of temporary distress in some localities; but to assert that this must be universal and lasting seems to us to be unwarranted. Not only so, but it tends to produce that very state of affairs that the alarmists would so greatly deprecate. Let a dozen persons tell any one that he looks ill, and the chances are that he will take to his bed. In like manner let the community take it into its head that the conditions of another financial relapse exist, and it needs nothing more to induce that abnormal condition. The public will take to its bed, and probably there remain until the diseased imagination has been cured, perhaps by remedies as simple as bread pills.

The notion that after the termination of a severe struggle there must ensue a period of depression in business, is merely an European idea. For proof we are referred to the old French war, followed by the resumption of specie payment by the Bank of England, and the general dead lock in British industry. But it is enough to say that entirely different conditions from those which existed in that country half a century ago, exist here to-day. The United Kingdom was then emerging out of a twenty years' war, almost every State on the continent having been ravaged by it. What England had to sell, the world was too poor to buy, except in very small quantities. There was little resource left but idleness and starvation, the latter assisted materially by a succession of bad harvests.

But the situation of this country will be essentially different. The war is not going to be waged twenty years, or even twenty months. We have an abundant stock of grain on hand from last year, with a good prospect for the present, so that no one anticipates a lack of bread. Assuming that "the staff of life" has been provided for, it is easy to see that every other form of industry will be quickened into almost its usual activity. The North and Northwest can afford to purchase freely the products of the factories both of this country and Europe. In these sections the people have gone on short allowance for nearly two years, and in fact, ever since the reverse of 1857. With peace restored, the necessity for so much self-denial will gradually relax its hold on the mind. The channels of trade have been well cleared out; and with the return of a tolerable demand there will be a general rush upon the importer and the manufacturer, increasing the call for and the remuneration of labor of every kind.

The view here taken is confined altogether to this section of the country; but there can be no doubt that a very large demand will shortly make itself felt from the South. Merchandise of every description has for some time been at extravagant prices. The West must send a supply of grain and pork to feed the people of the Gulf States; the Northeast must supply manufactures of iron, wood, cotton, wool, flax, &c., of which that market has been depleted. Whatever may be alleged about individual poverty, the fact remains that probably 3,000,000 bales of cotton await shipment, worth twenty-five per cent. more than the usual prices. There has doubtless also been considerable hoarding of the precious metals going on among the people, which will gradually return to the channels of circulation. As to the proposed destruction of the cotton and tobacco crops, we think the worst has passed; at any rate, we have not been hearing much of it lately, and probably the first accounts received were largely exaggerated.

There must, therefore, be a pressing demand for the products of our stores, our mills and shops; while the means of payment at the South will be considerable, and at the North immense. With these two elements at the outset, only a third is required—*money*. It is unnecessary to add that we have this in abundance, of the precious metals as well as government paper. Though our shipments to Europe have been increasing for some time, we have not sent back by any means the amount which we received from it last year, so that the country finds itself with a much larger stock on hand than when the troubles commenced.

If we have demands for the products of our industry, with the means of meeting those demands and money to carry on commercial intercourse, what more is necessary, except *confidence* in one another?

It is not true that a state of hostilities is always followed by stagnation in business. The Crimean war was not either in France or Great Britain, but the very reverse. Supposing, however, that it had been, this country, with its vast extent, resources, and industrial activity, cannot be considered as bound by foreign precedents? If the history of this war proves one thing more than another, it proves the great danger of our being bound by European rules and examples. Had not our government departed from them, its securities might now be offered at twelve per cent. interest, without finding a purchaser. It is henceforth the destiny of the United States to establish precedents for other countries rather than slavishly follow those provided abroad ready for our use. We cannot admit the force of the logic were it ever so strictly founded on fact, that because the close of war brings a financial revulsion in England, France or Russia, therefore it must do so in this country. The fact is, we had our crisis during the winter of 1860–1. The storm which then visited these States carried off the decayed wood, and with it all well-guarded mistrust of each other's solvency. There has been no unhealthy expansion, no general extravagance, no wild speculation indulged in during the last eighteen months, to generate *the causes* of another revulsion. In-

dividual sufferings may and will exist in particular localities; but we incline to think that the community is now disposed rather to over-estimate their extent and intensity, than the contrary.

Telegraph Lines.

Efforts are being made to extend the line of the American Telegraph Company from Eagle Bridge to Rutland, Vt., over the Rutland and Washington R. R., with offices at Cambridge, Shushan, salem, Poultney, &c.

Mr. Preece, the engineer to the Electric International Telegraph Company, states that in 1845 there were only 500 miles of telegraph in the United Kingdom; in 1850 there were 1,800 miles, in 1855 there were 3,400 miles, and at the present time there are 60,000 miles. In America there 40,000 miles. On the European continent there are 30,000 miles. In India, canada, and Australia there are 15,000 miles.

Pittsburg, Fort Wayne and Chicago R. R.

The gross earnings of this road during the fiscal year ending December 31, 1861, were:

From through freights		$1,484,273 48
" local "		421,433 87
" through passengers		419,376 98
" local "		483,329 48
" express matter		53,482 82
" mails		93,900 00
" rent of railroad		84,939 44
" rents of other property		4,843 98
" miscellaneous sources		6,207 46
		$3,031,787 51

And the expenses were:

Conducting transportation	$500,981 14	
Motive power	598,226 06	
Maintenance of way	435,824 53	
" cars	146,858 40	
General expenses	50,176 33	
		1,732,066 46
Net earnings (nearly 43 per cent.)		$1,299,721 07

Disbursed as follows:

One year's interest on bonds		$648,490 00
" " floating debt		80,654 00
Taxes		53,813 26
Discount on currency		18,102 46
Overcharges refunded		21,810 46
Claims incurred prior to receivership, adjusted since	$10,812 26	
Less sundry credits	1,273 15	
		9,539 11
Expenses of receivership, reorganization, and trusteeship		36,729 45
Losses of previous years to December 31, 1860		309,913 16
Surplus to carry forward		120,669 15
		$1,299,721 05
Compared with the previous year the gross earnings show an increase of		$696,433 68
With an increase in expenses of		158,267 59
Making the increase in net earnings		$538,166 09

Comparing the different classes of earnings with those of 1860, we find that the revenue from through freights has increased $638,950 53, or 75.5 per cent.; from local passengers $47,889 76, or 11 per cent.; from through passengers, $49,336 66, or 13 per cent.; from express matter, $2,182 82, or 7 per cent.; from rent of railway, $1,130 11, or 1.35 per cent.; and from miscellaneous, $2,440 57, or 64.80 per cent—while a decrease is shown of $42,957 97, or 9.3 per cent. in the earnings from local freights; and $2,532 80, or 34.3 per cent., in rents of property. The net increase in the earnings over those of the previous year being about 29.9 per cent.

The increase in the expenses were: for conducting transportation, $168,472 47, or 50.67 per cent.; for motive power, $68,877 01, or 12.17 per cent.; for general expenses, $3,534 75, or 7.58 per cent. —while a decrease is shown of $74,754 81, or 14.64 per cent., for maintenance of way; and $3,861 83, or 2.56 per cent., for maintenance of cars. The net increase in expenses are about 10.5 per cent.

The gross earnings per mile of railway were $6,492 05; and the expenses $3,708 92. The gross earnings per mile run by engines $1.38·8; and the expenses $0.75·8. The gross earnings per mile run by cars $0.13·4; and the expenses $0.07·6. The per centage of earnings absorbed by expenses was 57.2.

The increase in expenses of conducting transportation is more than equivalent to the increase in the earnings, but as the expenses connected with the transfer of through freight in Pittsburg, in 1860 deducted from earnings, were in 1861 charged to expenses, the ratio of this class of expenses may thereby be reduced; yet with this deduction, the expenses for conducting transportation per mile run by engine and per mile run by cars, exceeds that of the previous year.

The increase in the expenses of motive power is much below the increased mileage of trains. The number of miles run in 1860 was 1,984,501, and in 1861, 2,434,641, being an increase in 1861 of 486,140 miles, or about 20 per cent. The increase in the expenses of motive was only 12.17 per cent.

General expenses shows an increase of $3,534 75. This occurred in the legal department of the company's service. The increased expense in this department was $5,971 32, and the difference between this sum and the net increase of general expenses is accounted for by a reduction of expenses in the general offices.

The reduction of expenses of maintenance of way has occurred entirely on the eastern division, by reason of the heavy renewals of iron rails, cross ties, etc., in 1860. The decrease in this department in 1860, on the Eastern division was $110,962 58, the increase having been $36,207 77 on the Western division.

A much larger reduction in the expenses of maintenance of cars has occurred than is apparent by the foregoing statement. The total mileage of cars in 1861 was 22,646,634 miles, and in 1860, 17,024,279 miles, showing an increase in 1861 of 5,622,355 miles, or about 25 per cent. The cost of maintenance of cars per mile run in 1861 was 6½ mills, and 1860 a fraction less than 9 mills, being a decrease of nearly 2½ mills, equal on the whole mileage to a reduction in this class of expenses of $53,637 96, or 35½ per cent.

There were transported over the road during the year, 526,379 tons of freight, of which 164,755 were local, and 361,624 tons through freight. The eastward movement was, of local freight, 88,445 tons, and of through freight, 237,458 tons. The movement westward was, of local freight, 76,310 tons, and of through freight 124,166 tons. These figures show a preponderance of 149,013 tons, or 168½ per cent., in the through business eastward, and in the westward, 47,856 tons, or 62.7 per cent.; in the aggregate, 196,849 tons or 119½ per cent. Compared with the year 1860, the local tonnage exhibits a decrease of 50,130 tons, of which 30,761 tons were in the eastward, and 19,268 tons in the westward business. In through freight, an increase of 111,305 tons is shown, and of this increase, 106,604 were carried eastward, and 4,701 tons westward. The reduction in the amount of local tonnage is 23.3 per cent., with a reduction in the revenue of only 9.2 per cent. The average number of miles that each ton was transported being about the same in both years, this comparatively small decrease in revenue can only be accounted for by the company having obtained higher rates in 1861 than in the previous year. This addition to the rates amounted, on an average, to three mills per ton per mile, and on the entire mileage to $63,413 56. Had the rates remained as low as in 1860, a reduction of $106,371 53 would have taken place in the revenue from local tonnage.

It is in the through tonnage that the large increase of freight earnings has occurred. The number of tons carried show an increase of 44½ per cent., originating almost wholly from the eastward business. An increase of 77.1 per cent. is exhibited in the number of tons carried one mile, adding 21.2 per cent. to the average miles one ton was hauled. This, with the addition of one mill per ton per mile to the rates, has produced the large increase in the revenue from this class of freights.

The most profitable business was done in the westward movement; and it is a noticeable fact that, although the tonnage in this direction increased only about 4 per cent., the revenue was augmented nearly 27 per cent. This is partly owing to the increased length of the average haul, but chiefly to the addition of 5 mills to the rate per ton per mile, over that obtained the previous year. Had the same average rate been obtained upon the eastward as on the westward business, the freight earnings would have been still further increased by the amount of $342,301 81. The average rate obtained on the westward business was 2 cents per ton per mile, and on the eastward 1½ cents. The latter shows a very slight increase of less than one mill per ton per mile.

The total number of passengers of all classes, including U. S. troops, transported was 541,251, of which 457,050 were local, and 84,201 through, exhibiting an increase of 92,448 in the former, and 12,139 in the latter. Of the local passengers, 271,266 were carried in first class, 689 in second class, and 185,094 in accommodation trains. Of the through passengers, 73,696 were carried in first class, 5,225 in second class, and 5,281 in emigrant trains. The rate obtained for local first class passengers was 2.9 cents per mile; the reduction from the regular fare having been caused by the company being obliged to carry troops in first class cars at 2 cents per mile. The rate for second class local passengers was 2.2 cents per mile. For first class through travel, an average rate of 2.4 cents per mile was obtained; for second class, 1.6 cents, and for emigrants, 1.4 cents.

The movement of local passengers was 223,033 eastward, and 234,017 westward; and of through travel, 45,576 eastward, and 38,635 westward. The increase in the eastward through travel was 6,418; and in the westward, 5,722. The rate for eastward through passengers was 2.8 cents per mile; and on those going westward but 2.2 cents.

The financial condition of the company at the close of the fiscal year, December 31, 1861, was as follows:

Capital stock		$6,249,432 81
Funded debt, (10,264,995,) viz:		
1st mortgage bonds O. & P. R. R. Co.	1,000,000 00

Balance to debit of income account Dec. 31, 1860	309,913 16	
		402,082 27
Net increase of property and assets		$781,296 35

The corresponding increase of the capital of the company will be exhibited by the following:

Mortgage construction bonds issued in settlement of floating debt		$364,000 00
Chicago depot bonds issued		3,340 00
Increase of certificates convertible into bonds at par		124,787 88
Increase of floating debt		120,166 30
Increase of unpaid liabilities		78,267 33
Balance to credit of income account		120,669 15
		$811,230 66
Less decrease of capital stock	$16,934 31	
Bridge bonds retired by sinking fund	9,000 00	
Real estate bonds convertible into lands	4,000 00	
		29,934 31
Net increase of capital		$781,296 37

Of the expenditure during the year for construction and equipment, $216,813 96 were charged to the Eastern division for account of ballast, bridge masonry, bridge superstructure, cross-ties, graduation, iron chairs and splices, iron rails, railway superstructure, and spikes and bolts for track used mainly in the construction of a second track from Allegheny to Sewickley, a distance of 12 miles, and the improvement of the cut near Wooster Summit. The amount charged to machine shops was for additions to the shops at Allegheny, and branch at Crestline. Additions have also been made to the engines and cars on this division.

The expenditure of $289,060 82, on the Western division was, mainly, for the completion of the connections with other lines at Chicago; the graduation of three street approaches in that city; the building of an engine house, freight depot, and graduation of the dock front on the south branch of Chicago river, all in that city; the building of a new freight station; additions to the machine shops and machinery; the building of new bridges at Bucyrus and Upper Sandusky; the purchase of land at Dunkirk for station purposes, and additions to the equipment of engines and cars.

An apparent decrease of $59,692 is shown in the amount of stocks and bonds of other companies. There has in fact been an addition to these securities—the company having received 296 shares in the stock of the Dubuque and Sioux City Railroad Company, at 60 per cent., in payment for the transportation of iron for that road. The property of the Springfield, Mt. Vernon and Pittsburg Railroad Company having been vested in the Cleveland, Columbus and Cincinnati Railroad Company by a judicial sale, the value of the shares has been extinguished, and the amount paid by this company, $77,500 on their subscription of $100,000 has been embraced in the item of "sundry accounts receivable, bad and doubtful." The addition to the latter of $62,497 97 is thus explained; with this exception, these accounts have been reduced.

It will be observed that the balance of $309,913 16 appearing to the debit of income account Dec. 31, 1860, has been completely absorbed by the profits of the business the past year, leaving a balance to credit of that account Dec. 31, 1861, of $120,669 15.

There have been issued in the liquidation of the floating debt $364,000 of the mortgage construction bonds, at prices, with one exception, favorable to the company. These bonds were all held as collateral security for the payment of a portion of the floating debt, and were taken by the parties in full settlement thereof, with the exception before noted. Of the real estate bonds, there have been issued $6,000, in payment of unsecured claims, which with the redemption of $10,000 by the trustees, by the exchange of lands therefor, show a reduction of $4,000. There have also been issued $3,340 of the bonds created for the purchase of the Chicago depot property.

A large portion of the floating debt has been settled since the last summer, by the issue of certificates of the Purchasing Committee to the amount of $124,787 88, entitling the holders to convert them at par into the third mortgage bonds of the re-organized company. These certificates were issued for the principal and interest of all construction claims, and for three-fourths of the principal and interest of all claims incurred prior to the suspension of the company for transportation purposes, the remaining one-fourth of the latter having been paid in cash. This arrangement, while not absorbing an undue amount of revenue, has been generally satisfactory to the holders of unsecured claims, especially since it has been made apparent to them that the interest on the third mortgage bonds will be paid in a short time, and in this wise imparting a marketable value to the bonds.

There has been retired during the year $486,368 70 of the floating debt by the issue of bonds, certificates, and small payments in cash.

By the addition of the unpaid interest on the bonds, maturing during the year, amounting to $606,535, provision for the payment of which is made by its conversion into the bonds of the re-organized company, the floating debt which stood $1,727,161 52, Dec. 31, 1860, has been increased at the close of the past year to $1,847,327 82—being a net increase of $120,166 30. Practically, however, it has been reduced by the before mentioned payments, and the provision for the redemption of the matured coupons, to $328,115 32. This amount is about 5 per cent. of the capital stock. The cash in hand and cash assets were more than sufficient to extinguish this debt, part

of which is not matured, together with the remaining current liabilities. By the terms of the agreement, under which the re-organization has been effected, the greater portion of this debt is to be funded into the second and third mortgage bonds of the new company. Since the 1st of January a large amount of it has been so redeemed.

The increase in the current liabilities of the company is entirely due to the extended business of the company, and the unsettled accounts with the government. The accounts payable to other companies, etc., show alone an increase of $50,027 69.

Important Railway Suit.

A VERDICT INVOLVING $1,000,000.

In the Kingston (C. W.) papers we find a synopsis of one of the most important suits ever tried on this continent. It began in that place on the 12th instant, Mr. Justice Burns presiding. The action was brought by the Commercial Bank of Canada against the Great Western Railway Company, to recover loans granted to the latter amounting in the aggregate to $942,000, with interest for between three and four years.

It appears that the Detroit and Milwaukee road, having got into difficulty in 1857, the managers of the Great Western of Canada undertook to advance money sufficient to complete and equip the former, in order to control its business. Application was made to the English stockholders, who voted, on two separate occasions, £150,000 and £100,000 for this purpose, to be expended by Messrs. Brydges and Reynolds as their trustees. These gentlemen were officers in both roads at the date when the dispute began. The former was managing Director and the latter financial Director of the Great Western, while they were respectively President and Vice-President of the Detroit and Milwaukee line. The point involved is whether financial negotiations with the bank concerned them in one or other capacity, or in neither.

In December, 1857, Mr. Reynolds had an interview in Toronto with Mr. Ross, the manager of the Commercial Bank at Kingston, and Mr. Parke, its cashier at Hamilton. He proposed to open an account on behalf of the Detroit and Milwaukee Company for £150,000, payable in twelve months; but to this Mr. Ross objected on the ground of their financial condition. The latter offered to extend the requisite credit, by opening an account as "Great Western No. 2;" but to this Mr. Reynolds objected. Finally, it was arranged that this should take the form of "Great Western, Detroit and Milwaukee," by which name sums were drawn amounting to $742,270 92 up to the Spring of 1859. Subsequently $200,000 was advanced on mixed accounts to the Great Western on the Detroit and Milwaukee, when the bank managers received an intimation that it would not be safe to extend any further.

The agreement, however, had been only a verbal one at the outset; and so it remained until the first £150,000 voted had been overdrawn. Suspicion being entertained, application was made to Messrs. Brydges and Reynolds for a written assurance as to liability. The reply was to the effect that the Great Western would cover all overdrafts on the Detroit and Milwaukee account. On this assurance the additional aid was granted. The evidence shows that in the bank correspondence with Mr. Reynolds he was most frequently addressed as an officer of the Detroit and Milwaukee line, but this was at his own request, the alleged object being to keep the accounts from getting mixed.

Subsequently application was made to the Great Western Company for payment of the money; but the demand was denied on the ground that the money had been advanced to the Detroit and Milwaukee, which was then in a position of financial difficulty. Mr. Reynolds testified that the authority to draw from the Bank was made upon that of the D. & M. R. R., and that as a Great Western official he had no power to make such an engagement. The latter company have a seal which it requires two persons to obtain; this was never used in the transactions. The testimony of Mr. Brydges was equally to the effect that the loans obtained were on account of the Detroit and Milwaukee exclusively, with which the Great Western had properly nothing to do, the two accounts being kept entirely separate. The letter referred to above was only intended to apply to the balance of the loan.

VERDICT.

The Jury gave the following answers to questions put by his Lordship.

The account was given to the Great Western Company.

Messrs. Brydges and Reynolds had the authority to open the account.

The Bank had no notice that Messrs. Brydges and Reynolds had no authority to make the overdrafts.

There was no limitation, and the account was conducted in the same manner after the letter of guarantee was given as before.

The Great Western received the benefit of the loans and drafts.

His Lordship said this was a verdict for the plaintiffs.

The case has been appealed to the higher Courts of the Province.

Delaware and Raritan Canal and Camden and Amboy Railroad and Transp. Co.

In compliance with an act of the Legislature of the State of New Jersey, approved the 24th day of February, 1852, the Delaware and Raritan Canal, and Camden and Amboy Railroad and Transportation Companies make the following report:

The capital stock paid in of the Del. and Raritan Canal	$1,500,000 00	
To which has been added by authority of Legislature	798,400 00	
		$2,298,400 00
The capital stock paid in of the Camden and Amboy Railroad and Transportation Co.	$1,500,000 00	
To which has been added by authority	1,210,800 00	
		$2,710,800 00

The funded debts of the above companies are:

A loan at	6	per cent. interest	$	800,000
"	5	" "	£	210,000
"	6	" "	£	225,000
"	6	" "	$	867,000
"	6	" "	$	800,000
"	6	" "	$	1,700,000

Also a loan of $2,500,000, authorized by the stockholders, for straightening and doubling the track of branch railroad, and for subscriptions and advances to associated companies. Of this loan only $867,000 has been issued.

In addition to the above, there has been issued a loan for £185,000 sterling for the stock of the Philadelphia and Trenton Railroad Company, since converted into funds, at four dollars and eighty cents per pound sterling, bearing an interest of five per cent. per annum.

Also a loan of $1,175,000, bearing an interest of six per cent. per annum, for subscription to the Belvidere Delaware Railroad and branches, and Freehold and Jamesburg Agricultural Railroad Companies.

Also a premium loan of £48,333 6s. 8d., for the extension to the year 1880, of the sterling loan of £210,000 and £225,000 for the redemption of which loans, before the expiration of the year 1880, a sinking fund has been provided.

And the companies are under obligations to pay certain small annuities to persons who have been injured on the railroad.

The cost of the Delaware and Raritan Canal and appurtenances	$3,955,302 55	
The cost of the Camden and Amboy Railroad and equipments	5,918,658 15	
The receipts of the Delaware and Raritan Canal for twelve months ending the 31st of December, 1861	469,895 73	
Expenses of the Delaware and Raritan Canal for the same period	157,509 53	
Leaving net		$312,387 20
The receipts of the Camden and Amboy Railroad and Transportation Company for twelve months ending the 31st of December, 1861	$2,058,989 65	
Expenses of the Camden and Amboy Railroad and Transp. Co. for the same period	1,145,159 85	
Leaving net		$913,829 80

Dividends have been paid in cash during the year 1861 of eleven per cent. on the capital stock of the joint companies.

There has been invested during the past year on account of the sinking fund, the sum of	$107,213 12	
Which, added to the former sum of	112,367 19	
Makes		$219,580 31

Warren Railroad Company.

Subjoined is the annual report of the Warren Railroad Company for 1861, showing the operations of the road for that year, and the condition of the company at date January 1, 1862:

Capital stock issued and actually paid in	$1,270,000 00	
First mortg. bonds, due 1875, sold	600,000 00	
Other indebtedness on the books	712 92	
		$1,870,712 92

Which is the total cost thus far of the Warren Railroad, including lands for right of way, depot buildings, temporary track and expenditures on the Van Ness Gap Tunnel up to the above date.

The earnings of the road from 1st of January to 31st December, 1861, were:

Freight on coal	$163,167 01
" merchandise	43,794 29
Express business	1,531 27
Passenger fares	10,842 61
Transportation and mails	1,371 96
Telegraph earnings	119 98
	$220,827 12
The running expenses of the road, including depot agents, telegraph, extra repairs, trestle work, etc., estimated at 52 per cent.	114,830 10
Net earnings of the road	$105,997 02

INTEREST PAID ON $600,000.

First mortgage bonds	$42,000 00	
Amount applicable to paying a dividend on the capital stock of $1,270,000 of the 5 per cent.	63,500 00	
		105,500 00
Balance applicable to debts		$497 02

No injury has occurred to any person on the trains during the year.

During the past year the Company have expended on the Van Ness Gap Tunnel about $130,000, having been engaged most of the time in working upon six faces simultaneously with night and day forces, assisted by two powerful steam engines. They now take pleasure in announcing that on the 7th January inst., at 11.30 o'clock A. M., the heading was completed, and an opening effected, enabling a person, for the first time, to pass through the entire length of this great work, and that they are encouraged to hope that the whole will be completed and the new line occupied by the regular trains on or before the 1st of May next. This tunnel was commenced in 1854, since which time, or during a period of about eight years, the work has been prosecuted with untiring industry. It is constructed for a double track, and is three thousand feet in length. The rock is of the hardest kind, so that at different points it has been impossible with a night and day force to progress more than twelve or fifteen feet on one face during the month. The tunnel, when completed, will reduce the present length of the road about three miles, will lessen the current expenses, and dispense with the relieving engines now used for assisting heavy trains over the high grades.

The Warren Railroad commences at a point on the west or Pennsylvania bank of the Delaware river, about five miles below the Delaware Water Gap, at the eastern terminus of the Delaware, Lackawanna and Western Railroad, and running from that point in nearly an easterly direction across the county of Warren, connects with the Central Railroad of New Jersey at New Hampton summit, a distance of eighteen and a half miles. When completed it will cost nearly two millions of dollars, which is over one hundred thousand dollars to the mile, making it one of the most, if not the most, expensive road, in proportion to its length, in the country.

The mountains of Warren, as well as her streams and valleys, run north and south, while the road runs east and west, thereby making it necessary, in order to bring the grade to twenty-one feet to the mile, in conformity to those of the New Jersey Central and the Delaware, Lackawanna and Western Railroads, its eastern and western connections, to construct two tunnels, one 1,000 feet long, three miles east of the Delaware and at Van Ness Gap 3,000 feet in length, through Oxford mountain, nine miles east of the Delaware; in all over three-fourths of a mile of tunnelling; to bridge the Delaware river, as well as to bridge every stream, and fill every valley and ravine from the Delaware to New Hampton. This road must ever be a link in a trunk line between the east and the west, while its connection with the Delaware, Lackawanna and Western Railroad, and the coal fields of Pennsylvania, will place it among the heaviest tonnage roads of the country. The mountainous regions of Northern New Jersey are such that no east and west line of road of equally low grade can be constructed between this and the New York State line.

Finally, the Company look anxiously forward to the time which must speedily follow its completion, when fair dividends will be earned for the stockholders, and a revenue accrue to the State.

Freight Tolls on the New York Railroads.

THE ACT, PASSED JULY 10TH, 1851, DECLARED CONSTITUTIONAL. THE RAILROAD TOLLS NO PART OF THE REVENUES OF THE STATE CANAL, NOR OF THE CANAL ITSELF. THEREFORE THE RAILROADS ARE LEGALLY RELEASED FROM THE PAYMENT OF TOLLS.

An action was brought by the Attorney General, in behalf of the people, against the New York Central Railroad Company, to recover the tolls upon the freight transported by the defendant upon its railroad, since December 1, 1851. By the terms of an act passed by the Legislature of the State of New York, July 10th, 1851, it was enacted that it should not be necessary for any railroad company in the State to pay any sums of money into the treasury transported on its road; this act was entitled "An act to abolish tolls on railroads." The defendant claimed to be exempt from the payment of the tolls in question, by virtue of this act.

The defendants were incorporated by an act consolidating several existing roads passed in 1853. The right to carry freight from Buffalo to Albany, or over all the separate railroads then composing the continuous line of railway from the lakes to the Hudson River, was conferred by an act passed May 7, 1844. Some of these companies were indeed previous to that time authorized to carry freight, but others were not: and therefore no freight could before that time have been carried by railroad from Lake Erie to tide-water, so as to compete with the canals of the State. The right to carry freight upon these railroads in competition with the canals was therefore in effect conferred by the act of May 7th, 1844, and by that act the railroad companies were required to pay to the State toll on all the freight thus transported. These tolls were fixed by the statute at the same rates as the tolls upon the freight carried on the canals; and were directed to be paid to the commissioners of the canal fund. This act was in force, and these tolls were thus required and received, in the year 1846, when the present constitution was framed and adopted, and on the 1st of January, 1847, when it went into effect. It may be observed, however, that it was not until May 12th, 1847, that a distinct appropriation of these railroad tolls was made to the canal fund, or that they were expressly declared to belong to that fund, and directed to be applied in the same manner as the canal tolls. The act releasing the then existing railroads, and consequently the defendant, from the payment of these tolls, was passed as already stated July 10, 1851, and went into operation December 1, 1851.

The plaintiff contended that the act releasing the railroads from the payment of the tolls was unconstitutional, and therefore inoperative and void; because first, section 1, 2 and 3 of the seventh article of the constitution pledges and appropriates all the "revenues of the State canals" to the payment of the interest and redemption of the principal of the debts of the State, and for the use and benefit of the general fund, and for the completion of the Erie Canal enlargement, and the Genesee Valley and Black River canals, until the said canals shall be completed; that the tolls imposed upon the freight carried by the railroads were a part of the "revenues of the State canal," and therefore the Legislature had no power to divert them from the object, for which they were reserved and appropriated by the Constitution, and second, because by section 6, article 7, of the Constitution the Legislature are prohibited from selling, leasing or otherwise disposing of any of the canals of the State, but they are to remain the property of the State, and under its management forever; and the revenue derived from said tolls being a part of the canal, the act came in conflict with this provision of the Constitution, and was therefore void.

The case came on for trial at the Orange County Circuit Court held in January, 1861. After hearing the evidence on both sides, a motion was made by the defendant's counsel to dismiss the complaint, or non-suit the plaintiffs, on several grounds, which motion was granted by the court. It was then ordered that the exceptions taken by the plaintiff's counsel should be heard in the first instance, at the general term.

The following is a portion of the opinion delivered by the court in deciding the case; the court holding the act relieving the railroads from the obligation of paying the tolls to be constitutional.

EMOTT, J.—The magnitude of the interests and the importance of the principles involved in this cause, forbid our giving a formal or even a silent judgment. At the same time, the announcement that the parties will litigate the question to the last tribunal of appeal renders it unnecessary, and in our opinion inexpedient, that we should do more than briefly to indicate the grounds on which our judgment rests.

The action is brought to recover from the defendant tolls upon freight which has been transported over its road since December 1, 1851. Previous to that day the railroad companies to which the defendant succeeded, paid into the treasury of the State tolls at rates fixed by law, upon all the freight which it carried. Since that day no such tolls have been received from the large quantities of merchandise, which have passed over these avenues of trade. The amount of the claim now made for these taxes or tolls is obviously very large: it is put by the plaintiffs at $5,000,000.

The argument for the plaintiffs may be summoned up thus; the act releasing the railroad companies, afterwards consolidated into the defendant's from the payment of tolls, is constitutional: because, 1st, the constitution pledges to certain purposes all the revenues of the State canals; these railroad tolls were a part of the revenues of the canals, and to release them or discharge the railroads from the obligation to pay them, was a violation of this pledge; 2d, because the constitution forbid the sale or disposal of the canals of the State; the railroad tolls were a part of the "canals of the State," and the release to them, or of the liability to pay them, was a disposal of a part of the canals.

With respect to the latter argument, it is sufficient to say that we perceive no reason or rule of construction which would authorize or require us to hold that the tolls payable by railroads to the Commissioners of the canal fund, constituted a part of the canals. If they are a part of the revenues of the canals, which is the fundimental proposition upon which the main argument for the plaintiffs rests, they are not a part of the canals. The revenues of a person, natural or artificial, are not the person, nor in any proper use of language, a part of the person. It is not as one appellation including all which the canals may earn or produce, as well as what they are, that the word "canals" is used in the constitution. The phrase must be understood in its ordinary sense, meaning the material structures. Their ownership and possession will involve of course the right to their use, and any profit or income to be dorived from such use. But these would pass with or belong to the canals from the necessity of the thing, because they are consequent upon their possession, and not because the revenue thus to be earned is a part of the canals themselves. * * * *

The principal argument of the Attorney General was made upon the other branch of the case. His

reasoning rests upon two propositions: 1st, That the tolls required in 1846 by the then existing statutes to be paid to the Commissioners of the canal fund, upon all property transported by these railroads, were a part of the "revenues of the State canals," mentioned in section 1, 2 and 3 of the 7th article of the constitution. 2d, That releasing or relinquishing these tolls, and allowing the railroads to transport property without paying them, violated the provisions of these sections, which pledged or appropriated certain amounts of these revenues, first for a sinking fund to pay the interest and redeem the principal of the canal debt; next for a like sinking fund to pay the general fund debt, and then to defray the expenses of the State, and to complete the canals.

The first of these propositions presents a question of the meaning of words, or of the sense in which a particular phrase is used in the constitution of the State. The plain and natural import of the phrase "revenues of the canals," construed without reference to any extrinsic facts, would certainly be the revenues earned by or upon the canals. If it could be construed to mean anything else, taken in connection with the fact that the canal fund, that is, the fund established for the support of the canals, is replenished from other sources of income, yet this is clearly its primary meaning.

Looking at the meaning of the phrase more narrowly, however, and looking at the instrument in which it occurs, we think that in this article of the constitution the words "revenues of the canals," wherever they occur, mean only the tolls received for the use of the canal for transportation, and the rents received for the use of their surplus water. Revenue is the yearly income of a government, or a person natural or artificial, from the property belonging to such government or person. Thus we speak of the revenues of the State of New York, of the New York Central Railroad Company, and the like; and we may also speak of the revenue of any individual, although the word is not so often applied to individuals * * *

The canals themselves yield an income from their use, and that is their revenue, although the canal fund may have other sources of supply. But these sources of income or supply and among them railroad tolls, when these are appropriated to the canal fund, do not become a part of the canals, nor are they the property of the canals; and therefore the revenue thence derived in any year is not a part of the revenues of the canals, even if it might in a qualified sense be spoken of as part of the revenues of the canal fund. If it were otherwise, and the next proposition of the attorney general were correct, that these supples of income are sacredly and perpetually pledged and protected, not only against the obstruction or the diversion of their proceeds, but against their diminution, any tax or toll which may be levied at any time by the legislature for the benefit of the canal fund would become at once irrepealable and altogether beyond legislative control. * * * *

We do not find in the facts and documents adduced to explain the meaning which has been given to this phrase, enough to shake our conclusion that the phrase "revenues of the canals" does not include the tolls levied upon railroads for the transportation of freight under the statutes existing January 1st, 1847, and by the act of May 12th in that year, expressly appropriated to the canal fund. * * *

Judgment for the defendant.

Erie, and Atlantic and Great Western Railroads.

The Erie Railway is fast assuming, if it does not already occupy, the front rank among American railroads. Everything is in keeping with its character as the great Continental line. It is not only based upon the harbor of New York, but it strikes this at three different points—Jersey City, Piermont and Newburg—like a great river that requires several outlets for its accumulated waters. The vast volume of freight delivered at tide-water is received and distributed at the lowest possible cost, by means and facilities so ample, that there are never any accumulations to obstruct the regular business of the road. The main depot at its Eastern terminus is at Jersey City, opposite New York, the best point, probably, in the whole harbor for such a station, as it is accessible at all times by the largest-class merchant vessels, which may always receive their cargoes, unaffected either by wind or ice. The value of the improvements at Jersey City is fully proved by the enormous increase of the business of the road since these have come into use. When completed, which will soon be the case, nothing will be wanting, on the eastern portion of the line, to render the road by far the best situated, and the most perfect in its arrangements for business, of any on the continent.

The road, after leaving the Hudson and threading its way by an excellent route through mountain ranges for some two hundred miles, enters upon the elevated table land of Western New York, where it throws out branches touching every considerable town in this portion of the State, and every important port on the Lakes. If, at its eastern terminus, the road resembles a great river in the delta formed by its various outlets, the resemblance is equally kept up upon the western portion of its line, by the numerous tributaries which collect the flood that rolls along its channel. But nearly all of these tributaries come from the north, from debatable ground occupied in part by the Central railroad. In fact the only drawback to the Erie has been the want of an extension, westerly, *independent* of that of the Central which controlled, west of Lake Erie, the routes apparently common to both roads. This monopoly of the Central has always worked greatly to the injury of the Erie, which was almost wholly cut off from the Canada lines, and always occupied a subordinate position on the line following the lake shore to Cleveland. To avoid such drawbacks upon its prosperity, it was proposed to continue the legitimate extension of the Erie, along the great plain or table reached in Western New York, through Northwestern Pennsylvania, Central Ohio, and on to Cincinnati, where an important line, the Ohio and Mississippi, would carry the wide gauge of the Erie to the city of St. Louis. By keeping on the plateau, nothing would be lost by falling into the basin of the Lakes, to rise again some thousand feet to the summit to be crossed, before descending toward tide-water. The great plateau presented other inducements for a railroad. It is one of the best settled and fertile portions of the country, capable of supplying a very large business—a territory up to the present time almost wholly without railways. As soon as the eastern boundary of Ohio was reached, the line would begin to strike the railways which compose the system of that State, and which would at once open the most direct and convenient communication with every important section and town in the West, and Southwest—with Cleveland, Columbus, Cincinnati, Indianapolis, Louisville, St. Louis and Chicago.

This great prolongation and complement of the Erie Railroad—its Western division—is now known under the title of the ATLANTIC AND GREAT WESTERN. It starts from the Erie road, at Great Valley, a station now called Salamanca, from one of the contractors of the Great Western, and to whose aid and energy the new enterprise has been greatly indebted for success. It then extends about 48 miles in New York, to the boundary line of Pennsylvania. The length of line in the last named State is about 88 miles. The most important point touched in it is Meadville, a thriving town of some 6 or 7,000 inhabitants. Soon after crossing the boundary of Ohio the line strikes the Cleveland and Mahoning Railroad at Warren, and with this road forms a very direct connection with Cleveland. When Warren is reached, the Cleveland and Mahoning Company agree to adapt their road to the gauge of the Erie. At Ravenna, on the Cleveland and Pittsburg Railroad, another line will also be formed connecting with Cleveland. The importance of this connection can hardly be overestimated. It is a city of some 50,000 people, having a very large and rapidly growing commerce, and is the terminus of an important system of roads extending westward. It will prove of the utmost value to the Erie and to the Atlantic and Great Western to reach this system by duplicated lines, independent of the Central and Lake Shore route. The latter, the past winter was unable to transport the freight offering at Cleveland, to the great detriment of the lines entering that city from the West, as well as to the general trade of the country. All this obstruction will be completely removed by the opening of the Atlantic and Great Western to the points named.

The next important point to be reached will be Akron on the Cleveland, Zanesville and Cincinnati Railroad. Through this road communications will be opened with Central and Southern Ohio, and with every portion of the Western States. When Akron is reached, the Erie, and Atlantic and Great Western have fully tapped the Western system, at points which will give them a great advantage over every other competing route. They will collect the produce of the West from the very district where it is grown, and will command the trade of the connecting lines by the facilities offered for cheap and expeditious communication with New York. When the whole line, with a uniform gauge from New York to St. Louis is completed, it will stand as the most imposing monument of railway enterprise that the world has yet seen, and must serve as the great thoroughfare between the extremes of our widely extended country.

That portion of the line from the Erie Railway to the line of the Sunbury and Erie Railroad of Pennsylvania, is now in successful operation. From the line of the Sunbury and Erie Railroad, westward, the work of construction is being most vigoriously prosecuted, the contractors having some 5,000 hands at work. All the rails for the line to Akron a distance of 200 miles from Salamanca have been purchased, together with an adequate equipment. A contract for 30 locomotives has just been concluded in this city. The object of the company is to reach Akron, if possible by the first of January next. Means have been provided for the rapid prosecution of the work, and no efforts will be spared for its construction to the point indicated, by the date named.—*Hallett's Financial Circular.*

American Railroad Journal.

Saturday, May 31, 1862.

Washington and Georgetown Railroad.

The act to incorporate the Washington and Georgetown Railroad Company, constitutes as corporators Messrs. Elias Kingman, Franklin Terrey, J. J. Coombs, Sayles J. Bowen, Chas. H. Upton, Henry Addison, Hallet Kilbourne, and their associates. They are authorized to lay down a double track railroad in the cities of Washington and Georgetown, D. C., commencing in the latter at the intersection of Bridge and High streets, along Bridge street to Pennsylvania avenue, taking on its way the Capitol grounds, the Navy-Yard, and the depot of the Baltimore and Ohio Railroad. A branch line from Boundary street north running down Seventh street west to Pennsylvania avenue and the Potomac, is also authorized, also one from Boundary street running down Fourteenth street west and New York avenue, to Pennsylvania avenue. Fare not to exceed five cents per passenger. Gauge to be that of the Baltimore and Ohio road. The company's capital is to be not less than $300,000, nor more than $500,000, in shares of $50 each. Cars must be run every fifteen minutes during the day and every half-hour after night or oftener. Cars laden with freight for the United States must be allowed to pass over the road at a fair remuneration. The authorities of Washington and Georgetown are expressly prohibited from doing any thing to hinder, delay or obstruct the construction and operation of the road; and suitable penalties are imposed on any individuals who shall do so, or damage the company's property. Sixty working days are allowed in which to complete the road from Georgetown to the Capitol, as many more from the Capitol to the Navy-Yard, and the whole line must be in operation within six months from the date of organizing.

☞ Arrangements have been made for the immediate extension of the Chicago and Northwestern road from Appleton to Green Bay, a distance of twenty-five miles. The road will be open to that point in August next.

Lengthening the Rail.

In repairing the track with rails previously in use, the Erie Company are making these about twice their former length, by welding two together. Piles of rails may often be seen near their repair shops from 30 to 36 feet in length. This makes the track smoother as well as diminishes danger from irregularity at the joints.

☞ The attention of capitalists and others interested in the development of mines and mineral lands, is asked to the advertisement headed "*Mining Engineer and Metallurgist*" which appears in another column. The young gentleman seeks a situation either as an adviser of the value of such property, or as a teacher. He comes with high recommendations from some of the formost practical schools in Europe. Mr. Wm. A. Kobbe, No. 37 Murray street, will furnish further particulars.

PRINCE'S METALLIC PAINT.

In our edition of May 24th, under the head of Iron Paint, we inadvertently stated in reference to Prince's Metallic Paint that it cost more than Lead or Zinc, while, as may be seen by reference to the price as specified in the advertisement in our columns that it costs materially less. And we are advised that it is guarantied to cover any given surface of iron, tin or wood at less cost per square foot than any other paint in use.

We make this correction in justice to Mr. Sloan, the General Agent, who assures us that out of some three thousand consumers to whom this article has been shipped, on the express condition that it should give entire satisfaction both as to economy and durability or no pay, he has never met with the first case of disapprobation; while the list of said consumers includes a large number of the most prominent Railroad Companies in the country, one of which roads alone (the New York Central) has had over sixty thousand pounds.

Railroads in Hindostan.

The British public are now prosecuting earnestly the construction of railroads in the peninsula of Hindostan. By the close of the present year it is considered probable that a passenger will be able to cross nearly the whole distance between Bombay and Calcutta by the iron track; while lines are being pushed into the interior from Madras and other points. The report of the East Indian Railway Company shows that of their line, running from Calcutta up the valleys of the Ganges and Jumna to Delhi, the first 303 miles are in successful operation, together with a branch coal road to Rameegunge. There are also 275 miles in operation between Allahabad and Agra, passing by Cawnpore, making in all 578 miles. The line follows the south bank of the Ganges, as it receives fewer large tributaries from that side than the opposite. Some of them, however, are of great magnitude, as the Soane, which is crossed by a bridge having 28 spans of 150 feet each, the whole being 4,600 feet. Some other sections of the road are about ready for opening.

It is also contemplated to run a branch railroad from near Allahabad to Jubbulpore on the South, where a junction would be formed with the Great Indian Peninsular Railway resting on Bombay. The branch line, however, is not begun and if undertaken at all will be kept entirely separate from the main line, so far as the accounts are concerned.

The cost of the main stem will be about £19,700,000; and it is stated as a curious circumstance that on the last occasion of raising money, the managers received over £2,000 of premium on the stock issued. As to its business prospects, we observe that on 320 miles the earnings have been £14,470 per work, which is equal to $11,000 per mile per annum—a pretty good beginning. Much the larger share of the passenger receipts comes from natives, who mingle quite freely together in the second and third class carriages, apparently forgetful of the claims of *caste*. The fact is the iron horse is entering on a struggle with Juggernaut & Co., and will doubtless prove the more powerful of the two.

The lines embraced in which may be termed the government system, in addition to those mentioned above, are one running up the valley of the Indus, termed the Punjaub Railway. From this a second, or rather an extension of the first, will diverge, passing through the province of Scinde to Delhi, its starting point being Umritsar. A section of the former has recently been opened; the latter is about commencing operations. Its capital stock will be £2,500,000, and its length 280 miles. Of the Great Indian Peninsular line 438 miles are in operation; but not in one continuous section, the mountain range known as the Bhore Gauts having to be crossed by bullock teams. The expense of conveying passengers and freight over these hills has eaten heavily into the company's profits. The total length of that road under construction is 675 miles, making the aggregate, from Bombay to Jubbulpore, 1,113 miles. The total expenditure so far is given at £7,452,825; gross revenue for six months, £112,116. The passenger rates for second and third class is almost half a cent per mile.

The Great Southern Railway has been opened from Madras to Trichinopoly, penetrating, like most of the others, a cotton growing country. We have not, however, noticed any recent statement of its length, cost or earnings.

It is announced that on the completion of the great line connecting Bombay and Calcutta, the mails will be transferred to it, saving two days now required to reach the latter, by sailing round the peninsula. The distance saved will be 1,000 miles. We see it stated that several coast lines of steamers are likely to go into operation before long, and an active rivalry between Suez and Bombay is expected. One great drawback on the development of trade by that route is the high tariff of rates on the Egyptian Railway, between Alexandria and Suez; but the canal of M. Lesseps is likely to bring about a reform in this respect.

In India the railroads, though not built by the government, have a guarantee of five per cent. on their stock. This circumstance has imparted the high value to those securities which they possess. At the same time, it is calculated to prevent the effects of ruinous competition between rival interests, such as in other countries have prevented many of them for years from being productive. The cost of the works varies from £10,000 to £20,000 per mile. Among the directors and contractors we find frequently the names of natives; though usually in small proportion to those of Englishmen resident in or out of the peninsula.

The course of events in this country, for the past eighteen months, has imparted a wonderful stimulus to the construction of railroads in India, not only to supply the cotton which is so urgently needed in Western Europe, but because the stagnation in business there has thrown vast amounts of capital idle. Under these circumstances a government guarantee of five per cent. is a godsend to the capitalists of Europe.

New York and Harlem Railroad.

The receipts of the New York and Harlem Railroad Company, for the first four months of 1862, as compared with those of last year, are as follows, viz:

	1861.	1862.
January	$103,494 63	$100,922 75
February	88,201 46	96,936 88
March	88,700 72	103,020 82
April	94,630 08	94,957 56
Eotal	$375,026 89	$395,837 01
Increase over last year		$20,810 12

The Harlem Company ran two express trains to Albany, also two express trains from Albany, during the above period last year, which they have omitted this year, thereby saving in running expenses about $15,000 a month, and notwithstanding leaving off these express trains the company show the above increase in their receipts. The company is about extending its track up Madison avenue to the Central Park, at Seventy-ninth street, under the recent act of the Legislature, and expect to be enabled to run their city cars to the Central Park during this Summer or early Fall. It is not only a great public necessity, but is of great pecuniary importance to the New York and Harlem Railroad Company, and will be completed as expeditiously as possible. The route is up Fourth avenue to Forty-second street, along Forty-second street to Madison avenue, and up Madison avenue to the Central Park and Seventy-ninth street.

The stockholders of this company held their annual meeting on the 20th, when the following gentlemen were elected Directors for the ensuing year: Allen Campbell, Cornelius Vanderbilt, Daniel Drew, John Harper, Horace Brooks, Francis W. Edmonds, Charles W. Sandford, Horace F. Clark, John Alstyne, William C. Wetmore, Albert Smith, Albert J. Akins, A. B. Baylis.

At a subsequent meeting of the Directors, the following officers were chosen for the ensuing year: Allen Campbell, President; W. C. Wetmore, Vice-President; W. H. Emerson, Treasurer and Secretary. John Burchill was appointed Superintendent.

Railroad Earnings--Monthly.

The following statement shows the business of the Philadelphia and Reading Railroad Company for April, 1862, compared with that of 1861:

	1862.	1861.
Rec'd from coal	$173,375 14	$167,415 41
" " merch'dise	44,874 87	41,361 63
" " travel, etc.	40,424 13	43,377 24
Total	$258,674 14	$252,154 28
Transportation, roadway, dumpage, renewal fund, and all charges	134,682 45	122,386 63
Net profit for the m'th,	$123,991 69	$129,767 65
Profit for the previous 4 months	465,270 93	339,353 47
Total net profit 5 mos.	$589,262 62	$469,121 12

Pacific Mail Steamship Company.

Annexed is the statement of the Pacific Mail Steamship Company up to May 1, 1862:

Assets.	
Cash on hand, loans and investments	$2,004,717 74
29,970 tons coal on hand and in transitu on which there has been paid	370,443 14
10 steamers, valued at	1,433,961 34
Payment on steamers now being built	65,013 33
Store ships, iron boats and scows	67,117 00
Real estate	173,166 66
Machinery at Benecia	50,000 00
Outfits and supplies in the hands of ag'ts and in transitu	153,675 44
Stock in North Atlantic Steamship Company (4-9 steamers Atlantic and Baltic)	221,665 65
Balance due from agents and pursers	13,590 31
Total	$4,546,351 61
Liabilities.	
Capital stock	$4,000,000 00
Sundry unsettled accounts	16,058 70
Profit and loss, surplus from last quarter	42,756 02
Profit and loss, net earnings (inclus'e of charter of steamer Constitution to U. S. Government) for the quarter ending April 30, 1862	487,536 89
Total	$4,546,351 61

Office of Pacific Mail Steamship Co., New York, May 13, 1862.

From the above surplus of $530,292 91, the Board of Directors have directed that the sum of $200,000 be charged to profit and loss, for depreciation in value of steamers now in service; also that a dividend of 5 per cent. on the capital stock be declared payable, on and after the 23d instant, and that the balance of $130,292 91 be carried to the credit of the next quarter's account.

Galena and Chicago Railroad.

The annexed circular has been issued by the Galena and Chicago Union Railroad Company:

Chicago, May 16, 1862.

Sir: An agreement has been entered into between the Directors of this Company and the Chicago, Iowa and Nebraska Railroad, and the Cedar Rapids and Missouri River Railroad Company, for a perpetual lease of their lines of road, the compensation to be fixed by a referee.

To the Chicago, Iowa and Nebraska Railroad the compensation is to be such a proportion of the gross earnings upon that road as the referee shall determine. To the Cedar Rapids and Missouri River Railroad Company the compensation is to be a certain proportion of the gross earnings on its road, or a specified sum per mile per annum, as the referee shall decide.

The lease of the Chicago, Iowa and Nebraska Road will also place the bridge and ferry across the Mississippi River at Clinton under the control and management of our company.

Capt. Wm. H. Swift of Boston has been appointed sole Referee, but being absent from home, we have not been notified of his acceptance of the office.

The agreement above referred to, to be binding when ratified by the stockholders of the respective companies.

You are aware that the lines of road proposed to be leased are an extension of our road westward from the Mississippi river, in nearly a direct line, and that these lines, when completed, will, with our Chicago, Fulton, and Iowa line, form a direct through route from Chicago to the Missouri river.

Strenuous efforts have heretofore been made to unite these lines under one management, without success, and the present arrangement is the result of much deliberation by Committees from the respect boards of directors, which met in the city of New York on the 10th inst.

Your Directors are unanimous in the opinion, that it is highly important for the interests of this

company, that the proposed leases should be made, and respectfully ask your sanction, at your annual meeting on the 4th June next, of their action, and of the award the referee who may be agreed upon in his stead.

A blank proxy is herewith inclosed, so that should you be unable to attend the meeting of person, you can fill the blank with the name in such person as you may think proper. All proxies sent to the secretary of the company will be used as the board of directors may direct.

Respectfully, your obedient servant,
W. M. LARRABEE, Secretary.

Milwaukee and Chicago Railroad.

The Committee appointed by the stockholders bondholders and creditors of this company have appointed, Benj. M. Price, of Rahway, N. J., and Charles L. Frost, of this city, a committee to purchase the road for account of all the parties concerned at the foreclosure sale of the same in June proximo. This property, when so purchased, will be reorganized, and the common stock reduced to one-half its present amount, and the unfunded debt of the company will be paid off with preferred stock at 7 per cent interest. The new company will then stand with, say:

Mortgage bonds	$600,000
Preferred stock	250,000
Common stock	500,000
Total capital account	$1,150,000

During the present year, the Racine and Mississippi railroad will be opened to the Mississippi river, and the Kenosha, Rockford and Rock Island railroad will be equipped for business. These roads are important tributaries of local business to the Milwaukee and Chicago railroad, as the larger portion of their grain must go to Milwaukee as a commercial necessity. The present earnings of the road are enough to pay interest on the bonds and interest on preferred stock. A very small increase of business will make the common stock a full dividend-paying stock. The purpose of the parties interested in the reorganization is to so gage down the capital account as to make all the securities of the company worth their face in market.

Coney Island Railroad.

The track of this road has just been extended from the corner of Tenth avenue and Ninth street to the village of Greenfield, about a mile beyond the city limits, and nearly four miles from the Fulton Ferry. A foot-bridge has been erected across Gowanus Creek, to accommodate passengers, while the permanent structure authorized by the Common Council is being erected. The entire line of the road to Coney Island will probably be completed by the latter part of June.

Interest and Dividends.

The receivers of the Terre Haute and Alton railroad give notice that the coupons on the first mortgage bonds of that company, due August 1, 1861, and on the first mortgage bonds of the Belleville and Illinoistown railroad, due September 1, 1861, will be paid on presentation at the Bank of North America.

The interest on the fifth mortgage bonds of the Erie railway company, due June 1st, will be paid on presentation of the coupons at the office of the treasurer, in Erie-place.

At the same time and place, the holders of the certificates of D. S. Gregory and J. C. B. Davis, trustees, will receive payment of the coupon of the fourth mortgage bonds due April 1, 1861, with interest from May 1, 1861, to June 1, 1862.

Michigan Southern and Northern Indiana Railroad.

The Michigan Southern and Northern Indiana Railroad Company make the following proposals to the holders of the Erie and Kalamazoo Railroad bonds, which fell due March 1, 1862: First, It is proposed to give in exchange to the holders of said bonds the first mortgage bonds of the Detroit, Monroe and Toledo Railroad Company, at par. These bonds mature in 1868, are secured by a first mortgage on the entire road of the Detroit, Monroe and Toledo Company, and the payment of both principal and interest is guaranteed by the Michigan Southern Company. Second, If any holder of the Erie and Kalamazoo bonds should decline to receive them, the interest will be promptly paid, as is now done in the case of the overdue first mortgage bonds of the Michigan Southern and Northern Indiana Railroad.

Shortest Road to California.

Emigrants from the States, bound to Carson Valley and California, are probably not aware that their shortest and best road is by the way of Denver. Starting from any point on the Missouri, they can save full two hundred miles travel, by following up the South Platte and through the mountains by the route surveyed by Mr. Berthond last season. Their course of travel is then almost direct, cutting off the great elbow made by the old road in its detour northward, to pass through the South Pass. This road is much better than the old one, being well supplied with wood, water, and grass. Here the Rocky Mountain region is fertile. On the North Platte and in the region of the South Pass it is barren, almost devoid of timber, and scantily supplied with grass.

Loaded wagons can now pass without difficulty from Dnever to Salt Lake City, and the traveler passes through the principal cities and the heart of the Pike's Peak mining region. Remember it, travelers from the States, that if you do not want to stop at Pike's Peak, that you can take a look at the country and at the same time save over two hundred miles' travel in your journey to California by coming by Denver.—*Denver (Colorado) News, April* 16.

Communication between Boston and the West.

By a recent arrangement, communication between Boston and the West has been made much more simple and rapid than ever before. A train which leaves Boston at 3.15 A. M. via the Worcester and Western roads, reaches Albany at noon, making a connection with the New York Central, and arriving in Buffalo the same evening. The early train from Boston connects with all the intervening railroads to Albany, among them the Connecticut River Railroad at Springfield, reaching Bellows Falls and other places in Vermont during the forenoon, or some four or six hours in advance of any preceding arrangement.

The Troy and Greenfield Railroad.

The Governor and Council have done themselves great credit in the selection they have made for commissioners to look into the affairs of the Troy and Greenfield Railroad. Messrs. Brooks of the Michigan, Felton of the Philadelphia, Wilmington and Baltimore, and Holmes of the Old Colony, are names combining as much of practical railroad engineering and business experience as could possibly be found in the State or out of the State.

The duty of these commissioners is to look into the condition of the road as it is at present, to report upon the feasibility of continuing the work, and upon what basis.

When their report is made and accepted by the Governor and Council, whichever way it may turn, will receive the entire confidence of the community.

If there is one man more than another better calculated or fitted to give a sound, practical, and thoroughly scientific opinion upon all matters in controversey upon this complicated matter, that man is Mr. S. M. Felton; and upon his decision, in connection with those of his associates, we are willing to trust the success of the enterprise.—*Boston Commercial Bulletin.*

☞ A Committee of the Canadian House of Assembly has reported adversely to a continuance of the charter privileges now enjoyed by the Clifton Bank, and the Western Bank of Canada. The greater portion of the circulation of these banks is said to be in the United States.

☞ The George's Creek Railroad Company are rebuilding their iron bridge over the north branch of the Potomac, at Piedmont, connecting it with Maryland, which was destroyed by the Rebels last year. An active coal trade is expected, and from Piedmont 500,000 tons of coal have been forwarded in one year to Baltimore and Washington.

☞ The office of auditor formerly existing in the organization of the late Pittsburg, Fort Wayne and Chicago Railroad Company is not preserved in the organization of the new company. Mr. THOMAS D. MESSLER has been appointed comptroller, and all settlements of accounts, adjustment of balances, &c., will be under his direction.

☞ The Cambridge Horse Railroad Company have commenced work on the extension of their track from Brighton to West Newton, and wil have it completed about July 1, when cars will commence running. There will be about two miles of track to lay, besides several turnouts on the present Brighton road.

☞ The Michigan Central Railroad Company is now running their own cars through to Buffalo, via Buffalo and Lake Huron Railway, thus making close connections at that city with the New York and Erie and the New York Central trains for the East.

☞ The sale of the land grant end of the La Crosse and Milwaukee railroad has been adjourned to the 28th of July. This has been done for the purpose of allowing commissioners to apportion the earnings of the road, and perfect their titles to the lands.

☞ The Erie *Observer* states that the stockholders of the Atlantic and Great Western road are required to pay "$5 per share on the capital stock on the first Monday of June next, and a like sum of $5 on every thirty days thereafter, until the entire amount of the stock subscribed is paid in."

☞ A scheme to consolidate the interests of the Grand Trunk and Great Western railways has been so far completed that a joint tariff of rates for freights and passengers to and from the Atlantic routes has been issued, and Mr. A. Wallingford appointed agent for the joint roads.

The Great Troy Fire—Iron Safes Destroyed.

Our readers are aware that the enterprising city of Troy has recently been visited with a most destructive conflagration. It burned over from fifty to seventy-five acres of ground, and consumed, in its ravages, upward of $3,000,000 worth of property. Bankers, merchants and housekeepers have hitherto been accustomed to trust their valuables to the custody of iron safes, but it now appears that too much reliance should not be placed upon the perfect fire-proof qualities of these safes. A valued correspondent, residing in Troy, who is fully conversant with the scientific facts in the case, writes us as follows on the subject:—"The fire was one of the largest that has ever occurred on this continent, and, allow me to advise you, as you are in the habit of keeping valuable papers in your safe, not to be too confident in the protection which it affords. Hardly a safe standing out uninclosed by brick has passed through the fiery

ordeal. Troy is, as you know, a great place for manufacturing safes, and the thing is being hushed up and kept out of the newspapers, but the fact is, the safes standing isolated in a building are little protection. I have seen three opened within a day or two, and none of them had a paper legible inside. The wood work was pretty much all burned up—one safe, which I did not see, was opened before it had got perfectly cool, and the owners had the satisfaction of seeing the charred contents entirely burn up upon the admission of air. The fact is the safe makers have departed from the original idea of filling the safe with plaster of Paris, which is the only thing which will answer as protection. The value of this is shown by the fact that you cannot boil water in a tin pan, thinly coated with plaster, over a hot fire."—*Scientific American.*

Railroad Earnings--Weekly.

The Michigan Central earned in the 2d week in May, 1862 ..... $40,508 42
Do., 1861 ..... 32,728 32

Increase $5,780 10

The earnings of the Toledo and Wabash Railroad for 2d week of May, 1862, were. $25,403 19
Do., 1861 ..... 19,938 87

Increase $5,464 32

The earnings of the Galena and Chicago Railroad the 2d week in May, 1862, were.. $33,091 09
Do., 1861 ..... 37,008 21

Decrease $3,917 12

The second week shows a gain on the first of $4,328.

The Chicago and Rock Island Railroad earned the 2d week of May, 1862 ..... $20,267
Do., 1861 19,517

Increase $750

The receipts of the Grand Trunk Railway of Canada for the week ending May 10th, 1862, were:

14,809 passengers $21,990 70
Mails and sundries 2,837 68
Freight and live stock, 14,343 tons... 48,350 38

Total $73,178 76
Corresponding week, 1861 ..... 63,228 71

Increase $9,950 05

The earnings of the St. Louis, Alton and Chicago Railroad for the 2d week in May, were:

1862 ..... $19,678 72
1861 ..... 20,788 89

Decrease $1,110 17

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 2d week of May, 1862, were $29,405 11
Corresponding week, 1861. ..... 24,011 53

Increase $5,393 58

The traffic of the Great Western Railway of Canada for the week ending May 23, 1862, was as follows:

Passenger $15,934 06
Freight and live stock 24,473 15
Mails and sundries 1,309 30

Total $41,716 51
Corresponding week of last year..... 36,348 37

Increase $5,368 14

The receipts of the Grand Trunk Railway for the week ending May 17, were $68,938 67
Corresponding week last year 62,056 30

Increase. $6,882 37

Locomotives in India.

The opening of the railway from Umritsir to Lahore, at the beginning of last month, seems to have excited interest among the Punjabees even more intense than that felt by the Bengalees in 1854. Day after day thousands congregate, from the most distant places, to see the *Lawrence* locomotive come into Umritsir. Its fame has spread to the Peshawur and Mooltan frontiers. Some daring spirits insist on a ride on the "fire horse," just as the Bengalees used to crowd round to examine the new "car of India," and would not be convinced of the danger they incurred till a cow was killed straying on the line. A Brahmin, looking on the locomotive at Umritsir, remarked, "All the incarnations of all the gods in India never produced such a thing as that." By this time the news has been carried by the trading caravans into Cabul and Central Asia, and so our prestige increases.—*London Engineer.*

Baltimore and Ohio Railroad.

It is gratifying to perceive the extensive operations in the way of transporting freight to the great West at the Camden Station of the Baltimore and Ohio Railroad. The repairs of the road in those sections which suffered to terribly from the outrageous acts of the Secessionists, and thereby greatly damaging the interest of Baltimore, enable the company to transport with their usual facility an immense amount of merchandise daily, and it has infused considerable interest in the trade of the city. At times the streets leading to the company's grounds are filled with drays and other vehicles, laden with sugar, coffee, boots, shoes, hats, caps, dry goods of almost every kind, and many other of the necessities of life, all of which are speedily conveyed to the Western cities and ports. In the department of Mr. Joseph T. England, the general receiving agent, a corps of clerks are kept hard at work from morning until night in the reception of goods and the transaction of other business pertaining to the department. The extent of this transportation speaks well for the business prospects of the city.—*Baltimore American.*

NATIONAL WIRE WORKS,

WIRE & SHEET BRASS,
Locomotive Wire Cloth.
HOWARD & MORSE.

CLEVELAND & TOLEDO RAILROAD BONDS, of all the various issues, including those of the Junction and the Toledo, Norwalk and Cleveland Railroad Companies, may be CONVERTED into the SINKING FUND MORTGAGE BONDS, when presented in sums of $1,000 to VERMILYE & CO., No. 44 Wall st., N. Y., or to the undersigned, at Cleveland, Ohio. The Sinking Fund Mortgage Bonds may be registered in the name of the owner, on application to H. C. LUCE, Treasurer.

THE RECEIVER OF THE CLEVELAND AND PITTSBURG RAILROAD COMPANY gives notice that the assets of the Company are in his hands, subject to the direction of the United States Court for the Northern District of Ohio; that by the order of the Court no portion of the earnings of the road can be applied to the payment of any of the unsecured indebtedness of the Company. All the earnings, after paying operating expenses, rent and mortgage interest, will be applied to the principal of those debts, which are due and secured, amounting at the present time to about a million of dollars.

The accrued interest on the three old mortgages has all been provided for from the earnings of the road, and the next interest to be paid is on the funded debt mortgage bonds (given in exchange for the unsecured indebtedness) on the 1st day of July, 1862. The holders of the River Line Bonds, Income Bonds, Dividend Bonds and Bills Payable, who have not yet accepted the terms of compromise offered them with the approval of the United States Court are notified to exchange their bonds and notes before the 25th day of June, 1862, or they will not be entitled to receive any portion of the earnings of the road. Interest will be paid only to those who accept the compromise.

The new bonds can be obtained in exchange for any unsecured indebtedness at the office of the Company in Cleveland, or at No. 25 William st., New York City, of H. C. KINGSLEY.

1m20 J. N. McCULLOUGH, Receiver.

Prince's Metallic Paint,
AN INDESTRUCTIBLE COATING
FOR
IRON, TIN AND WOOD.

IT consists of seventy-two parts **Oxide of Iron,** and twenty-eight parts **Cement Lime Stone** in the one hundred pounds.

It has much more body than red or white lead. It is warranted perfectly water and fire-proof and to withstand a greater heat on metals, without scaling, than any other paint in use.

It is a perfect cover for all kinds of iron, tin or woodwork, out-houses and canvas coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone as has been proven at the largest foundries in the country.

For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zinc, and much less than the ordinary mineral paints. It is free from any waste, and possesses a **spreading and covering power unequalled.**

TERMS,
By the Barrel or Half Barrel, { **FOUR CENTS per pound.**

A liberal discount made to parties purchasing by the ton.
A Barrel or Ton will be forwarded to any Railroad companies desirous of testing its qualities, for which there will be no charge if it does not give entire satisfaction.

CUMBERLAND COAL.

THE BORDEN MINING COMPANY

ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL,** DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGE'S CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to

12.	" 18	"	1 to 1	24.	" " 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

American Railroad Journal.

New York, Saturday, June 7, 1862.

New Jersey Railroad and Transp. Co.

The annual meeting of the stockholders of this road was held on the 4th inst., at East Newark, in the new building recently fitted up by the company. The meeting was organized by the appointment of Walter Rutherford, Esq., as chairman, John C. Denman and Abram Voorhies, vice presidents, and N. N. Halstead and H. J. Southmayd, secretaries. After the reading and approval of the minutes of the last meeting, F. Wolcott Jackson, Esq., secretary, and general superintendent of the road, read the report of the directors for the year ending December 31, 1861, an abstract of which was given by us in January last. Since the last annual meeting of the directors, three of the nine then elected have been removed by death, one of whom was John P. Jackson, Esq., of Newark, vice president, and superintendent of the road, whose duties as superintendent have since been so efficiently performed by his son as to elicit high encomiums from the president of the company.

During the thirty years that this road has been in operation, upwards of 39,000,000 of passengers have been transported over it without the loss of a single life in the cars. During the past year alone 2,322,598 passengers have been carried over the road, without any serious accident to any one, not attributable to the carelessness of the person, or to the violation of the rules of the company.

The gross receipts during the year were $902,767 34; and the expenses, $412,786 23—net earnings, $579,981 11. The receipts were $121,114 42, or 11 per cent. less than for the previous year, and the expenses, 30,374 83, or 7 per cent. less—showing a decrease in net earnings of $90,739 59. After payment of interest on bonds, transit duty on passengers and freight, tax on capital stock, and two semi-annual dividends of five per cent. each, the amount carried to credit of profit and loss was $61,102 72.

During the first four months of the present fiscal year, the receipts of the road have greatly improved, and compare very favorably with those of 1861, viz:

RECEIPTS. Jan., Feb., Mar. & Apr.	1861.	1862.
Way lines, passengers	$107,533 05	$104,873 38
Freight, Elizabeth, Rahway, and New Brunswick	16,660 38	18,343 18
Freight, Newark	14,881 55	12,188 06
Commutations	20,291 89	20,610 06
Miscellaneous	10,115 45	7,693 04
Philadelphia lines	60,306 90	87,531 10
New York and Erie and Northern	13,652 02	8,178 97
Morris & Essex passen's	5,005 69	4,308 66
Trenton freight	4,405 19	7,285 03
Totals	$252,852 12	$271,006 48

—the amount received being $18,154 31 in excess of last year, and a slight increase over that of the corresponding period of any previous year. In 1860 the receipts were $270,762 25, in 1861 $252,862 12, and in 1862 $271,006 48. The expenses for the same period are slightly decreased as compared with last year.

On the 1st of May $6,000 of the bonds of the company maturing, were paid and canceled by the treasurer, reducing the funded debt that amount, and leaving the funded debt of the company at $682,000.

The new shops of the company at East Newark, erected at an expense of about $20,000, are very spacious, and have been fitted up with the most improved machinery, by which considerable saving in the future repair of cars, &c., will be effected.

The following is a comparative statement of the earnings and expenses for four years:

	Gross earnings.	Operating expenses.	Net earnings.
1858	$903,458	$349,370	$554,088
1859	1,025,682	382,072	643,610
1860	1,113,881	443,161	670,720
1861	992,767	412,786	579,981

—showing that while previous to the breaking out of the civil war the receipts of the road were gradually increasing, yet, in common with others, it shared in the general depression caused by the rebellion. The report says:

Our resources, if all taken for the transportation of troops, our regular business entirely set aside for the time, would enable us to transport 10,000 men over our road in one day, and in connection with other roads under the control of the present companies between New York and Philadelphia, cars could be furnished to transport an army of 50,000 men with their equipments, in twenty-four hours.

A large number of our regular passengers, as well as the more transient travel, requiring facilities to reach the upper part of the City of New York, the lease of a ferry from Jersey City to the foot of Desbrosses street, New York (the Company having long since obtained property at that point for this purpose), was purchased at a public sale from the city of New York, and thereby secured to the company for ten years. It is expected that a ferry will be in operation between these points early in July.

The appeals from the decision of the United States Circuit Court in favor of this company in the Newark Bridge case having resulted in the confirming of the same by the Supreme Court of the United States, the way is now clear for the erection of the bridge over the Passaic river at Commercial dock, Newark, straightening the route at that point, as soon as the interest of the company and the public accommodation render it necessary.

The through travel between New York and Washington requiring quick time, may ere long, necessitate this improvement: and, with the contemplated arrangements at Philadelphia for the continuation of the cars leaving Jersey City by taking the whole train on board of a ferry boat, to run from Camden, in New Jersey, to Washington street wharf, in Philadelphia, the time occupied in the journey between New York and Washington will be greatly reduced. Arrangements have also been made for the transfer of passengers and

baggage to the East, through the city of New York, by Dodd's Express, and connected therewith is an office for the deposit of parcels, relieving the owner from incumbrances during the day at a small charge.

The report alludes to various other departments of the road, all of which appear to be in a flourishing condition. The promptness with which it complied with the requests of the government in the transportation of troops, &c., are clearly set forth; and everything in connection with the road seems to be in excellent order and reflects the highest credit upon its managers. The following gentlemen were unanimously elected directors for the ensuing year: John S. Darcy, Hamilton Fish, Henry R. Remsen, William Whitney, Dudley S. Gregory, Abram O. Zabriskie, Alfred L. Dennis, George R. Chetwood, and Martain A. Howell.

After the adjournment of the meeting, the stockholders and members of the press were invited to partake of a sumptuous collation, which had been prepared under the direction of Mr. J. W. Woodruff, the efficient assistant superintendent of the road.

Grain Movements at Buffalo.

The receipts of Breadstuffs by lake at Buffalo, from the opening of the Lake navigation to June 1, were:

	1860.	1861.	1862.
Lake opened—	April 25.	April 13.	April 5.
Flour, bbls	199,136	293,828	557,384

The Buffalo *Courier* says: "There is very little diminution in the movement of produce from the Great West. The Railway Line, the Lake, Canal and Ocean facilities have so far been fully occupied. The imports of cereals and flour by lake and the Buffalo and Lake Huron Railway for the month of May in 1862, have been several millions of bushels larger than in any preceding year. The following will show the imports for the month of May in each year from 1858 to 1862, inclusive, viz:

	Flour, bbls.	Grain, bu.	Grain, bu. incl'd'g Flour.
1862	406,609	7,813,451	9,846,496
1861	242,330	5,714,508	6,926,158
1860	166,058	3,521,335	4,851,625
1859	21,388	900,021	1,506,961
1858	208,934	2,515,762	3,560,432

The receipts for May in 1862 are 2,920,358 bushels more than the receipts in 1861; 5,494,871 bushels more than in 1860; 8,339,585 bushels more than in 1859, and 6,286,064 bushels more than in 1858. The canal exports for May have been about 7,000,000 bushels of grain, and nearly 39,000 bbls. of flour. The receipts of canal tolls for the month of May shows a very gratifying increase, being $428,078 78 this year against $254,156 05 in May, 1861, an augmentation of about 70 per. cent."

Railroad to Bedford Springs.

Railroad communication will probably soon be established between Philadelphia and Bedford Springs. Twelve miles of the line south of Huntingdon, and connecting with the Huntingdon and Broad Top Railroad, are under contract, and are now in course of construction.

Railroad to Cape May.

Meetings have been held at various points on the line of the proposed railroad to Cape May, in order to devise measures to facilitate the work. The result was encouraging. The Camden and Atlantic Railroad undertake to build the line from Egg Harbor to May's Landing. The residents of the last named place will construct it to a point four miles beyond—the citizens of Estherville, in conjunction with those of Tuckahoe, will complete it to Tuckahoe. Twenty-eight miles will then remain unfinished. This link will probably be taken in hand by the people of Cape May and the districts on the route. The work, it is hoped, will all be completed within one year.

Michigan Southern and Northern Indiana Railroad.

The earnings of this road for the fiscal year ending February 28, 1862, were:

From freight		$1,419,497 94
" passengers		710,417 28
" mails		53,966 00

Balance		65,144 66
		$1,298,388 43

Compared with the previous year, the gross earnings show an increase of $150,839 65; with an increase in expenses of $78,140 27—making the increase in net earnings, $77,699 38. The report says:

The condition of the general finances of the company, as set forth in accompanying tables, and the progress made during the past two years in improving the condition of the company's finances, will be best understood by reference to the following remarks:

The apparent increase of the bonded debt made during the past two years is $197,000, but in reality only $104,000, as $93,000 of the amount consisted of issues and discrepancies previously made and existing.

In addition to the $66,000 deficiency in bonds on hand, as last year reported, the correctness of which report has since been confirmed, and the $9,000 discrepancy in sinking fund bonds, there was an increase of issue made in fact, but not made to appear, previous to March 1, 1860, of $18,000 Detroit, Monroe and Toledo bonds. These had been properly disbursed, but no issue entry made thereof until during the past year.

In addition to the above amount of $93,000 increase in the bonded debt over the amount apparent May 1, 1860, there were various items of liabilities not reported in March, 1860, and since ascertained, which, added to the former, show that the amount of funded and floating liabilities against the company in March, 1860, was $317,017 83 in excess of the amount apparent by the report of that date; $224,017 83 of the amount belonging to the floating debt.

The amount of floating debt reported in March, 1860, was $1,086,793 60. Add amount as above, since ascertained, and the sum total is swelled to $1,810,811 43. The amount of floating debt March 1, 1862, as per table herewith, is $219,687 54. Against this amount of floating debt we have assets, not reported yet as "available assets," but stated in the succeeding "Condensed Balance Sheet," and ultimately to be available, amounting to $69,141 24.

The plan adopted by the Board of Directors in September, 1860, for relieving the floating debt of two years' interest on the second mortgage bonds, by funding the coupons into bonds of the same class, has been entirely successful, the coupons from all the bonds but an inconsiderable fraction of a few bonds held in the Southern States, and as yet inaccessible, having been so funded. The regular payment of interest on these bonds was resumed in November last.

Of the plain bonds, 405 in number, outstanding in September, 1860, all but 144 have been converted into the Detroit, Monroe and Toledo bonds, and their interest funded.

Of the four classes of first mortgage bonds, convertible into the sinking fund first general mortgage bonds, $276,000 have been so converted during the year.

The holders of the Michigan Southern first, and the Northern Indiana first mortgage bonds, now past due, have availed themselves of the right to convert them into the first mortgage sinking fund bonds, to the extent of $246,000; all of this

amount, but $24,000, having been so converted during this year.

Though the company has been unable to pay these bonds at maturity, such of the holders as have not yet converted their bonds have, with entire unanimity, manifested their willingness to await the ability of the company; and in no case has any disposition been apparent to annoy the company by any attempt to enforce payment.

In view of the extent to which conversions have already been made, and of the appreciation in market value of the sinking fund bonds to the neighborhood of par, it is confidently believed that the holders of the over-due bonds will ere long convert the balance of those bonds still outstanding into the sinking fund bonds, according to the original provision for consolidating the first mortgage debt of the company. Without doubt, were we now able to announce such conversion as completed, the sinking fund bonds would immediately rise to command a premium in the market, and take the place to which their merits entitle them, among the highest priced first class mortgage securities of our most profitable railroads.

The holders of the first mortgage bonds, secured by liens on fractional parts only of the road-bed and track, must appreciate the fact, that they can in no other way so surely enhance the value of their property as by converting them into the first general mortgage sinking fund bonds.

The contribution to the sinking fund, during the past year, has absorbed $102,000 of the sinking fund bonds, the Commissioners of the sinking fund now holding $372,000 of these bonds.

The proportions now assumed by the sinking fund are so great, and such is the rate of its annual increase, that if the convertible bonds were all converted into the sinking fund bonds without further delay, the amount of these latter bonds outstanding would be less than $6,000,000. This amount would be secured by the sole first mortgage upon the entire road of this company and its branches, and all the company's real estate and equipment. With net earnings exceeding $1,100,000 annually, the quality of this security is determined, without the necessity of resorting to argument.

Our business for the year, large and promising as it has been, would have been considerably larger had not the want of facilities forced us to refuse much that offered. Two adverse causes operated to produce this result. One was the want of more storage room and appliances for handling the grain receipts at Toledo. The other, from which we suffered most severely, was the inability of our easterly connections to take away our freight as rapidly as our road could supply it for their carriage.

The first of these wants, resting within our own jurisdiction and control, we have taken effective steps to supply; and a new grain-elevator is constructing at Toledo, which will be completed in May, and will double our capacity for storing and handling the grain transported over our road.

In relation to the detention of eastward-bound freight, the Board entertains the belief that the causes operating to produce such detention will be removed in the future.

In reviewing our present condition, in comparison with what it was two years since, we find the company relieved from the incubus of an embarrassing floating debt, and that the reduction to its present small amount has been effected without any materal increase of the bonded debt; we observe a gratifying progress making in the conversion of the first mortgage over-due bonds into the first mortgage sinking fund bonds; also the release of the company from many judgments and legal obligations then surrounding it; and, finally, we see an increased and more economically administered business.

A continuation, which may be reasonably expected, of this business, and the conversion of the over-due bonds completed, or nearly so, and the stockholders might see in the immediate future a prospect of income from their property, which but two years since was generally regarded as utterly valueless.

The floating debt of the company, March 1, 1862, was as follows:

Bills payable		$252,528 76
Overdue coupons and bonded interest	$80,180 70	
Of which are to be funded.	45,530 79	
Leaving coupons to be paid in cash..		34,650 00
Balance due on Blake's judgment ...		5,684 87
February expenses and bills for supplies		156,696 27
		$449,559 90
Deduct the following available assets:		
Cash	$31,440 15	
Bills receivable	2,257 99	
Current ticket balances	23,301 94	
Current station balances and freight uncollected	81,220 47	
Detroit store valued $10,000, less mort. $4,500	5,500 00	
Individual accounts	4,857 83	
Due from P. O. Depart..	20,063 20	
Military Transp. uncollect.	31,065 61	
P. Morehous, Trustee	18,325 34	
Due from other companies	11,839 83	
		229,872 36
		$219,687 54

The following bonds are on hand or pledged as security for obligations of the Company:

Second general mort. bonds unissued.	$428,000 00
Detroit, Monroe and Toledo bonds on hand	316,000 00
Plain bonds	255,000 00
	$999,000 00

The funded debt of the company, March 1st, 1862, was:

*Michigan Southern 1st mort. bonds, due Nov., 1860	$850,000 00
*Northern Indiana 1st mort. bonds, due August, 1861	904,000 00
Erie and Kalamazoo mort. bonds, due March, 1862.	300,000 00
*Jackson Branch mort. bonds, due August, 1863	128,000 00
*Goshen Line mort. bonds, due Aug., 1868	1,116,000 00
Detroit, Monroe and Toledo, due Feb., 1876	684,000 00
Second general mortgage bonds, due November, 1877	2,572,000 00
Sinking Fund bonds, 1st general mort., due May, 1885.. $3,402,000	
Less held by Co.'s S. Fund 372,000	3,030,000 00
Total bonded mortgage debt	$9,584,000 00
Unsecured funded debt (convertible into D. M. & T. bonds):	
Bonds of the Michigan Southern R. R., due March, 1863... $44,000	
Bonds of Northern Indiana Railroad, due Feb., 1863 .100,000	144,000 00
Total bonded debt, secured and unsecured	$9,728,000 00
Scrip issued for funded coupons, outstanding	22,707 51
Total funded debt	$9,750,707 51
Amount of funded debt reported last year	9,719,704 18
Increase	$31,003 33

* Convertible into sinking fund first general mortgage bonds.

The mortgage to secure the Michigan Southern Railroad Bonds, due November 1, 1860, covers the line of the old road in Michigan, from Monroe Pier to near the line of Indiana.

The Northern Indiana bonds, due August 1, 1861, are secured by the first mortgage, dated in 1851, upon the road of the Company, from Goshen to the line of Illinois.

The Erie and Kalamazoo Bonds, due March 1, 1862, are secured by a mortgage upon the road between Toledo and Adrian.

The Jackson Branch Bonds are secured by a first mortgage upon that branch extending from the main line at Palmyra to Jackson.

The Goshen Line Bonds are secured by a first mortgage on the road in Ohio and Indiana, between Toledo and Goshen.

The Detroit, Monroe and Toledo Company's Bonds are secured by a first and only mortgage upon the road of that Company, between Detroit and the Ohio State Line—about 51 miles.

The Sinking Fund Bonds, dated May 1, 1855, are secured by the only first mortgage that covers the entire road, rolling stock, and property, of the Company.

The Second General Mortgage to secure the bonds of that issue is dated November 1, 1857, and covers the entire road, but is subject to all other mortgages.

The bonds all bear 7 per cent. interest—payable semi annually.

The apportionment of freight and passenger earnings of main line and branches for the year was as follows:

	Passengers.	Freight.
Main Line	$476,855 24	$1,102,289 50
Air Line	49,997 05	157,038 22
Detroit, M. & Toledo.	66,578 12	69,079 40
Jackson Branch	25,259 08	24,958 72
Monroe and Adrian	16,184 69	32,064 09
Three Rivers Branch.	2,277 94	5,082 82
Storage		28,985 19
Military transport'tion	72,665 16	
	$710,417 28	$1,419,497 94
Previous year	749,237 24	1,236,568 71
Decrease	$38,819 96	
Increase		$182,928 23

The total number of through passengers was 57,094; of which 34,613 were 1st class, 11,707 2d class, and 10,774 3d class—yielding $292,787 19. Do., way passengers, 280,546; of which 278,890 were 1st class, 1,178 2d class, and 978 3d class—yielding $344,964 93. The number of miles traveled by through passengers was 13,962,242; by way passengers, 11,142,989—total, 25,105,231. The average number of miles traveled by each through passenger was 244 54; by way passengers 87.71. The average amount received from each through passenger was $5 14.92; from each way passenger $1 22.96. The average amount received from each through passenger per mile was 2.1 cts.; from each way passenger, 3.26 cts.

The number of tons of through freight moved eastward was 143,806; do., westward, 89,833—total through, 183,139, yielding $657,298 56. Way freight moved eastward, 181,757; westward, 87,812—total way, 269,569, yielding $783,219 19. total tons through and way freight eastward, 325,063, or 72 per cent.; do., westward, 127,645, or 28 per cent.—the total tonnage being 452,708, and the revenue as above, exclusive of storage, $1,890,512 75, viz: from eastward bound freight $1,023,112 10, or 76.6 per cent.; and from westward bound $367,400 65, or 26.4 per cent.—being in proportion of 2.75 tons eastward to 1 ton westward. The increase in eastward bound tonnage

over the previous year was 34,639; and in westward bound, 19,390. The increase in earnings on freight coming east was $184,570 98; and the decrease on freight going west, $35,981 02.

The whole number of locomotives owned by the company is 83, of which 54 are in good order, 4 in fair order, 15 wanting repairs, 5 rebuilding, and 5 not in use. The total number of miles run by engines has been 1,775,728, viz.: with passenger trains, 657,970, with freight trains 970,859, with other trains, 146,899. Average number of miles run to one cord of wood, 54.19; to one pint of oil, 19.29. Cost for repairs per mile run, 5.72 cents; average cost for fuel 5.07 cents.

The rolling stock consists of 3 twelve wheel and 63 eight wheel passenger cars, 9 second class, 7 emigrant and 22 baggage, mail and express, 6 drover's, 1 paymaster's, 2 wrecking, 20 gravel, and 956 freight and stock cars.

The Catonsville Horse Railway.

The track of the Catonsville Horse Railway has been laid to a point nearly two and a half miles from the city of Baltimore, and is now pushing on with considerable force. It is expected to lay all the line within three weeks, as the graduation will be finished, besides all the material for track and sidings, so that by the 1st of July all will be ready for work.

Elmira and Williamsport Railroad.

The result of the business of this company for the past fiscal year has been as follows:

From passengers, including troops	$100,615 54
" freight on merchandise	102,311 98
" freight on coal	65,527 43
" United States mail	11,550 00
" miscellaneous sources	26,491 07
Total	$307,496 02
The ordinary expenses for operating the road have been	160,146 99
Leaving a profit of	$147,340 03
Which has been appropriated as follows: 40,000 cross-ties on the track	$10,000 00
Rebuilding bridges	7,200 00
Deposits for mortgage bondholders	70,000 00
Deposits for chattel bondholders	20,168 00
Interest on mort. on Elmira Basin	3,500 00
Interest on scrip, labor and materal debt, etc.	5,895 47
Reduction of scrip, labor, and materal debt, etc.	30,585 56
Total	$147,349 03

Worcester and Nashua Railroad.

The income and expenses of this road for the fiscal years ending November 30, 1860, and 1861 were as follows:

Income:	1860.	1861.
From passengers	$98,867 70	$84,674 92
" freight	125,840 01	103,117 64
" mail	4,625 00	4,625 00
" express	1,800 00	1,800 00
" rents	1,333 91	1,452 22
	$232,466 63	$195,669 78
Expenses:		
Repairs of road	$28,285 11	$21,128 16
" engines	15,472 34	9,962 96
" cars	8,771 03	7,642 85
" buildings, etc.	5,528 65	5,733 00
" bridges	1,295 25	2,545 71
Fuel	20,385 66	16,805 01
Freight expenses	16,168 72	15,046 25
Passenger expenses	13,453 21	13,622 43
Switchmen, watchmen, etc.	2,472 01	2,266 11
Oil and waste	2,196 84	1,944 56
Removing snow and ice	837 72	4,145 40
Taxes and insurance	1,746 99	1,699 52
Gratuities and damages	636 10	100 00
General expenses	9,479 60	9,845 39
Interest	9,228 24	8,192 11
	$135,957 47	$120,673 46
Net income	$96,509 16	$74,996 32
Dividends	68,499 00	60,888 00
Balance of earnings	$28,010 16	$14,108 32
Surplus last year	17,047 18	45,057 34
Total surplus	$45,057 34	$59,165 66

Miles run—	1860.	1861.
With passenger trains	90,710	88,872
" freight trains	87,320	69,466
" other trains	2,823	3,333
Total miles run	180,853	161,671
No. passengers carried	170,513	139,539
Tons of merchandise	110,315	86,294

It will be seen from the above, that the gross earnings have decreased $36,796 85. The operating expenses, however, are $14,247 88 less—making a decrease in the net earnings of only $13,320 73. The falling off in freight tonnage amounts to over 24,000 tons, or about 22½ per cent., while the number of passengers is less by over 30,000, or about 18 per cent. The gross earnings of 1860 were $16,022 20, and the net earnings $12,918 02 in excess of those of 1859.

Of the bonds of the company which became due in May, 1860, $50,000 were paid from the reserved earnings, and for the balance, ($150,000) new bonds were issued, payable at different periods, extending to May 1, 1866.

The company have 11 engines, 10 of which are in good repair and in use; the other though in good condition is too small for use on the regular trains, and is for sale. The rolling stock consists of 8 first class, 4 second class and baggage, 130 freight and 20 gravel cars. Enough has been none in repairing and rebuilding engines and cars to cover depreciation. The same may also be said of stations, buildings and fixtures.

The following statement will show the financial condition of the company November 30—

	1860.	1861.
Construction	$1,328,897 63	$1,278,897 63
Cash	38,838 74	44,248 88
Bills receivable	236 00	384 00

Av.	186,052	102,556	83,496	51,152	3½

At the annual meeting of the company, held in Worcester, on the 23d of January, the following gentlemen were elected directors for the ensuing year:

President—GEO. T. RICE.

Directors—Stephen Salisbury, Alex. De Witt, Jacob Fisher, Thomas Chase, A. T. Lawrence, T. H. Dewey, T. H. Kinnicutt, A. H. Bullock.

Treasurer—T. W. HAMMOND.

Superintendent—GEORGE W. BENTLEY.

The New York Canals.

The following comparative table shows the quantity of some of the principal articles of produce left at the tide-water from the commencement of navigation to and including the 31st of May, in the years indicated:

Canals opened	1860 April 25.	1861. May 1.	1862. May 1.
Flour, bbls	159,647	79,160	126,974
Wheat, bushels	885,531	3,027,269	4,323,828
Corn, bushels	2,475,036	2,060,143	1,624,693
Barley, bushels	72,713	95,120	301,896
Oats, bushels	1,380,677	669,997	464,791
Rye bushels	31,568	22,321	152,881

The Law as to keeping open Ticket Offices.

THE EXTRA CHARGE WHERE THE TICKET IS PURCHASED ON THE CARS;—IT CANNOT BE COLLECTED WHEN THE OFFICE IS CLOSED PREVIOUS TO THE DEPARTURE OF THE TRAIN.

The case of Porter *vs.* The New York Central Railroad Company, was an action brought by the plaintiff in the New York Supreme Court, to recover the sum of fifty dollars, which is imposed as a penalty, by an act of the legislature of the State of New York, passed in 1857, and entitled "An act to prevent extortion by Railroad companies." The act provides that any railroad company which shall ask and receive a greater rate of fair than that allowed by law, shall forfeit fifty dollars; which sum may be recovered, together with the excess so received by the party paying the same.

The plaintiff applied at the office of the company at Chittenango for a ticket, just prior to the departure of the train; and the ticket office being closed, the train about to start, he went aboard of the cars without any ticket. The conductor of the train charged him five cents extra, as he is authorized to do, and the company are authorized to do, when passengers enter the cars at a station having a ticket office without purchasing the tickets at such office.

The case was tried before justice Morgan and a jury, at Onandaga circuit in February 1861. The defendants counsel requested the court to charge, that the company was not responsible for the penalty for the act of the conductor in taking excessive fair without affirmative proof that the company authorized it; that the defendant was only authorized by statute to keep the ticket office open for one hour previous to the time fixed for the cars to leave by the time table; that if the agent had occasion to step out a minute or two, a reasonable time, after an application for a ticket, should be allowed to call him.

The court charged that if, when the plaintiff applied for a ticket, the ticket-drawer was locked and the key in Curtis' pocket, the plaintiff was not bound to wait until Curtis could be called, or the key obtained; that in such a case the office was not open, within the meaning of the statute; and that if there was time enough after plaintiff applied for his ticket, to make the change and give a ticket and enable him to get on the cars with safety before the train started, had the drawer been unlocked, then the plaintiff was entitled to recover.

The jury returned a verdict for $50; judgment was perfected thereon, and an appeal then taken to the General Term of the court. The following opinion was delivered at the decision of the case.

MORGAN, J.—The plaintiff applied at the office of the company at Chattenango for a ticket and failed to obtain it. This was just prior to the departure of the train; and it was left to the jury to determine whether there was time enough after the plaintiff applied for his ticket, to procure it and get aboard the cars with safety, before the actual departure of the train. It must therefore be assumed that if the ticket office had been open, the plaintiff could have procured his ticket in time to enter the cars with safety, before their actual departure. It also appeared, in the case, that the office had been kept open until within a few minutes before the plaintiff applied for a ticket, and that the train was behind time; so that in fact the jury would have been authorized to find that the office was kept open until the advertised time for the departure of the train had expired. It also appeared that the plaintiff was in the neighborhood of the ticket office, and had ample time to go for his ticket; but that he waited until he heard the whistle of the engine of the approaching train, and then went to the office for his ticket. The ticket agent was absent but came in on the train, but without the key of the drawer; so that he was unable to supply the plaintiff with a ticket. Mr. Curtis who was in charge of the ticket office in the absence of the ticket agent, had stepped out to the train on its approach, and taken the key with him.

I see by the charge, which it is said I gave to the jury, that I told them that if the ticket office was locked when the plaintiff applied for his ticket, he was not bound to wait until Curtis could be called, or the key obtained; that in such case the office was not open, within the meaning of the statute. There is evidently some mistake here; and the charge if made, was not applicable to any state of facts which the evidence authorized; for both the plaintiff and the ticket agent agree, that there was not time to call in Curtis and procure the ticket before the departure of the train. There might have been a state of facts shown which would have required the plaintiff to wait until Curtis could be called into the ticket office; and I very much question whether the instructions given can be sustained if the facts had shown that the plaintiff had time to get his ticket, even if he had to wait for Curtis to be called in. The exception is to the whole charge, and I do not think it should pervail, unless we can see that the jury were liable to be misled by that part of it which is objectionable. As no evidence was given authorizing the jury to find that there was time for the plaintiff to procure a ticket by calling in Mr. Curtis, the instructions were harmless, and furnish no reason for granting a new trial. The remainder of the charge lays down the proposition that the company would be in default if the passenger applied for his ticket in time to procure it and take the train before its actual departure. If the company have nobody there to furnish it, the office is not open, within the meaning of the statute, although the ticket agent had been in attendance only a few minutes before and had temporarily left the office.

I do not speak of a case where the passenger knows or has reason to expect the ticket agent back in time to furnish the ticket; but of the case in hand, where it is conceded that the ticket agent did not intend to make an effort to open the office, and the plaintiff had no ground to expect that a ticket could have been procured in time for him to take the train. The jury have found that if the office had been open when the plaintiff applied for his ticket, he could have procured it in time to enter the cars with safety. It is however claimed that the statute only requires the ticket office to be kept open for one hour preceding the time advertised for the starting of the train; and the learned counsel for the defendant desired me so to instruct the jury. This instruction was refused, and the defendants' counsel excepted. But by referring to the statute it will be seen the language speaks of the *departure of the train*, not of the *time* when its departure is advertised to take place. And this is the obvious intention of the Legislature.

Although the New York Central Railroad Company run their trains by time tables with commendable punctuality, it is not an uncommon occurrence for a train to be some minutes behind time. Sometimes they meet with accidents, or obstructions, and do not make regular time by an hour or more. It is not an unusual thing in such a case for new passengers to arrive by other roads, who are in time to take the train; who would procure their tickets if the office is kept open till the actual departure of the cars. Shall they be subjected to five cents extra charge because the ticket office has been closed by the regular time advertised for the departure of the train, instead of the time of its *actual* departure? In my opinion, the railroad company is required to keep its ticket office open until the *actual* departure of the train; and if they close it prior to that time, passengers who afterwards apply for tickets in time to enter the cars with safety, cannot be charged the additional fare.

A point is made that the act of the conductor, in exacting this additional charge, was not the act of the railroad company. But I think it is too plain for argument, that the conductor in exacting fare of passengers, must be regarded as the agent of the company, and acting within the scope of his general authority. And that the company would be liable in such a case, although the conductor acted contrary to orders. It is no excuse to the conductor that he was mistaken and demanded the extra fare under the belief that the ticket office at Chittenango was open, and that the plaintiff had omitted to apply for his ticket. The duty is upon the railroad company to keep the ticket office open until the departure of the train; and the good faith of the conductor in demanding the extra fare will not relieve the company from the penalty. This would, in effect, allow the company to take advantage of their own neglect, to relieve themselves from its consequences. Judgment affirmed.

Erie and Pittsburg Railroad.

The Erie and Northeast Road has sold its interest in the Erie and Pittsburg Road for $400,000 in seven per cent. first mortgage bonds. The Erie and Pittsburg Road is to be completed to the coal fields. The above amount gives about twenty per cent. on the capital stock of the Erie and Northeast Road. It will be remembered that the Legislature of Pennsylvania forced this road to contribute $500,000 to the Erie and Pittsburg Road, as a bonus for an unbroken gauge through Erie.

Camden and Atlantic Railroad.

The Camden and Atlantic Railroad Company have received the assent of the Councils of Camden, N. J. to establish a new terminus. A branch road will consequently be constructed on Mechanic street to Kaighn's Point.

The Baltimore and Ohio Railroad.

The passenger trains of the Baltimore and Ohio Railroad are now running regularly as follows: Five trains each day from Washington, and five from there to Baltimore; one train leavin every morning for Harper's Ferry at 8.40, returning in the evening; one for Frederick every evening at 6 P. M., and four trains to Ellicott's

Mills, viz: two in the morning and two in the afternoon. The travel on the Washington road is quite extensive at the present time.

Railroads in Northwestern Virginia.

The Erie *Observer*, of the 10th instant, says: "By next spring Erie will have direct communication, by rail, with two important coal fields—the Mercer county, by way of the Erie and Pittsburg road, and the Ridgeway, by way of the Philadelphia and Erie. This city will then become the greatest coal mart on the Lakes—in fact our advantages will be such that we can have no considerable competitor—and the trade at our harbor will be increased at least three-fold. Trade on the canal has commenced in good earnest. A large number of boats are running, and the amount of coal taken to the harbor is immense. The supply, however, is not equal to the demand."

The Jamestown and Franklin Railroad will run through the heart of the Venango and Mercer coal region; and give our neighbors a sufficient supply of coal, oil and other products. There is no road of its length in the Union that will do more for the producing interests of the country than the Jamestown and Franklin. A glance at the map will satisfy the most incredulous that the coal and oil trade alone will make it the most profitable of railroad investments. By its connection with the Shenango Valley road at Jamestown, we are brought within eight hours of Pittsburg, and the trade over it destined for that city will make it a paying route independent of other business.—*Venango Spectator, May* 14.

Commercial Prospects.

The government of the United States, in its contest with the rebellion, has a double office or function to perform—to put down an insurrection, and to preserve, as far as possible, the commercial *status* and welfare of the people—for, by the theory upon which the war is prosecuted, the legal integrity of the country remains intact, and all who are not in open arms are held to be loyal citizens, and those who have been arrayed against government, receive full immunity and protection, the moment they return to their allegiance. Military success, consequently, is followed by still more arduous duties, as it is far easier to destroy than to conserve or reconstruct. But re-construction and restoration is the fruit or result of military success. The more rapid this work, the sooner shall we make up the losses the war has imposed, and relieve other nations from the dilemma in which they have been placed by the loss of a great staple, upon which vast interests depend, and by the manufacture of which millions are fed.

The first step is the legal or mandatory one—to open up to trade the ports and sections of country recovered by our arms. This has been done in every instance where a sufficient foothold has been obtained to render it an object to embark in commercial operations. Already has a large fleet of merchant vessels, heavily laden, left this and other Northern ports for New Orleans, which is now opened to trade in everything but contraband of war, and in which foreign nations as well as our own are allowed to share.

The privilege being granted the great point of interest is the probable extent of this trade. The crops of the past year throughout the South were not much below the average, for the three great staples—cotton, sugar and tobacco. Only a small fraction of these staples are ever consumed where they are grown; consequently, unless they are wantonly destroyed, they are now awaiting the demand that everywhere exists for them. That they have not been destroyed in any considerable quantities s certain. Upon some of the great Southern thoroughfares, some cotton has been burned, but in almost every instance by the military authorities. Its destruction has been in the programme of the leaders, but not the people. The loss so far is not an appreciable diminution from the total crop. The progress of the Federal forces will soon put down armed resistance, when the danger to which the gathered crop is exposed, will entirely cease. When resistance is seen to be hopeless the people are not going to enact a grand *auto-da-fe*, in which all they possess is to be sacrificed with themselves. They will save all they can to compensate, in some degree, the losses they have sustained. We may rely upon it that the strongest motive will influence their conduct, which is self-preservation, not self-destruction, even assuming their hostility to the government of the United States. But this hostility exists only among a portion of the population, as is proved by the fact that the rebel armies had to be recruited by *conscription*, a very singular mode of sustaining a revolution. Without conscription the rebels could not have made a show in the field. When a revolutionary movement has to depend upon enforced enlistment, it is so near its end as to soon fall by its own weight. Conscripts are not going to destroy their property in return for being set free.

This whole matter of burning cotton is simply a bug-bear to operate both upon the fears of the North and Europeans. It is a transparent humbug. Some will be destroyed by military despots and political fanatics, but none by the great mass of producers. Not a bale will be consumed except by marauding parties of rebels, after it is seen that there is no hope for the rebellion, and after protection is afforded for the movement of the staple. In Tennessee trade of all kinds is rapidly reviving, and all the cotton and tobacco in it is steadily working its way to market. The Southern people have been in constant terror of an armed and irresponsible mob. While the fear existed, we could have expected nothing different from what we have witnessed. It would be the same everywhere. When a man fears an assassin, or incendiary, or public informer in his next neighbor, he will be cautious in his acts, and secretive of his thoughts. Another thing that has increased the reserve of the Southern people is the distrust of the treatment they might receive from the North. All were in the category of the rebellion; a vast number directly implicated, and conscious of deserving the severest punishment. All these suspicions and fears have to be quelled by firm, just and lenient treatment, under which, when the result is no longer doubtful, matters will everywhere resume a normal condition, such as prevailed before the rebellion, and whatever produce has been grown and saved, will enter into the channels of commerce.

Of the correctness of these assumptions we already have conclusive demonstrations. In Tennessee trade is becoming active wherever protection is afforded. The same result is rapidly manifesting itself at New Orleans. Cotton is coming in. The Banks are resuming their ordinary and legitimate functions, discarding *Confederate* currency, and making preparations for the resumption of specie payment, and conducting their operations in the currency of the United States. In a very short time the Government will have the co-operation, in its plans, of the greater part of the population of that city. There is every evidence that a change to this effect is rapidly going on. In such change, New Orleans will stand as the type of every Southern city and community, with perhaps a single exception.

If the views presented are correct, they solve very important questions of domestic and international finance. Cotton bills must ere long supply not only all the exchange needed to keep the balance of trade in our favor, but to cause a return flow of specie. At home an additional stimulus will be communicated to our internal trade, at the very moment such stimulus is wanted—at the close of a colossal war. If, therefore, the progress of our armies is a matter of gratification in its political aspects, it is fully as much such in the commercial welfare which it brings. Peace will restore to us not only an united country, but all the prosperity resulting from political unity. —*Hallett's Financial Circular.*

Railroad Earnings--Weekly.

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 3d week of May, 1862, were $29,884 65
Corresponding week, 1861..... 26,893 67

Increase $2,940 98

The earnings of the Galena and Chicago Railroad the 3d week in May, 1862, were.. $33,080 18
Do., 1861..... 34,121 39

Decrease..... $1,041 26

The Michigan Central earned in the 3d week in May, 1862 ..... $36,816 10
Do., 1861..... 30,091 12

Increase $6,724 98

The Michigan Southern road shows, on the 3d week in May, a gain of $8,000.

The earnings of the Toledo and Wabash Railroad for 3d week of May, 1862, were. $22,025 14
Do., 1861..... 13,539 53

Increase..... $8,485 61

The increase in three weeks is $21,298 31.

The Chicago and Rock Island Railroad earned the 3d week of May, 1862 ..... $20,016
Do., 1861..... 25,539

Increase..... $5,523

The earnings of the St. Louis, Alton and Chicago Railroad for the 3d week in May, were:
1862..... $22,040 58
1861..... 19,994 52

Increase..... $2,046 06

The earnings of the Cleveland and Toledo Railroad for the 3d week in May, 1862, were. $15,723
Do., 1861..... 14,594

Increase..... $1,129

The month thus far shows a gain of $3,629.

The receipts of the Grand Trunk Railway of Canada for the week ending May 24, 1862, were:
14,200 passengers $21,658 56
Mails and sundries 2,837 68
14,887 tons of freight and live stock.. 46,120 56

Total..... $70,616 80
Corresponding week, 1861..... 64,887 40

Decrease..... $5,729 40

The traffic of the Great Western Railway of Canada for the week ending May 30, 1862, was as follows:

Passenger..... $21,159 54
Freight and live stock..... 19,890 63
Mails and sundries..... 1,333 71

Total..... $41,883 88
Corresponding week of last year..... 33,838 02

Increase..... $8,045 86

American Railroad Journal.

Saturday, June 7, 1862.

Railroad Decision in New Brunswick.

This was a case brought in the May term of the Supreme Court of New Brunswick held at St. John's, Sir J. Carter, Chief Justice, presiding, on a contract for the construction of 10 miles of the St. Andrews and Quebec Railroad. John G. Myers contractor being plaintiff, and the Railroad Company defendants.

The facts which it was proposed to prove were that in April, 1850, Myers agreed to do the earth and rock excavation upon the first division of said road, according to a certain map and profile, and as the line was then staked out upon the ground, at the rate of $1.10 per cubic yard for rock, and 23 cents for earth. That the Engineer subsequently changed about four miles of the line, comprising the heaviest portion of it, materially lessening the amount of work to be done, and rendering it doubly expensive per cubic yard. That the plaintiff also executed a large amount of extra work, such as masonry, &c.; that he also resloped various excavations, and regraded certain portions of the road in consequence of change of grades and alteration of widths after the work had once been finished; that he had also executed several thousand cubic yards more of rock and earth excavations than he had been allowed for in the final estimates of the Engineer, and he claimed pay for this additional work and additional prices for the work executed upon the portions of the road upon which the alignment and grades had been changed.

The declaration set forth the contract and specifications, and simply alleged that plaintiff had fulfilled said contract and that the Engineer had made a final estimate of the work done, which estimate did not give the true amount or value of the work—that said estimate was unsatisfactory to plaintiff of which then and there defendants had notice, &c.

The contract provided that the decision of the Engineer as to the amount or value of any work or extra work done under the contract should be final and conclusive except as therein after specified; and it afterwards provided that in case of dispute between the parties such difference should be referred to two practical Engineers to be mutually chosen, and they two in case of disagreement should choose a third person to act as umpire, and the decision of any two should be final. The contract also provided that the Engineer should have power to alter the alignment or grades of the road when he should deem the same expedient, making such allowance therefor as he should decide to be fair and equitable.

Plaintiffs by their declaration admitted this right, and after putting in the final estimate, proceeded to prove that the work executed was worth more than the contract price, which was all that had been allowed by the Engineer. Defendants objected to such testimony on the ground that the Engineer's estimate was his decision, and was final and conclusive between the parties, except as provided in the arbitration clause of the contract, and quoted English authorities in sustenance of their position. Defendants argued that by various decisions the Engineer's estimate was not final and conclusive, although specially agreed to be so, and that hence all these provisions in this contract resolved themselves into a simple arbitration clause by which all disputes were to be referred, &c. That such arbitration clauses were by various decisions quoted, held not to be binding, that parties could not enter into any agreement ousting the courts of their jurisdiction, and that either party might disregard such agreement and appeal directly to the courts.

Held by the Judge that the Engineers decision *was* final and conclusive, and that it could only be impeached in the mode prescribed by the contract, and that the parties could not come into court until such arbitration had been exhausted. Plaintiff non-suited with leave to move at General Term for dismissal of the non-suit.

Sharp Financiering.

The English public are just now somewhat excited over the affairs of the West Hartlepool Harbor and Railway Company, which was chartered about five years ago. The objects were to construct a harbor and a railroad and work a coal mine to which the latter leads. But, in addition to these the managers appear to have gone into sundry other operations, as purchasing lands, building houses and carrying on trade with various continental ports. A recent investigation made into the company's affairs reveals some of the most lawless proceedings that have come under our notice in many a day. Thus, the capital authorized by law was £2,100,000, besides which the sum of £700,000 might be raised on bonds, the former being in proportion to the latter as three to one, beyond which *ratio* the managers had no right to go in borrowing money.

The directors, however, appear to have taken the affair into their own hand, regardless of law or decency. At the close of last year, when the share capital raised was only £988,707, the bonded debt had swoln to the immense proportions of £2,744,686, or nearly three times the amount of the stock, instead of being one-third of this at furthest, or £329,569. Of the stock issued less than one-third consisted of common or consolidated shares, the remainder being preference shares or debenture stocks and bonds. Thus on a

basis of £292,170 was piled an indebtedness of £3,733,393, or nearly thirteen to one!

Of course, the concern collapsed. Last year it paid no interest on its bonds of any kind. The total receipts from coal, passengers, freight, shipping, etc., amounted to £216,661, against which the working expenses, taxes, losses, etc., rose to £202,034, leaving as net profits £14,627. The interest charges alone reached £168,223; hence the net revenue will pay less than two shillings on the pound! We see it intimated that an attempt will be made to repudiate the whole indebtedness on the ground that the directors possessed no legal authority to contract such obligations.

The whole transaction shows one of the most barefaced pieces of swindling on the part of a body of men acting in concert, that we have ever heard of. It is not difficult to find cases where single individuals have played the rogue at the expense of a corporation, the public, or both; but for a number of directors to proceed unitedly in this manner and maintain public confidence so long, is surprising, indeed. But this is not all. How could a game of that sort be carried on for a length of time without coming to the light? We can very readily understand that few men, desirous of investing their surplus means, find it convenient to consult acts of Parliament on every occasion that may arise. But had nobody in England eyes to see the true state of that company's affairs? Have they published no statements of their receipts and disbursements from year to year, that such a mountain of debt should be created apparently without the knowledge of either shareholders or bondholders? The fact that such monstrous proportions could be attained as have been shown, without a note of warning from any quarter, is what, perhaps, should excite the greatest surprise. We question whether it could have taken place in any other country than England.

As to any corporation repudiating under such circumstance, it is not to be thought of. The probability is that in this case the stockholders were quite as culpable as the directors, either by neglecting to look closely into the management of affairs, or by directly conniving at the fraud. In any such case the whole interest should be made to suffer. It is the only plan by which vigilance can be secured: otherwise a *carte blanche* is given to each manager to cheat the public to the utmost, assured that the latter only will be the sufferers.

Railroads in Sweden.

The railroad from Stockholm to Gottenburg, on the Cattegat, is progressing steadily, and is expected to be open for travel next year. The government have also directed a road to be surveyed from Stockholm to Neynus, a port about twenty miles from the capital and open to vessels all the year round; while Stockholm is usually closed by ice about five months. By means of these a line will be established stretching across the Southern peninsula and saving considerable time in sailing round it, as well as in keeping open easier communication with St. Petersburg. From the latter a railroad is to be run to a point called Baltic Port, by the Russian government. By the time these works shall have been completed, it is estimated that a continuous railroad will stretch between the capitals of Russia and Persia—probably 2,000 miles.

Hanover Branch Railroad.

This road is 12.20 miles in length, commencing at Hanover Junction, on the Northern Central railroad, 46 miles north of Baltimore, and extending westwardly to Hanover, at which point a junction is formed with the Gettysburg road, 17 miles in length, and with the Littlestown road, 7¼ miles in length. Both these roads are operated by the Hanover Branch Railroad Company. From the 10th annual report of the directors of this company we learn that the gross earnings during the fiscal year ending March 31, 1862, were:

From freight, passengers, etc.		$25,716 25
" working Gettysburg railroad		4,800 00
" " Littlestown "		1,244 00
" car service		857 10
		$32,617 35

The expenses were:

Transportation	$4,277 98	
Motive power	4,794 50	
Fuel	3,522 87	
Repairs of road and cars	3,444 17	
Car service	1,214 10	
Telegraph	60 04	
General expenses	1,121 89	
		19,030 37
Balance		$13,586 98

—about 41⅔ per cent. of the gross earnings.

The receipts from all sources during the year have been as follows:

Earnings as above		$32,617 35
Sale of iron, car, cross ties, repairing locomotive, rents, stock subscriptions, etc.		1,822 19
		$34,439 54

The disbursements were:

Working expenses, as above,	$19,030 37	
Renewal expenses	1,796 15	
Extraordinary expenses	957 17	
Rolling stock	4,749 70	
Mortgage bonds cancelled	5,600 00	
Discount and interest	2,287 02	
Taxes, etc.	212 81	
Materials	2,033 87	
	$36,666 59	
Materials used in excess of what were purchased during the year	2,759 00	
		33,907 59
Balance in treasury		$531 95

The following is a statement of the passenger and freight receipts during the nine years operation of the road:

	Passenger.	Freight.
1853	$7,025 10	$12,200 00
1854	8,910 43	13,584 83
1855	7,842 88	14,544 17
1856	8,486 02	22,617 24
1857	8,805 65	18,659 84
1858	8,877 66	16,354 18
1859	9,523 98	17,544 31
1860	8,657 77	18,368 84
1861	7,775 74	17,149 42

The leading articles of freight transported during the year 1859, 1860 and 1861 were:

	1859.	1860.	1861.
Iron ore, lbs.	10,338,340	11,386,600	1,363,800
Coal, "	18,930,152	21,610,394	13,714,016
Lumber, "	14,695,320	14,007,060	7,894,820
Grain, "	10,208,828	11,571,581	*63,297,870
Flour, bbls.	10,461	8,350	

* Balance of all the freight, consisting principally of grain and flour.

There were carried over the road during the year 11,155 through and 4,842 way passengers.

The letting of the repairs of the road having worked satisfactorily, the contract has been extended another year at $2,500—a reduction of $340. Provision has been made for continuing the ballasting of the track with broken stone. It is estimated that 5,000 cross-ties, and from 50 to 75 tons of new iron will be required for the year.

The mortgage bonds issued in 1852, amounting to $35,000 became due Feb. 1. The company not being prepared to redeem more than $5,600, an arrangement was effected with the holders of the balance to extend the payment of the same for ten years at 6 per cent. per annum. The company reserve the privilege of extinguishing them at an earlier period.

The equipment of the road consists of 4 locomotives, 3 passenger, 24 freight and 10 dumping and hand cars.

GENERAL STATEMENT.

Capital stock	$121,600 00
Mortgage bonds	29,400 00
Dividends due	208 00
Bills payable	1,050 00
Profit and loss	382 00
Profits from earnings of the road	71,565 28
	$224,205 28
Cost of road and appurtenances	$177,577 77
Real estate	785 39
Equipment	38,975 00
Materials on hand	5,103 17
Bills and outstanding claims	1,283 00
Cash	581 95
	$224,207 28

Finances of Connecticut.

The message of Governor Buckingham, of Connecticut, thus states the present indebtedness of the State:

For bonds issued	$2,000,000	
For three months' inter't.	30,000	
Making a total indebtedness of		$2,030,000 00
Estim'd expenditures present year.		1,133,384 00
Total.		$3,163,384 00
Charges against general government	$1,516,565 74	
Less bal. of credit	411,981 90	
Total	$1,104,583 84	
Ordinary rece'ts.	$134,500 00	
Interest.	86,000 00	
Cash on hand..	298,489 42	
	$468,989 42	
		$1,573,573 26
Estimated deficiency		$1,589,810 74

Which it will be necessary to raise, either by taxation or a loan, or by both.

In relation to the banks of the State the governor remarks:

"The Bank Commissioners report the seventy-five banks of discount and deposit in an improved condition from last year. They took a large portion of the last State loan of one million two hundred thousand dollars, and are rendering the usual facilities to the business interests of the State."

The four leading items in the reports of the Connecticut banks are:

Capital	$21,790,937
Deposits	6,079,204
Circulation	8,015,681
Specie	1,518,317

The circulation has increased 17, the deposits 20, and specie 50 per cent. since the last annual report. The deposits in the savings' banks are

$19,983,959, being an increase of $606,289 during the year.

Interest and Dividends.

The Lehigh Coal and Navigation Company have declared a dividend of three per cent., equal to one dollar and fifty cents per share, on the capital stock of the company, payable on demand.

The coupons upon the bonds of the New York and New Haven Railroad Company due June 1 will be paid at the office of the company or at the Bank of the Republic.

The Rome, Watertown and Ogdensburg Railroad Company have declared a dividend of 4 per cent., payable July 1; they also are offering to pay their bonds due Sept. 1.

The interest upon Iowa State Stocks due July 1, 1862, will be paid on and after that date at the Banking House of Messrs. Gilman, Son & Co., New York City.

The transfer books of Ohio State Stocks will be closed, at the agency in this city, from the 15th inst. until the 15th of July; and the interest on the State debt, some $420,000, will be paid by the Commissioners of the sinking fund, at No. 25 William street, in coin, from the 1st until the 15th of July.

The Manhattan Company, as agents of the State of New York, are now paying off $900,000 of the principal of the Public Debt, due June 1, in gold. The quarterly and half-yearly interest on the whole Public Debt, due July 1, will also be paid in gold.

The Delaware and Hudson Canal Company have declared a semi-annual dividend of three and a half per cent., payable on the 21st instant. The transfer books will remain closed until the 18th instant.

The Little Miami Railroad Company have declared a dividend of five per cent., payable June 2. Eastern stockholders may receive their dividends in New York funds by addressing S. E. Wright, Treasurer, Cincinnati, Ohio.

The coupons due June 1 on Milwaukee City Readjustment bonds will be paid by W. Schall & Co., 58 Exchange Place.

Finances of Brooklyn.

The Mayor has submitted his annual statement to the Joint Board of Aldermen and Supervisors, from which it appears that the following amounts are required to be raised by general tax for the expenses of the city from January, 1863, to January, 1864:

For principal on city bonds	$149,112 75
" interest on ditto	100,886 84
" principal on certificates	994 13
" interest on ditto	8,337 62
" salaries	95,500 00
" police purposes	220,200 00
" school purposes	165,450 00
" lighting streets	110,000 00
" general purposes	71,700 00
" fire department purposes	48,300 00
Total	$970,521 34
City revenue (estimated)	136,000 00
Amount to be raised	$834,521 34
The amounts to be raised upon the several wards for cleaning streets and repairing wells and pumps, is	17,150 00

The amount raised last year for the same purpose was $1,065,491 25, making a reduction in the taxes of over $200,000. The street cleaning account in 1862 was $50,200 and salaries $110,180. The sum of $9,500 is however added to the salary account for the Aldermen, to whom $500 each per annum will be paid next year, as provided by the new charter.

The Indebtedness of the World.

We condense from the London *Economist* the essential facts in relation to the indebtedness of the principal nations of the old world, which go to show that the United States, even after the immense expenditure required for the preservation of its nationality, will be far behind the contemporaneous governments in the matter of a large debt. We have turned the pounds sterling into our own currency at the rate of five dollars to the pound, which is near enough for the purposes of this article. The amount, however, will not be strictly accurate.

THE DEBT OF GREAT BRITAIN.

In the article from which we quote the debt of India, part of Great Britain virtually, is separately given, and the writer confesses that "if Australia had boasted of a surplus, and if Hungary had been getting deeper and deeper into debt, we should have vigorously contended that the accounts of the provinces and the accounts of the empire must be considered together."

The following is the debt of England itself:

	Dec. 31, 1847.
Funded debt	$3,862,009,255
Unfunded debt	89,732,500
Total	$3,951,741,755
	Dec. 31, 1861.
Funded debt	$3,922,100,035
Unfunded debt	77,649,000
Total	$3,999,749,035

The following is the debt of India:

	In India.	In England.
At the date of the last published return, being Dec. 31, 1860, for English debt, April 30, for India.	$386,451,225	$148,374,950

which is an augmentation of England's debt of about $235,000,000.

This does not include any liabilities of the Indian government or railway guarantees.

The bebt of England is $4,237,820,300.

DEBT OF FRANCE.

	1852.	1861.
Funded debt of France	$1,103,238,920	$1,943,655,380

making an expenditure in ten years of over $840,000,000 more than its income. France never has a surplus. In the year 1858, which was not affected by the Crimean war or by the Italian war, and in which the revenue of France was greater than it had ever been before or since, the account stood:

Expenditures	$371,800,000
Revenue	349,600,000
Deficit	$22,200,000
Between 1851 and 1860 (both inclusive) the expenditure of France has amounted to	$3,842,600,000
The revenue amounted to	3,098,400,000
Aggregate deficit	$744,200,000

DEBT OF AUSTRIA.

Austria never has a surplus. The governments of Europe have generally a habit of spending a good deal more than their income, and borrowing to supply the deficit.

Average revenue for four years, 1857-'60	$144,375,000
Average expenditure	197,750,000
Average annual deficit	$53,375,000
Total national debt, April 1860	$1,468,000,000

to which has since been added over $55,000,000.

Last year Austria spent $44,500,000 over and above her income.

DEBT OF ITALY.

Italy is added to the list of countries whose finance is likely to press on the money market for a time.

Total debt	$411,276,710

This is not much for a nation of her resources, but the excess of expenditure over revenue in the year 1861—the sum which she had to borrow—was but little short of $63,000,000, and this with a total revenue of but $98,000,000.

DEBT OF RUSSIA.

Of Russia we have not any very authentic account of her revenue and expenditures for the last few years. She has lately come into the market for a loan, and probably shares the want of money with the other nations and "the rest of mankind." By the authority of M. Ogareff, in a book recently published, the debt is stated as follows, and this is probably an approximation to the truth, if not the correct figures:

Total debt in 1861	$412,050,000

The statement in this book would also make it appear that Russia, during the year 1860, paid off $26,000,000 of her debt. It must be taken into consideration in this connection, however, that there is a note circulation of about $530,000,- and a specie circulation of only about $60,000,000.

DEBT OF TURKEY.

Turkey also spends more than her revenue.

The expenditure of 1859-'60 was	$55,440,000
The revenue was	48,555,000
Deficit	$6,885,000

And the deficit of 1861-'62 was $20,000,000 more than that.

Total debt	$207,500,000

In this amount $25,000,000 inconvertible paper money, against which no specie is held, is counted.

RECAPITULATION.

So that the debts of the principal nations of Europe are as follows in round numbers:

England, 1861	$4,237,000,000
Funded debt of France, 1861	1,964,000,000
Austria, 1860	1,468,000,000
Italy, 1861	411,000,000
Russia, 1861	412,000,000
Turkey, 1861	207,000,000

Proposals for New York State Bonds.

The State Comptroller will receive proposals until the 18th inst., for a loan of $800,000, on the credit of the general fund debt sinking fund. The interest will be at the rate of six per cent. per annum, payable quarterly, and the principal reimbursable July 1. Payments are to be made in specie or its equivalent, or in the certificates issued to the New York and Erie Railroad, reimbursable July 1, 1862. The Albany *Statesman* says:

"The State in this year of war pays off more than $2,000,000 of its funded debt, and we are informed that if the present policy of the State officers be rigidly adhered to, this will be the last loan the State will ever need to call for unless upon some extraordinary emergency, and that the entire debt will be extinguished within sixteen years. This loan is for the payment of the last instalment of the old Erie Railroad loan.

Receipts from Customs.

The receipts from customs at the Boston Custom House for the first four months of 1862, were $1,690,996 95
First four months of 1861 ..... 1,211,953 18

Increase $479,043 77

The receipts of customs at the Baltimore Custom House for the month of May, compared with the same month of last year were as follows:

May, 1861 ..... $55,184 90
" 1862 ..... 310,401 91

Increase $255,217 01

The duties received at the Philadelphia Custom House for the first five months of 1860, 1861 and 1862 were:

	1860.	1861.	1862.
May	$308,475	$114,921	$179,804
Previous 4 mos..	941 674	691,595	937,761
Total	$1,250,149	$806.516	$1,417,565

Railroad Earnings--Monthly.

The earnings of the Hudson River Railroad for May, 1862, were $192,442 41
Do., 1861 ..... 150,807 63

Increase $41,634 78

The earnings of the Panama Railroad for April, 1862, were $155,282
April, 1861 126,000

Increase $29,782

☞ An agreed case having been taken into the Supreme Court of Illinois, for the purpose of authoritatively settling the supposed obligation of the state treasurer to receive the Treasury notes of the federal government for state taxes, the court decided, by a unanimous vote, that the taxes must be paid in gold and silver, being so directed by the state constitution.

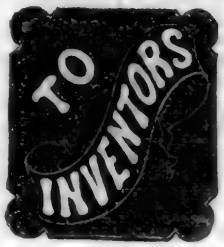
Desks and Office Furniture,

WAREROOM { No. 107 FULTON ST., Near Nassau, N. Y.

☞ LIBRARY FURNITURE made to order.

CLEVELAND & TOLEDO RAILROAD BONDS of all the various issues, including those of the Junction and the Toledo, Norwalk and Cleveland Railroad Companies, may be CONVERTED into the SINKING FUND MORTGAGE BONDS, when presented in sums of $1,000 to VERMILYE & CO., No. 44 Wall st., N. Y., or to the undersigned, at Cleveland, Ohio. The Sinking Fund Mortgage Bonds may be registered in the name of the owner, on application to H. C. LUCE, Treasurer.



THE RECEIVER OF THE CLEVELAND AND PITTSBURG RAILROAD COMPANY gives notice that the assets of the Company are in his hands, subject to the direction of the United States Court for the Northern District of Ohio; that by the order of the Court no portion of the earnings of the road can be applied to the payment of any of the unsecured indebtedness of the Company. All the earnings, after paying operating expenses, rent and mortgage interest, will be applied to the principal of those debts, which are due and secured, amounting at the present time to about a million of dollars.

The accrued interest on the three old mortgages has all been provided for from the earnings of the road, and the next interest to be paid is on the funded debt mortgage bonds (given in exchange for the unsecured indebtedness) on the 1st day of July, 1862. The holders of the River Line Bonds, Income Bonds, Dividend Bonds and Bills Payable, who have not yet accepted the terms of compromise offered them with the approval of the United States Court are notified to exchange their bonds and notes before the 25th day of June, 1862, or they will not be entitled to receive any portion of the earnings of the road. Interest will be paid only to those who accept the compromise.

The new bonds can be obtained in exchange for any unsecured indebtedness at the office of the Company in Cleveland, or at No. 25 William st., New York City, of H. C. KINGSLEY.

1m20 J. N. McCULLOUGH, Receiver.

Messrs. MUNN & CO.,

PROPRIETORS OF THE SCIENTIFIC AMERICAN continue to solicit patents in the United States and all foreign countries, on the most reasonable terms. They also attend to various other departments of business pertaining to patents, such as Extensions, Appeals to United States Courts, Interferences, Opinions relative to Infringements, etc. The long experience Messrs. MUNN & CO. have had in preparing specifications and drawings, extending over a period of sixteen years, has rendered them perfectly conversant with the mode of doing business at the United States Patent Office, and with the greater part of the inventions which have been patented. Information concerning the patentability of inventions is freely given, without charge, on sending a model or drawing and description to this office.

Consultations may be had with the firm between 9 and 4 o'clock, daily, at their principal office, No. 37 Park Row, New York. We have also a branch office in the city of Washington, on the corner of F and 7th sts., opposite the United States Patent Office. This office is under the general superintendence of one of the firm, and is in daily communication with the principal office in New York, and personal attention will be given at the Patent Office to all such cases as may require it. Inventors and others who may visit Washington, having business in the Patent Offices, are cordially invited to call at their office.

MUNN & CO., are very extensively engaged in the preparation and securing of Patents in the various European countries. For the transaction of this business they have offices at Nos. 66 Chancery Lane, London, 29 Boulevard St. Martin, Paris, and 26 Rue des Eperonniers, Brussels. Probably three-fourths of all the European Patents secured to American citizens are procured through this Agency.

A pamphlet of information concerning the proper course to be pursued in obtaining Patents, the requirements of the Patent Office, etc., may be had gratis upon application at the Principal Office, or either of the Branches. They also furnish a Circular of information about Foreign Patents.

During the last sixteen years the business of procuring Patents for new inventions in the United States, and all foreign countries has been conducted by Messrs. MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN; and, as an evidence of the confidence reposed in them by the inventors throughout the country, we would state that we have acted as agents for more than FIFTEEN THOUSAND Inventors! In fact, they have become identified with the whole brotherhood of Inventors and Patentees, at home and abroad. We would state that we never had a more efficient corps of Draftsmen and Specification Writers than are employed at present in our extensive Offices, and we are prepared to attend to Patent business of all kinds, in the quickest time and on the most liberal terms.

Communications and remittances should be addressed to

PROPOSALS

FOR $333,000 "CENTRAL PARK IMPROVEMENT FUND STOCK OF 1876."

SEALED proposals will be received at the Comptroller's Office, until FRIDAY, the 27th day of June, 1862, at 2 o'clock, P. M., when the same will be publicly opened for the whole or any part of the sum of THREE HUNDRED AND THIRTY-THREE THOUSAND DOLLARS of the "Central Park Improvement Fund Stock," authorized by Chap. 85 of the Laws of 1860, and by an Ordinance of the Common Council, approved by the Mayor, April 25, 1860.

The said stock will bear interest at the rate of six per cent. per annum, payable quarter-yearly, and the principal will be redeemed November 1, 1876.

The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted, will be required to deposit with the Chamberlain of the City, within fifteen days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the stock, bearing interest from the dates of payments.

Each proposition should be sealed and indorsed "Proposals for Central Park Improvement Fund Stock," and inclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if considered necessary to protect or promote the interests of the city.

ROBT. T. HAWS, Comptroller.

Comptroller's Office, May 28, 1862. } 3t23

Prince's Metallic Paint,

AN INDESTRUCTIBLE COATING FOR

IRON, TIN AND WOOD.

IT consists of seventy-two parts **Oxide of Iron,** and twenty-eight parts **Cement Lime Stone** in the one hundred pounds.

It has much more body than red or white lead. It is warranted perfectly water and fire-proof and to withstand a greater heat on metals, without scaling, than any other paint in use.

It is a perfect cover for all kinds of iron, tin or woodwork, out-houses and canvas coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone as has been proven at the largest foundries in the country.

For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zinc, and much less than the ordinary mineral paints. It is free from any waste, and possesses a **spreading and covering power unequalled.**

TERMS,

By the Barrel or Half Barrel, { **FOUR CENTS per pound.**

A liberal discount made to parties purchasing by the ton. A Barrel or Ton will be forwarded to any Railroad companies desirous of testing its qualities, for which there will be no charge if it does not give entire satisfaction.

DANIEL SLOAN, Gen'l Agent,
71 Maiden Lane, New York.

LOCAL AGENTS:

S. R. WILLIAMS, { 204 South Front st., **Philadelphia.**
CALVIN GAY, 81 State st., **Boston.**

MINING ENGINEER AND METALLURGIST.

A YOUNG gentleman just returned from Europe, a graduate of the Royal Mining Academies of Freiberg and Clausthal, offers his professional advice and opinion on the value of Mines, Mineral Lands and Mining operations generally.

Having directed his attention particularly to the smelting of ores and to the extraction of useful products from their natural mineral, he offers his services in this particular branch of the business, and would have no objection to give to a limited number of pupils private lessons on the subject of smelting.

CUMBERLAND COAL.

THE BORDEN MINING COMPANY

ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL,** DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGE'S CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to

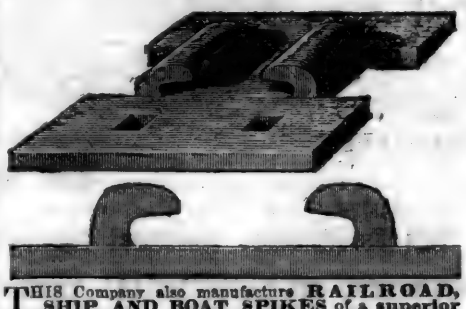
ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. Contracts negotiated by
E. A. & S. W. HOPKINS,
70 Beaver st., New York.

RAILROAD IRON.
2,000 TONS Railroad Iron, New York and Erie pattern, "Crawshay's" make,—50, 56 and 58 pounds per lineal yard, afloat, or in yard at Brooklyn, ready for immediate delivery; for sale by
FIRM } **THEODORE DEHON,**
May 8th, 1862. **28 Beaver st.**

RAILROAD IRON.
THE undersigned, agents for the manufacturers, are prepared to make **CONTRACTS FOR RAILS** delivered free on board at ports in England, or exship at ports in the United States
M. K. JESUP & COMP'Y,
44 Exchange Place.
New York, 1st June, 1859.

RAILROAD IRON.
3,400 TONS BEST QUALITY WELSH RAILS—T pattern—56 lbs. per lineal yard, for sale by
CHAS. L. PERKINS, or
E. LIVINGSTON,
3m15 **54 Exchange Place.**



RAILROAD IRON.
THE subscriber is prepared to enter into **Contracts for RAILS** delivered at an English port or at a port in the United States.
JAMES TINKER,
54 Exchange Place,
NEW YORK.
Erie Rails, 57 to 58 lbs. per yard, on hand in NEW YORK and NEW ORLEANS.

MORRIS, WHEELER & CO.,
SUCCESSORS TO
MORRIS & JONES & CO.,
IRON MERCHANTS,
MARKET AND SIXTEENTH STREETS,
PHILADELPHIA.
IRON AND STEEL
IN ALL THEIR VARIETIES.
BOILER PLATE, CAR AXLES,
BOILER RIVETS, RAILROAD IRON,
CUT NAILS and SPIKES, PIG IRON, etc.
Having the selling agency of a number of the Rolling Mills, Furnaces and Forges in this State, **orders for any description of IRON** can be executed.

RAILROAD IRON
AND COMMON BARS.
THE undersigned, sole Agents to Messrs. GUEST & Co., the proprietors of the Dowlais Iron Works, near Cardiff, South Wales, are duly authorised to contract for the sale of their G. L. Railroad Iron, and Common Bars, on most advantageous terms.
R. & J. MAKIN, 70 Broad st.

CAR DUCK.
HEAVY 4-PLY FITCHBURG DUCK OF ALL WIDTHS, 11 to 140 inches, PLUSHES, BURLAPS, CAR HEAD LININGS, and all kinds of RAILROAD SUPPLIES.
For sale by
WILLIAMS & PAGE,
67 Water st., Boston

NEW YORK
Railroad Chair Works,
J. S. BREESE, *Pres't.* J. S. DAVENPORT, *Secr'y and Treas.*
Office, No. 89 Maiden Lane, cor. Gold St., NEW YORK.
JOSIAH S. LEVERETT & CO.,
SOLE AGENTS.

THIS Company also manufacture **RAILROAD, SHIP AND BOAT SPIKES** of a superior quality, which they are prepared to supply at the **shortest notice.**

PHŒNIX IRON COMPANY'S

SUPERIOR WROUGHT IRON
RAILWAY CHAIRS,
With continuous lips, made to fit exactly the flanges of the rails.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.			Sheet No		
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft. Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.		14.	" " 20 "	1½ to 1
3.	Base 12 ft. Slopes	1½ to 1	15.	" " 24 "	¼ to 1
4.	" 14 "	1½ to 1	16.	" " 24 "	1½ to 1
5.	" 15 "	¼ to 1	17.	" " 25 "	1½ to 1
6.	" 15 "	1 to 1	18.	" " 26 "	1½ to 1
7.	" 15 "	1½ to 1	19.	" " 28 "	¼ to 1
8.	" 16 "	¼ to 1	20.	" " 30 "	1 to 1
9	" 16 "	1 to 1	21.	" " 30 "	1¼ to 1
10.	" 18 "	¼ to 1	22.	" " 30 "	1½ to 1
11.	" 18 "	½ to 1	23.	" " 32 "	1 to 1
12.	" 18 "	1 to 1	24.	" " 32 "	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

The Late Freshet.

During the past week one of the most destructive freshets that ever visited this country ravaged large portions of Virginia, Maryland, Pennsylvania, New Jersey and this State. Its effects, indeed, are known to have been experienced all over the Atlantic slope, from Maine to the Carolinas. Pennsylvania, however, appears have been the chief sufferer. On the Delaware and Lehigh rivers the water is known to have risen as high as in the great freshet of 1841, which proved so exceedingly disastrous to the coal and navigation interests of that State. A period of twelve years elapsed before the Lehigh Navigation Company were able to resume the payment of dividends. It does not seem that this river has been so completely swept of its great improvements as on that occasion, though several dams, locks and bridges have been carried away. The causes why the State should suffer so severely are simple. In the first place, she has much more valuable property exposed to destruction than any other State lying to the Southward, and most of those lying to the Northward of herself. Her mountains are not only penetrated by numerous canals and railroads, but each of these has attracted to itself an extensive manufacturing industry, all of which suffers in the general wreck. Thus, a large number of the most important iron-works in the country are situated in the valley of the Lehigh, between Easton and Mauch Chunk. By means of the improvements made there, the soft ores obtained in the Pennsylvania mountains, are mixed with the harder ores from the Northern part of New Jersey, the product being manufactured into various uses or shipped directly to Philadelphia and this city. With the sudden rise of the waters some of those works were invaded before the furnaces had time to blow out; others were so inundated that the buildings sustained serious damage. In every case, there is more or less interruption in getting supplies and shipping products to the large cities. The Morris Canal will be a heavy loser in its business this season.

In the next place, through an agency lately alluded to in these columns, the Eastern parts of Pennsylvania and New York have become more exposed to ravages from heavy rains than States whose surface is largely covered by forests. The water rushes forthwith to the leading arteries and the ocean, instead of settling in the swamps and woodlands. This is one of the necessary evil consequences of improvements, or rather of improvements only half carried through. In a single day the Keystone State was made not less than five and possibly ten millions poorer than she had been the day before. Allowing for the States lying on both sides of her, we doubt not the total losses will foot up to the larger of the figures mentioned. Indeed, the Lehigh Valley alone is estimated to have been devastated to the extent of five millions. A similar sum judiciously expended would, we believe, have prevented nearly all the mischief; and when we come as a community to adopt the principle of prevention rather than cure, that sum will be forthcoming.

One of the preventive agencies has already been alluded to in these columns—the construction of numerous reservoirs in the mountain ravines, by which the surplus waters might be retained there, to be dispensed on future occasions to the lowlands. Considering what has already been accomplished, in our own country, for the purpose simply of supplying our canals, it will be readily seen how much more could be done, were the agricultural, manufacturing, mining and carrying interests to combine their strength on behalf of the proposed undertakings. The soil would be vastly benefitted by the retention of its best ingredients, now annually washed away, and by the process of irrigation, which would alone almost double its productive capacity. If the farming interest was sufficiently intelligent and enterprising, it would not hesitate in carrying into effect the improvements we have pointed out. But the truth is, *every* interest is directly concerned in the same general result, as the events of last week abundantly bear witness.

In connection with this, there is another agency which is equally simple and much less expensive, that ought to be employed without delay. The science of Meteorology has now arrived at such a pitch that every general and violent storm, such as that of Wednesday week, can be predicted with almost absolute certainty twenty-four or thirty-six hours in advance. By means of the telegraph this information might be communicated to all parts of the country in a few minutes, so that signals could be displayed along the coast, while in the interior works could be put in a state of readiness to receive the expected visitor. Every reservoir could thus be run dry; every canal be lowered; even the boatmen could be forewarned. A large number of valuable lives perished during the late freshet, every one of which might have been saved to their own families and the community at large.

We are here making use of no reckless assertions. The experiment of "forecasting" the weather has been tried in England. It is conducted on strict scientific principles by a Department under the supervision of Admiral Fitzroy. To defray the necessary expenses in connection with it, the British Government makes a small appropriation annually. A leading London journal remarks that this invention has already been the means of saving hundreds of lives annually. It is admitted on all hands that though Fitzroy has made frequent mistakes as to *local* gales, yet that no great general storm has visited the country during the past year without being heralded for several hours in advance by the display of signals along the coast, warning seamen to keep off shore or not to venture out for the time being. In this

country, owing to the uniformity of our general coast lines, the laws of the storm will doubtless be found more simple than in any part of Europe.

When our government and people determine to adopt the instrumentalities which science has put within their reach to obviate the dangers arising from storms and floods, they can readily be obviated.

Cincinnati, Hamilton and Dayton Railroad.

The gross income of this company for the fiscal year ending March 31, 1862, after division of earnings with the Little Miami and Columbus and Xenia Railroad Company, was as follows:

From passengers		$272,117 30
" freight		298,289 69
" mails and express		36,854 57
" rents of track and machinery		30,914 11
" " real estate		2,063 75
" interest		5,966 21
		$646,205 57
And the expenses were:		
Repairs of road	$62,472 86	
" bridges	8,384 39	
" buildings	8,678 53	
Passenger expenses	84,357 21	
Freight "	99,962 39	
Other train "	1,450 20	
Station "	10,802 58	
Office "	13,019 77	
Shop "	9,407 92	
Watching bridges	5,579 08	
Miscellaneous	12,374 06	
		316,490 99
Balance of earnings		$329,714 58
Interest on bonds	$95,030 84	
Taxes and insurance	13,706 40	
Balance profit and loss ac't	175 83	
		108,913 07
Net income for the year		$220,801 51
Dividend, October, 1861, 3½ per cent.	$75,453 00	
Dividend, April, 1862, 4 per cent.	86,232 00	
		161,685 00
Surplus		$59,116 51
Surplus previous year		36,041 23
Total surplus		$95,157 74

The sinking fund is fully up to the requirements of the resolution passed by the stockholders in the year 1855.

The gross receipts for the year ending March 31, 1862, after division, were	$646,205 57
For the year ending March 31, 1861.	615,071 07
Showing an increase of	$31,134 50
The expenses for the year ending March 31, 1862, including interest on bonds, taxes and insurance, were	$425,404 06
Expenses for previous y'r	440,475 76
	15,071 70
Making the increase in net earnings	$16,206 20

The number of passengers carried during the year was 358,992—a decrease of 120,945. The tons of freight carried amounted to 249,540—a decrease of 26,653. The track and equipment have been kept in good repair. There have been used in the former during the year, 715½ tons of rails, 34,880 cross-ties, 26,800 lbs. spike and 46,385 wrought iron chairs. There will be required for the current year, 700 tons of rails, and about 12,000 cross-ties. Ten passenger, four baggage and forty new freight cars have been built in the company's shops, the past year, at a cost of $42,289 65. There have also been built two warehouses, one at Middletown station, and the other at Miamisburgh station. In Cincinnati, a car house, 32 by 165 feet has been erected. The cost of these improvements and new cars has been charged to transportation expenses.

The contract for a division of business and earnings, made in 1860, between the Little Miami, Columbus and Xenia, Dayton, Xenia and Belpre, and this company, continues to work advantageously to the public, as well as to the parties more directly interested.

Treasurer—Lafayette Banking Company.
Secretary—Frederick H. Short.
Superintendent—Daniel McLaren.
Freight Agent—Joshua R. Reed.

Movement of Freight on the Rail and Water Lines of Pennsylvania and New York.

The State of New York having unintercepted water communication between its great seaport and the lakes, owns the principal artificial route between the East and the West, for the carriage of the produce of the interior to the seaboard. More than this, New York has two rail routes with the trade centers of the inland region, with a net work of iron outstretching West even into the frontier States. New York, therefore, is in a position to command a vast tonnage over her carrying lines, and that she does command such tonnage the tables of tons moved indubitably attest. Nevertheless, it is a fact that, notwithstanding her two-fold means of communication with the country back and beyond her territory—a vast country always in communication with the seaboard for the interchange of commodities, after the fashion which establishes and perpetuates commercial relations—the artificial improvement lines of New York carry a less number of tons of freight in a year than are carried over the artificial improvement lines of Pennsylvania!

The reason of the preponderance of tons carried by the Pennsylvania lines is, that, whilst New York has more variety in her facilities for carrying freights between the East and the West, Pennsylvania has more capacity for supplying freights from her own resources. In truth, so marked and positive is the difference between the two States in capacity for production of marketable tonnage, that Pennsylvania produces more tons from within her own territory than all the tonnage carried across New York, superadded to the tonnage supplied from all sources within New York.

In internal commerce, consequently, Pennsylvania is dominant over New York, as much so as is the seaport of New York, in foreign commerce, dominant over the seaport of Pennsylvania.

In 1861 the more important of the lines in the two States, moved the number of tons subjoined:

New York carriers:	Tons.	Tons.
New York State Canals		2,980,144
New York Central Railroad	1,167,302	
New York and Erie R. R.	1,253,419	
Buffalo and State Line R.R.	600,031	
Hudson River Railroad	370,098	3,390,850
Total		6,370,994
Pennsylvania carriers:	Tons.	
Philadelphia & Reading R.R.	2,348,906	
Pennsylvania Railroad	1,620,586	
Delaware, Lackawanna and Western Railroad	1,285,962	
Lehigh Valley Railroad	1,176,745	
Northern Central Railroad	489,155	6,921,354
Delaware & Hudson Canal	1,562,851	
Schuylkill Canal	1,385,377	
Lehigh Canal	1,145,881	
Monongahela Navigation	735,404	
Penna. R. R. Co.'s Main Line Canal (estimated)	520,000	5,349,513
Total		12,270,927
Here we have a difference in favor of the Pennsylvania lines of		5,899,933 tons.
This is equal to ninety per cent.!		
The tonnage of the lines in the State of New York, other than those enumerated in the foregoing, was		2,069,559 tons.
Tonnage of lines enumerated		6,370,994 "
Total tons moved in State of New York		8,440,553 tons.

This aggregate is much below the joint tonnage of the ten Pennsylvania lines enumerated, whereas if all the lines in Pennsylvania were given, their joint tonnage would be more than twice the New York exhibit.—*U. S. R. R. and Mining Register.*

Great Western (Ca.) Railway.

REPORT OF THE DIRECTORS.

The receipts on capital account during the last half-year amounted to £5,202 17s. 9d., making the total receipts on 31st January, 1862, £5,218,300 5s.

The expenditure now amounts to £5,019,662 12s. 6d. This includes the extra cost of renewing wooden bridges in stone and iron and the expenditure incurred in fish-jointing eight and a-half miles of rails renewed during the half year. There are still ninety and a-half miles of the main line to "fish-joint," and the expense of this, as it is hereafter incurred, will be charged to capital.

It also includes a sum of £14,618 9s. 4d., which, it will be observed, has now been charged to capital as "loss on value of rails in stock." These rails form the residue of those purchased when the road was first made; a very large portion of them were used by the contractors in the construction of the line, and also in completing its ballasting during several years after the railway was opened. The rails in this way became much damaged in value, but the stock has now been estimated by Mr. Reid, at its present market price in Canada, much below the figure at which the rails were originally purchased, with the duty and other charges upon them.

It should be mentioned that the rails which have hitherto been supplied for the maintenance of the road out of this stock have only been charged to revenue at their proper value.

The sum of £8,219 3s. 7d., advanced for the Port Huron and Milwaukee Railway in 1858, hitherto included in the balance-sheet under the head of "Sundry Accounts due to the Company," has also now been charged to capital.

The balance at the credit of capital account is, therefore, £198,637 12s. 6d.

With reference to the charges against capital, it may be observed that during the last two years no less than five additional locomotive engines, with their tenders, have been built at the company's workshops and paid for out of revenue, as well as, in accordance with the last report, the cost of fish-jointing ninety-six and a-quarter miles of road, amounting in all to £11,762 0s. 3d.

The revenue account for the half-year ending 31st January, 1862, shows the following results:

Gross receipts			£265,951 11 11
Working expenses, including maintenance, taxes, insurance, and rent of suspension bridge.			125,424 17 10
Balance			£140,526 14 1
From which there has to be deducted—			
Interest on Government loan	£17,498 5 0		
Interest on Company's bonds	37,725 9 3		
Renewals of rails, sleepers, bridges, etc.	27,442 15 4		
Flamborough accident account.	882 11 8		
Balance of bad debt account	3,700 5 6		
		87,249 6 9	
Leaving the balance from the half-year's working of		£53,277 7 4	
Out of which the directors recommend the payment of a dividend at the rate of 8 per cent. per annum, which will absorb.		50,142 14 3	
		£3,134 13 1	
To this has been added the surplus from last half-year		18,373 0 6	
Balance.		£21,507 13 7	
From this balance the directors have written off the sum of £7,453 7s. 1d., being one-third of the arrears of interest amounting to £22,360 1s. 4d. hitherto standing in the balance-sheet against the Detroit and Milwaukee Company		7,453 7 1	
Leaving to be carried forward to next half-year's accounts the sum of		£14,054 6 6	

The following statement shows the traffic and working expenses of the line for the last four half-years:—

	Receipts.					
Half-year.	Passengers and mails.	Goods and live stock.	Rents.	Total.	Expenses, including taxes, insurance & suspension bridge rent.
	£	£	£	£	£
July, 1860.	98,808	91,528	884	191,220	114,260
Jan., 1861.	128,251	128,619	953	252,820	121,406
July, 1861.	95,771	112,800	744	209,315	129,616
Jan., 1862.	104,167	161,069	714	265,950	125,424

The working expenses of the last half-year are at the rate of 47.16 per cent., and for the whole year 54½ per cent.

The war in America in the early part of the half-year greatly affected trade and disturbed railway traffic, but after the close of navigation a large quantity of freight, which before the war used to go down the Mississippi, was turned in the direction of the Atlantic ports, and very largely benefitted the traffic of this and other parallel lines.

The suspension of specie payments in the United States has caused considerable embarrassment in converting American currency into negotiable funds, but the Executive in Canada have exerted themselves most efficiently in counteracting this inconvenience; and the whole loss from this source, including that from the unavoidable rise on exchange on the remittances for England and other similar causes, is under £1,800 for the half-year. There are also some balances due from Southern railways, not likely now to be recovered, to the amount of £145 13s. 9d., which are included in the sum of £3,700 5s. 6d. of bad debts. The whole of these sums have been charged against the revenue of the past half-year.

The receipts of the Detroit and Milwaukee line have very satisfactorily increased during the winter, and the traffic brought upon the Great Western Railway by that line is estimated to amount during the past half-year to £25,508 10s. 9d., as against £23,765 19s. 1d. for the corresponding six months of 1860.

The result of the working of the Detroit and Milwaukee Railroad during the year 1861 was that, within £2,500, it earned sufficient to have provided (but for the debts specially ordered by the court to be paid) for the payment of interest upon the whole of the bonded debt of that company.

The anticipations respecting the importance of the earth oil district as a source of fresh traffic seem likely to be realized, and the plank road to Wyoming Station from Bear Creek being found totally inadequate to accommodate the business, the directors request the sanction of the proprietors to an outlay of about £10,000, which would be sufficient, as they are informed, to provide a rough rail or tramway sufficient to meet the present requirements of the district and prevent the trade taking another channel.

The directors have to record with regret the loss by fire of the corn elevator and grain warehouse at Hamilton, on the 18th of February. The loss in money will be defrayed by the insurance fund, but until its reconstruction inconvenience must of course arise to the grain traffic, though this is fortunately alleviated by the auxiliary elevator which the company possess at Hamilton Wharf. A new elevator, to replace that destroyed, will be completed by the 14th of June at a cost of £4,600.

The directors have to report that the Commercial Bank of Canada continue to proceed with their suit in the court of Michigan, alluded to in the last report.

The bank has also commenced another action in Canada against the Great Western Company, but the directors are assured by their legal advisers that the bank has no prospect whatever of success in either suit; as, however, the matter is now before the courts of law, any discussion of the merits of the case is obviously impolitic and to be deprecated.

The directors have much satisfaction in stating that an agreement was entered into by them with the directors of the Grand Trunk Railway Company on the 31st of January, subject to the sanction of the proprietors of both companies for securing the advantages of economy and unity of interest to both concerns, by placing the whole under one management, with a fusion of all receipts. This agreement, however, requires that in the first instance permissive powers be given by the Canadian Legislature, and it is expected that the bill now before it for that purpose will be in committee by the middle of May. So soon as the fate of the bill is decided, a special meeting of the proprietors will be convened. Some of the details of the arrangements are not yet quite complete. The directors therefore trust that the proprietors will permit them to abstain from entering at present into farther particulars upon this most important matter until such special meeting is called for its consideration, when they will, of course, be prepared to afford every information on the subject.

The directors are happy to be enabled to add that, by a memorandum just received from Canada, Messrs. Brydges, Watkin and Carter have proposed to refer the terms upon which the Buffalo and Lake Huron Company may join the federation of the Grand Trunk and Great Western Railways to the decision of the chairmen of the London boards of those three companies for settlement.

Immediately after the London meeting in December, Mr. Brydges laid his resignation before the directors, intimating at the same time his willingness to remain in their service until a successor could quite conveniently be appointed. Mr. Brydges was shortly afterwards engaged by the Grand Trunk Railway Company as their manager. Under these circumstances, when the agreement before referred to was entered into with that company, it became obviously undesirable to appoint any successor to Mr. Brydges if that arrangement were to be carried out.

Pending, therefore, the decision of the proprietors upon the agreement proposed, the directors have retained the services of Mr. Brydges in the position he has hitherto occupied.

Signed on behalf of the Board of Directors in in England,

F. S. Read,
Chairman of the English Board.

London, April 24, 1862.

Trade and Commerce of Buffalo.

The "Annual Review" of the trade and commerce of the City of Buffalo, lately issued, is very comprehensive and elaborate. Among other interesting items concerning the movements of grain, it comprises a complete table, showing the amount sent eastward from the Lake regions—Ohio, Indiana, Michigan, Illinois, Wisconsin, Minnesota and Canada West—during six years; and also the per cent. of receipts at the principal Eastern (Lake) receiving points. We extract as follows:

Table *showing the variations in the movement eastward from* 1856 *to* 1861, *as given below, viz.:*

1856.	3,865,442	19,505,358	14,282,632	4,592,569
1857.	3,397,594	16,763,285	8,779,832	2,256,914
1858.	4,499,613	21,843,850	10,495,554	5,035,097
1859.	3,760,274	16,865,708	4,423,096	4,264,051
1860.	4,106,057	32,334,391	18,075,778	7,712,032
1861.	6,533,869	46,384,144	29,524,628	10,656,116

Reducing the flour to bushels of wheat, the following table will show the total eastward movement in bushels, and the receipts at Buffalo, for the years indicated:

	Total eastward movement.	Receipts at Buffalo.	Buffalo per cent. of total movement.
1856	57,707,769	26,239,791	45.5
1857	44,789,851	20,052,689	44.8
1858	59,872,566	28,219,855	47.1
1859	44,354,225	22,215,425	50.0
1860	78,652,480	37,133,461	47.2
1861	119,264,233	61,460,601	51.5

Table *showing the per cent. of receipts at the principal receiving points, for four years from* 1858 *to* 1861, *inclusive of the foregoing eastward movement:*

Locality.	1858.	1859.	1860.	1861.
Buffalo	47.1	50.0	47.2	51.5
Oswego	19.2	17.1	21.7	15.6
Montreal	9.2	8.7	9.2	12.6
W. Ter. B. & O. R. R.	6.5	5.7	2.4	6.0
Ogdensburg	6.0	5.8	3.5	3.4
W. Ter. Pa. C. R. R.	4.3	4.2	3.9	1.1
Dunkirk	3.4	5.6	4.2	3.8
Suspension Bridge	2.0	0.7	6.5	5.4
Cape Vincent	1.8	1.3	0.8	0.6
Rochester	0.5	0.9	0.6	0.1
	100.0	100.0	100.0	100.0

Philadelphia and Reading Railroad.

The total length of track in the Reading Railroad and its branches (seven in number) is 311.96 miles, or including the sidings, 415.97 miles. It would seem to be inevitable that most of the short lines penetrating the coal deposits should be leased by or consolidated with the great roads resting in Philadelphia, New York, Baltimore or Pittsburg. The Schuylkill Valley and Mill Creek railroads have been added by lease to the Reading during the past year, and the Allentown and Schuylkill and Susquehannah lines by the purchase of stock.

The report shows that with every improvement in the track and machinery a steady reduction in the cost of transportation is taking place. This, however, is due in part to the larger bulk carried. Thus, in 1852, the expense of carrying general merchandise over the whole road was $1.09.5 per ton; in 1862, it was $0.70.2, while the profit amounted to $0.55.2. The expense of carrying coal was $0.41; profit $0.77.2. For passengers the former was $1.37.5, and the latter $1.06.75. It will be seen that the gain in general merchandise was least; while that on a passenger carried over the whole road was the greatest, being nearly equal to two tons of ordinary freight, or one and a-half tons of coal.

It is principally as a coal road that the Reading derives its great importance. The statistics in connection with this service may be set down as based on the most favorable circumstances that can be imagined; and it will be well to remember this fact, when instituting comparisons between the Reading and other roads. Thus the former enjoys a continuous level or descending grade from Pottsville to tide-water, enabling heavy loads to be conveyed at a minimum of cost. Its track is in excellent condition. Its stock, depots, sidings and other conveniencies are ample. Anthracite coal is used, which can be purchased at first cost. All these advantages have been the creation of twenty years' outlay. For the round trip of 190 miles the report estimates the expense of hauling an average load of 435.6 tons of 2,240 lbs. each at $90 71, or 20.82 cents per ton. But this is exclusive of repairs, renewals or interest charges which add about as much more.

The number of locomotives owned is about one to every 2.8 miles of track of roads and sidings—probably the largest equipment on any leading road in the country. The majority of these were built at the company's shops, where eleven were also re-built during the past year. The number of coal cars (5,608) gives an average of nearly fourteen to every mile of track. The engine which has run the greatest number of miles is the Hudson, built by Mr. Baldwin in 1844; she has made 276,892 miles, altogether, including 12,486 miles last year. The greatest work done by any of the company's locomotives was rendered by the Reading, built in 1842; her total mileage is given at 249,987 miles, including 13,065 for last year. The Messrs. Norris furnished one the same year which has made 256,900 miles, including 4,570 miles in 1861. Messrs. Danforth, Cook & Co., of Paterson, supplied, in 1857, the Petrel, which has in that period (four and a-half years) travelled 127,430 miles, of which 25,380 miles were run the past year. Three engines built by Braithwaith & Co., of London, in 1838, have not averaged 200,000 miles each.

Finances of Ohio.

The semi-annual report of the sinking fund commissioners of Ohio places the total reducible State debt at $14,699,426—an increase of $404,000 since the last report. The sinking fund receipts for the last six months are $1,062,507; the disbursements $838,389.

Railroad and Highway Crossing.

THE LAW OF MASSACHUSETTS AS TO THE CROSSING OF COMMON ROADS AT THE SAME LEVEL WITH RAILROADS. A HIGHWAY CONSTRUCTED AFTER THE RAILROAD IS BUILT SHOULD NOT CROSS AT THE SAME LEVEL, UNLESS ABSOLUTELY NECESSARY FOR PUBLIC CONVENIENCE.

In 1856 the Mayor, Alderman and Common Council of the City of Lawrence, laid out a highway in that city, across the railroad track of the Boston and Maine Railroad Company, which was to be so constructed as to cross the company's track at the same level; and as such crossings usually do, much inconvenience to the company would naturally flow therefrom. In order to avoid this, the company sought the aid of the Supreme Court of Massachusetts, and prayed for a writ of *certiorari*, asking that the record of the proceedings of the authorities of the City of Lawrence in respect to the laying out of the highway in question might be quashed, on the ground that the city had no right to so construct their road as to put them to inconvenience or expense, that the laws of the State required that the road should be built either above or below the level of their track.

The city in their answer or defense set forth among other things, that an agreement had been made between the company and the former owners of the land where the crossing was, by which the former owners stipulated for a right of way to be used by them and their assigns, at the place where the highway was afterwards laid out.

After argument the court decided to grant the writ in favor of the company; and held, that under the Revised Statutes of Massachusetts, c. 39, § 69, town or city authorities had no power to lay out a highway across a railroad, on a level therewith; and a railroad company is not estopped from objecting to the exercise of such power by an agreement made by it with former owners of the land, which contained a stipulation for a right of way, to be used by such owners and their assigns, at the place where the highway was afterwards laid out. The following opinion was rendered by the court at the decision of the case.

CHAPMAN, J.—Such crossings necessarily create embarrassment, and there has been considerable legislation and some litigation in respect to them. In the construction of a railroad, the grades and levels must generally be established without much regard to the levels of the turnpikes and other ways which it may cross; and the levels of the turnpikes and ways must be made to conform to the necessities of the railroad. There are four different methods of arranging the crossings. 1, The railroad may pass over the other road at a higher level by means of a bridge. 2, It may pass under the other road, which will then pass over the railroad by means of a bridge. 3, It may cross it at the same level at which the other road was originally made. 4, It may be constructed so that the other road must be either raised or lowered a few feet, or even less to cross it at the same level. In the last two cases there is a sense in which the railroad may be said to cross "over" the other roads. This construction of the word over is adopted in Newburyport Turnpike Cross *vs.* The Eastern Railroad Company.

There are two classes of cases in which crossings must be provided for. 1, Where a railroad is to be constructed across an existing turnpike or other way. 2, Where a turnpike or other way is to be constructed across an existing railroad. The first class of cases was provided for by Revised Statutes c 39, §§ 66 and 67; the second class was provided for by § 69.

Sec. 67 received a construction in the case above cited, in respect to the words "over" and "under." It was held that they were not precisely opposites; but that though the word "under" as applied to the construction of a railroad, would require it to be constructed at a lower level than the turnpike or other way, yet construing the word "over" by applying it according to the subject matter, a railroad might be said to pass "over" the turnpike or other way when both were at the same level. It will readily be seen that without such a construction of the word in that section, an important class of cases would be entirely unprovided for, namely, the fourth class above mentioned, where a railroad is so constructed that, by a little raising or lowering of the other road, they may cross each other—at the same level. For there are many cases where it would be a much greater injury to the turnpike or other way to raise or lower it, to such an extent that it shall cross the railroad at a higher or a lower level, than to change it so that it shall cross at the same level. It was in view of this subject matter that this construction was given to the word "over" in that section.

But after a railroad is completed, the establishment of a new turnpike or other way across it is a different matter, and the language of the statute in respect to it is different. Sec. 69, provides that "if after the laying out and making of any railroad already granted, or which hereafter may be granted, any turnpike or other way shall be so laid as to cross said railroad, the said turnpike road or way may be so made as to pass under or over said railroad, and said turnpike or way shall in all cases be so made as not to obstruct or injure such railroad." The word "over" as used in this section has not received a judicial construction. If the subject matter required us to do so, we might give it the same construction that has been given to the same word in § 67. But this is not its most natural construction, and there is nothing in the subject matter which requires us to vary from the most natural construction. Where a turnpike or other way is to be made across an existing railroad, and to be so made as to pass over or under said railroad, it is comparatively easy to construct it in such a manner that it shall cross at a different level; and by constructing it thus it will "injure" the railroad much less than by crossing it at the same level. And it is to be remarked that the word "injure" which is found in § 69 is not used in § 66. We are therefore of the opinion that it was intended by § 69 to prohibit the laying out of turnpikes, highways, and townways across existing railroads at the same level. This construction is confirmed by a reference to subsequent legislation on the subject. St. 1842, c 22, provides for the cases in which a railroad has been so made as to cross a turnpike,

highway, or townway at the same level. If the town or city authorities are of opinion that the way should be raised or lowered, "so as to pass over or under said railroad," they may request the company to make the change; and if the company does not comply with the request, they may apply to the county Commissioners, who are invested with full and final jurisdiction of the matter. In this statute three terms, "over," "under," and "on a level therewith" are used; and by the term "over" a higher level is obviously intended.

In 1846 another act was passed upon the subject of crossings. It required every railroad which should thereafter be made across any turnpike, highway or townway, to be so constructed, "as to cross over or under the turnpike, highway or townway." In this section the term "over" obviously intends a higher level. Sec. 2 authorized the county Commissioners, upon the application of parties interested, after a hearing, to authorize and require the railroad to be constructed at such crossing "upon the level with the turnpike, highway, or townway, in such a manner as they may direct." None of this legislation touched the subject of laying out turnpikes, highways or townways across existing railways at the same level, as it would have been likely to do if it had been understood that any power existed to lay them in such manner.

The Statute of 1849, extended the authority of the county Commissioners. Section 1 made a further provision as to crossings in Boston. Section 2 extended the provisions of former laws to traveled places not laid out as highways or townways. Section 4 is as follows: "The original jurisdiction of all questions touching obstructions to turnpikes, highways and towns, caused by the construction or operation of railroads, shall be vested in the county Commissioners of the respective counties where such obstructions shall occur." This general provisions covers the whole subject, provided the construction we have given to the Revised Statutes c 39 § 69 is correct. If the Legislature had not so understood the section referred to, they would have been likely to include in this statute a provision regulating the exercise of the power of town and city authorities to lay out town ways across existing railroads.

By St. 1857, c 287, authority is given to construct turnpike roads and other ways across existing railroads on the same level. But the company is first entitled to a hearing before the county Commissioners, and such crossing is not to be permitted unless it shall be decided by the Commissioners that the public necessity so requires it. The provisions of this statute are continued in force by *Gen. Sts. c* 63 § 57 *et seq.* It is to be remarked that the Legislature regard the objections to laying out such new ways as being so forcible that the Commissioners are not authorized to sanction them for mere reasons of public convenience. The language is, "but not permitting it to be at a level, unless public necessity so requires." Under this provision, the way in question may be laid out so as to cross the railroad at the same level, if a public necessity exists for so constructing it.

But upon the view we have taken of the Revised Statutes the proceedings of the respondents are void for want of authority. Being thus void, none of the facts alleged in the answer can give them validity. The agreements of the petitioners, which are relied on to show that they ought not to object to the laying of the road, are immaterial. They provide for the establishment of a private way; and the petitioners might be willing that such a private way should exist across their track near to their depot, when they could have strong reasons for opposing the establishment of a public way at that place. *Certiorari granted.*

The New Plans of Internal Improvement by the Federal Government.

The lessons which the present war has taught may result in an improvement of our great water lines, which will work a change in the commercial affairs of the continent, quite as marked as those which must necessarily take place in its political condition.

By the treaty with Great Britain, following the last war with that power, it was stipulated that neither party should maintain upon the Great Lakes, in time of peace, ships of war carrying more than one gun each. The object was to remove mutual causes of distrust, as well as to avoid the cost of great armaments upon these waters. But since this treaty was made, the Canadas, as a part of the British Empire, have constructed canals past the rapids on the St. Lawrence, and the Falls of Niagara, by means of which, vessels of war may ascend into all the Lakes but Superior, and capture or destroy every town upon them within the territory of the United States, as they are all entirely defenceless against attacks by water, especially by the new agencies of destruction which have been brought into use. To meet this inequality of position in the only mode possible, it is now proposed so to enlarge the Erie Canal on the East, and the Illinois Canal on the West, and to improve the navigation of the Illinois River, that an overwhelming force of gun-boats may, on any emergency, be placed on the lakes both from the Hudson and the Mississippi. Such facilities for transportation would relieve all apprehensions of a successful inroad upon what is now an entirely exposed frontier, and would allow the withdrawal of the means of defence for operations in other quarters, as soon as the danger threatened was averted or removed. The plan suggested has received the careful consideration of the Committe on Military affairs on the part of the House of Representatives at Washington, which has unanimously agreed upon a report in its favor, with every prospect that it will meet with a favorable response from Congress.

On the East the plan proposes an enlargement of the Erie Canal to a depth of water of 12 feet, and with locks that will pass ships of war fitted for operations upon the Lakes. The cost of such an improvement is estimated all the way from $3,500,000 to $7,000,000. There are no engineering difficulties to be encountered, the new work required being of the simplest character possible. There is an abundance of water upon the route of the canal for the enlarged prism. On the West a similar enlargement is proposed for the Illinois Canal, though only to the depth of seven feet, which would equal the depth found on an average, in the Mississippi above Cairo. The work here might involve a cut, as proposed when the present canal was constructed, whereby a portion of the water of Lake Michigan could be turned down the Illinois and Mississippi. An excavation to a depth of only eight feet would accomplish this object, and would probably, be the most desirable mode of effecting the improvement, although the summit between Lake Michigan and the Illinois River might be fed from other sources.

Although the improvements proposed are to be undertaken as *military* works, it is plain to see that they would prove vastly more useful and valuable in commercial, than in military results or consequences. The condition of all commerce in this country is economy in the transportation of the bulky produce of the interior to markets, which are either within a narrow belt upon tide water, or in foreign countries. Upon the best constructed earth roads, the most valuable produce grown can be conveyed only a comparatively short distance before the value of such produce is eaten up in cost of transportation. Hence improved highways are a necessary condition to any considerable commerce either foreign or domestic. Indian corn would not bear cost of transportation in wagons over earth roads from the nearest points on the lakes to tide water. Such cost would very nearly equal the value of wheat; yet both products are grown 2,500 miles inland, and are laid down with profits upon the docks, not only of this city, but nearly every city of Europe, by means of our magnificent system of public works. The configuration of the country is most favorable to such works, while the gentle slopes of our great plains render navigable nearly all the rivers by which they are watered, and which in turn serve as most valuable feeders to our artificial lines.

The Erie Canal has reduced the cost of transporting a ton of merchandise from Buffalo to New York City, from $100 by the ordinary highways, to $2.50. The process of this marvelous reduction was a gradual one, the cost at the present time being only one-quarter what it was when the canal was first opened. The reduction has only followed the increased capacity of this work. There were transported over it the past year 2,300,000 tons of breadstuffs equivalent to 75,000,000 bushels, having a value of $70,000,000. Produce can be transported from the Western shores of Lakes Erie and Superior to New York, for $60 per ton. This work now allows the production of breadstuffs, at a profit, upon every portion of territory in the West yet occupied by our people, and is one of the most important agencies by which the financial strength of the country has been sustained in the present crisis.

But complete as our public works are, we still want something better. The average number of tons, each trip, transported by the boats navigating the Erie Canal the past season was 163. If their capacity could be increased to 500 or 1,000 tons, the saving in cost of transportation would be enormous—a saving which would inure equally to the benefit of the producer and consumer. The commercial value of such an improvement to every interest in the country would be incalculable. All would alike share in it. It would draw to the Northern ports the whole produce of the interior, and nearly render superfluous the existence or maintainence of Southern harbors. It would carry the habitable line of our territory hundreds of miles further West—that is, it would give a commercial value to products, hundreds of miles west of the extreme limits from which they will now bear transportation. We of course include in the plan of improvement, the enlargement of the Illinois Canal, so that every vessel now navigating the Mississippi, or any of its branches, might discharge their cargoes upon the Western shores of Lake Erie.

The effect of the improvement proposed would be to increase many times the value of the advantages we now enjoy, and which has enabled the country to display a strength which has excited the surprise, not to say the admiration of the world. But the works we have, in their present condition, have given us

the trade of only a portion of the continent. With the onward movement of the great tide of population, we must supply the means to give value to their industries—or rather we must encourage such onward movement, by supplying in advance such means or conditions. As yet, only one of the grand hydrographic basins of the interior has been occupied—those of the St. Lawrence and Mississippi really belonging to a common system. Another almost equally large is still a desert—that of which Lake Winnepeg is the centre, and watered by the Red River of the North, Saskatchawan, and other rivers. In a few years more the tide of emigration will flow into this, if we can by new and improved works secure a market for the products of its agriculture. Such a result would be effected by those proposed, and by no others. If they are rendered necessary in a military point of view, we have the satisfaction of knowing that they will in a very short time discharge their cost in the reduced charge for transportation which they will effect. We can thus make a military precautionary measure serve both as a means of protection, and of commercial aggrandisement to an extent far beyond that ever realized, even in a country whose progress has been almost magical, but which at the same time is but the necessary sequence of the energy and enterprise of our people in the construction of works, though on a smaller scale, similar to those now proposed.—*Hallett's Financial Circular.*

Public Debt of the United States.

The following is a statement of the amount of the public debt of the U. S., as it stood on the 29th of May, 1862:

Under what Act.	Rate of Int. Per cent.	Amount.	Total.
Loans—1842	6	$2,883,364 11	
Loans—1847	6	9,415,250 00	
Loans—1848	6	8,908,341 80	
Loans—1858	5	20,000,000 00	
Loans—1860	5	7,022,000 00	
Loans—1861	6	18,415,000 00	
Texan indemnity	5	3,561,090 00	
			$70,104,955 91
Treas. notes issued prior to 1857*	—	$105,111 64	
Treas. notes, issued under act Dec. 23, 1857*	—	175,900 10	
Treas. notes, under act Dec. 17,'60*	—	221,650 00	
Treas. notes, under acts June 22,'60, and Feb. March, 1861	6	2,767,900 00	
Treas. notes, under acts March 2, July 17 & Aug. 5, 1861	6	111,600 00	
			3,382,161 64
Three years 7.30 bonds	7.3	$120,523,450 00	
Twenty y'rs' bonds	6	50,000,000 00	
			170,535,450 00
Oregon War debt	6		878,450 00
U. S. notes†	—		145,880,000 00
Certificates of indebtedness	6	47,199,000 00	
5 and 20 years' bonds	6	2,699,400 00	
			49,898,400 00
4 per cent. temporary loan	4	5,913,042 21	
5 per cent. temporary loan	5	44,865,524 35	
			50,778,566 56
Total amount of public debt			$191,448,984 11

Average rate of interest paid on the entire debt, 4 354-1,000 per annum.

To this amount it is estimated that $100,000,000 should be added for unliquidated claims against the Treasury.

* Interest stopped. † No Interest.

American Railroad Journal.

Saturday, June 14, 1862.

The Grand Trunk Railway.

In the early part of January last a meeting of shareholders and bondholders in the Grand Trunk Railway was held in the London Tavern, to devise some measure for relieving that great work from its pecuniary embarrassments. A scheme, recommended by a Committee who had been appointed to investigate the whole subject, was accepted, and Mr. Watkins, one of the members, was authorized to proceed to Canada and urge its acceptance upon the Provincial Government. Its principal features were to capitalize the postal revenue payable during the next twenty-five years and amounting to about $7,000,000, making this available for present uses in paying off a portion of the floating debt and expending about $2,000,000 for equipment.

A bill to this effect was introduced into Parliament and has just become law. It occasioned, we observe, a good deal of excitement among the members, and a variety of amendments were offered, apparently rather for the purpose of killing it off than aught else. The measure, however, has passed both legislative bodies and become law. A commission is to be appointed to settle the question of the amount of postal payment. The Quebec *Chronicle* states that this will consist of Mr. Brooks, of Boston, and Mr. Moffatt, of Montreal, with probably Chief Justice Draper, as umpire.

A bill to authorize a consolidation of the Grand Trunk, the Great Western and the Buffalo and Huron Railways, was withdrawn during the session. The capital and liabilities of each interest were to remain separate from those of the others, the object being to prevent ruinous competition by establishing a *pro rata* distribution of the earnings of the whole. The bill, however, was merely permissive, the consent of three-fourths of the shareholders and bondholders both in England and Canada being necessary before it could be carried into effect. We are not advised of the reason why this bill was withdrawn; but suppose that its passage was impracticable at present. As, however, the managers of both the Grand Trunk and the Great Western profess to deprecate the effects of unwise competition, we suppose there will be less of this in time to come than there has been, whether the matter shall ever be regulated by law or not. Some lines that we could name on this side of the line, after several years' trial to run one another off the track, have at last concluded it did not *pay!*

The National Wire Works.

The attention of locomotive builders and railroad managers is asked to the advertisement of the *National Wire Works*, which appears in our columns. These works are in this city, the depot being at No. 63 Fulton Street. Wire cloth, such as is used in "Radley and Hunter's Spark Arrester," is made of all descriptions and materials. For covering cylinders, furnaces or other parts of locomotives, an excellent assortment of sheet brass can be obtained at the establishment of Messrs. Howard & Morse, referred to. Miners can also be supplied with wire rope of iron or copper, and of any required thickness. For all other purposes to which wire is put now-a days, it is only necessary to pay a visit to No. 63 Fulton Street.

The Finances of Missouri.

The recent Message of Gov. Gamble to the State Convention, accompanied by the report of the Auditor, shows that the financial condition of Missouri is quite as favorable as there was reason to expect, considering the ravages of war within her limits during the past twelve months. Most of the former document, indeed, is taken up with narrating events rather than discussing questions of debt, expenditure, income, etc. Of the $1,000,000 of Defence Warrants authorized by the Convention last fall for the payment and equipment of the State troops first enlisted, we learn that there has been already issued the sum of $720,000, which may be augmented by outstanding claims to $775,000. The Governor notices the influences which were made use of to depreciate the market value of these obligations, remarking that its ultimate redemption is abundantly provided for. Of the taxes for 1861 the sum of $279,425, partly in Defence Warrants, has been collected from the counties: while $694,220 is still due. Only forty-one counties have paid up in full; but the difficulty appears to have been increased by the resignation of a number of Sheriffs on political grounds. In seventy-three counties the work of collecting has not commenced. The officers are, however, finding it more easy to make collections as the country gets quieted. "You will thus see," observes the Governor, "that the Provisional Government is not in a worse condition than when it was established. It is true that another instalment of the July interest upon our bonds has become due and is unpaid; but it may be assumed that the holders of our bonds have not expected us to pay the interest when the tide of war was rolling over our State, and that they will not find, in our failure to pay under such circumstances, any reason to doubt our purpose to pay ultimately."

The Auditor in his report recommends that the Defence Warrants be made receivable for the unpaid taxes of 1860 and for those of 1863, as well as for 1861 and 1862—a proceeding which, he thinks, would have the effect of bringing their market value up to par. The people in the tax-

paying counties, he remarks, have sustained little or no loss from the efforts of those who endeavored to depreciate them. As the amount of taxable property in the State has decreased, it is supposed that the ordinance in its present shape would have the effect of leaving no funds for support of the civil government, should the taxes for only two years be payable in these warrants, which are not made re-issuable.

The tables appended to this report give the total amount of the tax list receipted for 1861 in 41 counties at $604,220 74, of which $253,386 96 has been paid. Adding revenue for licenses the aggregate is $279,425 51.

The gross amount of revenue of 1861, chargeable against the various Collectors, up to June 1st, 1862, in the forty-one counties referred to is	$604,220 74
Amount paid into the Treasury, up to above date, including Defence Warrants, is	253,386 90
Leaving a balance unpaid on the taxes of 1861, (less commissions, mileage, etc.,) of	350,833 78
Amount of cash and Defence Warrants received into the Treasury, on the taxes and licenses of said year is	253,386 96
On dram shop licenses of St. Louis, 1861	23,294 55
Foreign insurance licenses of St. Louis.	2,744 99
Total amount received in 1861, in cash and Defence Warrants	$279,425 51
Number of Defence Warrants issued up to the 1st of June, 1862, is.	720,000 00
Amount paid into the Treasury up to said date, is $94,265 00	
Returned and canceled by Paymasters Mo. State Militia 2,410 00	—96,775 00
Total amount of outstanding Defence Warrants, to June 1st, 1862	$623,225 00

Cincinnati, Wilmington and Zanesville Railroad.

The following is a synopsis of the report of the Receiver of this road for the fiscal year ending April 30, 1862:

Gross earnings	$191,141 03
Expenses for working the road	125,045 22
Net earnings	$69,095 81

Or 64½ per cent. of eatnings.

The number of local passengers carried was 57,029, and the receipts, $48,501 14. The number of foreign passengers, 9,755, and the receipts were $14,957 22.

The cash receipts and disbursements for the year were:

RECEIPTS.

In hands of Receiver May 1, 1861	$38,708 80
From passengers, mail and express	70,503 58
" freight	90,390 74
" foreign roads on transport'n acc'ts	26,943 95
" other sources	104 16
" rents	143 00
	$226,794 23

DISBURSEMENTS.

For E. Gest, Receiver	$54 26
For supplies and service	163,939 63
Amount paid president, directors and company, as per order of court	1,350 00
Amount paid G. S. Coe, Trustee, per order of court	796 07
Amount paid on old claims	2,468 08
" " Attorney's fees	1,363 83
" " foreign roads	4,362 66
Balance on hand	52,459 70
	$226,794 23

The following is a comparative statement of earnings and expenses for the year ending April 30, 1861, and 1862:

EARNINGS.

	1860-61.	1861-62.

March	11,597 41	12,060 79
April	12,863 31	12,465 43
Total	$168,102 22	$162,968 27

Elmira and Williamsport Railroad.

We gave last week the income account of this company for the fiscal year ending April 1, 1862. The following is the general account, showing the financial condition of the company at that date:

Construction account		$2,136,036 88
Elmira basin		50,000 00
Cash on hand	$3,913 56	
Cash items	3,735 00	
		7,648 56
Freight and toll bills due.	$8,200 86	
Less back charges	5,890 00	
		2,310 86
United States Government,	$6,003 07	
Less amount due on Government debent's acc't.	5,200 00	
		803 07
Debts due to the Company		2,395 28
Materials on hand, insurance, etc.		14,678 75
Williamsport basin		1,000 00
		$2,214,873 40
7 per cent. mortgage bonds		$1,000,000 00
Preferred stock	$500,000 00	
Common stock	500,000 00

Ebensburg and Cresson Railroad.

The track is being laid on the last section of the Ebensburg and Cresson Railroad, and the work will be completed during the present week. —*Harrisburg Patriot, May* 31.

Railroad Earnings--Monthly.

The receipts of the New York and Harlem Railroad for May are as follows:

May, 1862	$94,156 67
" 1861	83,856 46
Increase	$10,300 21

The earnings of the Michigan Central Railroad for May, 1862, were $186,039 13
Do., 1861 149,550 38
Increase $36,488 75

The Chicago and Rock Island Railroad earned in May, 1862 $95,595
Do., 1861 89,172
Decrease $8,423

The Milwaukee and Prairie du Chien in the past five months shows an increase in earnings over 1861 of $80,000.

The earnings of the Galena and Chicago Railroad for May, 1862, were $150,871 57
Do., 1861 165,707 22
Decrease $15,835 65
Corrected earnings for previous month 90,179 64

The earnings of the Buffalo, New York and Erie Railway, for the month of May were:

1862	$85,072 82
1861	56,173 59
Increase	$8,898 73

Through business was suspended the last week of May by the destruction by fire of the bridge at Lanesboro', on the Erie Railway.

The earnings of the Toledo and Wabash Railroad for May, 1862, were. $106,845 44
Do., 1861 78,277 61
Increase $28,567 83

The earnings of the Chicago and Northwestern Railroad in May, 1862, were:

Passengers	$24,081 31
Freight	59,691 22
Mails, express, etc.	2,656 86
Total	$86,429 39
Corresponding month, 1861	84,891 39
Increase	$1,538 02

The earnings of the St. Louis, Alton and Chicago Railroad for May, 1862, were $86,749 06
Do., 1861 75,250 21
Increase $11,498 85

The earnings by the Chicago, Burlington and Quincy Railroad for May, 1862, were. $182,585 53
Do., 1861. 169,099 73
Increase $13,485 80

The earnings of the Milwaukee and Prairie du Chien Railroad for May were $130,211
Corresponding month, 1861 112,265
Increase $17,946

Savings Banks in England.

From a Parliamentary return just issued in England, we learn that the number of depositors in Savings Banks amounted to more than a million and a half on the 20th November, 1861, and that the sums invested were close upon forty-two millions sterling. Of this enormous sum, nearly thirty-nine millions were contributed by individual depositors, and the rest by friendly societies and charitable institutions. Among individual depositors, the largest sum, about six millions, is contributed by persons who have invested from

£75 to £100; the smallest amount, some £72,000 only, by persons possessed of from £1 to £5.

Lake and River Defences.

While the New York and Illinois delegation in Congress are urging upon Government the enlargement of the Erie, Oswego and Illinois canals, to a capacity sufficient for the passage of iron-clad war vessels, for the protection of the commerce of the lakes and rivers, and the security of the country bordering upon them, it is to be hoped that the Michigan delegation will urge, as part of the system to be adopted by Government, the fortification of Mackinaw and the construction of a military road from some principal thoroughfare in the Lower Peninsula of this State, to Mackinaw and through the Upper Peninsula to the water at the head of Lake Superior. There is no section more exposed than that, none more inviting to attack by a foreign foe, and, for what is asked, no greater interest is as much imperilled. Every consideration of State and National policy favors the creation of easy land communication between the two Peninsulas of this State, while the importance of fortifying the Straits of Mackinaw is second to no other military necessity on the Lakes.—*Detroit Tribune.*

Illinois Central Railroad.

The Illinois Central Railroad Company has paid into the treasury of that State, in the last six years, $779,631. The public revenue now derived from this road reaches nearly $180,000 per annum.

The Illinois Central Railroad Company, in anticipation of an increased demand for its farming lands on the part of immigrants and our citizens of foreign birth, have established a foreign land department. It is the intention of the company, by this department, not only to effect the sale of its vast quantity of excellent lands, but also to agitate in Europe and at the East the subject of immigration to Illinois.

Camden and Atlantic Railroad.

The City Council of Camden have passed an ordinance authorizing the Camden and Atlantic Railroad Company to continue a branch road on Mechanic street, from Kaighn's Point, to intersect their main line near the Mount Ephraim road. This is intended as the terminus of the new road, now nearly graded, from Keyport to Jackson station, on the line of the Camden and Atlantic Railroad.

Erie City Coal Market.

The coal which comes to this market is from the Mercer county coal fields. This coal is very plentiful there, and is regarded as the best in the world for producing steam. It is taken from the mines to the canal by short railroads. The Erie and Pittsburg Railroad will run through the heart of this region, thus ensuring us always a plentiful supply of coal at reduced prices. We do not see how this road can fail to become one of the most profitable in the State. If we were a capitalist, we would not hesitate a moment to invest means in it.—*Erie Observer, May* 31.

Wisconsin State Taxes Declared Valid.

The opinions of Chief Justice Dixon and Associate Justice Paine, given this afternoon, reversing their decision of last winter, by which the State taxes for many years past were pronounced invalid, will be found in full in our columns this evening. This places the subject back where the decision of 1855 left it. The court adhered to their former opinion of the present tax law, as an original question, but have receded from their decision of last winter upon grounds of public policy and the principle of *stare decisis*. This will be good news to the whole State, and extricate it from difficulties otherwise irremediable.—*Madison State Journal, June* 2.

Railroad Earnings—Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending May 31, 1862, were:

14,191 passengers	$19,648 38
Mails and sundries	2,837 68
12,917 tons of freight and live stock	41,004 17
Total	$63,490 23
Corresponding week, 1861	67,125 20
Decrease	$3,634 97

Premium for Raising Sugar in Ohio.

The State Board of Agriculture of Ohio, will award a premium of $1,000 to the first person who makes 5,000 pounds of good brown sugar, and a specimen of white sugar of not less than twenty pounds in a single uncompressed block, from beets raised on five acres of ground within the State.

Finances of New Hampshire.

The State Treasurer's Report shows the ordinary finances of the State to be in a satisfactory condition. The State debt, above assets on hand, was, on the 1st day of June, 1861, $31,668 93. The indebtedness has been reduced the past year $26,005 90, leaving the ordinary debt of the State June 1, 1862, $5,663 03.

Provincial Postage.

On and after the 1st of June, the postage on all letters directed to the Province of Nova Scotia must be prepaid with United States stamps at the rate of ten cents for a single rate. Letters not thus prepaid will be sent to the Dead Letter Office at Washington.

Hudson River Railroad.

The following gentlemen have been elected directors of this company for the current year:

Samuel Sloan, President, James Boorman, John David Wolfe, Edward Jones, William Kelly, D. Thomas Vail, Erastus Corning, William H. Hays, J. B. Johnston, E. H. Miller, Moses H. Grinnell, John L. Aspinwall, Jacob B. Jewett.

Atlantic and Great Western Railroad.

Work has been commenced on this road near Orangeville, on the line between Trumbull county, Ohio, and Mercer county, Pennsylvania. The West Greenville *Democrat* says work is expected to begin near that place in a few days. There is now every prospect that the enterprise will be rapidly pushed to completion.

Automatic Car Couplings.

Colonel H. T. Romertze has obtained a patent for an automatic car coupling. This invention, we learn, besides being immensely valuable in the matter of saving manual labor, will operate to obviate many of the lamentable "crushing accidents" which receive almost daily record in the newspapers throughout the country. This is one of the latest and doubtless a valuable improvement in alleviation of the many woes of "poor humanity."—*National Intelligencer.*

The Troy Fire—Iron Proof Safes.

An article from the Troy correspondent of the *Scientific American*, which was transferred to the columns of the Railroad Journal, has unwittingly given cause for offence, on the part of those who are engaged in the manufacture of iron safes in that city. It related to the late conflagration there, and stated, in substance, that hardly a safe unenclosed by brick passed through the fiery ordeal without damage to its contents. It was supposed that this remark conveyed unjust reflections upon Mr. Lillie, whose safes were extensively used, as well as made, in Troy. Our contemporary, however, puts the matter right by disavowing any such motive, and the Testimonials herewith, voluntarily offered by nearly fifty persons, will set the matter completely at rest. One of these is signed by fifteen different parties, each of whose safe was exposed from twenty-four to seventy-two hours to the fire, unprotected by water; yet "the money, papers, books, etc., were well preserved, and the safes are suitable for further use."

Mr. Lillie's safes are manufactured from wrought and chilled iron combined. Noticing this circumstance, the Troy *Times* observes: "This compound is not warped or displaced by heat, however powerful or long continued it may be; at least, such was the experience in the fire of May 10th. Wrought iron alone in the fire was bent and warped to a considerable extent; but when compounded with chilled iron no test was powerful enough to make an impression." It further observes: "We saw several of Mr. Lillie's safes opened, some of them after they had been in the fire at least thirty hours, and all of them preserved their contents from destruction; though not in a perfect state. Papers were blackened and charred; but in every instance they were available for copying. From one safe we saw $2,000 in paper money taken out in good condition." It further adds that, "Mr. Lillie's safes not only stood the test well, but in all cases where water was poured upon them to cool them, they came out triumphantly, and proved their superiority beyond all question."

THE GREAT FIRE IN TROY.

Unparalleled Triumph

OF

LILLIE'S SAFES!

The following certificates explain themselves:

Troy City Bank, May 21, 1862.

Lewis Lillie, Esq.—Dear Sir: I am sure it will give you as much pleasure to know as it does me to say, that in the recent fire of the 10th inst., which desolated our city and destroyed our Banking-house, the contents of our Bank vault, though the building itself was a heap of ruins, remained entirely unharmed. This result we attribute entirely to the fact that our old Wrought Iron Doors were, about two years since, exchanged for a set of your celebrated Chilled and Wrought Iron Doors and Frames. With the old doors, not a book or paper in the Vault could have been saved; as it is, nothing in it was even damaged, though exposed to the most intense heat.

Yours, respectfully, S. K. STOW, Cashier.

Troy, N. Y., May 14, 1862.

The undersigned, using **Lillie's Chilled and Wrought Iron Fire and Burglar Proof Safes,** at the time of the late disastrous fire in this city, would state that our safes were subjected to a severe test by fire, the heat varying in intensity, according to the locality and surroundings. The time they were exposed to the fiery ordeal, unprotected by water, varied from 24 to 72 hours. We would say that our money, papers, books, etc. were well preserved, and the Safes are suitable for further use. By comparison with Safes of other manufacture, equally exposed, we have no hesitancy in recommending Safes of Lillie's manufacture to the public on their demonstrated merit as entitled to unparalleled confidence as fire-proofs.

James Kenyon,	S. Bachelder,
S. O. Gleason,	Gates H. Barnard,
Percy & King,	W. D. Haight,
McCoy & Beadle,	Denio & Frejot,
Coon & Van Valkenburgh,	Walsh, Petit & Anthony,
S. S. McClure,	D. H. Snyder,
Ross & Smith,	Jonathan Seaman.
Robert Green,	

Not dug out—nothing in them.

Troy, May 19, 1862.

The undersigned had one of **Lillie's Wrought and Chilled Iron Safes,** which went through the fire of the 10th of May. The Safe was exposed to a severe fire for over 24 hours. In falling it turned on its face, and when turned up to open the doors was red-hot. The back of the lower part of the Safe (behind the books) was filled with pennies, which, in falling over, pressed against the books, and brought them directly in contact with the doors. The wrappers on the pennies were mostly good. The books were unfit for further use, but the writing on them was partially legible, and could be copied.

DUSENBURY & ANTHONY.

TROY, May 19, 1862.

This is to certify that we had in our store, in this city, when it burned, one of **Lillie's Small Safes,** which was in the fire, without water on the building or Safe. Most of the valuables were removed before the fire, and therefore we were not in haste to get the Safe out of the burning ruins. Some of the papers left in the Safe were legible when taken out, but most of them were charred.

I. M. SINGER & CO.,
Per G. W. BABCOCK, Agent.

This is to certify that the undersigned had one of LILLIE'S Patent Chilled Iron Safes in their store, which was burned during the late severe fire in this city, and we are happy to state, the Safe preserved all its contents in first-rate condition. All the papers were legible, and the books will do for further use, without even rebinding.

GRANT, NUTTING & CO.

The foregoing comprises all the Safes of my manufacture that were in the fire, and below will be found certificates from all the owners of Safes manufactured several years since, by World's Safe Company, who used my Patent Chilled Iron Shell, but not my Fire-Proof Cement.

WORLD'S SAFE COMPANY'S SAFES.

TROY, May 19, 1862.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire of the 10th inst., in this city, would state that our Safes were exposed to a severe heat, being confined in the burning ruins, unprotected by water, from one to three days. On opening the Safes the contents were mostly legible, and to a far greater extent than could be reasonably expected of any Safe. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectors against fire, and by this test we are prepared to recommend them as such to public patronage.

Lyman Bennett, Silliman, Matthews & Co.,
Flood & Dunham, E. L. Mallory,
John Hutchinson, E. H. Virgil,
Sup't National Express Co.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire in this city, would state, that on opening our Safes the contents were mostly legible. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectives against fire, and we are happy to recommend them to public patronage.

W. & L. E. GURLEY,
R. L. & G. DRAKE,
LEONARD SMITH,
H. E. & W. ALENDORPH, Absent.

TROY, May 19, 1862.

To whom it may concern: We wou'd certify that when the recent fire broke out in this city, we took out from our Safe (which was made by World's Safe Company) all our books, papers, etc., and then left it to the flames without shutting the door, and the Safe will do for further use by being repaired, although the book case was destroyed by the door being left open through the fire.

ACKLEY & CO.

TROY, May 19, 1862.

The undersigned, using Safes manufactured by the World's Safe Company, at the time of the late disastrous fire on the 10th instant, in this city, would state that our Safes were filled with fire-brick for the fire-proof, and while several of this class preserved their contents, ours were considerably charred, and only a part legible. In justice to Mr. LEWIS LILLIE, we are pleased to state that Safes of his manufacture proved to be powerful protectors against fire, and have preserved their contents, after having been exposed to the fiery ordeal, unprotected by water, from one to three days.

Stephen Holton, Luther Greenman,
Bennett, Strickland & Fellows, E. W. Johnson,
Corlons & House, J. H. Goodsell.

TROY, N. Y., May 17, 1862.

LEWIS LILLIE—Dear Sir: We were using at the time of the late severe fire of 10th inst., a Safe purchased in 1852 of the late World's Safe Company. The contents were considerably charred, but our Ledger is mostly legible, and we are able to copy it.

The Safe was subjected to a severe heat for over eighteen hours, and we are satisfied that if water had been thrown on the ruins, as is ordinarily the case, the contents would have come out uninjured. You will please repair our Safe, placing in it the improvements embraced in Safes of your manufacture, and oblige

SHELDON & GREENE.

N.B.—The above Safe is believed to have damaged the contents more than any of those named in this circular.

There were only seven Sheet Iron Safes, made by Herring and others, outside of the railroad depot, that were exposed to the fire, four of which were entirely burnt out; the fifth was saved by being early cooled off by water; the remaining two were not severely tested.

LEWIS LILLIE.

☞ **LIBRARY FURNITURE made to order.**

THE RECEIVER OF THE CLEVELAND AND PITTSBURG RAILROAD COMPANY gives notice that the assets of the Company are in his hands, subject to the direction of the United States Court for the Northern District of Ohio; that by the order of the Court no portion of the earnings of the road can be applied to the payment of any of the unsecured indebtedness of the Company. All the earnings, after paying operating expenses, rent and mortgage interest, will be applied to the principal of those debts, which are due and secured, amounting at the present time to about a million of dollars.

The accrued interest on the three old mortgages has all been provided for from the earnings of the road, and the next interest to be paid is on the funded debt mortgage bonds (given in exchange for the unsecured indebtedness) on the 1st day of July, 1862. The holders of the River Line Bonds, Income Bonds, Dividend Bonds and Bills Payable, who have not yet accepted the terms of compromise offered them with the approval of the United States Court are notified to exchange their bonds and notes before the 25th day of June, 1862, or they will not be entitled to receive any portion of the earnings of the road. Interest will be paid only to those who accept the compromise.

The new bonds can be obtained in exchange for any unsecured indebtedness at the office of the Company in Cleveland, or at No. 25 William st., New York City, of H. C. KINGSLEY.

1m20 J. N. McCULLOUGH, Receiver.

PROPOSALS

FOR $333,000 "CENTRAL PARK IMPROVEMENT FUND STOCK OF 1876."

SEALED proposals will be received at the Comptroller's Office, until FRIDAY, the 27th day of June, 1862, at 2 o'clock, P. M., when the same will be publicly opened for the whole or any part of the sum of THREE HUNDRED AND THIRTY-THREE THOUSAND DOLLARS of the "Central Park Improvement Fund Stock," authorized by Chap. 85 of the Laws of 1860, and by an Ordinance of the Common Council, approved by the Mayor, April 25, 1860.

The said stock will bear interest at the rate of six per cent. per annum, payable quarter-yearly, and the principal will be redeemed November 1, 1876.

The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted, will be required to deposit with the Chamberlain of the City, within fifteen days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the stock, bearing interest from the dates of payments.

Each proposition should be sealed and indorsed "Proposals for Central Park Improvement Fund Stock," and inclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if considered necessary to protect or promote the interests of the city.

ROBT. T. HAWS, Comptroller.

City of New York, Department of Finance, Comptroller's Office, May 23, 1862. 3t23

Prince's Metallic Paint,

AN INDESTRUCTIBLE COATING FOR

IRON, TIN AND WOOD.

IT consists of seventy-two parts **Oxide of Iron,** and twenty-eight parts **Cement Lime Stone** in the one hundred pounds.

It has much more body than red or white lead. It is warranted perfectly water and fire-proof and to withstand a greater heat on metals, without scaling, than any other paint in use.

It is a perfect cover for all kinds of iron, tin or woodwork, out-houses and canvas coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone as has been proven at the largest foundries in the country.

For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zinc, and much less than the ordinary mineral paints. It is free from any waste, and possesses a **spreading and covering power unequalled.**

TERMS,

By the Barrel or Half Barrel, { **FOUR CENTS per pound.**

A liberal discount made to parties purchasing by the ton.

A Barrel or Ton will be forwarded to any Railroad companies desirous of testing its qualities, for which there will be no charge if it does not give entire satisfaction.

12.	" 18	"	1 to 1	24.	"	32 "	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c. each;** or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

New York, Saturday, June 21, 1862.

The Illinois Ship Canal.

The bill which has been introduced into the House of Representatives provides that so soon as the State of Illinois shall have transferred to the United States a title to the Illinois and Michigan Canal, with all its appurtenances, a commission of three persons shall take charge of the same for the purpose of improving the navigation. These are to consist of Wm. H. Swift, who is one of the present trustees; a competent engineer in the topographical corps of the U. S. army, and a citizen of Illinois, the two last to be designated by the President. Their authority extends to enlarging the canal and to improving the navigation of the Illinois and Des Plaines rivers. Surveys are to be made for a canal not less than 160 feet wide, with locks 350 feet long by 75 feet wide—the whole permitting the passage of war or merchant vessels of any kind drawing not over six feet.

On the President expressing his approval of the plan, the commissioners are to begin the construction of the works, under direction of the Secretary of War, making annual reports of the proceedings to Congress. The Commissioners are empowered to make all needful rules and regulations, not only for building the canal, but for its navigation afterward: they can establish or alter the rates of toll, employ agents, enter upon lands, use streams of water or any materials, compensation therefor being made as provided by State law. Work must be let by contract to the lowest bidder, after giving due public notice. The net revenue shall be paid into the United States Treasury and appropriated, first, to the payment of interest and principal of construction; next, to the payment of the State of Illinois of the entire amount which was a charge at the time of conveyance. The salary of Commissioners shall not exceed $3,000 per annum each. Bonds for the faithful performance of duties must be given. The last section provides that, after re-imbursing the United States and the State of Illinois for their respective outlays in this work, the President shall transfer it, on request, to that State, on the condition that its navigation shall be forever free to all citizens of the country, subject only to such tolls as may be necessary to keep it in suitable repair; but the general government shall have the right to use it, without payment of any charge whatever.

The Scientific American Patent Agency.

It is questionable whether in any other interest as many and as valuable patents have been taken out as in connection with the railroad, during the last forty years. Invention has built it up from nothing to the representative of at least twelve hundred millions of dollars, in this country alone. Yet the career of improvement seems as far as ever from having reached a limit; indeed, no bound to inventive progress can be imagined. Every invention calls into existence a class of others as necessary accompaniments. The business of procuring patents has become a recognized pursuit, as much as the importing of dry-goods or the sale of hardware. Among those who have entered upon it, we need not do more than name Messrs. MUNN & Co., publishers of the *Scientific American*. A visit to their establishment in the "Times Building" will amply repay the stranger the time required, if he have a taste for mechanical pursuits. We need not say it has no rival in the world, as it has none in this country. This will be best understood from the circumstance that in seventeen years they have acted as agents for more than *fifteen thousand inventors*, or nearly one thousand per annum. With the utmost readiness to befriend the great interest with which they are so closely identified, Messrs. MUNN & Co. have the amplest facilities, both in this city and Washington, for aiding inventors in the matter of procuring patents.

Chicago and Rock Island Railroad,

The time for closing the fiscal year of this company having been changed from July 1, to March 31, the last report of the directors, a copy of which has just been received, is made to cover a period of only nine months, viz: from July 1, 1861, to March 31, 1862, during which time the gross earnings of the road were:

From freight		$757,144 47
" passengers		254,071 12
" mails, etc.		43,488 81
		$1,054,704 40

The disbursements for operating and maintaining the road during the same time were:

Repairs of road	$93,351 04	
" engines	43,469 20	
" cars	64,548 06	
" bridges	17,727 92	
" buildings, etc.	15,014 49	
Cost of iron for repairs	87,347 81	
Fuel	75,466 20	
Oil, waste, etc	9,793 21	
Loss and damage	4,541 25	
Contingent account	7,947 60	
Salaries of agents, etc.	46,480 16	
Labor handling freight	45,228 32	
Pay of train hands	56,434 92	
Station house expenses	8,980 25	
Stationery, etc	4,456 63	
		531,886 86
Leaving net earnings		$522,817 54
Cost of new works	$35,875 12	
Taxes	11,408 84	
Legal expenses	2,287 19	
Interest on bonds for nine months	73,132 50	
Rent of Peoria road	98,760 00	
		216,453 65
Balance		$306,963 89

There has been expended upon the road for masonry in bridging and culverts, covering bridges bridge superstructure, new side track, ballasting, grading, etc., which is properly chargeable to con-

struction, $43,186 17. Of this sum, $7,811 05 is included in the item of repairs; the remainder, $35,375 12 is put down as the cost of new works. There has also been expended for covering Rock River bridge, new bridge over canal at Juliet, and for rebuilding two pile bridges across the West Bureau, 200 feet long each, the sum of $11,096 35, which sum, though properly chargeable to extraordinary repairs, is included in the general expenses.

The new materials placed in the track during the nine months have been; 60,657 ties, 249 tons rails, 825 tons rails re-rolled, 73,124 lbs. wrought iron chairs at 4.27 cts., 8,026 fish bars for rail joint, 115,346 cast iron chairs at 2 cts., 19,276 bolts for cast iron chairs and fish bars, and 156,650 rail spikes at 3.16 cts. In addition to which, 13,476 rails have been repaired in the company's shops, averaging per rail 64.84 cts. The value of the above materials is put down at $69,302 41. The chairs now used are much more expensive, and much better, than those formerly used.

The company have 59 engines, all in good working order; two of which are in the service of the Illinois River Railroad Company. Of this number, 32 have been in the shop the past year, and thoroughly repaired.

The number of miles run by engines with passenger trains is 264,665; with freight trains, 434,659; with wood and gravel trains, 66,635—total miles run, 765,949. The cost per mile run for each locomotive is 19.91 cents—a decrease of 3.01 cents. per mile from last year. The cost of oil, waste, tallow, fuel, and repairs of engines, making the total expense per mile run, including new works and extraordinary repairs in the expenses, 75.03 cents per mile. Less construction and extraordinary expenses and taxes, 68 cents per mile. The proportion of expenses to earnings is, including new works, extraordinary repairs and expenses, 55.08 per cent. Less new works, legal expenses and taxes, 50.38 per cent. It will thus be seen that the expenses are gradually decreasing, both in the aggregate as well as their proportion to the earnings. This is owing in some measure to the improved condition of the road, by substituting permanent works in the place of those more temporary and perishable. The saving from this cause will be more apparent as these works progress.

In the last report, the loss on Illinois currency was estimated at $40,350 40. Since then the currency has been disposed of and the loss accurately charged over, which makes it $26,551 46—a reduction of $13,798 94.

The total amount of freight transported over the road during the nine months was 570,288,866 lbs., and the whole number of loaded cars, 36,648, of which 12,330 went westward and 24,318 eastward.

The whole number of passengers carried was 148,829, of which 76,168 went west and 72,661 east; of these, 147,056 were first class, 795 second class, and 978 emigrant. Number of passengers carried one mile, 8,829,401. Number of soldiers carried east, 7,323; do., west 3,061—total, 10,384.

The total number of pounds transported across the Mississippi Bridge was 198,891,540, viz: going west, 64,853,558; going east 134,037,982. Number of car loads passing east, 8,460; do., west, 4,794. Foot passengers going east, 33,362; do., west, 33,254. Number of steamers passing the draw going north, 152; do., going south, 154. Total number of rafts, 121.

Directors—T. C. Durant, F. H. Tows, David Dows, C. W. Durant, E. W. Dunham, Nathan Peck, John B. Jervis, Henry Farnam, John F. Tracy, R. A. Forsyth, T. S. Faxton, E. Cook.

Treasurer—E. W. DUNHAM, New York.

Secretary—FRANCIS H. TOWS, "

Superintendent—JOHN F. TRACY, Chicago.

Assistan Sup't—W. H. WHITMAN, "

Cashier—FRANK D. SHERMAN, "

Washington and Georgetown Railroad.

The first meeting of the stockholders of this company was held in Washington on the 10th inst. The following is the list of directors chosen, viz: George S. Gileon, John Carter Marbury, Henry D. Cooke, Harris C. Fahnestock, Edward W. Clark, J. Parlow Moorhead, W. A. Darling. The two last named gentlemen are experienced railway men—Mr. Moorhead of Philadelphia, and Mr. Darling of New York.

The Directors have elected Henry D. Cooke, Esq., President, and Harris C. Fahnestock, Esq. Secretary and Treasurer; and already on the 11th instant, workmen have been engaged with the preparations at the foot of the Capitol for commencing the roadway thence along Pennsylvania Avenue to Georgetown. It is understood that a portion of the rails and other material for the construction of the road have been already procured, and the digging out for the road bed and laying of the timbers commenced.

The work will go on under the superintendence of Mr. Wm. Morton, Jr., who has had experience in street railway building, and be done directly for and by the Company, as it puts none of the work out by contract. A superior class of cars, with the most recent improvements, will be ready for the track as soon as completed.

Philadelphia, Wilmington and Baltimore Railroad.

We have received the report of this company for the fiscal year ending October 31, 1861, which was presented at the annual meeting of the company, held in Wilmington, Del., on the 13th of January last. From this we learn that the gross earnings during that time were:

From passengers	$1,067,275 42	
" freight and express	363,552 98	
" rents	17,000 25	
" mails and miscellaneous	46,847 73	
	$1,494,676 38	
Add earnings of New Castle and Frenchtown Line	22,308 43	
Total for both roads	$1,516,984 81	
And the expenses were:		
Repairs of road	$97,306 11	
" bridges	15,649 63	
" locomotives	29,377 27	
" cars	20,618 81	
" buildings	10,670 80	
Passenger department	79,641 32	
Freight "	65,750 19	
Ferries	26,120 88	
Fuel	44,312 56	
Oil, waste, etc.	7,861 18	
Taxes and insurance	11,855 78	
Office expenses, salaries, etc.	19,100 94	
Switchmen, watchmen, etc.	16,524 93	
Rents	6,319 92	
Telegraph	6,734 74	
All other ordinary exp.	30 430 41	
New work, as below	97,044 62	
Guarding bridges and repairing burnt bridges.	22,515 35	
Operating New Castle & Frenchtown Line	14,393 07	
Taxes and bonds to the State of Delaware	11,000 00	
Add loss in operating Delaware Railroad	53,060 26	
	688,288 77	
	$828,696 04	
Interest on bonded debt, ground rents, etc., less interest received	155,212 24	
Net earnings	$675,483 80	
Dividends, April and October, 1861, 6½ per cent.	364,000 00	
Surplus	$311,483 80	
Appropriated to the sinking fund	46,666 67	
Leaving an actual surplus of	$269,817 13	

—over all expenditure, interest, dividends, loss on Delaware railroad, and appropriation to sinking fund. The report says:

The year which this Report embraces has been the most extraordinary one in the history of the road. It began with a prosperous and regular business, which bid fair to go on increasing; but early in the year, the political horizon became overcast with clouds, and in April the great Rebellion, which began in an attack upon Fort Sumter, culminated in an assault upon a Massachusetts regiment in the streets of Baltimore, which had been carried over the road for the defence of the capital. This was succeeded on the night following by the destruction of three bridges, between the Susquehanna river and the city of Baltimore, by fire. The incendiary's torch was applied by I. R. Trimble, the former Superinten

dent of the road, professing to act under orders from the city of Baltimore and the State of Maryland. This uncalled for and criminal act was perpetrated on the morning of April 20th, and the road on the other side of the river Susquehanna, for forty miles, was disabled. The resources of the road, and its ability to serve the Government, were not, however, by this act, cut off, as was intended. Troops were immediately forwarded to Washington, via Perryville, and thence by steamer, "The Maryland," to Annapolis, and thus, through the instrumentality of this company the Annapolis road, the then only available route to the capital, was immediately occupied, and troops were transported to Washington, in season to save the city. The road has thus earned, if it has not received, the grateful remembrances of the Government. Though a corporation, it did not forget its duties to the country, in the darkest hour of its history, and in its most trying emergency. It expended its money, its resources, and the energies of all its employees, at a time when the fate of the country seemed trembling in the balance, and when many hesitated into which scale to throw their weight.

Amid all this, the managers of the road never doubted their duty, nor hesitated to perform it at any cost.

For a few months the business of the road was not satisfactory. The bridges beyond the Susquehanna, for want of aid from the military, remained unrepaired for some time. Finally, on the 14th day of May, the Company succeeded, without aid from the Government, in completing the repairs, and in opening the road through to Baltimore, for both freight and passengers. For some time, notwithstanding the invaluable services this Company had rendered the country in its hour of greatest need, another and a much longer route was availed of by the Government, for the transportation of troops and supplies, and this route was unaccountably ignored; but its importance has since been recognized, and its business largely increased—taxing at times its utmost capacity, with the rolling stock it then had.

Since the Government increased its requirements for the transportation of troops and supplies, we have added very largely to our stock of cars and engines, and also to our tracks and turnouts. We have also made large improvements at the Susquehanna river, rendered necessary to accommodate, on each side, the long trains it became necessary to run.

We have expended, during the last year, for new work on the road, and for new cars and engines as follows:

For new track, (about two miles,)	$13,067 82
New buildings, fences and bridges	11,640 25
45 new freight, platform and express cars	25,314 72
15 new passenger cars	29,316 70
2 new locomotives	17,705 13
Total	$97,044 62

Besides those above enumerated, there were placed on the road thirty-five freight cars and two mail cars, not yet paid for. In addition to these, we have now building four new locomotives and thirty new freight cars.

Exclusive of the new track, there were about twenty miles of the main track relaid with new cross-ties and new iron rails, the cost of which is included in the operating expenses.

The ferry boat "Maryland" has performed an amount of work the last year greater than any other boat of the kind in the world. It has never in a single instance failed to perform its part of the duty. All the troops and all the freight have been taken over on deck without change of cars; and for several months the New York and Philadelphia and Washington passengers have been carried through without any change of cars either at the river or at Baltimore.

Arrangements are now in progress for carrying both passengers and freight, between New York and Washington, in the same cars—thus avoiding the frequent changes which have heretofore given rise to much dissatisfaction on the part of the public. Already the tracks of the horse railroads between the Kensington depot and our station at Broad and Prime streets have been so connected that passengers are taken from one station to the other in the same cars, and are transferred from the cars of the horse railroad to our cars and those of the New York lines, without exposure to the weather.

With a connection by locomotive, now provided for in Philadelphia, and some projected improvements carried out in Baltimore, no route can be devised between New York and Washington so short in distance or expeditious in time as the present route. Much has been said in the public journals and in the halls of Congress, about an air line between these cities, to be built under the patronage of Government for military purposes; but it is presumed when all the facts are put before Congress and the public, that this scheme will be abandoned as one not required by any emergency justifying the expenditure. Government works cost, in the first place, much more than the same character of works when built by private enterprise; and, when once built, they afford offices to greedy and unprincipled politicians, who pervert the works to their own selfish purposes, and thus entail a constant loss upon the Government, without any return in valuable services.

The present roads between New York and Washington, passing through Philadelphia and Baltimore, are on the most direct practicable line. An air line between the two cities would cross the Chesapeake Bay below the mouth of the Susquehanna river, and be therefore totally impracticable. A line avoiding Philadelphia and Baltimore, and relying upon the business between New York and Washington, would find its running expenses exceed its revenue, and would therefore be but a poor speculation in the hands of individuals, while in the hands of the Government it would be productive of nothing but loss, and the service it would perform would be, from the nature of the case, inferior and unsatisfactory. In ordinary times, the Government has but little service to be performed by railroad, other than the carrying of the mails. It is to be hoped that the present emergency, demanding such extraordinary service, will soon pass away—by the effectual suppression of the rebellion; but if it should continue, and the Government require an amount of service equal to the present, or need greater facilities than the roads, with their present means, can now furnish, an expenditure of fifteen or twenty per cent. or the cost of a new road by the Government, in improving the present roads would enable them to meet promptly all the wants of the country, and from their increased earnings re-imburse the Government for both the outlay and the interest on the same.

A double-track railway between New York and Washington, with a bridge at the Susquehanna, could do an almost unlimited business; and the cost for such improvements would not be one-fifth of a single-track new road between the same points. The work could be accomplished in less than one-half the time of a new road of single track.

The number of miles run on the Philadelphia, Wilmington and Baltimore railroad, by locomotives carrying passenger trains, during the year, was 275,032; by freight trains, 159,668 miles; by gravel, repair and wood trains, and miscellaneous, 5,080 miles. Total miles run, 439,780. Cost per mile run, $1.38.

It will be seen that the whole expenditures bear a ratio of 40.6 per cent. to revenue.

The expenditures for new work and improvements bear a ratio of 8 per cent. to revenue. The ratio of operating expenses to revenus was 32.6 per cent.

That proportion of our service which has been performed for the Government, has been at an average of only about two-thirds of our regular charges, for both troops and their supplies. When it is considered that most of this business has been only one way, and that the cars home necessarily returned empty, it will be seen that the charges to the Government have really been but little over one-third of our usual tariff—the cost of returning an empty train being nearly the same as it would be were the train loaded. In view of all these facts, the rates to the Government must be considered very reasonable. We freely admit that such charges should always be at a minimum. This view we took at the beginning, and we believe it to be a fact beyond controversy, that this company, and the Camden and Amboy and New Jersey railroads, were the first railroads in Pennsylvania to reduce on Government transportation. The statement in the report of the Secretary of War, that the lines between New York and Baltimore did not reduce till after troops were sent to Baltimore via Harrisburg, is an error. The first troops sent that way left New York on the 21st day of June, and the reduction by the Camden and Amboy and New Jersey railroads and this road, took place on the 14th day of May, the day on which our bridges were repaired and the road opened through to Baltimore. For the short time that our road was crippled and in operation only about three-fifths of the distance, we charged our regular fares—deeming that to be no more than equitable, as our whole force was at the disposal of the Government, and the regular rates were but an inadequate compensation.

The Burnetizing apparatus, spoken of in our last annual report, was completed and put in operation in March last. It has been in almost constant use since its completion. The amount of material Burnetized during the last year is shown by the following table:

80,978 cross-ties.
430,320 square feet bridge timber and plank for platforms and crossings.
12,406 joint blocks.

The whole cost of material and labor for the foregoing was $5,325 30. The expenses incident to starting the establishment were larger than the average cost will be hereafter. Should the process add to the durability of timber as much as is claimed for it, a large item of expenditure will be saved annually, after a few years. For some time its adoption will increase our expenses; but at the period when timber in cross-ties and bridges begins ordinarily to decay, we shall begin to be repaid for our outlay by large annual savings.

We have been exempt to a remarkable degree from accidents. No one out of the large number of troops and other passengers we have carried during the year, has been injured, excepting through his own fault, by exposing some part of his body outside the car. Even these cases have been extremely rare. Our trains have been run at all hours of the night and the day, and our men have cheerfully and faithfully performed their laborious and responsible duties, both on the regular and irregular trains. Such exemption from accident speaks loudly in praise of the faithfulness of the employees.

From the 18th of April last, we carried over the road between Philadelphia and Baltimore, and intermediate points, 154,303 troops. We also carried a large number of sick and disabled soldiers, for whose transportation we have not received any pay.

Owing to the peculiar nature of the service for the last year, it is impossible to give the details of the performance of each locomotive, as we gave them in our last annual report. The saving in burning coal instead of wood has been very large on the engines used, and as we purchase no new locomotive except coal-burners, we shall soon dispense entirely with the use of wood as a fuel for motive power.

The rebellion and its consequent work of destruction has cut off all our Southern and Southwestern railroad connections for the time being, excepting the Washington Branch railroad. The main trunk of the Baltimore and Ohio railroad has been cut off at the early part of the rebellion, and our joint business with that road has in consequence ceased. This business has been heretofore a large item in our recipts. The wants of the Government and the public will, however, soon

render it necessary to re-open this most important thoroughfare, and thus we shall resume our accustomed East and West business in connection with it.

A comparison of the gross earnings with those of the preceding year show an increase of $280,-386 87 with an increase in expenditure, including interest on bonded debt, etc., of only $76,615 26—making the increase in net earnings for the year $207,771 61. The surplus for the year after payment of dividends is $203,771 61 in advance of the previous year. The actual surplus over everything, including loss on Delaware railroad, interest, dividends, rebuilding and guarding bridges, new work and improvements, appropriation to sinking fund, etc., etc., is $269,817 13. The company have built during the year a new frame engine house at Wilmington, and a new building for the Burnetizing apparatus; new freight platforms at Philadelphia, Perryville and Chester; new stone piers for drops at Perryville and Havre-de-Grace; a new bank wall and trestle-work for new tracks at Perryville and Havre-de-Grace; new stone pier at Brandywine bridge, and also one at Darby creek, two new stone culverts on the meadow above Lazaretto; a new blacksmith shop and tool house at Gray's Ferry; a new drop and dock at Southwark wharf. Besides, the following works, have been renewed, to wit: passenger platforms at Chester, Claymont, Staunton, Elkton, Newark and Perryman's; a bridge at Moody's Crossing; the centre drops at Perryville and Havre-de-Grace; the trestle-work for drops both at Perryville and Havre-de-Grace; a stone culverts near Grubb's Landing; a bridge house at Bush river, and one at Gunpowder bridge. All the burnt parts of Bush and Gunpowder bridges have been rebuilt, and both bridges thoroughly overhauled and repaired, with a new and improved draw at Bush river. The bridge in Baltimore, near Canton, which was burnt, has also been rebuilt. This latter work was mostly done by the city of Baltimore.

"It will be perceived," says the report, "that we have, within the last year, added largely to the valuable resources of the road, and that we have paid for all additions and improvements out of earnings. We have been able to do this without any increase of capital, while we have at the same time increased our reserve of cash over the last year. The Government still are indebted to us in a large amount for services rendered. A portion of our accounts have not yet been adjusted and approved. The large bulk of them, however, have been adjusted and approved, and will be paid as soon as the Government is in funds.

We have added to our real estate a valuable lot at the southwest corner of Swanson street and Washington avenue, in Southwark, to enable us to lay tracks on to our wharves that can be traversed by locomotives. The lot with the buildings cost nearly $20,000.

Our policy has been to steadily improve the value of the property entrusted to our care, and make it a reliable and certain dividend-paying work. We feel now that it can be relied upon with as much certainty as any other property in the country for regular dividends, which, if not extravagantly large, will be beyond the contingencies which often beset railroads in their infancy, as well as in their maturer years.

The company have 32 locomotives; 75 first class and 3 second class passenger cars, 2 sleeping cars, 16 baggage, 7 platform cars for crates, 5 express and 1 paymaster's car—making the total in the passenger department, 109; in freight department, 504; in road department, 61—total 674. Total number of miles run by locomotives with trains, 439,780. Number of passengers carried, 629,098; of which 499,622 were local and 129,476 through. Number carried one mile, 28,138,521; of which 15,499,873 were local, and 12,688,648 through. Tons of freight carried 165,352; of which 106,-984 were local, and 58,368 through. Tons carried one mile, 9,553,103; of which 3,833,019 were local, and 5,720,084 through. Of the through tonnage, 15,188 were carried northwardly and 43,179 southwardly. Of the local freight 68,508 tons were carried northwardly, and 43,476 southwardly. The passenger travel, both local and through were nearly equally divided.

The following is a condensed statement of the financial condition of the company at the close of the fiscal year, October 31, 1861:

Cost of road		$6,787,504 28
Port Deposit Branch railroad		109,514 70
Terminus on the Delaware		76,400 06
Stock owned by the company		744,425 00
Real estate, for use		48,298 79
Assets, viz:		
Real estate, subject to sale valued at	$205,650 00	
Stock and other securities at cost	142,840 50	
Agents' balances	11,526 76	
Sundry accounts—the principal portion being due by the U. S.	125,895 73	
Post office department	5,674 78	
Bills receivable	95,685 18	
Other roads and lines, principally for the transport'n of troops, etc.	190,573 49	
Materials on hand, including wood lands	55,313 40	
Cash	84,193 16	
		917,353 00
Advances, viz:		
To Eastern Shore R. R.	$2,577 24	
To Junction and Breakwater R. R.	1,786 95	
To Southwark R. R.	32,992 56	
To Delaware R. R.	21,203 03	
		58,509 78
		$8,742,000 61
Capital stock		$5,600,000 00
Mortgage loan, due July 1, 1884		2,300,000 00
Improvement bonds, due May 1, '63		119,000 00
Mortgages on real estate		36,500 00
Ground rents		20,000 00
Sinking fund for the mortgage loan due 1884—10 months' appropriation		35,000 00
Current liabilities		140,993 12
Balance of revenue Oct. 31, 1861		490,507 49
		$8,742,000 61

The officers and directors elected for 1862, are

President—SAMUEL M. FELTON.

Directors—Moncure Robinson, Wm. Lyttleton Savage, John A. Duncan, Jesse Lane, Joseph Bringhurst, Frederick A. Curtis, John C. Groome, J. I. Cohen, Jr., Thomas Kelso, Columbus O'Donnell, Enoch Pratt, Thomas Donaldson, Wm. W. Corcoran, Edward Austin.

Secretary and Treasurer—ALFRED HORNER.

Ohio and Mississippi Railroad.

In accordance with a decree entered in the Circuit Court of the United States for the Southern District of Illinois, the Western division of the Ohio and Mississippi Railroad, property and franchises, has been sold, under a foreclosure of the second mortgage, for $482,000, the amount of interest in default upon the second mortgage bonds, subject to the payment of the principal and interest of the first mortgage bonds amounting to $850,000, and the principal of the second mortgage bonds, amounting to $1,500,000. The purchaser of the road makes it also subject to the payment of all debts due for labor and supplies from the company, making an aggregate of about $3,000,-000 paid by the purchaser, or for which such purchaser is liable.

The property was purchased by the Ohio and Mississippi Railway Company, a corporation created by the General Assembly of the State of Illinois, at its regular session in 1861.

Chicago and Northwestern Railroad.

Messrs. French & Wells have taken the contract for building the section of railroad between Appleton and Green Bay. They are steadily engaged in preparing to complete the work of grading in the shortest possible time. These are the contractors who built that portion of the Northwestern Railroad between Janesville and Minnesota Junction, some four years ago.

Cincinnati, Hamilton and Dayton Railroad.

The company was chartered on the second of March, 1846. The division south of Hamilton was put under contract in December, 1849, and the Northern division in July, 1850. Construction on the Southern division was commenced in March, 1850, but owing to the prevalence of cholera in the Miami Valley the work was suspended and not resumed until the following September, when operations were commenced on the whole line. On the 18th of September, 1851, the first train of passenger cars left Cincinnati for Dayton, and on the 30th of the same month the road was regularly opened for travel; but not for freight transportation, until near the close of the year. The company has always had operating contracts with all the connecting roads. In 1860, a contract was concluded between this company and the Little Miami, the Columbus and Xenia, and the Dayton, Xenia and Belpre railroad companies, for working their several roads on joint account for a period of twenty years, and became operative on the 1st of April of the same year.

The road is 59.80 miles in length, extending from Cincinnati to Dayton. Second track, about 16 miles. Sidings, turn-outs, etc., about 2 miles.

The capital stock authorized is $2,500,000 in 25,000 $100 shares; of which $2,155,800 has been paid in on 21,558 shares.

Funded debt, $1,344,000, classified as follows:

First mortgage 7 per cent. coupon bonds, 394,-000—issued January 1, 1852, and payable Jan'y 1, 1867, and coupons semi-annually, Jan. 1, and July 1, in New York City.

Second Mortgage 7 per cent. coupon bonds, $950,000—issued May 1, 1853, and payable, principal May 1, 1880, and coupons semi-annually May 1, and Nov. 1, in New York City.

Cost of road and equipment, $3,423,619, as follows:

Graduation	$541,655	Inter'st & disc't.	$350,697
Masonry	309,199	General expens.	85,639
Bridges	114,045	Second track	188,046

Railroad Earnings--Weekly.

The earnings of the Toledo and Wabash Railroad for 1st week of June, 1862, were.$22,886 05
Do., 1861 ..... 18,158 32

Increase $4,727 73

The earnings of the St. Louis, Alton and Chicago Railroad for the 1st week in June, were:

1862 .....$18,876 81
1861 ..... 16,592 90

Increase $2,283 91

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 1st week of June, 1862, were $43,619 33
Corresponding week, 1861. ..... 39,773 93

Increase $3,845 40

The receipts of the Grand Trunk Railway of Canada for the week ending June 7, 1862, were:

15,016 passengers $21,521 65
Mails and sundries 4,353 98
12,825 tons of freight and live stock .. 36,977 08

Total $62,852 71
Corresponding week, 1861 ..... 66,184 78

Decrease $3,332 07

The traffic of the Great Western Railway of Canada for the week ending June 13, 1862, was as follows:

Passenger $18,842 02
Freight and live stock 22,525 92
Mails and sundries 1,375 29

Total $42,743 23
Corresponding week of last year. 33,164 52

Increase $9,578 71

The earnings of the Galena and Chicago Railroad the 1st week in June, 1862, were.$45,661 65
Do., 1861 ..... 46,674 84

Decrease $413 19

The Michigan Central earned in the 1st week in June, 1862 .....$36,075 54
Do., 1861 ..... 30,352 20

Increase $5,723 34

The earnings of the Chicago and Northwestern Railroad the first week in June were..$27,003 51
Corresponding week, 1861 ..... 20,982 23

Increase in 1862 .....$6,021 28

This rate of increase assures the payment of interest on all the first mortgage bonds.

Cedar Rapids and Missouri Railroad.

We understand this company has effected an arrangement with the Galena and Chicago Union Company, whereby the former leases to the latter their road for a term of years. This arrangement is said to be of such a nature as to secure the immediate completion of the road to the Missouri river.—*Marshall (Iowa) Times.*

Tubular Bricks.

The Society for improving the condition of the laboring classes, London, highly commend the use of tubular bricks for purposes of construction. According to an official statement made by the Society, a size has been chosen which, with the omission of the headers, reduces, by about one-third, the number of joints, and greatly improves the appearance of the work, giving it more boldness of effect and resemblance to stone than that of ordinary brickworks. This size is twelve inches long, and three courses rise one foot in height—a size equally convenient for the workmen in the manufacture, and in the use of the bricks. Nine bricks of this kind and size will do as much walling as sixteen of the common sort, whilst the weight of the former but little exceeds that of the latter. When passing through the machine, or in the process of drying, any number may be readily splayed at the ends for gables, or marked for

closures, and broken off as required in use, or they may be perforated for the purpose of ventilation.

New York and Harlem Railroad.

The receipts of the New York and Harlem Railroad for the first five months of 1862, as compared with last year, are as follows, viz:

	1861.	1862.
January	$103,494	$100,922
February	88,201	96,936
March	88,700	103,020
April	94,630	94,957
May	83,856	94,156
Total	$458,881	$489,991
		458,881
Total five months' incr. over last year		$31,110

The Rain Fall and Flood in the Anthracite Region.

Last week we referred to the tremendous fall of rain which occurred on Wednesday, 4th instant.

On Monday and Tuesday there were intermittent rains, which on Wednesday terminated in a rain pour that lasted into the "middle watches of the night." The storm covered a large extent of territory, extending across Pennsylvania, Maryland and Virginia, though the scene of severest visitation was along the water-shed in the anthracite coal region, in a distance of an hundred miles on the map, between Pine Grove on the Swatara and Port Jervis on the Delaware.

Within the anthracite territory the main summit sheds the gifts of the rain clouds into the Lackawanna, the Susquehanna, and the Swatara, on the Susquehanna side, and into the Lackawaxen, the Lehigh, and the Schuylkill, all tributaries of the Delaware, on the Delaware side. The flood caused by the rains was most severe in the Lehigh, next on the Swatara, next on the Upper Delaware, and next and least severe on the Schuylkill. From the great Southern and Northern Anthracite fields all the tidewater carriers were more or less flooded and injured, the damage done in some cases being especially severe to mechanical work and terribly destructive to human life.

Since the development of the coal trade the coal region has sustained no such visitation by flood, the flood of 1841 sinking into insignificance by a comparison of its effects with the wrecks made by the freshet of Thursday, 5th instant.

And as the greatest destruction of property on the day named occurred to the works of the Lehigh Canal Company, we shall commence with that important and *pioneer* coal carrier.

The Lehigh river, in the distance that it is occupied with the works of the Lehigh Navigation Company, from its month at Easton to Stoddartville, 84½ miles, has a lockage of 1,297 feet. The company's works are divided into three sections, two comprising slackwater and canal, and one, the upper section, consisting of a descending navigation for lumber.

Lower Section, Easton to Mauch Chunk, 46 miles; lockage 361 feet; locks 46; dams 8; height of dams 8 to 16 feet.

Upper Section, Mauch Chunk to White Haven, 26½ miles; lockage 600 feet; locks 29; dams 20; highest dams, "Barn Door" No. 8, *thirty-eight feet* from water to water, 58 feet from base to overfall: lift of highest lock *thirty feet*.

Descending Navigation, White Haven to Stoddartville, 12¼ miles, lockage 336 feet; locks 8; dams 3; this section is for passing down lumber and has no *ascending* navigation.

From White Haven across to the Susquehanna at Wilkes Barre the company own a railroad 20 miles long, over which coal is shipped to the canal at White Haven on the Lehigh, whence it is locked down to connecting canals leading to tidewater.

The principal points, however, where coal tonnage is put upon the canal are Mauch Chunk and Penn Haven, the first named distant 46 miles from Easton, the latter 8¾ miles from Mauch Chunk and from Easton 54¾ miles. From Easton to Penn Haven the lockage is 548 feet; locks 571; dams 26. From Penn Haven to White Haven distance 17½ miles; lockage 412½ feet; locks 18; dams 14.

Now, inasmuch as between White Haven and Easton the distance is 72½ miles, the lockage 961 feet, the number of locks 75, and the number of dams 28, it results that, *forty-three per cent.* of the lockage is in the *twenty-four per cent.* of mileage between White Haven and Penn Haven. And hence it is contended that, instead of reconstructing the dams and locks between Penn Haven and White Haven, it would make a better working programme if the company would extend their railroad down the Lehigh from White Haven to Penn Haven. This would give them a rail line from Wilkes Barre to Penn Haven 37½ miles long, and a canal navigation from Penn Haven to Easton 55 miles long. With a rail line extended from White Haven to Penn Haven, the Wyoming Valley would be put into direct rail communication with the Lower Lehigh Valley and with this city and New York.

How many of the river dams below White Haven have been carried away, or so washed around or sundered that the water does not run over the over-fall, we do not specifically know; but on Thursday a gentleman direct from the scene of disaster informs us that, from White Haven all the way down to and including the Slate dam, which is 46 miles blow White Haven and 20 miles below Mauch Chunk, he knew of very few dams (one at Penn Haven) that remained whole and intact and that passed the water over its over-fall; that some of the dams are washed out down to their foundations; that others are injured in their guard banks and combs and breasts, some in one way, some in another.

At the end of the deep level below Mauch Chunk, a work of masonry laid in cement and seemingly massive enough to defy any flood, was swept away. At Penn Haven the waters rose fifteen feet in three minutes, the reason of this sudden rise being the giving away of dams above, and the descent of the emptying pools in a rush of waters that carried destruction on its wave and left death in its wake; for the coming of the danger could not be signalled (the telegraph poles having previously succumbed to the storm) and in many places and cases there was no escape from it. Boats moored in pools, with crews and families on board, were torn loose and swept down upon the rushing current and wrecked and lost; whilst habitations along the river's side were lifted from their foundations by the rising waters, and their inmates sent adrift and drowned.

What the damage done to the company's works may amount to, we are unable to indicate. It is said that three months will elapse before the navigation can be reopened to Mauch Chunk. The company, however, is wealthy, being owner of a magnificent coal estate, and can command means to reconstruct its line according to any plan that may be agreed upon. It is manifest though, that from the lower portions of the valley of the Lehigh there will be urged, with plausibility and force, objections to the rebuilding of the river dams above Penn Haven, the reservoirs formed by the dams carried away on Thursday, 5th inst., having been the source and cause of the damage and loss inflicted upon property and life.

The Lehigh Valley Railroad.—The bridge upon which this road crosses the Lehigh river below Mauch Chunk was carried away, as also in whole or part were lesser structures farther down the river. In some places the track and roadbed were washed down into the river, and, altogether, much injury was sustained. About three weeks, it is said, will suffice to reopen the road to Mauch Chunk. This road is in able hands, and all that can be done will be done with a promptitude that will attain the end sought.

The Beaver Meadow Railroad.—On about nine miles of this road, between Penn Haven and Mauch Chunk, the damage done is serious, the road in some places having been washed down into the river; the Turnhole Bridge, an iron structure across the Lehigh, was carried off its piers and abutments, and lies in the river's bed at right angles to its course when in place, its wrought iron parts twisted and bent and its cast iron parts broken. The upper portion of this road was not injured, and on Monday next, upon the completion of the repairs to the Little Schuylkill Railroad, tonnage from Hazleton and its vicinity will be forwarded via the Quakake, down the Schuylkill Valley.

The Hazleton Railroad was injured nowhere except at the foot of the planes at Penn Haven, where the pockets and trestling and the bridge across the Quakake, were carried away.

The Delaware and Hudson Canal Company had their aqueduct across the Delaware river at the mouth of the Lackawaxen, and, we believe, some smaller aqueducts in its vicinity carried away.

The Delaware, Lackawanna and Western Railroad suffered in a number of places from the carrying away of culverts and loss of embankment and roadbed, but at no one spot was the damage very serious.

The Schuylkill Valley.—The Philadelphia and Reading R. R. was not even for the brief period of a day embarrassed in its operations, nor did the Schuylkill Canal suffer anywhere in its dams and locks; the breaches in its banks were all between Schuylkill Haven and Reading. One week from to day the repairs will be completed; the damage to the canal will not exceed $25,000.

The Mine Hill and Schuylkill Haven Railroad sustained a slight injury in Mine Hill Gap; the Little Schuylkill Railroad will be in operation by Monday next; The Mahanoy and Broad Mountain Railroad lost a culvert (ten feet wide over a small stream) and some embankment; other lateral roads lost bridges and otherwise sustained damage, but not to serious extent.

The Swatara—The Union Canal.—On the Union Canal, from Pine Grove to the Susquehanna, great destruction ensued from the giving away of some small mill dams above Pine Grove, which was followed by the giving away of the canal dam at Pine Grove, the big dam fifty feet high in the gap in the Blue Mountain—and the Feeder dam, which jointly from their pools let down into the valley below a volume of water that carried off or greatly damaged all the structures met with before the Susquehanna was reached, except the massive brick viaduct upon which the Lebanon Valley Branch crosses the Swatara. This permanent work, built by Richard B. Osborne, C. E., withstood the flood and vindicated its builder, at the same time that it kept open the Lebanon Valley route from Harrisburg to Philadelphia. The Union Canal basin at Middletown was considerably injured. One hundred thousand dollars, it is said, will be required to restore the works destroyed on the Union Canal. The Western Division of the line we are assured can be put in order without long delay; the Eastern Division is not damaged. The Branch Canal extending to Pine Grove it is supposed can hardly be rebuilt this present season.

Accompanying the destruction of property by the flood was an appalling loss of human life, two hundred persons, it is estimated, having been drowned on the anthracite territory and in the valleys leading down from it. The damage done in dollars, too, swells into a total of millions.

In consequence of this flood coal has risen in price, the carrying lines to the great markets having at one swoop been reduced from six to one, the Philadelphia and Reading Railroad being the only one of the half dozen, in operation this present week.

Soon, however, the Delaware, Lackawanna and Western Railroad will again be in use, forwarding coal trains to tidewater; in one week navigation on the Schuylkill Canal will be resumed; and soon thereafter the Lehigh Valley Railroad and then the Delaware and Hudson Canal will be reopened. Lastly, at the end of three months, the Lehigh Canal will be in order to Mauch Chunk, when the six lines will all once more be in operation.

Meantime the obstruction in the sources of supply will keep the market scant and scarce of the staple fuel, and, per consequence, better prices will rule, and the consumer will pay more than he paid last year, for his anthracite.—*U. S. R. R. and Mining Register.*

AMERICAN RAILROAD BOND LIST.

(*) signifies that the road is in the hands of receivers. (†) that the company is in default in its interest. S. F.," Sinking Fund. "var.," that the bonds fall due at different periods

American Railroad Journal.

Saturday, June 21, 1862.

Another Issue of Treasury Notes.

The Secretary of the Treasury has recently recommended Congress to clothe that department with authority to issue $150,000,000 of demand notes, in addition to an equal amount which is now in circulation. A bill has been introduced into Congress, we observe, with that object in view. It is meeting, however, with quite a strenuous opposition from a large section of the Press and the public which advocated the first issue. The advance in the value of specie, or rather the decline that has taken place in the paper currency, during the last ten days, is naturally exciting lively apprehension among all except those who may be operating in stocks for a further rise, or who seem to think that loyalty does not comport with criticising the advice of a member of the cabinet. If the mere *shadow* of the new issue has produced a change of nearly three per cent., what may be expected when the substance of such a large amount crosses our track?

We assume the Secretary's programme to be this: He requires a larger conversion than had lately been taking place of demand notes into permanent bonds. At the date of his report it amounted to about one million dollars per week. The receipts from customs and other sources added fully one million and a half to this, leaving four or five millions to be provided to cover ordinary expenditures. Mr. Chase thinks, and thinks correctly, that if authority were given to increase the volume of the currency still more largely, the exchanging process would go on at a proportionably more rapid rate. Indeed, last Friday and Saturday witnessed the conversion of $1,039,000, or nearly twice as much as during all the rest of the week. With the passage of the bill it is probable that twice the number of notes would be returned to Washington, as they are now piled up in such quantities in our banks as to be practically valueless.

But here occurs the difficulty. Unquestionably there is at this moment as large an amount of "currency" in circulation as the wants of the community require. If every body does not feel flush, it is not for want of gold or paper; but simply because industry is comparatively stagnated. The importer is afraid of speculating in wares, not being able to divine the wants of the public three or six months hence. For the same reason, the manufacturer prefers to do a small and safe business to trusting former customers with large amounts, however honest and solvent they may have been. Mistrust governs as respects the future; and for this reason gold or its representative is not so plenty as most of us might desire. There is abundance of money lying idle and seeking employment, if the state of affairs were such as to dispel fears and drive it into the channels of business. We do not require more treasury notes to supply our wants; even the precious metals are not wealth unless they are made to subserve the wants of commerce.

The condition of legitimate business being such, there is only one way in which a surplus currency can be employed, which is in *speculation*. Hence, as millions after millions of paper come in, stocks and other securities go up to a range where they are far above other and more substantial values. In a state where moneyed men go "from hand to mouth," that is, when they mean to use their means only for the day, the stock market is the first field that offers itself. Hence the rapid rise in prices that has lately taken place—a rise in many cases without any more just ground than the depressed state which preceded it. But this is not the great evil. Foreigners, hearing of the high prices which rule here, return our securities, convert them into specie, and withdraw it from the country. All at once people are struck with alarm at the export of the precious metals, seldom comprehending the true cause. Let stocks go ten or twenty per cent. higher, and unless an equal appreciation in the price of gold as compared with paper should take place, the banks would shortly be depleted of their treasures altogether.

In brief, then, we deprecate exceedingly th issue of any large additional amount of demand notes as currency. By the unsettling of values as well as the export of specie, it would probably cost the country far more than the amount which it would bring to the government. The first issue has probably conferred a benefit on the community; but enough is as good as a feast, and certainly better than a surfeit. It is believed that the means already provided will suffice to carry the government through till the re-assembling of Congress in December.

The Halifax and Quebec Railway.

Among the dispatches recently laid before the British Parliament we observe a reply from the Duke of Newcastle to delegates from the Provinces of Canada, Nova Scotia and New Brunswick, on the subject of railroad communication between Halifax and Quebec. The governments of these provinces submitted an offer of uniting with Great Britain in a guarantee of four per cent. on three millions sterling, the estimated cost of the intercolonial road. To this the Duke replies that the imperial government cannot accede. But they "are willing to offer to the Provincial governments an imperial guarantee of interest toward enabling them to raise by public loan, if they should desire it, at a moderate rate, the requisite funds for con-

structing the railway," whatever it may cost. The sum specified would probably go *half way* toward building a line 850 miles long after the English style.

The Irving House.

This popular establishment is situated on the corner of Broadway and Twelfth Street, this city. The entrance is on Twelfth Street. By reference to an advisement in another column, it will be seen that the "House" is now open for the acommodation of families and transient guests. Messrs. HUNT & NASH, the proprietors of the "Irving House," have recently opened in its basement, a first class *Restaurant*, the entrance to which is at No. 825 Broadway. As the "Irving" is conducted upon the European Plan, this will be a great accommodation to the guests, as well as to the public at large. Such an establishment has been for a long time needed in that neighborhood. Mr. Hunt, the senior proprietor has been for a number of years connected with our first class Hotels on Fifth Avenue, and elsewhere, and Mr. Nash, as the keeper of the "Great Republic," is well known to the business community. We commend the Irving, its proprietors, and especially the new Restaurant, to the attention of a discriminating public.

The Hartford and New Haven Railroad Company Compelled, by Mandamus, to run Passenger Trains to the Original Terminus.

DISCONTINUANCE OF PASSENGER TRAINS—RIGHTS OF THE PUBLIC, CHARTER OBLIGATIONS: CONTRACTS IN DEROGATION OF SUCH OBLIGATIONS DECLARED VOID.

The State of Connecticut, by her Attorney General, applied to the Superior Court for a *mandamus* against the Hartford and New Haven Railroad Company to compel them to run passenger trains to the original terminus of their road *at the navigable waters in New Haven Harbor*; they having constructed a track diverging from the original track at a point a mile and a half from its terminus at tide water, and running to the station of the New York and New Haven Railroad Company in the city of New Haven, and discontinued running passenger trains to the old terminus.

The application alleged that the respondents were incorporated by the Legislature of the State in the year 1833, with power and for the purpose of constructing and operating a railroad for the transportation of passengers and freight from the city of Hartford to the navigable waters of New Haven Harbor at some point between the canal basin and the west end of Tomlinson Bridge, and by a latter act were empowered to extend their road to the North line of the State, and thence, with the assent of the State of Massachusetts, which was soon after obtained, to Springfield in that State; that the connection of the road at Springfield with various important roads leading in all directions, made it a thoroughfare of great importance; that the road connected at its terminus at New Haven Harbor with a line of steamboats, which was established and run for the transportation of persons and freight from the said railroad to the city of New York, and from the latter to said railroad; and that said railroad and line of steamboats had for a long time constituted a direct and important route for the public travel, greatly accommodating the same, and necessary to the public convenience; and that the respondents were obliged, by the terms of the charter, to run their cars and transport passengers to said terminus, to such an extent as to afford reasonable accommodations to the traveling public; but that the respondents, some time before the bringing of the application, had wholly discontinued the running of the passenger trains to said terminus, although they had been often requested to continue them by persons desirous of being transported over that part of their road, and that they now wholly refused to run their passenger cars over that part of their road.

The Superior Court issued an alternative mandamus, and the respondents then came into court and filed their return. The substances of the defence was, first, that they were not required by their charter to run the passenger trains to the terminus in question; and, second, that in March, 1850, they had entered into a contract with the New York and New Haven Railroad Company the object of which was, among other things, to prevent the extension of a certain railroad in that State, known as the Canal Railroad, beyond a certain station known as Granby station; and in consideration of the covenants and agreements the respondents agreed, among other things, that they would pay $1,000 per month, to the New York and New Haven Railroad Company during the continuance of the contract, and until July, 1869, and that they would not run any passenger trains during said term, in connection with any steamboat running between New York and New Haven, and would not run any passenger trains to or from the steamboat dock in New Haven; but would run all their passenger trains to, and start them from the station near Chapel street, on the road of the said New York and New Haven Railroad Company. That the term of this contract had not yet expired and the New York and New Haven Railroad Company insisted on the observance of said contract as binding and obligatory upon the respondents.

The Attorney for the State demurred to the return, and the case was reserved by the Superior Court for the advice of the Supreme Court of Errors of the State. The following is the opinion, delivered after argument, and at the decision of the case: declaring that it was the duty of the company to continue the running of its passenger trains to the original terminus; they being required to do so by their charter, no contract with another company could absolve them from this obligation; and the people at large had the right, it being for their convenience, to require trains to be run as formally; and that *mandamus* was the proper remedy.

ELLSWORTH, J.—We consider the return made by the respondents to the *mandamus* unsatisfactory and insufficient, presenting no reason why the order should not be immediately executed.

The respondents admit that they have accepted, made and completed their road as required, and for years have continued to run cars upon it for freight and passengers to and from tide water in the harbor of New Haven in connection with steamboats from New York; and they do not deny that they are now using that part of their road for the transportation of freights, but they refuse, and have for some time past refused to use it for the transportation of passengers. And it is substantially admitted by the return that the public convenience will be subserved by the use of this part of the road.

Now it is difficult to perceive upon these premises upon what grounds the respondents can justify their refusal to perform their entire corporate duty; how they can expect to retain their franchise, and pay no attention to the duty it enjoins upon them. The contract with the New York and New Haven Railroad Company, that they will not permit the public to enjoy the benefit of this part of their road, amounts to nothing. It is in our judgment an aggrivation of their censurable neglect of duty, instead of a legal excuse for the neglect. What right have they to covenant with that corporation, that they will not run cars to tide water, as the charter provides that they shall, and as the public accommodation requires, especially when they enter into that covenant to secure to that corporation a monopoly of the public travel to and from New York, and, as an equivalent to secure to themselves a like monopoly of all the travel in the Connecticut valley, to the prejudice of every other corporation, that might have an interest in those routes? The whole proceeding from first to last, seems to us to be in contravention of the charter obligations of both these companies, and to present a case of arduous monopoly, if not of positive oppression and wrong, which can receive no countenance from an impartial tribunal.

We hardly know what doubtful principles of law are thought to be involved in the case. The respondents certainly were bound to make their road (if at all) within the time prescribed in the charter; and, having made it, to put into use every material part of it, and keep it in use until discharged by the Legislature. And this continuous duty is in no manner inconsistent with the power in the company, (which has been so much dwelt upon in the argument) to regulate and control the manner of using the road by wholesome rules and by-laws. These we admit are necessary and allowable; but then they must be such as are really promotive of the original design of the charter, and not such as tend to defeat that design. Under the contract in question, viewed in the most favorable light, persons traveling by railroad down the valley of the Connecticut, and desiring at New Haven to take the steamboat for New York, and those coming by steamboat from New York, and desiring to take the cars, must necessarily be exceedingly incommoded; while this very course of travel was well known when the charter was granted, and was intended to be secured and promoted by it.

We forbear going into other questions raised on the trial, or commenting upon the authorities cited by counsel. We think it unnecessary and prefer to place our decision upon the simple ground of the corporate duty of the respondents. All jurists and judges will at once agree that chartered companies are obliged fairly and fully to carry out the objects for which they are created, and that they can be compelled by *mandamus* to do it; and it will not be questioned that in the case of public highways, whether turnpikes or railroads, they are bound to keep them fit for use, and, in the case of railroads, to keep them furnished with suitable cars, engines and attendants, without which they cannot be used at all. We advise the issuing of a *preemptory mandamus*. In this opinion the other judges concurred.

Internal Improvements resulting from the War.

In our last CIRCULAR we gave a sketch of the great works proposed to be constructed by government, by means of which the extended line of frontier on the North could be defended by gun-boats entering the Lakes by way of the Erie Canal on the East, and the Illinois Canal on the West. The improvements proposed would probably allow the passage of boats of, say, 1,000 tons burden from the Hudson, and of very nearly equal tonnage from the Mississippi.

Such works, undertaken as *military* necessities, would inure chiefly to the benefit of commerce, as they would so reduce the cost of transporting the bulky products of the interior to market, as to pay for themselves in a very few years, and vastly increase the wealth and financial strength of the country. A system of internal navigation would be formed, unrivalled in the world, in capacity, extent and value. No country presents such extraordinary facilities for such a system. It would reflect, in its grandeur, the natural features, wants and resources of the country, and place its internal commerce entirely beyond the reach of foreign interference. It would render us invulnerable in war, and vastly augment our strength and prosperity in peace.

But this work only refers to the great Eastern portion of the continent. It leaves untouched the Western half, including the slope that faces the Pacific, whose richness both in soil and minerals is probably, unequalled in the world. No where else is labor so productive. Upon this Western slope is being rapidly repeated the achievements of the East—States, populous cities, immense mineral and agricultural interests, and every industry and enterprise that characterize a great, rich and progressive people. The only drawback to the prosperity of this Western sub-division of the continent, is the want of means of direct, rapid and cheap intercourse with the Eastern. Between the two are vast mountain ranges impracticable for a water line, and by far too extensive to admit of much personal intercourse, much less to allow the movement, over ordinary highways, of merchandise or property of any kind, except the precious metals. The only work that can unite the two extremes is a *railroad*. To such a work there are not only no insurmountable obstacles, but there are probably several routes from the Mississippi to the Pacific, over which a railroad might be constructed at the average cost of first class works in the Eastern States. Although a great altitude is reached in the central portion of the line, the difference in elevation is distributed over so great a distance as to be an inconsiderable element in either the cost of constructing or working the road.

There are several considerations which demand the construction of such a work by the United States. It is a political necessity to preserve the identity of our people in their ideas, sentiments, habits, and, as far as possible, in their pursuits. Notwithstanding the extent of the territory already occupied by them, so perfect have been the means of intercourse, and so universally have these been availed of that there are fewer provincialisms in the United States, with their area of millions of square miles, than in England with its thousands. We of course make one grand exception of a section which, by founding its great institution on force, necessarily cut itself off from the grand characteristic of the age—change resulting from progress—and checked the movement of a great portion of the population, free as well as servile, and necessarily gave birth to local peculiarities and provincialisms that could not accept government, or ideas, cosmopolitan in their character, and produced a divergence in feeling which resulted in rebellion. Everywhere else the people were able to accept a common nationality, so that when they met from the extremes of East and West, to put down the insurrection, they found themselves inspired by similar sentiments and actuated by a common object. The agencies that fused them into one people were *our public works*. If we would extend this nationality to the Pacific, we must extend the means that created it in the East.

By securing political unity we provide for military aggression or defense. With a line of railroad stretching across the continent we should secure our Western possessions from the fear of attack, while it would, assisted by the Electric Telegraph, enable each section to lend all its strength to the defence of the one menaced. In this way, it would be worth hundreds of millions, as it would relieve us from all fear of attack, from the utter hopelessness of such an attempt. It would be infinitely more effectual to avert aggression than any works of mere defense we might raise.

As an instrument of commerce it is indispensable. With it, the United States could not fail to become at once the centre of commercial influence and attraction, and by necessary consequence of political influence. The reader of every morning journal throughout the world would instantly cast his first glance to the column containing AMERICAN NEWS. In the Old World merchants would turn to the West for news from the East. The New Continent would become the thoroughfare between the extremes of the old, and command an influence from its wealth and resources quite as potent as from its position. With vast extents of territory of inexhaustible fertility fronting both oceans, and possessing salubrious climates, the great mountain chains that now divide them will be found to be Nature's Store-house for the most valuable minerals, so that with the area now occupied by our people, there will be found the greatest profusion of almost every product known to the tropical or temperate zones, with every metal and mineral valuable to man. All that is wanting to develop these resources to an extent that will make the United States the mart and counting house for the world, is a railroad which shall place the Atlantic coast within five days of the Pacific, and which shall form a great highway of commerce and travel between them. Such a work is now engaging the attention of Congress, with every probability that the proposed measure will become a law before the adjournment of that body. Sufficient aid will be extended to secure the speedy construction of the road. Such a step will show to the world that we are not, as Englishmen affect to believe, an effete and prematurely decayed people, but that the trials to which we have been exposed only serve to develop a strength which will not only astonish the world, but will lead to measures that will establish more firmly the genius of the Free States upon every portion of the continent, which will be gradually absorbed in a common nationality of which they are now the highest and most perfect type.—*Hallett's Financial Circular.*

No. 84 Broadway, N. Y.

Prince's Metallic Paint,
AN INDESTRUCTIBLE COATING
FOR
IRON, TIN AND WOOD.

IT consists of seventy-two parts Oxide of Iron, and twenty-eight parts Cement Lime Stone in the one hundred pounds.

It has much more body than red or white lead. It is warranted perfectly water and fire-proof and to withstand a greater heat on metals, without scaling, than any other paint in use.

It is a perfect cover for all kinds of iron, tin or wood-work, out-houses and canvas coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone as has been proven at the largest foundries in the country.

For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zinc, and much less than the ordinary mineral paints. It is free from any waste, and possesses a spreading and covering power unequalled.

TERMS,
By the Barrel or Half Barrel, { FOUR CENTS per pound.

A liberal discount made to parties purchasing by the ton.
A Barrel or Ton will be forwarded to any Railroad companies desirous of testing its qualities, for which there will be no charge if it does not give entire satisfaction.

Messrs. MUNN & CO.,

PROPRIETORS OF THE SCIENTIFIC AMERICAN continue to solicit patents in the United States and all foreign countries, on the most reasonable terms. They also attend to various other departments of business pertaining to patents, such as Extensions, Appeals to United States Courts, Interferences, Opinions relative to Infringements, etc. The long experience Messrs. MUNN & CO. have had in preparing specifications and drawings, extending over a period of sixteen years, has rendered them perfectly conversant with the mode of doing business at the United States Patent Office, and with the greater part of the inventions which have been patented. Information concerning the patentability of inventions is freely given, without charge, on sending a model or drawing and description to this office.

Consultations may be had with the firm between 9 and 4 o'clock, daily, at their principal office, No. 37 Park Row, New York. We have also a branch office in the city of Washington, on the corner of F and 7th sts., opposite the United States Patent Office. This office is under the general superintendence of one of the firm, and is in daily communication with the principal office in New York, and personal attention will be given at the Patent Office to all such cases as may require it. Inventors and others who may visit Washington, having business in the Patent Offices, are cordially invited to call at their office.

MUNN & CO., are very extensively engaged in the preparation and securing of Patents in the various European countries. For the transaction of this business they have offices at Nos. 66 Chancery Lane, London, 29 Boulevard St. Martin, Paris, and 26 Rue des Eperonniers, Brussels. Probably three-fourths of all the European Patents secured to American citizens are procured through this Agency.

A pamphlet of information concerning the proper course to be pursued in obtaining Patents, the requirements of the Patent Office, etc., may be had gratis upon application at the Principal Office, or either of the Branches. They also furnish a Circular of information about Foreign Patents.

During the last sixteen years the business of procuring Patents for new inventions in the United States, and all foreign countries has been conducted by Messrs. MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN; and, as an evidence of the confidence reposed in them by the inventors throughout the country, we would state that we have acted as agents for more than FIFTEEN THOUSAND Inventors! In fact, they have become identified with the whole brotherhood of Inventors and Patentees, at home and abroad. We would state that we never had a more efficient corps of Draftsmen and Specification Writers than are employed at present in our extensive Offices, and we are prepared to attend to Patent business of all kinds, in the quickest time and on the most liberal terms.

Communications and remittances should be addressed to

PROPOSALS

FOR $333,000 "CENTRAL PARK IMPROVEMENT FUND STOCK OF 1876."

SEALED proposals will be received at the Comptroller's Office, until FRIDAY, the 27th day of June, 1862, at 2 o'clock, P. M., when the same will be publicly opened for the whole or any part of the sum of THREE HUNDRED AND THIRTY-THREE THOUSAND DOLLARS of the "Central Park Improvement Fund Stock," authorized by Chap. 85 of the Laws of 1860, and by an Ordinance of the Common Council, approved by the Mayor, April 25, 1860.

The said stock will bear interest at the rate of six per cent. per annum, payable quarter-yearly, and the principal will be redeemed November 1, 1876.

The proposals will state the amount of stock desired and the price per one hundred dollars thereof, and the persons whose proposals are accepted, will be required to deposit with the Chamberlain of the City, within fifteen days after the opening of the bids, the sums awarded to them respectively.

On presenting to the Comptroller the receipts of the Chamberlain for such deposits, the parties will be entitled to receive certificates for equal amounts of the par value of the stock, bearing interest from the dates of payments.

Each proposition should be sealed and indorsed "Proposals for Central Park Improvement Fund Stock," and inclosed in a second envelope, addressed to the Comptroller.

The right is reserved to reject any or all of the bids, if considered necessary to protect or promote the interests of the city.

ROBT. T. HAWS, Comptroller.

CUMBERLAND COAL.

THE BORDEN MINING COMPANY

ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL**, DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGE'S CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to

WILLIAM BORDEN.

THE GREAT FIRE IN TROY.

Unparalleled Triumph

OF

LILLIE'S SAFES!

The following certificates explain themselves:

TROY CITY BANK, May 21, 1862.

LEWIS LILLIE, Esq.—Dear Sir: I am sure it will give you as much pleasure to know as it does me to say, that in the recent fire of the 10th inst., which desolated our city and destroyed our Banking-house, the contents of our Bank vault, though the building itself was a heap of ruins, remained entirely unharmed. This result we attribute entirely to the fact that our old Wrought Iron Doors were, about two years since, exchanged for a set of your celebrated Chilled and Wrought Iron Doors and Frames. With the old doors, not a book or paper in the Vault could have been saved; as it is, nothing in it was even damaged, though exposed to the most intense heat.

Yours, respectfully, S. K. STOW, Cashier.

TROY, N. Y., May 14, 1862.

The undersigned, using **Lillie's Chilled and Wrought Iron Fire and Burglar Proof Safes,** at the time of the late disastrous fire in this city, would state that our safes were subjected to a severe test by fire, the heat varying in intensity, according to the locality and surroundings. The time they were exposed to the fiery ordeal, unprotected by water, varied from 24 to 72 hours. We would say that our money, papers, books, etc. were well preserved, and the Safes are suitable for further use. By comparison with Safes of other manufacture, equally exposed, we have no hesitancy in recommending Safes of Lillie's manufacture to the public on their demonstrated merit as entitled to unparalleled confidence as fire-proofs.

James Kenyon,	S. Bachelder,
S. O. Gleason,	Gates H. Barnard,
Percy & King,	W. D. Haight,
McCoy & Beadle,	Denio & Freiot,
Coon & Van Valkenburgh,	Walsh, Petit & Anthony,
S. S. McClure,	D. H. Snyder,
Ross & Smith,	Jonathan Seaman.
Robert Green,	

Not dug out—nothing in them.

TROY, May 19, 1862.

The undersigned had one of **Lillie's Wrought and Chilled Iron Safes,** which went through the fire of the 10th of May. The Safe was exposed to a severe fire for over 24 hours. In falling it turned on its face, and when turned up to open the doors was red-hot. The back of the lower part of the Safe (behind the books) was filled with pennies, which, in falling over, pressed against the books, and brought them directly in contact with the doors. The wrappers on the pennies were mostly good. The books were unfit for further use, but the writing on them was partially legible, and could be copied.

DUSENBURY & ANTHONY.

TROY, May 19, 1862.

This is to certify that we had in our store, in this city, when it burned, one of **Lillie's Small Safes,** which was in the fire, without water on the building or Safe. Most of the valuables were removed before the fire, and therefore we were not in haste to get the Safe out of the burning ruins. Some of the papers left in the Safe were legible when taken out, but most of them were charred.

I. M. SINGER & CO.,
Per G. W. BABCOCK, Agent.

This is to certify that the undersigned had one of LILLIE'S Patent Chilled Iron Safes in their store, which was burned during the late severe fire in this city, and we are happy to state, the Safe preserved all its contents in first-rate condition. All the papers were legible, and the books will do for further use, without even rebinding.

GRANT, NUTTING & CO.

The foregoing comprises all the Safes of my manufacture that were in the fire, and below will be found certificates from all the owners of Safes manufactured several years since, by World's Safe Company, who used my Patent Chilled Iron Shell, but not my Fire-Proof Cement.

WORLD'S SAFE COMPANY'S SAFES.

TROY, May 19, 1862.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire of the 10th inst., in this city, would state that our Safes were exposed to a severe heat, being confined in the burning ruins, unprotected by water, from one to three days. On opening the Safes the contents were mostly legible, and to a far greater extent than could be reasonably expected of any Safe. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectors against fire, and by this test we are prepared to recommend them as such to public patronage.

Lyman Bennett,	Silliman, Matthews & Co.,
Flood & Dunham,	E. L. Mallory,
John Hutchinson,	E. H. Virgil,
	Sup't National Express Co.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire in this city, would state, that on opening our Safes the contents were mostly legible. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectives against fire, and we are happy to recommend them to public patronage.

W. & L. E. GURLEY,
R. L. & G. DRAKE,
LEONARD SMITH,
H. E. & W. ALENDORPH, Absent.

TROY, May 19, 1862.

To whom it may concern: We wou'd certify that when the recent fire broke out in this city, we took out from our Safe (which was made by World's Safe Company) all our books, papers, etc., and then left it to the flames without shutting the door, and the Safe will do for further use by being repaired, although the book case was destroyed by the door being left open through the fire.

ACKLEY & CO.

TROY, May 19, 1862.

The undersigned, using Safes manufactured by the World's Safe Company, at the time of the late disastrous fire on the 10th instant, in this city, would state that our Safes were filled with fire-brick for the fire-proof, and while several of this class preserved their contents, ours were considerably charred, and only a part legible. In justice to Mr. LEWIS LILLIE, we are pleased to state that Safes of his manufacture proved to be powerful protectors against fire, and have preserved their contents, after having been exposed to the fiery ordeal, unprotected by water, from one to three days.

Stephen Holton,	Luther Greenman,
Bennett, Strickland & Fellows,	E. W. Johnson,
Corloss & House,	J. H. Goodsell.

TROY, N. Y., May 17, 1862.

LEWIS LILLIE—Dear Sir: We were using at the time of the late severe fire of 10th inst., a Safe purchased in 1852 of the late World's Safe Company. The contents were considerably charred, but our Ledger is mostly legible, and we are able to copy it.

The Safe was subjected to a severe heat for over eighteen hours, and we are satisfied that if water had been thrown on the ruins, as is ordinarily the case, the contents would have come out uninjured. You will please repair our Safe, placing in it the improvements embraced in Safes of your manufacture, and oblige

SHELDON & GREENE.

N.B.—The above Safe is believed to have damaged the contents more than any of those named in this circular.

There were only seven Sheet Iron Safes, made by Herring and others, outside of the railroad depot, that were exposed to the fire, four of which were entirely burnt out; the fifth was saved by being early cooled off by water; the remaining two were not severely tested.

LEWIS LILLIE.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No.			
1.	General Table for all Bases and all Slopes.			13.	for Base 13 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" " 20 "		1½ to 1
3.	Base 12 ft. Slopes		1½ to 1	15.	" " 24 "		1½ to 1
4.	" 14 "	"	1½ to 1	16.	" " 25 "		1½ to 1
5.	" 15 "	"	¾ to 1	17.	" " 26 "		1½ to 1
6.	" 15 "	"	1 to 1	18.	" " 28 "		¾ to 1
7.	" 15 "	"	1½ to 1	19.	" " 29 "		1 to 1
8.	" 16 "	"	¾ to 1	20.	" " 30 "		1 to 1
9	" 16 "	"	1 to 1	21.	" " 30 "		1½ to 1
10.	" 18 "	"	¾ to 1	22.	" " 30 "		1½ to 1
11.	" 18 "	"	¾ to 1	23.	" " 32 "		1 to 1
12.	" 18 "	"	1 to 1	24.	" " 32 "		1½ to 1

The Tables are printed in clear, bold type on tinted paper, sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

☞ RAILROAD COMPANIES will oblige us by sending us copies of their REPORTS as soon as they are issued.

A Bankruptcy Law.

The evil of a vicious system is that its effects do not immediately cease to exist, but that they propagate themselves indefinitely in point of time and space. One abuse generates whole classes of others. In all commercial countries the practice of giving *long credits*, has prevailed to a greater or less extent; but here it has reached a head that is alarmingly dangerous. Mere adventurers, empty in pocket and more empty in brain, are tempted to go into business in the hope that "something will turn up" in time to enable them to discharge their obligations. Creditors are too apt to feel equally sanguine. One venture having turned out favorably, why should not another and another? In a short time a very large and handsome house of cards is put up, and every body congratulates his neighbor on the improved condition of affairs in general.

But a breath of wind tumbles the whole structure into the mud. There arises a defective crop of grain or cotton; we import foreign fabrics too freely; we ship the precious metals pretty rapidly for a time; we are involved in hostilities, or in some other mode an alarm is got up. Retail dealers cannot collect from the farmers, and the wholesale merchant cannot collect from retailers. The importer or manufacturer is in turn non-plussed, and for a time every thing comes to a stand. Banks contract their issues, when these might at least mitigate the general distress; fearing an immediate return of their paper for conversion into gold, and doubting the solvency of their best customers.

This periodical "dead-lock" will doubtless take place while long credits in mercantile transactions shall be the rule and cash down the exception. It is essentially vicious, immoral, impolitic. It involves the necessity of further proceedings which, under other circumstances, would be radically wrong. Among these we may notice the all but unanimous call now arising for a bankrupt law. Seldom has such unanimity been shown on behalf of any public measure. Large creditors, who have lost millions by the revulsions of 1857 and 1860, are asking for such a law, as are unfortunate traders, both great and small. The East, the West, and the South so far as heard from, evince the same general desire, only differing in unimportant details. The earnest cry is to pass a bill which shall make a full and fair distribution of the debtor's effects among his creditors, taking that as a settlement in full for all past obligations and enabling him to begin *de novo*, free from all harrassing annoyances. "Leave to his own conscience," it is said, "the final liquidation of the debt, if he be able to pay; but let not the law force him, after it has once stripped him of every thing, seeing his creditor was willing to trust all to chance."

The position taken by the friends of a bankrupt law is to some extent like that of those who would repeal all statutes for the collection of debts, except that the latter is much more sweeping than the former. Some of the shrewdest business men we have ever met avow themselves favorable to repeal, on the principle that where every thing is left to the purchaser's *honor* credit will not be extended, unless there is good ground for believing him to be both solvent and honest; that, therefore, most of the hazards now existing would cease and a higher tone pervade all departments of trade, inasmuch as it would rest on a sounder foundation. Now, a bankrupt law goes one step in this direction. In certain circumstances the law virtually declares that it will not interpose its authority to collect debts. It says in effect, "you may levy once, but only once, on the debtor's effects. You shall have every thing in his possession except his person and family; but having made that seizure you cannot repeat the process. He is to be allowed an opportunity to recover his position free from harrassing persecution. If, under these circumstances, you see fit to trust him, it is at your own risk."

It will be alleged that this has not been the true situation of the fifty thousand insolvents at the North, to whom a bankrupt law would apply; that no such act being on the nation's statute books two years ago, to force creditors to relax their grasp after one distribution of the effects, would be like legalizing a breach of contract. But to this it may be replied that the events which have arisen were not foreseen two years ago, and that they are unprecedented in our history as a people. In legislation some allowance must be made for emergencies like the present. The late revulsion has caused many of our oldest and wealthiest houses to totter and fall. During the year 1861, 6,993 failures occurred in the Free States, for sums of $5,000 and upward, against 4,932 in 1857. The aggregate amount of indebtedness due by the South to the North, at the outbreak of hostilities, has been estimated at $300,000,000, of which fully fifty per cent. was to merchants and others in this city. A very small proportion of this will ever be recovered; but the necessity for a general settlement by some process common to all portions of the country, is felt by both the great interests concerned.

Had the vicious system of long credits not prevailed to such an extent, the course of events would probably have been different; the necessity which is now felt might not have existed. But it is idle to waste breath in talking about what might have been, unless we are turning the painful lessons of the past to profitable account. It seems to us that sound policy, mercy to the fallen, and even justice, call for the enactment of a bankrupt law, such as will operate fairly between debtor and creditor.

Iron Sleepers.

In the last report of the Madras (India) Railroad Company, we observe that the managers are now laying down iron sleepers on some portions of the track. In the south of that peninsula, and indeed in nearly all parts of it, wood is so scarce that it is difficult to obtain it in sufficient quantities; while the decay, induced by a tropical climate, is much more rapid than with us. Much benefit ultimately is expected to arise from the substitution of iron for wooden ties. In same portions of the United States the same difficulty may be expected to arise respecting ties, that has already shown itself in regard to fuel. Fortunately there is no limit to the iron deposits of the West, where the scarcity of wood will first be experienced. In the Southern States the necessity of frequently renewing that portion of the superstructure, on account of the climate, is greater than at the North or Canada, but the extent of country still covered by the forest is such that no lack of material need be apprehended for an average life time. The same remark will apply still more forcibly to the Central American countries and part of Mexico. But if the cost of timber is of little consequence, it is different with that of *labor* in taking up old and putting down new ties—one of the largest items of expenditure on the part of the Panama Railroad Company. Taking the United States as a whole, we suppose that seven or eight thousand miles of track have to be re-laid every year with wood, for which one million and a-quarter ties are necessary.

The railroad in question has been recently completed its entire length, 406 miles. It stretches across the Indian peninsula from Madras to Beypoor. Its construction extended over a period of nine years. It traverses a section from which much is expected in the production of cotton and coffee.

New York and New Haven Railroad.

The iocome of this company for the year ending March 31, 1862, was:

From passengers	$618,181 69
" freight	125,092 38
" miles, expresses, extra baggage, and interest on dividend funds invested	64,786 38
	$808,060 45

And the expenses were:

Transportation expenses	$213,661 68	
Repairs of roadway, etc.	80,706 64	
" equipment	112,694 04	
Fuel, oil and waste	76,102 86	
Haulage by horse-power	22,916 50	
		506,081 72
Leaving as net earnings		$301,978 73

The resources of the year have been disposed of as follows;

Cash on hand, April 1st, 1861	$223,926 74
Reduction, since April 1st, 1861, of the stock of materials on hand	24,060 97
Net earnings for the year	301,978 73
	$549,966 44
Paid loss in operating the Canal road	$40,675 48
" coupons for bond interest	122,520 00
" two dividends of 3 per cent each	180,000 00
" for new locomotives	38,180 18
Reduction of accounts papable	49,947 50
Cash on hand, April 1st, 1862	118,643 28
	$549,966 44

The report says:

The unfortunate National troubles of the past year have exercised a bad influence on the passenger and freight business of this road, in common with all other roads north and east. It will be seen, by reference to the annexed table of comparative receipts, that the serious diminution commenced in June, 1861, and continued until January, 1862. This was mainly caused by the almost total absence of the Southern business and pleasure travel by which we have, in former years, been largely benefitted during the Summer.

In order to meet the effects of this deficiency in receipts, prompt measures were taken to reduce our expenditures in all the various departments of the road. Important reductions of the pay to various salaried officers of the company were at once made, and in some cases to the extent of 33⅓ per cent. of their whole pay, and this reduction was cheerfully acquiesced in by all. Our average number of employees was reduced by over one hundred, or twenty per cent. of the force employed; and all such other means were put in requisition as would have a tendency to reduce our expenditures to a point not inconsistent with safety and efficiency. It will be seen that while the gross receipts of the road have been diminished, during the past year, $118,425 35, at the same time the expenditures have also been reduced $93,420 48. The business and receipts of the road have much improved; and while no immediate large increase may take place, yet there is confidence that they will prove to be more satisfactory in the future. An arrangement has been made with the Housatonic Railroad Company, by which our freighting business will be largely increased from that source.

It will be seen that the bond account remains in all respects as reported last year, being in no wise changed.

The Directors, after a careful consideration of the propriety of declaring a dividend in February last, and in view of the large and unexpected diminution of receipts, decided that the interests of the stockholders would be best promoted by passing or deferring the same. The large amount of our cash earnings, invested in our own bonds and in building the second track from New Rochelle to the junction with the Harlem road, amounting in the aggregate to upwards of three hundred and ninety thousand dollars, left but slight room for the accumulation of a desirable surplus. Since the date of our last report, two dividends of three per cent. each have been paid to the stockholders in cash.

During the past year, two powerful coal-burning engines have been added to our equipment, and paid for out of the earnings; six hundred tons of new iron have been purchased, and 41,616 new ties have been bought and paid for, together with 5,000 wrought iron chairs; all of which materials are being used in the ordinary repairs of the road. There have been repaired, at our shop in Norwalk, during the past year, 2,619 old rails that were susceptible of easy repair. Some extra expense has been incurred in altering the flues of many of our locomotives, removing the copper and substituting iron, the former having been found unequal to a long endurance of coal-heat; and it was deemed to be sound economy to make the alterations, although at some cost. The rebuilding of old passenger cars, which was formerly done at our shops in New Haven, is now being done by contract at Springfield and Worcester, under an arrangement which, it is believed, will insure important savings to the company. Much difficulty has been experienced in procuring our usual supply of desirable coal, since the interruption of traffic on the Baltimore and Ohio Railroad, from which source we have chiefly derived our supply. As the road is now open, these difficulties will disappear, and at the same time a reduction of price may be looked for.

The Directors have made a careful and close examination of the roadway, bridges, culverts, station houses, shops, and the property of the company generally, and are enabled to report that they were all found, with slight exceptions, in good repair and safe condition.

Since the decision of Judge Ingraham, in the so-called "Omnibus" case, confirming the separation of the so-called "bogus" stock from the genuine, made by this company, some suits have been brought in the State of New York and three in the State of Connecticut, for damages. Up to this date there has been no hearing in any one of these cases; but all the principles involved in the above mentioned suits were embraced in a suit brought in the Superior Court of New York, by John O. Woodruff and Robert M. Henning, against this company, for damages. The case was decided by Judge Woodruff, at Special Term of January, 1860, in favor of the company, and from this decision the plaintiffs appealed to the General Term full Bench of three Judges; at this present April Term, 1862, the decision of Judge Woodruff was confirmed, with costs to the defendants, the New York and New Haven Railroad Company. It is to be hoped that these repeated decisions, all of the same character, will have the effect of preventing further useless litigation.

It is with the highest pleasure that we are enabled to report the truly gratifying fact, that there have been conveyed over this road more than six millions of passengers during the past six years, ending on April 1st, 1862, without causing the loss of a single life or limb to any passenger so carried; and at the same time, we would submit this to be the highest testimony that could be offered, to prove the good condition of the road, and the care and attention evinced by the officers and employees.

The number of miles run by passenger trains during the year was 420,992; by freight trains, 63,519; by service trains 5,339—total 489,850. Number of passengers carried, 1,016,934; do., carried one mile, 34,688,451. Tons of freight moved, 55,442; do., moved one mile, 3,018,280. Number of passenger trains, 6,490; average cars per train, 5. No. of freight trains 683; average cars per train, 17. Average weight of passenger trains loaded, 115 tons; do., freight trains, do., 225 tons. Average speed of express trains, 30 miles; way trains, 24 miles; freight trains, 12 miles. Average receipts per passenger per mile, 2 cents; per ton of freight, 4.50 cents. Of the passengers carried, 763,112 were local and 253,822 to and from other roads; 503,108 were passengers over Harlem road, 257,712 commuters over do., and 256,114 passengers beyond do. Of the freight moved, 21,818 tons were local, and 23,624 tons to and from other roads.

The equipment of the road consists of 32 locomotives; 74 passenger, 19 mail and baggage, and 349 freight cars—of which 6 locomotives, 6 passenger, 3 mail and baggage, and about 150 freight cars are in use upon the Canal road.

The cost of fuel for running the trains the past year has been about 12.53 cents per mile—being a reduction on the cost per mile for the preceding year of about 16 per cent. Tons of coal used, 6,255; cords of wood, 3,927; cords of kiadling, 717.

But three of the engines which are wood-burners, are now running on the New York and New Haven road, and one of these is used only for switching. The remainder of the wood-burners are used for operating the Canal road, on the line of which wood can be obtained at a rate which renders its use as economical as the use of coal.

The number of miles run by engines on the Canal road was 85,656. Tons of coal used, 186; cords of wood, 1,995; cords of kindlings, 34.

The earnings of the Canal road were $99,879 24, and the expenses of operating, $140,572—loss $40,675 48. The actual falling off in receipts on this road was $41,094 48; the expenses were however lessened by the amount of $28,173 63.

Last year the loss in operating this road was $27,754 63.

CONDENSED BALANCE SHEET.

Railroad; including the franchise, right of way, grading, masonry, bridging, fencing, superstructure, iron, station-houses, shops, fixtures, furniture, machinery, engineering, agencies, interest, discount on bonds, &c. &c.		$4,643,649 18

Bonds; due December 1st, 1866, with 7 per cent. coupons, payable on the first days of June and December in each year		912,000 00
Bonds; secured by mortgage, due Oct. 1st, 1875, with 6 per cent. coupons, payable on the first days of April and October in each year.		978,000 00
Profit and loss; being the total surplus of earnings not paid out in dividends, (but of which $529,557 75 has been expended for new depots, finishing the second track, new bridges, and retiring bonds,).		678,368 37
Accounts payable; being for coupons payable April 1st, 1862, and balance due on the March payroll.		58,090 69
		$5,626,459 06

Officers chosen May 9th, 1861:

President—JUSTUS R. BULKLEY.

Directors—Justus R. Bulkley, George N. Miller, Abraham R. Van Nest, George B. Cahart, New York, Donnie Kimberly, John Bradley, E. C. Scranton, New Haven; John W. Leeds, Stamford; Jonathan Godfrey, Southport.

Superintendent—JAMES H. HOYT.

Treasurer—WILLIAM BEMENT.

Secretary—E. S. ABERNETHY.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Fort Wayne and Chicago Railway during the month of May ultimo, compared with the same period last year, were as follows:

	1861.	1862.
Freight	$137,854 26	$180,505 28
Passengers	61,146 03	75,907 49
Express	2,700 00	2,700 00
Mails	7,825 00	7,825 00
Rent of railway	7,083 33	7,083 33
Rents	157 75	.....
Miscellaneous	234 54	500 00
Total for May	$216,500 91	$274,521 10
Earnings, Jan'y 1, to April 30	955,142 20	1,146,397 06
Total earnings to May 31	$1,171,643 11	$1,420,918 16

Increase for May, $58,020 19, or 26.8 per cent.

Average increase to May 31, 1862, 21¼ per cent.

This increase shows over 8 per cent. on the stock, after paying interest on 1st, 2nd, and 3rd mortgages, and providing $200,000 annual sinking fund on the 1st and 2d mortgages.

The earnings of the La Crosse and Milwaukee Railroad for May, 1862, were $125,999 19
Do., 1861 108,002 71

Increase $17,996 48

The earnings of the Erie Railway for the month of May, 1862, were $575,344 95
Do., 1861 506,610 49

Increase $68,734 46

The earnings of the Norwich and Worcester Railroad for May were as follows:

	1861.	1862.
Passengers	$7,642 38	$9,009 39
Freight	16,218 10	18,088 51
Total	$23,860 48	$27,097 90
Increase		$3,237 42

The May earnings of the Cleveland, Columbus and Cincinnati Railroad, are $119,984, as against $96,433 same month last year.

The business of the Illinois Central Railroad for May, 1862, was:

Land Department.

Acres Construction Lands sold	5,865.31 for	$64,434 23
Acres Interest Fund L'ds sold	777.68 "	7,385 28
Acres Free Lands sold	1,280.37 "	13,124 72
Total sales during the month	7,923.36 for	$84,944 23
To which add Town Lot sales		1,751 00
Total of all		$86,695 23
Acres land sold since Jan'y 1, 1862	35,363.55 for	$418,551 76
Acres sold prev'sly (net sales)	1,236,971.08 for	16,161,203 15
Total	1,272,334.63 for	16,579,754 91
Construction bonds canceled previous to April 30		$2,106,000 00
Cash collected in May		23,312 15
55,000 bushels corn received on hand.		
Net collections to April 30, 1862		4,193,210 04

Traffic Department.

Receipts from Passengers		$59,466 40
" Freight		117,110 35
" Mails		6,358 34
" Rent of road		6,333 00
" Other sources		2,750 00
Total receipts for May, 1862		$192,076 75
Do. do. 1861		199,487 63

Original land grant, 2,595,000 acres; railway, 706 miles of main track, and 97 miles of sidings, 113 engines, 2,456 cars. Funded debt, $15,235,500.

The following statement shows the business of the Philadelphia and Reading Railroad Company for May, 1862, compared with that of 1861:

	1862.	1861.
Rec'd from coal	$189,356 82	$205,985 43
" " merch'dise	44,701 31	31,762 69
" " travel, etc.	49,938 24	26,169 37
Total	$283,996 37	$268,917 49
Transportation, roadway, dumpage, renewal fund, and all charges	147,412 24	131,983 34
Net profit for the m'th,	$136,584 13	$131,954 15
Profit for the previous 5 months	589,262 62	469,121 12
Total net profit 6 mos.	$725,846 75	$601,055 27

☞ Messrs. Nathaniel Marsh of the Erie, G. W. Carr, of the Fort Wayne, and W. H. Clements of the Little Miami road, have been appointed a commission to audit the claims of the Baltimore and Ohio road against the general government. They will meet in Washington on the 30th instant.

The Financial Measures of Government.

We have advices from Washington, that the bill for an additional issue of Demand Notes, recommended by the Secretary of the Treasury, will undoubtedly become a law before the adjournment of Congress.

While there are some objections to the proposed measure, there is no one so well calculated to supply government with money, while provisions might, and we trust will be added, which would disarm the objections most urged, and render it salutary in its operations both for the government and the people.

That on the whole the financial measures of Government have been wisely conducted, is proved by the steady appreciation in the market value of its securities, compared with a specie standard. The 6 per cents. of 1881 have commanded a premium, even in gold. A year ago they were at a discount of nearly 20 per cent., payable in gold. Such an advance in face of a civil war, and of enormous expenditures, is full evidence of the wisdom of the course pursued, and of the strength of the country. This course consisted in a declaration by government that its promises should be the equivalents of money. This promise was accepted by the people. Its adoption was an immediate addition to the available capital of the country, equal to the amount issued. It was a general opinion that an excess in the volume of currency would be thereby created, with all the consequences of such a plethora. But such has not been the result up to the present time. The whole issue has been absorbed in the operations of the government and the people, the great portion of the amount having been treated as capital, in the same manner of bonds payable at a future day, rather than currency. The notes receivable for Custom House dues have entirely disappeared from circulation—and form no portion of the currency. The balance of the whole issue has been readily absorbed to fill the vacuum created by the retirement of local currencies, as in the Western States; in supplanting local currencies of doubtful value, and by hoarding to a large amount. From all these causes only a small portion of the $150,000,000 is in circulation, except in the Western States, where a still larger amount might be used to advantage.

As a means of raising money the plan adopted by Government is perfect. Its promises are, in the conviction of the people, the equivalents of money. The only weak point in the matter is the irredeemability of the notes issued, and the tendency to a wider divergence than at present exists, between paper and metallic standards. But as the long bonds of the Government are the equivalents of gold, no step should be taken to subvert such relation. On the contrary, the utmost care should be had to maintain the Government Securities at a premium. So long as such a state of things exists, the solution of our financial problem is an easy one. Every issue of demand notes, consequently, should be convertible into long bonds bearing a rate of interest sufficiently high to induce such conversion. When there is an excess of notes issued, the rate of interest will fall, and conversion be resorted to as a matter of course. An active demand will show that there is no excess in the currency.[5] In this way a provision for converting the money issued by Government into its long bonds may be made to serve as a regulator which shall maintain the machinery of business in uniform and healthy action.

We have no doubt of government being able to sell its bonds bearing 5 per cent. interest, and having fifty years to run, at par. Money

is likely to remain very nearly as abundant as it is at present. The public works of the country, upon which our people for many years, spent at least $150,000,000 annually, are completed, and the greater portion of them are now returning a fair income upon their cost. The annual net income of the railroads of the loyal States will exceed $50,000,000. From 1856 to 1860 was the great period of emigration from East to West. During the process, and for several years thereafter, the labor of the immigrant was mainly unproductive; or rather, it was not felt in the channels of commerce. The period of productive industry has commenced. Hence the enormously increased traffic of Western Railroads. This is only an index of the increasing wealth of the country. Money is a drug because there is no employment for it as formerly. It must seek investment, not in new enterprises, but in the securities of the old, and in those of the National and State Governments. The latter will rise to prices higher than have yet been reached. The officials of Washington should bear in mind the low rates for money which must prevail. All that is wanted to get money at rates very nearly as low as those that prevail in England is a similar security—one bearing a low rate of interest, but irredeemable except at the pleasure of the government—or what is better, a security having 100 years to run. Length of time has become a great element of value. Government can, by paying out its six per cents., resume specie payments to-day. In a short time it could probably do so with its 5 per cents. But whatever may be the rate of interest necessary, government should never put it beyond its power to resume specie payments at will, as an example, and a means of enabling the public to accomplish a similar result, which should immediately follow the close of the war.—*Hallett's Financial Circular.*

Railroad Earnings--Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending June 14, 1862, were:

15,474 passengers	$21,884 41
Mails and sundries	2,837 68
13,636 tons of freight and live stock	41,650 40
Total	$66,372 49
Corresponding week, 1861	67,246 14
Decrease	$873 65

The earnings by the Chicago, Burlington and Quincy Railroad for the 2d week in June, 1862, were

	$51,201 85
Do., 1861	32,120 97
Increase	$25,080 88

The traffic of the Great Western Railway of Canada for the week ending June 20, 1862, was as follows:

Passenger	$18,918 87
Freight and live stock	21,143 10
Mails and sundries	1,536 28
Total	$41,598 25
Corresponding week of last year	31,981 91
Increase	$9,616 33

The earnings of the Galena and Chicago Railroad the 2d week in June, 1862, were $56,832 80
Do., 1861 43,824 51
Increase $13,008 29

The earnings of the Toledo and Wabash Railroad for 2d week of June, 1862, were $28,308 10
Do., 1860 18,957 10
Increase $9,351 00

The earnings of the St. Louis, Alton and Chicago Railroad for the 2d week in June, were:

1862	$22,530 33
1861	17,725 23
Increase	$4,805 10

The earnings of the Chicago and Northwestern Railroad the 2d week in June were $30,268 11
Corresponding week, 1861 22,546 02
Increase in 1862 $7,722 09

The Michigan Central earned in the 2d week in June, 1862 $30,848 62
Do., 1861 39,950 27
Increase $9,101 65

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 2d week of June, 1862, were $37,377 86
Corresponding week, 1861 28,453 99
Increase $8,923 87

The Chicago and Rock Island Railroad earned the 2d week of June, 1862 $21,729
Do., 1861 31,697
Increase, equal to 41 per cent. $9,868

Interest and Dividends.

The Michigan Central R. R. Co., have declared a dividend of $3 per share, payable July 1. Payment to be made to stockholders residing in Michigan and registered at Boston, at the office of the general receiver, in Detroit: to holders of stock registered in the City of New York, at the office of the Farmers' Loan and Trust Company, in said City, and to all others at the office of the Treasurer, in the City of Boston.

The Chicago and Rock Island Railroad Company have declared a dividend of 3 per cent payable July 12.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of two and a half dollars per share, payable in this city, at the Union Bank, on the 1st of July.

The Western Railroad Corporation of Massachusetts have declared a semi-annual dividend of 4 per cent, payable July 1.

The Boston and Providence Railroad Company, 4 per cent payable July 1.

The Fitchburg Railroad Company 3 per cent, payable July 1.

The Boston and Maine Railroad Company, $3 per share, payable July 1.

The Old Colomy and Fall River Railroad Company, 3 per cent, payable July 1.

The Boston and Worcester, 4 per cent, payable July 1.

The Vermont and Canada Railroad Company, 4 per cent, payable July 2.

The Providence and Worcester Railroad Company, 4 per cent, payable July 1.

The Chemung Railroad Company has declared a quarterly dividend of $2 per share, payable on demand at the Park Fire Insurance Company's office, 237 Broadway.

The interest coupons of the Brooklyn and Newtown Railroad, due July 1, will be paid at the office of the company, corner of Front and Dock streets, Brooklyn.

The interest due July 1, on the Funded Debt Mortgage Bonds of the Cleveland and Pittsburgh Railroad Company, will be paid at No. 25 William street, by H. C. Kingsley.

The coupons of the City of Marysville, California, due July 1, will be paid on that day at the Bank of the State of New York.

The Treasurer of the State of Illinois will, on and after the first Monday of July, 1862, until the 6th day of August, 1862, be ready, at the American Exchange Bank, New York, to pay the interest maturing on the first Monday of July, 1862, on the public debt of the State of Illinois. The interest then due and not called for prior to the 6th day of August, will thereafter be paid only at the office of the Treasurer of the State of Illinois, in the City of Springfield, Illinois. Holders of Illinois and Michigan Canal Bonds, whose coupons are exhausted, are required to present the bonds.

The Trustees of the Illinois and Michigan Canal, have ordered a dividend of 5 per cent to be paid on account of the principle of the Illinois and Michigan canal registered bonds. The payment of the dividend will be made by the treasurer of the board of trustees, at his office, No. 54 Fulton street, in the City of New York, on and after July 1. The bonds must be presented to the treasurer at the time of payment, in order that said payment may be stamped thereon.

The interest on the Iowa State debt will be paid by Gilman, Son & Co., No. 47 Exchange place, on 1st of July.

Coupons due July 1, 1862, of Chicago city municipal and water bonds, will be paid on presentation, by Duncan, Sherman & Co.

The coupons due July 1 on the first mortgage bonds of the Sacramento valley railroad will be paid on that day at the office of Schuchardt & Gebhard, in this city.

The semi-annual interest on the bonds of the Joliet and Chicago Railroad, due July 1, will be paid at the office of Messrs. M. K. Jesup & Co., No. 44 Exchange place.

The coupons of the Evansville and Crawfordsville Railroad company, due on the 1st of July next, will be paid at the Farmers Loan and Trust Company.

The interest warrants, or coupons, attached to the different series of bonds issued by the Pittsburg, Ft. Wayne & Chicago Railway company, will be paid as they respectively mature, on being surrendered to the transfer agents of the company in New York, Messrs. Winslow, Lanier & Co., No. 52 Wall street. The company has so arranged the interest on its funded debt, that one-twelfth falls due each month in the year.

The interest coupons on the first mortgage bonds of the Indianapolis and Bellefontaine—now Indianapolis, Pittsburg, and Cleveland Railroad Company—due July 1, 1862, will be paid at the Market Bank, New York.

The holders of the bonds of the city of Columbus, given on the 1st day of July, 1849, payable to the treasurer of the Columbus and Xenia Railroad Company, or bearer, and made redeemable on the 1st day of April, 1864, or redeemable at the pleasure of the City Council of Columbus after the 1st day of April, 1854, are hereby notified that said City Council are now ready to redeem said bonds, at the office of Miller, Donaldson & Co., in the city of Columbus, Ohio, and that no interest on said bonds, after the 1st day of July, 1862, will be paid by the city.

The Commissioners of Greene county, Ohio, give notice that they are now ready to pay all the

bonds of certificates of indebtedness of Greene county, Ohio, made payable to the treasurer of the Columbus and Xenia Railroad Company or bearer, redeemable at the pleasure of the commissioners of Greene county, Ohio, after the year 1855; and that no interest will be paid on said bonds after the 1st day of July, 1862. The above bonds with coupons due July 1, 1862, will be paid by the Broadway Bank, New York.

☞ Street railroads in Cincinnati do not make very profitable returns to the stockholders. Official examination by the Council Committee shows a loss to the companies in the two years and three months they have been in operation of $60,428.

The Railroad Tax Laws of Illinois.

A NEW KIND OF PROPERTY: RAILROAD TRACKS DECREED TO BE "FIXED AND STATIONARY PERSONAL PROPERTY," BUT ONLY FOR THE PURPOSES OF TAXATION. THE TRACKS LIABLE TO BE REMOVED AND SOLD BY THE COUNTY TREASURER.

The Supreme Court of the State of Illinois have decided the case of William L. Maies, Treasurer of Tazewell county, *vs.* The Logansport, Peoria and Burlington Railroad Company. The decision effects all railroad companies whose lines traverse the State of Illinois; and holds that the stations and tracks of such companies were declared by a statute of the State of Illinois, passed in February, 1855, to be "fixed and stationary personal propty;" and they are therefore liable to be removed and sold by the Collector, for taxes due to the State.

The case was submitted to the Circuit Court of Tazewell county, at the September term, 1861, upon the following statement of facts: It was agreed that the complainant was a regularly incorporated company, for the purposes and objects stated in the bill. That it has connections and runs for the carriage of passengers, and freight and United States mails, as stated in the bill; and that the company was formally known as the Eastern extension of the Peoria and Oquawka Railroad Company. It was further admitted that the length of the main track and side tracks of the road in Tazewell county, liable to taxation is 16.35-100 miles; that the value of the fixed and stationary personal property in the county, as returned by the company was $70,000 for the year 1857, upon which there was legally assessed for the State, county, and special taxes, the sum of $439 64. For the year 1859, the value of the fixed and stationary personal property, was $40,875, upon which there was legally assessed the sum of $396 43. That no part of these taxes were ever paid by the company; but that there was then due from the company for taxes on the fixed and stationary personal property, besides interest, the sum of $2,157 67. That the company were requested to pay the taxes, and that the Treasurer on the 17th of August, 1861, after notifying the agents of the company, and upon their refusal to pay, was proceeding, by warrant in due form of law, to collect the taxes, and was proceeding to take up and remove the rails that composed and formed the track of the road, and which were fixed with spikes and chairs to the ties imbedded in the bed of the road, and to take them to a convenient place for the purpose of sale, when he was stopped by injunction from so doing. That the company had no personal property out of which said taxes could be collected; that Tazewell county had adopted a township organization; and that the defendant was Treasurer of the county.

The circuit court rendered a decree making the injunction perpetual; and the case was then appealed to the Supreme Court.

Previous to the act of 1855, the term "real property" and "land" were held by the courts of the State to mean and include, not only the land itself, whether laid out in town lots or otherwise, with all things contained within the land, but also all buildings and other fixtures thereon. The term "personal property" was held to mean and include every tangible thing which was subject to ownership, whether animate or inanimate, other than money, and not forming part or parcel of real property. The act of 1855 changes the classification of the taxable property of railroads, as it previously existed under the act 1853. The fourteenth section of the act of 1855 is as follows:

"The schedule or list of the taxable property of railroad companies shall set forth a description of all the real property owned or occupied by the company in each county, town, and city, through which such railroad may be run; and the actual value of each lot, or parcel of land, including the improvements thereon, except the track or superstructure of said road, shall be annexed to the description of such lot or parcel of land. Said list shall set forth the number of acres taken for right of way, stations or other purposes, from each tract of land through which said road may run, describing said land as near as practicable in accordance with the surveys of the United States, giving the width of the strip or parcel of land, and its length through each tract; also the whole number of acres, and the aggregate value thereof, in said county, town, and city. All of the property mentioned in this section shall be denominated real property. The list aforesaid shall set forth the length of the main track, and the length of all side tracks and turnouts in each county, city and town through which the road may run, with the actual value of the same, and the value of the improvements at each of the several stations, when said stations are not a part of the city or town lots. The said stations and track shall be denominated 'fixed and stationary personal property.'

The list shall contain an inventory of the rolling stock belonging to said company, with the value thereof; said rolling stock shall be denominated 'personal property;' also a statement of the value of all other personal property owned by said company, in each county, city and town; the length of the whole of the main track within this State, and the total value of the rolling stock, shall be set forth in said list. The rolling stock shall be listed and taxed in the several counties, towns and cities, *pro rata*, in proportion as the length of the main track in such county, town or city, bears to the whole length of the road. All other property shall be listed and taxed in the county, town, or city, where the same is located or used." The remainder of the section is directory to the Assessor, as to the manner in which he shall enter the description of the right of way, or land for station purposes on his books, and "when advertised by any sheriff or collector, to be sold for taxes, or when so sold, no other description shall be necessary."

The following is the main portion of the opinion rendered at the decision of the case:

BREESE, J.—The act of 1855 classifies railroad property somewhat differently from the act of 1853. In that act, railroad property was known only as real property and personal property, and subjected to taxes as such, and to compulsory payment of them in the same manner as property of natural persons, each description of property being liable for the taxes assessed upon any one description. In construing any amendatory act, it is a fixed rule that the old law must be considered, the mischiefs arising under that law and the remedies for them which the new law may be supposed to provide. We have seen in what manner the old law classified such property. We apprehend the evils resulting from it were found to be that the government was liable to the loss of its sustenance by the obstacles thrown in the way of the speedy collection of the taxes by the very law itself, there being no other mode provided than by the sale of their real property, in default of personal property, with a redemption of two years allowed after the sale, or, in case of no sale, a forfeiture to the State; then, by carrying it from year to year, on the Assessor's books, as forfeited land, to be again sold as such for the taxes assessed. It is a part of the public history of this State that purchasers could not be found to buy, for taxes, such property, who were willing to take the risk of the legality of the sales, and other risks; the consequence of which was a forfeiture to the State; and the counties through which the roads run were deprived of the annual taxes due them from such property. The object of the amendatory law was, as we conceive, to provide some remedy for this, which they have done by giving description other than "real property," and other attributes, to a portion of such property, thereby rendering it susceptible of immediate transfer and delivery on a sale of it, for the taxes assessed upon it.

The complainants contend that the only object of the Legislature in so classifying railroad property was for the purpose of valuation and a view to increase the aggregate of the revenue. We do not precisely understand how the aggregate of the revenue can be increased by classifying this kind of property. It is very evident the statute in the valuation requires the road-bed to be separate from the track and superstructure placed upon it, and to be valued separately. Now is it possibly they could produce more revenue by being valued separately than if valued together? Suppose the value of a road-bed be ten thousand dollars per mile, and the value of the superstructure six thousand dollars per mile, do these two sums produce more revenue than would be produced by a valuation of the road-bed and superstructure jointly, at sixteen thousand dollars per mile? As in the case of improved property owned by individuals, by separating the house from the lot, the State would derive no more revenue from them separated than it would from them together, the valuation in each respect controlling the amount of the revenue to be derived from the property. If such was the only design of this amendatory act, it need not have been passed, as it is no improvement whatever on the old law. It is quite manifest, we think, that the legislature had something more in view in thus classifying railroad property, and in denominating a portion of its fixtures, placed by artificial means upon the land owned by it, "personal property," than mere facility in its valuation. The road-bed and right of way is denominated "real property;" for a delinquency in paying the taxes assessed upon them they can be sold and redeemed in two years after the sale. The main track, the side-tracks, the turn-outs, and the buildings at the several stations are to be scheduled separately, and denominated "fixed and stationary personal property." The rolling stock shall be denominated "personal property."

Here is evidently a design on the part of the Legislature to create a species of personal property not before known to the law, and with the purpose, as we think, of subjecting it in certain contingencies to a separation from the soil on which it may be fixed. If not, why call it personal property at all? If, though "fixed and stationary," it was never to be under any circumstances subject to removal, and to all intents, and for every purpose, of the same nature and character as land itself, why not call it real estate? What is gained by designating it as personal property, when it shall never, under any circumstances, or for any purpose, public or otherwise, possess any of the attributes of such property? We are at a loss to discover any good reason for the distinction, unless it be, in view of the loss of revenue to the State

and counties by the neglect of such companies to pay the taxes assessed on such property, that the Legislature has endowed it with the attributes of personal property, so that it might be removed and sold for the taxes, an attempt to do which would bring delinquent or reluctant companies to a performance of their obligations to the State. To make the road-bed on which the superstructure is placed, personal property would have been, for this purpose, of no practical benefit, as it could not be removed, and, though sold for the taxes, the company would continue in its enjoyment. Not so with the main and side-tracks, turn-outs, and improvements at the several stations. They are placed there by artificial means, and easily removed. It is true they are stationary and fixed, but surely it will not be contended that, although fixtures of a certain kind, which, by the common law, are deemed a part of the freehold and cannot be removed, that the Legislature may not destroy this character and make their personal property liable to be sold for taxes or upon execution to pay a private debt. It is a question of expediency and policy only, whether the dwelling house shall not, for purposes of taxation, be deemed personal property, to be severed from the land if the taxes assessed upon the house are not duly paid, and the house exposed for sale on that account.

It cannot be denied that this "fixed and stationary personal property" is liable for the taxes assessed upon it—the defendants do not deny that; it follows then like all other property, it is liable to be sold for the assessments. The defendants, however, insist that, for the taxes assessed on this property and unpaid, the land is liable, and that this property is liable for the tax assessed upon the land—that there is a mutual liability under section fourteen, already quoted. That section does not so provide, as we understand it. The provision is that personal property of the kind and nature denominated in that act shall be liable for the taxes on real estate and *vice versa*, but it nowhere provides that land or personal property shall be subject to the taxes assessed upon "fixed and stationary personal property," that new description of personal property, so by the act created. This kind of property stands by itself, isolated from real and from personal property, and is made by the law to bear its own burdens, and, if it cannot be sold and removed, as the defendants contend it cannot be, then the new law is of less avail than the old law, for, under the old law, the real property could be sold to pay the taxes assessed on the personal property in certain cases. Under the new law this kind of personal property is not so liable, and no taxes assessed upon it can be collected unless authority is conceded to the Collector to take it and sell it. This property is a new species of property created by the Legislature, made distinct from all other property, and assessed and valued as such; and, as the lands and personal property are not made liable for the taxes assessed upon this kind of property, as they clearly are not, it must follow that this new description of property must be liable for the assessment upon it, to be collected on default by a sale of the property. Surely the Legislature did intend that this new description of property should be liable to taxation, and be sold if the taxes were not duly paid, else how could it be subjected to this burthen?

It seems to follow as a necessary consequence from these premises that the Sheriff or Collector, to put the property in a position to be sold, may sever the superstructure from the freehold, and take it into his possession precisely the same as he could any other fixtures which the Legislature may have declared to be personal property, and subject to removal. In taking personal property for taxes, the Collector, in all cases, has the right to remove the property. His right to do so cannot be questioned, and it is no argument against it that he may exercise it in a riotous manner, or at an improper hour. Nor, as to the quantity of such personal property to be removed to satisfy the taxes, can the Collector be restricted, unless his act in this regard should be oppressive and wanton, and done with a design unnecessarily to vex and harass the delinquent.

That the State should have this power, vast and destructive as it may be to some great interests of the country when exercised, there seems great propriety. In considering such questions as have arisen in this case, we must bear in mind the maxim, that the Government must not be deprived of the aliment indispensable to its life—that it must be sustained at all hazards regardless of the individual suffering which may be produced—the derangement of the business affairs of communities, or the crippling of corporate powers, for whatever purposes they may have been granted. All must yield to the inexorable demands of the Government. Taxation in some form must exist in every civilized community, and must be enforced upon property if not paid in money. It is a public burthen which all persons and corporations should be willing to bear, since all receive a just compensation in the benefits conferred by the Government. Nay, it is a duty which all should be prompt to perform. Taxation is the breath of its life; if that be stopped, anarchy, ruin and death would be the inevitable catastrophe. As was said by the Supreme Court of the United States, in the case of Priestman *vs.* the United States, 4 Dallas, 28: "Public policy, national purposes, and the regular operations of Government require that the revenue system should be faithfully observed and strictly executed."

We know of no principle that will exonerate an individual from the prompt payment of his taxes, if he has property out of which they can be made, nor of any applicable to railroad corportions, however conducive they are admitted to be to the development of the resources of a State, or however necessary to the transaction of its widely extended business. Nor is it an argument in favor of relieving these companies from the taxes imposed upon their property, that they have become embarrassed for its construction and equipment, incurring therefor heavy debts. It is no fault of the State that it has become embarrassed and contracted debts beyond its ability to pay, but it is the just claim of the State that the dues of the company to it shall be first paid, in preference to all other claims upon it.

The conduct of this road furnishes a strong argument in favor of the view of the case we have presented, keeping in view the principle that taxes must be paid before all other obligations. This record shows this road has not paid one dollar of taxes assessed upon its fixed and stationary personal property for the last four years, having been delinquent for the years 1857, 1858, 1859 and 1860 until the amount due to the county of Tazewell has reached the very considerable sum of two thousand one hundred and fifty-seven 67-100 dollars, exclusive of interest. This preferred and paramount claim of the public has been postponed year after year by the company, and they now contend, when the attempt to collect it is made in good earnest, that the mode adopted is illegal; that great public interests will be destroyed, and a wanton sacrifice of property inevitable.

The legality of the mode proposed to be adopted by the Collector, we do not question. He can take these rails from their bed and sell them, in the same manner as he could take a horse from a stable of an individual owner for payment of taxes, and if the property be sacrificed, or if great public interests be injured, we have only to say, all these considerations must yield to the paramount claim of the State to be sustained in its existence, a claim so great and overriding as to dwarf all others which may be set up against it. It is a good law, and should be strictly enforced, doing as little injury as possible in the execution of its provisions.

We think it may be said with truth that the railroad companies of this State have discharged their taxes with commendable promptitude, and performed their obligations in a manner generally satisfactory. This road is the only one, so far as we are informed, which has manifested a disposition to postpone the just claims of the State to those of other creditors and to evade its responsibility to the power which protects it in the enjoyment of its franchise. We are slow to believe that other railroad companies, operating in this State, desire such a construction should be placed on the revenue law as the appellees contend for, by which they may avoid the payment of their taxes and, to that extent assume an attitude of hostility to the government.

The views here expressed are not intended to apply to a levy and sale by execution of this species of property, or to retract or qualify in the slightest degree former decisions of this court on that question. This species of property is made personality to a limited extent, and for revenue purposes only, and the attributes of personal property only attach to it for such purposes. The General Assembly, in regulating the liability of property to taxation, sought to prescribe the mode in which it was to be subjected to that burthen, and were not seeking to charge wholly its incidents. Was such a provision found in the act regulating sales on executions, or in the law regulating chattel mortgages, or had the Legislature declared in those statutes this description of fixtures to be "fixed and stationary personal property," then it would assume the attributes of personality for these several purposes. No such design has been indicated, except in this revenue law, and for the purpose of revenue, and since no other property, real or personal, is made liable to the burthen imposed upon this species, we are forced to conclude the Legislature designed that, on delinquency, it should be subject to sale and removal.

The decree of the Circuit Court is reversed, and a decree entered that the injunction be dissolved and the bill dismissed.

Association of Provincial Land Surveyors.

INSTITUTE OF CIVIL ENGINEERS AND ARCHITECTS OF CANADA.

This Association met in Montreal on the 4th inst., at the Mechanics' Hall, for the election of officers and the transactions of business. There were present George Browne, James Springle, Frederick Lawford, James Nelson, T.S.Scott, John Jas. Browne, H. M. Perrault, T. Fahrland, from Montreal; G. H. Perry (Vice-President), W. A. Austin, (Rec.-Secretary), Duncan Sinclair, Thos. Stent, Thos. Fuller, from Ottawa City; Chas. Baillerge, A. Wallace, from Quebec; and W. J. McDonald. George Browne, Esq., was called to the chair. The Secretary read thirty-eight letters from absent members approving of the object of the meeting. The President, after stating the object of the meeting, requested the members to proceed with annual election of officers. The following gentlemen were elected for 1862-63:

George Browne (Montreal), President.

Charles Baillergé (Quebec), James Stewart (London, C. W.), F. Rastuck (Hamilton), Vice-Presidents.

W. A. Austin (Ottawa City), Rec. Secretary.
John Tully (Toronto), Corres. Secretary.
Augustus Laver (Ottawa City), Treasurer.

COUNCIL.

Surveyors' Division.—A. Wallace (Quebec), D. Sinclair (Ottawa City), O. F. Austin (Ottawa City), Samuel Peters (London, C. W.), H. M. Perrault (Montreal), J. Mamel (Quebec), J. L. P. O'Hanley (Ottawa City).

Engineers' Division.—Walter Shanly (Montreal), George H. Perry (Ottawa City), W. B. Galloway (Ottawa City), G. L. Reid, Robert Shanly, W. H. Napier, F. W. Cumberland (Toronto).

Architects' Division.—F. Lawford (Montreal), James Springle (do.), T. S. Scott (do.), Thos. Fuller (Ottawa City), W. Kauffman (Toronto), T. Stent (Ottawa City), C. P. Thomas (Toronto).

BOARD OF EXAMINERS.

Surveyors' Division.—D. Sinclair (Ottawa City), H. M. Perrault (Montreal), A. Wallace (Quebec).

Engineers' Division.—Walter Shanly (Montreal), F. W. Cumberland (Toronto), G. H. Perry (Ottawa City).

Architects' Division.—F. Lawford (Montreal), T. Stent (Ottawa City), Thomas Fuller (do.).

The officers of the Association are *ex officio* members of the Council and Board of Examiners.

AMERICAN RAILROAD BOND LIST.

(*) signifies that the road is in the hands of receivers. (†) that the company is in default in its interest. S. F.," Sinking Fund. "var," that the bonds fall due at different periods

American Railroad Journal.

Saturday, June 28, 1862.

Report of the Philadelphia, Wilmington and Baltimore Railroad Co.

The report of this company, published in our last, is eminently satisfactory. A railroad which for eight years was entirely unproductive, and for twenty-one years averaged only about three per cent. on its capital, has at length become one of the best paying lines in the country. The Philadelphia, Wilmington and Baltimore road, like a great many others, was too sanguine of paying large dividends at the outset. For those amounting to seven and a half per cent., divided in 1838 and 1839, its stockholders had to go on short rations for many a year afterward. In 1849 the mangaers divided a modest three per cent., and since then the profits have kept gradually increasing. Two chapters in the history of the Erie have borne a close resemblance to that of the P., W. & B. Co. We hope the third one will also be equally satisfactory before many years.

The largest earnings for any year previous to the war, by the Wilmington road, were in 1857, when the gross receipts reached $1,143,852; last year they amounted to $1,494,676—an increase of $350,824, or twenty-one per cent. in round numbers. In 1856 the net profits were $662,365; last year, $828,698—an increase of $166,331, or over twenty-five per cent. The advance was, of course, caused mainly by the outbreak of hostilities, which for a time threw upon that thoroughfare a larger volume of business than it was able to perform. Had the company had a double track all the way, and the bridges near Baltimore escaped destruction in April, the gross income would doubtless have amounted to more than two millions, yielding fully fifty per cent. as net profits.

It would be idle, however, to anticipate a continuation of the large income enjoyed last year, caused by the transportation of such vast numbers of soldiers and their friends, of warlike materials and supplies of all kinds. With the restoration of peace that great artery of travel must relapse into something like its former condition. There may be more persons passing to and from the national capital; but the numbers coming from beyond that point will, we apprehend, be fewer. At least the subject appears to us in this light at the present moment.

That the Philadelphia, Wilmington and Baltimore Railroad Co. have been able to divide six and a half per cent. last year, leaving a handsome surplus, does not prove that there is a necessity for another great thoroughfare being opened between New York and the city of Washington. A good deal of vigorous writing on this subject has lately been done by parties who ought to know better than make the statements which some of them have done. What is to be thought of the assertion, for example, that such a line need not cost more than $30,000 or $35,000 per mile, crossing the Delaware, the Susquehanna and a score of smaller rivers? It is preposterous on its very face. A moderate estimate would be $50,000 per mile for a single, or $75,000 for a double track. The one would require $12,000,000; the other, $18,000,000 to complete it. To avoid Philadelphia and Baltimore, or either, would be wild in the extreme, as such a detour would not only add to its length, but cut off its principal sources of income.

But while we feel compelled to take this view of some of the schemes proposed, especially in the improbable event of their being undertaken by the general government, it is incumbent on the stockholders of the Wilmington road to put it in the most efficient condition that can be done on the resources within their reach. A double track is urgently needed on such a great thoroughfare. It ought to have been constructed ten years ago. The crossing of the Susquehannah river by a ferry-boat is still a serious and costly obstruction to travel, when a bridge with a sufficient draw would answer every purpose. If the road is to continue profitable it must keep up with the wants of the age. If the general government is to be restrained from building a rival line, the stockholders in this must put it in a condition for accommodating any amount of travel or freight that may be offered.

Bridging the Ohio River.

A bill has been introduced into Congress providing for the establishment of certain post roads across the Ohio. It confers upon the Steubenville and Indiana and the Halliday's Cove Railroad companies, or either of them, authority to build a bridge across the Ohio river; or rather constitutes the one partly built near Steubenville a lawful structure. If constructed without a draw, there must be an unobstructed headway of ninety feet above low-water mark, with a width of channel not less than two hundred feet between the piers. If built as a draw-bridge, the space designated for the draw shall not be less than one hundred feet on each side of the pivot, both spans remaining constantly open, except for ten minutes preceding the time when trains may be due. Section third provides, further, that it shall be lawful for *any* railroad company having a line extending to the Ohio river to throw a bridge across it under the same limitations and conditions, such roads to be used as post roads and to charge no higher rates for mails, munitions, etc., belonging to the United States, than on other portions of the lines. Should the bill become law, as we trust it will, it will have an important effect on the railroad inter-

ests of Virginia, Kentucky, Ohio and even Pennsylvania.

Iron and Steel Forgings.

In the London International Exhibition are shown some immense iron forgings, one piece from the works of a Liverpool firm weighing over twenty-four tons. The same party exhibit a forged armor plate, 21 feet 3 inches long, 6 feet 3 inches wide, and 5¼ inches thick, having a superficies of 133 feet and weighing upward of 13 tons. It is said the plate would have been prepared of still larger dimensions, if space could have been obtained in the exhibition.

But in mammoth steel forgings the Germans bear away the palm. The celebrated Herr Krupp exhibits an ingot *broken*, each fragment weighing 10½ tons. It is 44 inches in diameter and when whole was 8 feet long. About one-fourth of the section was cut away to enable it to be severed and then it required 150 blows of a fifty ton hammer fully ten feet to break it.

Among the locomotive tires, is shown a pair from the North London railway, which have run 78,000 miles without repair, and another set which have made 66,000 miles. Both are of steel, from the same establishment. Among other articles exhibited is a pump rod five inches in diameter and 30 feet long.

If steel tires can ordinarily be made to render such service, they will become objects of demand in this country as well as in Europe.

☞ We annex a card, addressed to the public by Mr. Samuel Hallett, on the subject of Indiana State Five per cents. It will be seen that he has from the first desired to have a public investigation. The card will be read with interest:

To the Public.—Various rumors have recently been circulated, in reference to an alleged over-issue of Indiana State Bonds. My connection with Bonds of that State commenced by my receiving them in the regular course of business, as collaterals for advances made and money loaned on faith of those instruments; afterwards, to secure money borrowed, I hypothecated some of them, and when it was deemed necessary that a number of them should be retired, I co-operated in effecting that result with the legally authorized agents of the State of Indiana. The idea has been in some way conveyed to the public that these bonds were fraudulently circulated, and the charge has been made that the authorities of Indiana, knowing the bonds were improperly issued, took no steps to expose parties through whose agency they reached the public.

The result is, that the Grand Jury have been induced, as I understand, upon an unsworn and informal communication, without any complaint or charge before a magistrate, to investigate these matters, and as these proceedings are secret, and they receive only testimony from the prosecution, and no accused party can be heard before them, it is not impossible that on the imperfect, or misrepresented state of facts presented to them, they may find an indictment against those to whose hands the alleged illegal bonds have come, and thus attempt to implicate me.

No Indiana State Bonds have ever reached my hands which were not in the usual and regular form of those admitted to be valid obligations. It is not pretended that any signature or attestation essential to their legality is wanting, nor that any name or attestation they bear is not genuine. But it is said that though legal and binding on their face they are invalid, because they were issued "in excess of authority."

This is not the first time that obligations, informally or regularly issued, have come to the possession of our business community, and I need not say how frequently similar informalities or irregularities have failed to prevent obligations being enforced. In the present instance, I am advised by counsel that the bonds alleged so to be valid, are valid and legal obligations binding on the State of Indiana, and that whatever objection may by any possibility have existed in reference to the original issue of the bonds by the State agent has been removed by the fact that the authorities of Indiana have, with a knowledge of the circumstances, permitted the very bonds now claimed to be invalid to be transferred at the agency, and others issued in their place, and otherwise and in all respects treated and recognized them as bonds properly and lawfully issued.

From the moment when I understood these bond transactions were to be investigated, I have most earnestly desired and striven to have the investigation publicly conducted, being assured that, having an opportunity to explain, I could satisfy any tribunal that, so far as I am concerned, nothing culpable could be imputed to me in such transactions, but for reasons already stated I could not effect what I so much desired. The Grand Jury cannot be required to hear a person in any way charged or implicated, and as no one originated any proceeding against me, I have had no opportunity whatever to present an explanation or call a witness. This seems the more unjust in view of the fact that in January last, after I had hypothecated many of the Bonds now alleged to have been created without sufficient authority, and after the arrangement for retiring Bonds as above mentioned had been made, I purchased directly from the authorities of the State of Indiana, and paid for $200,000 worth of its State Bonds in all respects upon their face like those which are now alleged to be invalid.

If any banker, merchant, or broker, having paper which was ostensibly genuine, should find himself suddenly accused of injustice in dealing with it, or subjected to the inquisition of a Grand Jury, because such paper was alleged to have been issued under circumstances which in law might make it invalid as against the parties to it, he would occupy just such a position as I now hold.

I have no apprehension of any consequences which may attach to me personally from any action of the legal authorities, and am prepared to answer and meet everything which may be alleged against me; and I have no fear that the judgment of fair minded men will hold me amenable for anything which I have done in the transaction which I have felt called upon thus publicly to notice.

June 18, 1862. Sam'l Hallett.

Railroad Building in Pennsylvania.

Though a large portion of Pennsylvania is covered with a net work of railroads, its vast wealth is such that there is a large demand for more extensive facilities of the sort. Some of the Philadelphia papers, indeed, speak as if another railroad *mania* had sprung up in the Keystone State, so numerous are the works in progress or contemplation. Among the former class may be mentioned the Atlantic and Great Western, now in rapid progress, with good prospects of being completed; the Pittsburg and Erie, intersecting the first-named at Jamestown; the Jamestown and Franklin, under control of the Pennsylvania Railroad Company, to connect with the Sunbury and Erie; the Corey and Titusville, penetrating the oil region. The Jamestown and Franklin is part of the old projected, but never executed, Venango line. These roads will exercise a wondrous effect in developing the North-western portion of the State, which has hitherto been sadly retarded by the want of such facilities.

The Tyrone and Lock Haven Railroad, uniting the Pennsylvania Central with the Sunbury and Erie, it is said, will be finished between those points by the 1st of August and soon after between Lock Haven and Bellefonte. Meantime the Pennsylvania Central is pushing forward branch lines in several directions. One runs from Lewistown through Penn's Valley to Bellefonte; another extends to Ebensburg and a third to Bedford by the Broad Top Line. In the Eastern part of the State the East Mahanoy railroad has just been finished, while the Reading and Columbia line is being pushed forward rapidly to completion.

While our enterprising neighbors are making such great exertions to develop the buried wealth of the State, as if the country was in a state of profound tranquility, it behooves New York to look to her laurels. We are gratified to find that the Erie Canal Enlargement project appears to be winning its way to public confidence.

Passage of the Pacific Railroad Bill.

We congratulate our readers and the people of the whole country, that the bill for aiding the construction of a railroad to the Pacific, has passed both Houses, and only awaits the President's signature to become a law. This event may be truly said to mark a new era in the history of our public works, and indeed, in those of the world. That the locomotive will, before many years, make the trip from the Mississippi to the Pacific, is placed beyond the shadow of a doubt. The nation has put its shoulder in earnest to the wheel, and will carry it through, in spite of every obstruction. We hope to be able to publish the entire bill, or a full abstract of it, in the next number of the Journal.

Economy of Sewing Machines.

The Wheeler & Wilson Company has prepared tables showing, by actual experiments of four different workers, the time required to stitch each part of a garment by hand, and with their Sewing Machine. Subjoined is a summary of several of the tables:

	By Machine. Hours—Minutes.		By Hand. Hours—Minutes.	
Gentlemen's shirts	1	16	14	26
Frock coats	2	38	16	35
Satin vests	1	14	7	19
Linen vests	0	48	5	14
Cloth pants	0	51	5	10
Summer pants	0	38	2	50
Silk dress	1	13	8	27
Merino dress	1	4	8	27
Calico dress	0	57	6	37
Chemise	1	1	10	31
Moreen skirt	0	35	7	28
Muslin skirt	0	30	7	1
Drawers	0	28	4	6
Night dress	1	7	10	2
Silk apron	0	15	4	16
Plain apron	0	9	1	26

Number of Stitches made per Minute.

	By hand.	With machine.	Ratio.
Stitching fine linen	23	640	28
" satin	24	520	22
" silk	30	550	18
Seaming fine cloth	38	594	16
Patent Leather, fine stitching	7	175	25
Fitting ladies' gaiters	28	510	18
Stitching shoe vamps	10	210	21
Binding hats	33	374	11

When the machines are driven by power the ratio is much higher, 1,500 and 2,000 stitches per minute not being an unusual average.

Seams of considerable length are ordinarily sewed with the best machines at the rate of a yard a minute, and that, too, in a manner far superior to hand-sewing.

Mutilation of Treasury Notes.

The following notice is issued by the Treasury Department, at Washington, May 18, 1862. To guard against frauds upon the government, and to secure the just rights of holders, the following rules, for the redemption of mutilated United States notes, are hereby established:

First.—Mutilated notes, which have been torn, no matter how much, but of which it is evident that all the fragments are returned; or defaced, no matter how badly, but certainly satisfactorily genuine, will be redeemed at their full face value on presentation.

Second.—Fragments of notes will be redeemed *in full* only when accompanied by an affidavit, stating the cause and manner of the mutilation, and that the *missing part of the note is totally destroyed.* The good character of the affiant must, also, be fully vouched by the officer before whom the affidavit is taken.

Third.—In the absence of such affidavit, fragments of notes will not be paid in full, but the parts presented will be redeemed in their proportion to the whole note; reckoning, as a general rule, by twentieths.

Fourth.—Less than half of a note will not be redeemed, except by payment of the full value of the note under the second rule; or by payment of the proportional value of the missing part, when presented under the fifth rule.

Fifth.—Fragments of notes, for which less than the full face value has been paid, will be retained for a year, to the end that the owners, who have received less than the value of a full note, may have opportunity to return the missing part and receive the amount previously withheld.

Sixth.—Until further order, mutilated notes and fragments will be redeemed only at the Treasury of the United States, at Washington; whither they can be sent, addressed to the "Treasurer of the United States," by mail, *free of postage.* A draft on the assistant treasurer, at New York, for the amount allowed, will be returned, in the same way, to the address of the person remitting the same.

S. P. CHASE, Secretary of the Treasury.

Patent Locomotive Lamps.

FOR BURNING COAL AND OTHER OILS.

We invite attention to the advertisement of I. A. WILLIAMS, Esq., of Utica, N. Y., manufacturer of "Patent Locomotive Lamps, for burning coal and other oils." The patents for these inventions were granted October 10, 1854, and November 16, 1858; and for the *Coal Oil Lamp*, April 29, 1862. The more recent invention, a specimen of which we have been permitted to see and examine, relates to a new and improved Locomotive Lamp for burning Coal Oil—the object being to obtain a lamp which would admit of the flame being supplied with a requisite quantity of oxygen to support proper combustion, and at the same time prevent the flame from flickering under the motion of the locomotive, and from other disturbing causes, which tend to produce an uneven supply of air to the flame. The lamp is simple in its construction, easily managed, and its advantages are many.

1st. In its economy; the cost of burning being only about ¼ of a cent per hour when in full operation, and with a tubular wick, 1¾ inches in diameter, burning a flame over 8½ inches in height, without smoke, and producing a light more intense than gas, and equal to half-a-dozen common oil burners, such as are usually used in headlights.

2d. In the steadiness of the light; as not the slightest flare, waver, or diminution of brilliancy is perceptible; and it is not affected by outward currents of air when the engine is in motion at the highest speed. The purer qualities of oil burn as well as the finer ones. The wick does not crust, and need not be trimmed oftener than once a week. The lamp can be kept clean without difficulty, and when once lighted, will furnish an undiminished glare until the oil is completely gone.

We understand that this lamp has been placed upon several of the engines on the New York Central Railroad, for the purpose of giving it a thorough trial, and the probabilities are that it will eventually be adopted by that company.

Excelsior Wire Works.

Mr. Wm. Cabble has removed his "Excelsior Wire-works" from the corner of Cliff and Fulton, to No. 43 Fulton street, at which establishment a large stock of steel, copper, brass and iron wire is kept constantly on hand; also wire-cloth for locomotive smoke-stacks, and for fourdriuier machines in paper mills; wire-rope, such as are required in mines, hoop skirt-wire, &c., &c. Mr. C's manufactory is in Union avenue, Brooklyn, formerly Williamsburgh. See the advertisement.

"This Machine makes the 'Lock Stitch,' and ranks highest, on account of the elasticity, permanence, beauty, and general desirableness of the stitching when done, and the wide range of its application."—(Report of American Institute, New York.)

This report was in accordance with the previous awards at the Fair of the

UNITED STATES AGRICULTURAL SOCIETY.

At the Fairs of the
American Institute, New York.
Mechanics' Association, Boston.
Franklin Institute, Philadelphia.
Kentucky Institute, Louisville.
Mechanics' Institute, Baltimore.
Mechanics' Association, Cincinnati.
Mechanical Association, St. Louis.
Mechanics' Institute, San Francisco.
Metropolitan Mechanics' Institute, Washington.

At the State Fairs of

Maine,	Pennsylvania,	Ohio,	Illinois,
Vermont,	Virginia,	Indiana,	Kentucky,
Connecticut,	Mississippi,	Iowa,	Michigan,
New York,	Missouri,	Tennessee,	Wisconsin,
New Jersey,			California,

And at hundreds of County Fairs.

The LOCK STITCH made by this Machine, cannot be ravelled and presents the same appearance upon each side of the seam, a single line of thread extending from stitch to stitch. It is formed with two threads one upon each side of the fabric, and interlocked in the centre of it. In beauty and regularity, and in the firmness of the seam formed it excels hand sewing. The machine is preferred for the following qualities:

1. Beauty and excellence of stitch alike upon each side of the fabric sewed.
2. Strength, firmness, and durability of seam that will not rip nor ravel, and made with
3. Economy of thread.
4. Its attachments and wide range of application to purposes and materials.
5. Compactness and elegance of model and finish.
6. Simplicity and thoroughness of construction.
7. Speed, ease of operation and management, and quietness of movement.

THE
WHEELER & WILSON SEWING MACHINE

Is the machine for all kinds of **Family Sewing,** and for the use of Seamstresses, Dressmakers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks, Mantillas, Clothing, Hats, Caps, Corsets, Ladies' Gaiters, Linen Goods, Umbrellas, Parasols, Silk Goods, etc.

[From the 'Scientific American.']

A New Improvement has lately been added to the WHEELER & WILSON machine (which we considered long ago as nearly perfect,) being an attachment for sewing braid upon cloth or any other material.

If any of our friends have been through the tedious operation of braiding children's dresses, they will realize the great relief that awaits them in this invention. The braid follows the needle with perfect accuracy, taking any curve desired, so that the most intricate pattern may be braided with great rapidity. Every lady may now possess one of those lovely chambray morning robes, embroidered in vines and labyrinths of white braid, which have heretofore fallen to the lot only of the most industrious and ingenious. For summer dresses nothing can be more becoming. We hail this improvement as a confirming evidence of "a good time coming" for the ladies one and all. And we may as well include the gentlemen, for there will doubtless be an immediate harvest of elaborate smoking caps and velvet slippers embroidered with gold braid. Long live the sewing machines!

BOARDMAN'S
Patent Steam-Boilers

SAVE over 30 per cent. of the fuel required for flue or plain cylinder boilers, while they have all the advantages of strength, cheapness and simplicity of construction, convenience and safety in use, claimed for either. Send for a circular.

H. BOARDMAN,
No. 84 Broadway, N. Y.

Prince's Metallic Paint,
AN INDESTRUCTIBLE COATING
FOR
IRON, TIN AND WOOD.

IT consists of seventy-two parts **Oxide of Iron,** and twenty-eight parts **Cement Lime Stone** in the one hundred pounds.

It has much more body than red or white lead. It is warranted perfectly water and fire-proof and to withstand a greater heat on metals, without scaling, than any other paint in use.

It is a perfect cover for all kinds of iron, tin or woodwork, out-houses and canvas coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone as has been proven at the largest foundries in the country.

For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zinc, and much less than the ordinary mineral paints. It is free from any waste, and possesses a **spreading and covering power unequalled.**

TERMS,
By the Barrel or Half Barrel, { **FOUR CENTS per pound.**

A liberal discount made to parties purchasing by the ton.

A Barrel or Ton will be forwarded to any Railroad companies desirous of testing its qualities, for which there will be no charge if it does not give entire satisfaction.

CUMBERLAND COAL.
THE BORDEN MINING COMPANY

ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL,** DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGE'S CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to

WILLIAM BORDEN.

THE GREAT FIRE IN TROY.
Unparalleled Triumph
OF
LILLIE'S SAFES!

The following certificates explain themselves:

TROY CITY BANK, May 21, 1862.

LEWIS LILLIE, Esq.—Dear Sir: I am sure it will give you as much pleasure to know as it does me to say, that in the recent fire of the 10th inst., which desolated our city and destroyed our Banking-house, the contents of our Bank vault, though the building itself was a heap of ruins, remained entirely unharmed. This result we attribute entirely to the fact that our old Wrought Iron Doors were, about two years since, exchanged for a set of your celebrated Chilled and Wrought Iron Doors and Frames. With the old doors, not a book or paper in the Vault could have been saved; as it is, nothing in it was even damaged, though exposed to the most intense heat.

Yours, respectfully, S. K. STOW, Cashier.

TROY, N. Y., May 14, 1862.

The undersigned, using **Lillie's Chilled and Wrought Iron Fire and Burglar Proof Safes,** at the time of the late disastrous fire in this city, would state that our safes were subjected to a severe test by fire, the heat varying in intensity, according to the locality and surroundings. The time they were exposed to the fiery ordeal, unprotected by water, varied from 24 to 72 hours. We would say that our money, papers, books, etc. were well preserved, and the Safes are suitable for further use. By comparison with Safes of other manufacture, equally exposed, we have no hesitancy in recommending Safes of Lillie's manufacture to the public on their demonstrated merit as entitled to unparalleled confidence as fire-proofs.

James Kenyon,	S. Bachelder,
S. O. Gleason,	Gates H. Barnard,
Percy & King,	W. D. Haight,
McCoy & Beadle,	Denio & Freiot,
Coon & Van Valkenburgh,	Walsh, Petit & Anthony,
S. S. McClure,	D. H. Snyder,
Ross & Smith,	Jonathan Seaman.
Robert Green,	

Not dug out—nothing in them.

TROY, May 19, 1862.

The undersigned had one of **Lillie's Wrought and Chilled Iron Safes,** which went through the fire of the 10th of May. The Safe was exposed to a severe fire for over 24 hours. In falling it turned on its face, and when turned up to open the doors was red-hot. The back of the lower part of the Safe (behind the books) was filled with pennies, which, in falling over, pressed against the books, and brought them directly in contact with the doors. The wrappers on the pennies were mostly good. The books were unfit for further use, but the writing on them was partially legible and could be copied.

DUSENBURY & ANTHONY.

TROY, May 19, 1862.

This is to certify that we had in our store, in this city, when it burned, one of **Lillie's Small Safes,** which was in the fire, without water on the building or Safe. Most of the valuables were removed before the fire, and therefore we were not in haste to get the Safe out of the burning ruins. Some of the papers left in the Safe were legible when taken out, but most of them were charred.

I. M. SINGER & CO.,
Per G. W. BABCOCK, Agent.

This is to certify that the undersigned had one of LILLIE'S Patent Chilled Iron Safes in their store, which was burned during the late severe fire in this city, and we are happy to state, the Safe preserved all its contents in first-rate condition. All the papers were legible, and the books will do for further use, without even rebinding.

GRANT, NUTTING & CO.

The foregoing comprises all the Safes of my manufacture that were in the fire, and below will be found certificates from all the owners of Safes manufactured several years since, by World's Safe Company, who used my Patent Chilled Iron Shell, but not my Fire-Proof Cement.

LEWIS LILLIE.

WORLD'S SAFE COMPANY'S SAFES.

TROY, May 19, 1862.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire of the 10th inst., in this city, would state that our Safes were exposed to a severe heat, being confined in the burning ruins, unprotected by water, from one to three days. On opening the Safes the contents were mostly legible, and to a far greater extent than could be reasonably expected of any Safe. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectors against fire, and by this test we are prepared to recommend them as such to public patronage.

Lyman Bennett,	Silliman, Matthews & Co.,
Flood & Dunham,	E. L. Mallory,
John Hutchinson,	E. H. Virgil,
Sup't National Express Co.	

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire in this city, would state, that on opening our Safes the contents were mostly legible. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectives against fire, and we are happy to recommend them to public patronage.

W. & L. E. GURLEY,
R. L. & G. DRAKE,
LEONARD SMITH,
H. E. & W. ALENDORPH, Absent.

TROY, May 19, 1862.

To whom it may concern: We would certify that when the recent fire broke out in this city, we took out from our Safe (which was made by World's Safe Company) all our books, papers, etc., and then left it to the flames without shutting the door, and the Safe will do for further use by being repaired, although the book case was destroyed by the door being left open through the fire.

ACKLEY & CO.

TROY, May 19, 1862.

The undersigned, using Safes manufactured by the World's Safe Company, at the time of the late disastrous fire on the 10th instant, in this city, would state that our Safes were filled with fire-brick for the fire-proof, and while several of this class preserved their contents, ours were considerably charred, and only a part legible. In justice to Mr. LEWIS LILLIE, we are pleased to state that Safes of his manufacture proved to be powerful protectors against fire, and have preserved their contents, after having been exposed to the fiery ordeal, unprotected by water, from one to three days.

Stephen Holton,	Luther Greenman,
Bennett, Strickland & Fellows,	E. W. Johnson,
Corless & House,	J. H. Goodsell.

TROY, N. Y., May 17, 1862.

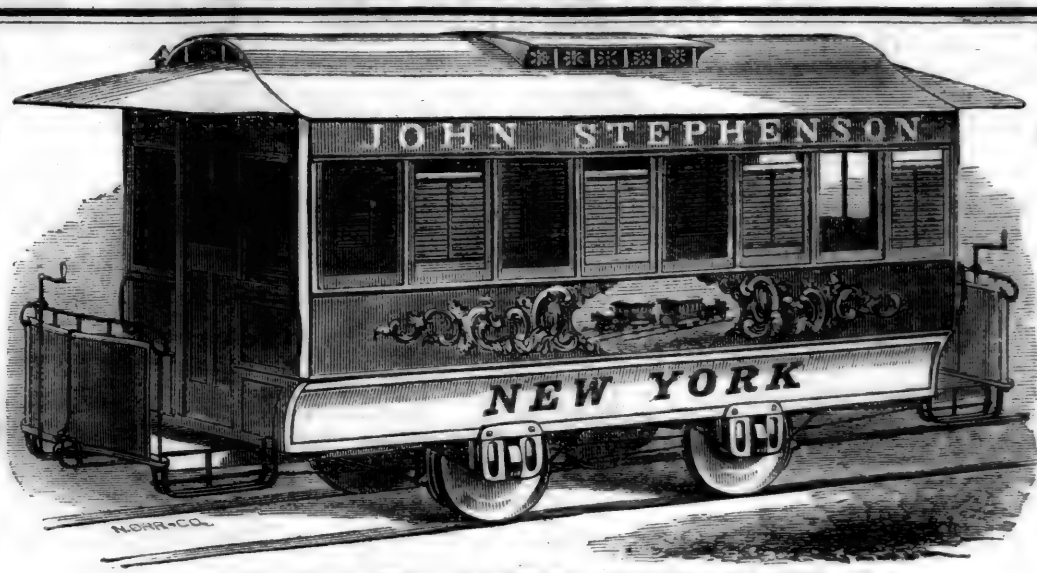
LEWIS LILLIE—DEAR SIR: We were using at the time of the late severe fire of 10th inst., a Safe purchased in 1859 of the late World's Safe Company. The contents were considerably charred, but our Ledger is mostly legible, and we are able to copy it.

The Safe was subjected to a severe heat for over eighteen hours, and we are satisfied that if water had been thrown on the ruins, as is ordinarily the case, the contents would have come out uninjured. You will please repair our Safe, placing in it the improvements embraced in Safes of your manufacture, and oblige

SHELDON & GREENE.

N.B.—The above Safe is believed to have damaged the contents more than any of those named in this circular.

There were only seven Sheet Iron Safes, made by Herring and others, outside of the railroad depot, that were exposed to the fire, four of which were entirely burnt out; the fifth was saved by being early cooled off by water; the remaining two were not severely tested.



LEWIS LILLIE.

MARCUS A. FINCH, Agent.
MANUFACTURERS of Paraffine Lubricating Oil for Railroad Cars, Locomotive Engines, and Stationary Machinery of all kinds, including Cotton Spindles, Woollen Machinery, etc., etc.
TRIAL of PARAFFINE LUBRICATING OIL.
By W. B. LEONARD, Esq., Sec'y of the American Institute.
ON HIS PATENT DYNAMOMETER FOR TESTING OILS.

Revolutions.	Pure Sperm Oil, Power Exhausted.	Paraffine Oil, Power Exhausted.	In favor of Paraffine.
500	2	1	100 per cent.
1,000	4	2	100 "
1,500	6½	3¼	90 "
2,000, Practical point of Oiling	9¼	5	90 "
2,500	13	7	85 "
3,000, Sperm entirely exhausted,	17½	10	75 "
3,500, Paraffine entirely exhausted	14		500 more revolutions, and 25 per ct. less power exh'sted than the sperm.

CERTIFICATE.
OFFICE No. 1 SPRUCE ST., NEW YORK.
I hereby certify that the above is a true copy of a trial of Paraffine Oil, manufactured by the Union Coal and Oil Company, of Maysville, Ky., as tried on my Patent Dynamometer, on the 20th day of September, 1858, showing that said Paraffine Oil contains 75 per cent. more lubricating properties than pure Summer Strained Sperm Oil.
[Signed,] W. B. LEONARD.
P. S.—All Oils **warranted** for the purposes for which they are recommended.

ENGINEERING WORKS.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
				14.	" 20 "		1½ to 1
2.	For Side Hill Cuts and Fills.			15.	" 24 "		¾ to 1
3.	Base 12 ft. Slopes		1½ to 1	16.	" 24 "		1½ to 1
4.	" 14 "		1½ to 1	17.	" 25 "		1½ to 1
5.	" 15 "		¾ to 1	18.	" 26 "		1½ to 1
6.	" 15 "		1 to 1	19.	" 28 "		¾ to 1
7.	" 15 "		1¼ to 1	20.	" 30 "		1 to 1
8.	" 16 "		¾ to 1	21.	" 30 "		1¼ to 1
9	" 16 "		1 to 1	22.	" 30 "		1½ to 1
10.	" 18 "		¾ to 1	23.	" 32 "		1 to 1
11.	" 18 "		¾ to 1	24.	" 32 "		1¼ to 1
12.	" 18 "		1 to 1				

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

American Railroad Journal.

New York, Saturday, July 5, 1862.

The Growth of Our Population.

Our Railroad Companies everywhere, but particularly in the West, are deeply interested in the question of the further growth of our population —whether this shall advance in numbers as it has done since the foundation of our government, or come to a stand-still. Not a few unfriendly journals in Europe have predicted such an interruption in our career of national growth. Some persons have even gone so far as to anticipate the influx into foreign communities of large bodies of American paupers! But they may make themselves perfectly easy on this head. Severe as may be the losses arising from war, a conflict of one or two years is not going to turn aside the destinies of this country, nor can it essentially retard the progress of a nation possessed of such industrious habits, such natural resources, and such created elements of wealth as the United States. With the cessation of hostilities our people will return to the work-bench, the anvil and the plow with greater eagerness than ever, obliterating in a short time every trace of the fearful struggle.

In a short period of seventy years, namely, from 1790 to 1860, our population rose from 3,929,823 to 31,429,891, an increase of over 700 per cent. in round numbers. During the first decade (1790—1800) the percentage of increase was 35; for the next, 36.4; for the next, 33; for the next, 33.5; for the next, 33.5; for the next, 35,8, and for the last, 35.5, The uniformity of this increase is remarkable. The period showing the smallest growth is that between 1810 and 1840, comprising the era of our second war with Great Britain, and the revulsions attendent upon it at the commencement and the close; also the break-down of 1837. Owing to the lack of sufficient capital and facilities for inter-communication, the recovery from each of these disasters was exceedingly tedious. It is different now, however. We had as general a collapse in 1857 as twenty years before; yet within the space of twelve months afterward our national industry was quite as active as if nothing had happened. It is, therefore, unfair to reason from the effects of the war of 1812, as if the country was in the same condition which it occupied at that time.

The principal argument employed against us is the increase of taxation which is to be so oppressive as to drive most of us out of house and home into the British possessions. It is probable that for a time a good many miners may find their way into British Columbia, nine-tenths of whom will return before five years. All the better for both parties, the more rapidly those territories fill up with a good population. But the people of Canada have to pay taxes as well as those of the United States. Admitting that the general government here will require $150,000,000 per annum for some years, this will average less than $5 per head of the population. The budget submitted by Hon. Mr. Galt, late Financial Minister of Canada, amounted to $12,500,000 for little over two millions and a half of inhabitants. As modified by the present Ministry, the taxes will still average $4.50 *per capita*. With our richer soils and more diversified industry we are in a better position naturally to pay the same amount of taxation than our Northern neighbors. And it may be added that they have been about as seriously prostrated as ourselves from the effects of the Southern insurrection.

But there will hereafter be other agencies at work which must tell largely in our favor. In the first place, the throwing open of the public lands for settlement *free*, however inexpedient the step may have been at this particular time, will have the effect of drawing to the Western States hundreds of thousands of the laboring classes of Europe. The Germans, in particular, who are industrious, patient and democratic from instinct, will settle on the public lands in vast numbers, adding a corresponding increase to the centres of trade and manufactures. For every hundred settlers in the North-west openings for ten inhabitants are created in the city of New York alone. The effect is felt at every point on the great avenues between the Atlantic and the frontier settlements. The commencement of operations in building the great Pacific Railroad will add largely to this volume of immigration. A third still more potent agency will be the development of our domestic manufactures, certain to take place in consequence of the increased duties on foreign merchandise. However much this course of policy might, under other circumstances, have been regretted, we cannot help ourselves now. A high tariff must be the rule for ten years to come at least—perhaps for a quarter of a century. This will transfer to our shores large numbers of British mechanics. Irish laborers, French artisans—those elements which form the bone and sinew of a community.

To what extent there is likely to be of migration of Northern people South and of Southern people North, it is hardly safe to speculate upon. But if, as we incline to think, the two populations are to mingle together to a greater extent than before, the general effects cannot fail to be beneficial to both parties, as also to the advancement in numbers of our aggregate population. With a properly organized industry, the States lying beyond the Potomac and the Ohio could absorb five millions of immigrants in ten years, and be all the better for the increase. Meanwhile it must be borne in mind that the most closely populated State in the North is by no means filled to its utmost capacity.

The Northern Railroad of France.

Some matters of general interest were stated at the late annual meeting of stockholders in the Northern Railroad Company of France. The receipts per kilometre were 66,305 francs, or about $21,000 per mile, being the largest in the company's history. The increase was 6 per cent. on slow trains, against 4.6 per cent. on quick trains. Though 8,400,000 passengers were carried against

7,745,000 the year before, while there was an increase of 26 per cent. in tonnage, the diminution of *fuel* was large, being 10,000 tons of coke and 43,000 tons of coal. This was brought about by the employment of more powerful locomotives than formerly. In 1859 ninety-six per cent. of the fuel consisted of coke; that substance now gives only about thirty per cent. The Northern Railroad (Paris to Boulogne) is one of the most prosperous in the French empire.

Little Miami and Columbus and Xenia Railroad Companies.

We have received a copy of the Sixth Joint Annual Report of the Directors of these companies being the Nineteenth Annual Report of the *Little Miami*, and the Twelfth of the *Columbus and Xenia*. The gross income derived from the joint operations of both roads during the fiscal year ending November 30, 1861, compared with that of the preceding year has been as follows:

	1860.	1861.
From passengers	$523,570 46	$566,236 36
" freight	645,145 57	612,174 72
" rent of track and depots	57,606 01	59,067 76
" mail and express	63,522 80	61,034 18
	$1,289,844 84	$1,298,503 02

The expenses of 1861 were:

Repairs of road	$132,579 77	
" locomotives	55,469 20	
" cars	63,054 18	
" bridges	11,405 34	
" depots, etc.	14,285 41	
Transportation expenses	254,985 25	
Fuel	72,519 48	
Oil, tallow and waste	12,067 16	
Loss and damage	9,040 06	
Stationery, etc.	5,390 69	
Rent	5,646 74	
Lease of D. & X. road	28,000 00	
		664,443 28
Leaving as net earnings		$634,059 74
Add dividend on C. & X. stock		38,488 00
Total net income		$672,547 74

From which deduct—

Taxes	$24,779 41	
Interest	94,095 54	
Expenses of previous year	21,558 10	
Dividend June 1, 1861	178,882 81	
" Dec. 1, 1861	178,882 69	
		498,198 55
Leaving a surplus of		$174,349 19

This revenue exceeds that of any former year; and in comparison with last year, it shows—

An *increase* in passenger earnings of	$42,665 90
In rent of track and depots of	1,451 75
	$44,117 65
From which deduct *decrease* in freight earnings of	$32,970 85
In express and mail	2,488 62
	35,459 47
The net increase being	$8,658 18
With a decrease in expenses of	28,870 01
Making the increase in net earnings	$37,528 19

The following statement exhibits the earnings and expenses for the past six years—the rental paid to the Dayton and Xenia Railroad Company, amounting to $28,000, being embraced in the working expenses of the years 1859, 1860 and 1861:

	Earnings.	Working Expenses.
1856	$1,209,636 00	$562,675 01
1857	1,163,162 59	645,561 12
1858	1,200,499 29	579,225 34
1859	1,276,754 73	688,561 41
1860	1,289,844 84	693,313 29
1861	1,298,503 02	664,443 28

The total income, including dividend on C. & X. stock, has been $1,336,991 02
And the total expenditures 804,876 33

Making the net income $532,114 69
Of which the Little Miami Railroad Company's share is $354,743 13
And the Columbus and Xenia Railroad Company's share 177,371 56

$532,114 69

The net profits in 1860 were $497,922 52
In 1861 they were 532,114 69

Increase $34,192 17

The assets and liabilities of the joint company are as follows:

ASSETS.

Rolling stock and shop machinery	$750,786 65	
Bills receivable	8,040 76	
Due from agents	64,756 85	
" transportation companies	94,484 88	
" U. S. for mail transportation	12,705 16	
" " military "	20,271 25	
" State of Ohio for do.	21,970 17	
C. & X. R. R. stock	38,400 00	
" bonds	96,000 00	
Cash in hands of Treasurer	228,430 38	
" " Assistant Treasurer	107,785 86	
" " Paymaster	11,173 24	
Materials in shop, supply room, etc.	121,684 84	
		$1,624,722 43

LIABILITIES.

Bills payable	$13,045 37	
Due to agents	794 67

The value of the rolling stock of the joint companies is $750,786 65. This company's proportion is therefore $250,262 22. The Little Miami Company's proportion is $500,524 43. The increase in equipment of the joint companies the past year has been $5,920 21.

The equipment of the road consists of 42 locomotives; 33 passenger, 16 baggage, mail and express, 322 box, 49 box stock, 25 rack stock, 99 platform, 21 lime and 54 gravel cars.

The number of miles run by engines has been—with passenger trains, 375,813; with freight trains, 400,491; with wood and construction trains, 38,604. Total miles run, 814,908—an increase over the previous year of 18,721 miles.

The following statement exhibits a comparison of mileage and cost of repairs of locomotives for five years:

	Miles run.	Cost of repairs.	Cost per mile run.
1857	666,546	$65,479 46	9.82 cents.
1858	637,835	59,031 92	9.25 "
1859	732,924	54,407 41	7.43 "
1860	796,187	60,778 92	7.63 "
1861	814,908	55,469 20	6.80 "

The following is a comparative statement of the mileage and cost of repairs of passenger cars for the past and preceeding year:

	Miles run.	Cost of repairs.	Cost per mile run.
1860	1,868,009	$28,411 80	1.52 cents.
1861	1,765,461	17,417 15	1.99 "
Decrease	102,541	$10,994 65	Inc.0.47 "

The mileage and cost of repairs of freight cars during the same time was:

	Miles run.	Cost of repairs.	Cost per mile run.
1860	5,569,648	$45,070 73	0.81 cents.
1861	5,668,678	45,673 03	0.80 "
Increase	99,030	$602 30	Dec.0.01 "

The cost of renewal and repair of iron rail, renewal of cross-ties and chairs, opening ditches, renewal and repair of culverts, cattle guards and other masonry, repairing fences, surfacing track, etc., has been $131,956 26; against for last year, $144,251 87—a decrease of $12,295 61. The following materials have been used in renewal during the year: 1,867 tons iron rail, 14,685 new chairs, 105,000 lbs. spike, 59,825 cross-ties, and 9,305 iron rails repaired, and restored for use in the main track—the total cost of which has been $78,152 45.

The cost of repairs of road per mile run by locomotives and cars in 1861, was 1.60 cents. In 1860 it was 1.75 cents. Estimating the damage to road by a locomotive equal to three cars, the cost per mile per car for road repairs was: in 1861, 1.33 cents; and in 1860, 1.46 cents. The cost of material used in the repair of track exceeds that of the previous year $8,244 74. The track has been kept in good order, the renewals being fully equivelant to the depreciation, except perhaps in the renewal of iron rail. Although there has been a larger renewal in this important item than the average of former years, the heavy mileage to which the track is subjected appears to injure the new iron placed in the track, within the few last years, more than was expected. It will be desirable to use during the coming year fully 1,800 tons of new iron.

The increase in cost of repairs of bridges has been $9,282.98. The increase in expenses on this account occurs in consequence of the rebuilding of the bridges on the Dayton and Xenia road referred to as necessary in the last annual report. The new bridges are built in the most substantial manner, and are covered and thoroughly protected from the weather.

During the year, 2,138 panels of new fence have been built. A new freight depot, 200 by 30 feet has been erected at Dayton. The turn-tables at Pendleton and Dayton have been renewed. A turn-table at South Charleston is much needed, and one should be built there during the next year.

The whole number of passengers carried was 482,996; of which there were carried over the entire line on local tickets, 21,994; do., on through tickets, 33,012; over any part of the line on local tickets, 362,544; do., on through tickets, 65,446. Number of passengers carried one mile, 22,785,161—of which, 14,655,319 were local, and 8,129,842 through. The total number of tons transported was 336,839, of which 140,255 were local, and 196,584 through. Of the through, 133,318 were carried eastward, and 63,266, westward. The number of tons carried one mile was 29,165,552. The total tonnage moved eastward is 210,233; westward, 126,606.

The officers and directors for 1862, are as follows:

LITTLE MIAMI RAILROAD COMPANY.

President—W. H. CLEMENT.

Directors—Jos. C. Butler, John H. Groesbeck, Nathaniel Wright, James Hicks, Jr., Larz Anderson, W. H. Clement, Alphonso Taft, Chas. H. Kilgour, Henry Hanna, John Bacon, Abraham Hivling, Jos. S. Swan.

Auditor—D. G. A. DAVENPORT.

Secretary—CHAS. H. KILGOUR.

Treasurer—S. E. WRIGHT.

Superintendent—E. W. WOODWARD.

Directors—Wm. Dennison, Jr., Robert Neil, D. W. Deshler, L. Goodale, Wm. B. Hubbard, Jos. R. Swan, Geo. M. Parsons, W. H. Clement, Larz Anderson, Henry Hanna, Abraham Hivling, Simon Gebhart.

COLUMBUS AND XENIA RAILROAD CO.

President—JOS. R. SWAN.

Vice-President—W. H. CLEMENT.

Superintendent—E. W. WOODWARD.

Secretary and Treasurer—CYRUS FAY.

New England Car Spring Co.

The office of this company has been removed from 61 Chambers Street to No. 237 Broadway, corner of Park Place.

Accidents at Village Railroad Crossings.

INJURIES TO HIGHWAYS BY THE CONSTRUCTION OF RAILROADS; DUTY OF COMPANIES AS TO REPAIRING THE SAME; THEIR LIABILITY FOR ACCIDENTS HAPPENING FROM A NEGLECT IN SUCH CASES.

This was an action to recover damages for injuries received by the testator of the plaintiff, through the alleged negligence of the defendants, the New York and New Haven Railroad Company.

The defendants under the authority of their charter had located and constructed their railroad across the main street of the village of Stratford, and thence along a lane that ran into the street. The street was about twelve rods wide, and had two traveled paths in it near the outside of the street, the intervening space being an open common, used in part as a parade ground and in part as a play ground for the children attending school at a public house which stood upon it. The charter of the defendants required them, where the location of their railroad intersected any highway, "to restore such highway to its former state, or in sufficient manner not to impair its usefulness. They had thus restored the two traveled tracks mentioned, but not the whole of the highway. The railroad track was raised a little above the surface of the highway, and in consequence impeded the flow of water, caused by rains and the melting of the snow, along the street, as it had been accustomed to escape, and to remedy this difficulty the defendants some time after the road was constructed, made an open culvert under the track of the railroad, about midway between the two traveled tracks of the highway, forty-two inches wide and twenty-one deep, which had over it only the open ties of the road, but which was covered with planks by the defendants immediately after the injury for which this suit was brought.

The deceased, who was eighty-one years old, was passing, in the day time, across the street, having come down the lane to the point where it intersected the street, and there took the railroad track; a foot path near by being obstructed by snow. While walking along the track he fell into the culvert, which was filled with snow so as not to be seen, and was so injured by the fall that he died about four weeks thereafter.

The defendants claimed that they had done their whole duty in putting the two travelled paths in the street in a proper condition, and that they were not bound to make the whole width of the street passable; and especially claimed that they were not bound to keep the culvert covered for the accommodation of people traveling, not across but upon and along the track of the railroad, and that the public had no right to travel upon the track on foot, or otherwise than in conveyances of the defendants; and that if they did it was at their own hazard, and the defendants were not responsible for any injuries they might receive in so doing.

At the trial the Court charged the jury that the defendants had the right to locate and construct their railroad track so as to intersect the street in question; but in doing so, they were bound to restore the highway to its former state, or in a sufficient manner not to impair its usefulness; that this did not imply that the highway must be put in the precise condition it was in before the railroad was built; nor that the right of the railroad company was to be exercised in subserviency to the right of the public to the highway; but that in granting to the company the power to construct their track across this highway, it was intended that the company should exercise the right reasonably, and in such a manner as effectually to carry out the objects the company had undertaken, and at the same time not seriously to disturb or obstruct the public travel upon the highway; that the question in this part of the case was—had the railroad company in the construction of their track, and the provision which they made for the public travel, acted reasonably, and so as not to seriously impair the usefulness of the highway; that the defendants having located their track across a public highway in a village, were bound so to construct it that the inhabitants of such village, and others as occasion might require, might safely cross the highway, which they might do along and upon the track; and if in so doing, in the exercise of ordinary care, any person should receive injury in consequence of the culpable carelessness and negligence of the defendants in constructing the track, he would be entitled to recover damages; but that under these circumstances, it was incumbent on the person claiming damages to satisfy the triers that he was in the exercise of ordinary care; or, in other words, that he had not, by his own carelessness or negligence, contributed essentially, to the injury he had received.

The jury returned a verdict for the plaintiff; and the defendants then moved for a new trial, on the ground that the law does not authorize the

public to travel upon the track of a railroad, in any other manner than in the railroad cars; and where a railroad crosses a highway the public are entitled to a safe and commodious crossing, and nothing more. They cannot require the railroad company to put their track in a safe condition for traveling, either on foot or in vehicles, along the track itself; the track being for the sole use of the railroad company. The judge, therefore, erred in his charge to the jury.

The following is the opinion of the Supreme Court of Errors of the State of Connecticut, before whom the motion was argued, delivered at decision of the case, and holding the company liable for the plaintiff's injuries.

ELLSWORTH, J.—We perceive no error in the charge under which this case was submitted to the jury. On the other hand we think the principles of law laid down by the judge fully sustained by the authorities, as well as by equity and good sense. If the defendants without a charter, had gone into the highway at this place, and made a ditch three and a-half feet wide and a foot and a-half deep, and left it uncovered, and a person passing that way had fallen into it, without any neglect or presumption on his part, no one will doubt but that he could recover for the injury he had sustained. This is substantially the case before us, if we are correct in our view of it.

The defendant's charter gave them no authority to make an alteration in this highway without restoring it substantially to its former condition and usefulness. This duty of the defendants applied not merely to the beaten path, which seems to be the claim of the defendants' counsel, but to the highway throughout, so far as they had altered it, and the people had occasion still to pass over it, in one direction or another: the person so using the highway being of course bound to use reasonable care in passing over it, which was to be judged of by the circumstances of the particular case. At the place of intersection the highway is twelve rods wide, and the railroad is laid directly across it, upon a level very nearly with the highway itself. Why, now, should not the defendants place the whole of the highway, as well as a part of it, in such a condition that it could be safely and conveniently used by the people of the village? Why leave in it, anywhere, uncovered ditches and culverts, so far rendering it unsafe for foot people to pass along or across it? If the people have occasion, why may they not pass as freely as before, giving to the defendants the exclusive use of their chartered franchise? We do not say that the defendants whenever embankments are necessarily raised in a highway, must construct them so as to allow the public to drive along them, or even over them, at every place; this would be unreasonable and useless; but for aught that appears here, and doubtless such was the opinion of the jury, the whole length of the railroad within the highway could have been made safe for travelers, as has been done, at a trifling expense, since the accident. The plaintiff, exercising ordinary care, had a right to pass where he did pass, and at such times, by day or by night, as business called him; and it is not possible that the defendants, under such circumstances can properly leave dangerous culverts or pitfalls uncovered. Even at common law the defendants would be required to guard such a dangerous place, and secure the public against injury from such exposure. Motion for a new trial denied: all the judges concurring.

Railroads in Tennessee.

Four railroads, one of which was unfinished, centre in Memphis. The Memphis and Charleston—built at an expense of $7,000,000—Memphis and Ohio, an important connecting link between Memphis and New Orleans, extending from the former city to Paris, Tenn., a distance of 180 miles; the Mississippi and Tennessee railroad, communicating with Grenada, Canton, Jackson and New Orleans; the Memphis and Little Rock railroad, leading from a point in Arkansas west of Memphis, taking in Duvall's Bluff on the White River, taking in St. Francis on the river of that name.

The receipts for 1861 for freight and passengers on these roads foot up as follows:

Memphis & Charleston	$1,841,122 60
Memphis & Ohio	362,595 33
Mississippi & Tennessee	220,333 74
Memphis & Little Rock	41,836 18
Total	$2,465,887 85

Northern (N. H.) Railroad.

The earnings of this road for the fiscal year ending March 31, 1861 and 1862 were as follows:

	1861.	1862.
Miles run by engines	333,951	307,260
Passengers carried	85,438	70,773
Tons merchandise	200,055	184,985

There were purchased and cancelled of bonds that had been issued, during the year 1860–'61, $21,500; and during 1861–'62, $7,500—leaving now outstanding of bonds due April 1, 1864, $42,000: and of bonds due April 1, 1874, $186,800. The directors have been prepared to purchase a further amount of bonds, but the supply offered has been limited. The contingent fund is safely invested, and now amounts to $53,456.

During 1860–61, there were laid down 510 tons of new rails, and 30,470 sleepers; one locomotive built and 26 freight and 1 baggage car rebuilt, to replace old ones worn out. Some small bridges were re-built, and the large bridge over Connecticut river reconstructed in a most thorough manner. During the past year 580 tons of new rails, and 33,486 sleepers have been laid, and about 2,000 tons repaired and relaid; 13 freight cars have been built to replace those broken up.

The embarrassed condition of business throughout the country the past year has had the effect to reduce the income of the company about $58,000, or 16 per cent. The expenses have been reduced during the same time about $27,000—making the net loss about $31,000.

The equipment of the road consists of 10 passenger and 14 freight locomotives; 14 passenger, 6 baggage, 327 merchandise, and 25 gravel cars.

The road, locomotives, cars and all machinery have been maintained in good working order.

The income of the Bristol Branch for the year ending March 31, 1861, was $12,992 05: and the expenses, $8,357 09—balance, $6,634 96. For the year ending March 31, 1862, the income was $11,650 96; and the expenses, $7,415 06—balance, $4,235 90.

The road is 69.16 miles in length, extending from Concord to West Lebanon. Length of Branch Line, Franklin to Bristol, 13.41 miles—total 82.57 miles. Length of sidings, turnouts, etc., about 10 miles.

The Northern Railroad Company was chartered June 18, 1844, and organized July 15, 1845. In October and November following, the road was placed under contract. On the 1st of September, 1857, the first section from Concord to Canaan, 54 miles was opened for public use, and on the 20th November following the entire line to West Lebanon. In April, 1848, a lease was a taken of the Franklin and Bristol Railroad for a term of 100 years. The company constructing this road was chartered July 8, 1846. Its construction was commenced in 1847, and the road completed in July, 1848. On the 31st of January, 1849, the two companies were consolidated, since which time the Franklin and Bristol has been operated as a part of the Northern Railroad. The cost of this branch at the time of the consolidation was $190,942—represented by share capital $159,146, and bills payable, $31,196. A considerable expenditure was subsequently made to complete the line. The cost of both roads and equipment at the same date was $2,655,398.

The following statement will show the earnings, expenses, etc., from 1848 to 1862, inclusive:

	Gross earnings.	Operating expenses.	Net earnings.	—Dividend.— Am't.	p. c.

Pres't and Sup't—ONSLOW STEARNS, Concord.

Treasurer—GEORGE A. KETTLE, Boston.

The Future Policy of the United States.

There is no longer a doubt but that the present rebellion is to result in a wide sweeping revolution, so far as our foreign relations are concerned, and in the domestic policy and views of our people. Financial necessities will erect, in the form of high duties, a formidable barrier to commerce with the Old World—or rather to importations from it, excepting of course, articles that are not appropriate to our climate and soil. For a long time to come the distinction between protection and free trade parties will cease. All will accept high rates of duties as inevitable, while most will agree in their expediency. We must no longer have large foreign balances against us, to disturb, or threaten disturbance to the even tenor of affairs at home. Our people are more readily reconciled to the new order of things from the hostility displayed by foreigners with whom our relations have been the most intimate. It is seen that commercial intercourse, intimate as this has been, has not had the effect to create any sympathy or good will between the Old World and the New, as we had only to fall into trouble, to find our utter downfall to be most earnestly desired. The evidence of such a state of feeling, leads our people, of all classes, to accept high, and in many cases, prohibitory duties not only without murmur or complaint, but as our true policy under the present emergency.

It is fortunate for us that we can isolate ourselves, in part at least, from other countries, and still have full scope for activity upon our own continent, the development of whose resources is to absorb us hereafter. For years the antagonism between the North aad South brought the Federal Government to a dead lock upon everything that related tothe development of these resources. It was seen by the South that any step in this direction inured to the benefit of the North, consequently any one that would add to our wealth, population and power were held to be expressly forbidden by our organic laws. Such has been the construction or the Constitution for a generation. But with all the restriction to the free articulations of its people, the North grew out of all proportion to the South, leaving the subversion of the government the only alternative left to check and destroy its already overshadowing power. This *coup de main* failed. Northern ideas and Northern policy seized the reins of government, and one of the first steps taken in the exercise of this newly acquired freedom, is the incorporation of a company, with ample grants of money and land, for the construction of a railroad from the valley of the Mississippi to the Pacific!

No measure could better inaugurate the new Era. No work so well expresses the progress of man in the physical sciences as the railroad, and no enterprise of one-tenth its magnitude was ever proposed to human effort. Its construction will constitute the great Epic in our national career. Its undertaking is a declaration to the world that this continent is, hereafter, to be our theme. We need not step off it to find abundant subjects for our industry and capital. We have secure foothold upon the great slopes facing the two oceans. But the vast interior is still a desert, which when cultivated, is to yield an overflowing return in the precious metals of all kinds. We all know what California has done both for the United States and the world. But as far as minerals are concerned there were many Californias between our settlements on the two shores of the continent. The whole range of the Rocky Mountains is known to be as rich in gold, silver and copper, as the most fertile sections of the Mississippi valley are in soil. By cultivating this wealth, labor can be made much more productive than in raising the articles that have hitherto constituted the greater portion of our foreign commerce, while its product will enable us at all times and under all circumstances, to command whatever other nations may possess, and of which we may stand in need.

It is unquestionably our wisest policy, in every point of view in which our interests can be regarded, to make this continent, for the future, the theatre not only of our efforts, but our policy. A people who have millions of unoccupied territory before them, need have no fear of being unemployed, while the division of labor which will necessarily result from our diversified resources, will always secure a market for the productions of each class. A domestic policy, too, will be the first step toward a real and distinctive nationality. The relations we have sustained heretofore to other nations, have been a decided obstacle to such development. We have felt ourselves to be in a state of pupilage, and have cherished to the Old World all that respect and reverence that youth naturally feels for age. We fully appreciated the great excellence in the institutions and social condition of the Free States, and vainly supposed that these were necessarily the admiration and imitation of the world; that ours was the work of humanity. We have been rudely awakened from this dream, to a consciousness that our fancied admirers regard our civilization with disgust, and our efforts to preserve it, with contempt. We have fortunately sense enough to take the proper course, which is the cultivation and development of our own domain, and the consolidation of our political structure as the surest road not only to domestic comfort and order, but to power, should we ever be called upon to exert it. The continent is our future field, and our policy henceforth a domestic one. In our new independence we start under the most favorable auspices. We have an abundant population for defense, vast accumulated wealth, with resources tenfold greater. A quarter of a century more will give us a population of 65,000,000. We can produce, economically, upon our own soil nearly every article we may wish to consume. We could not sever, to a degree, our commercial relations with the Old World, at a more propitious moment. These for the future must be reduced to amounts nominal compared with the enormous commerce of the past, with what benefit or injury to either party, time will not be long in disclosing.—*Halleti's Financial Circular.*

Little Schuylkill Railroad.

From the proceedings of the meeting of the stockholders of the Little Schylkill Railroad Company, we learn that the decree of the Supreme Court in the suit of Mr. James Milliken, one of the stockholders, has been accepted. The decree awards to the company $100,000 payable in cash, $125,000 payable in the coupons of the seven per cent. mortgage bonds of the company, and in addition 2,500 shares of its own stock, valued at $125,000. The parties paying the $225,000, in cash and coupons, are to receive in return therefor shares of the capital stock at par. Conditioned upon these payments, the first mortgaged bondholders have agreed to exchange, with the company, their over-due bonds for the bonds of the second mortgage, after which the first mortgage will be canceled. The recovery of the money, and the organization of the financial affairs of the company, will leave it with a stock issue of $2,600,000. A mortgage debt of $960,000 (to become first mortgage), of which the company will still hold over sixty thousand dollars of the bonds, and will have the interest warrants cut from $450,000 of this mortgage for four years, and from $50,000, additional, for two years. The company will also have an addition of $190,000 to their cash fund, and a reserve fund of over $80,000. We understand that the company owes no floating debt except one of $75,000, due to parties in England, on which an extension of four years on the time of payment has been granted to the company. The prospects of this company seem now to be encouraging to the stock and bondholders. A preamble and resolutions were adopted, pointing to Mr. James Milliken as the individual through whom a settlement of the difficulties between the stockholders and certain bondholders had been effected, from which we extract the following:

Resolved, That the stockholders fully appreciate the great advantages that have accrued to them by his efforts; desiring thereby to return their thanks for the zeal which he has manifested in maintaining the rights of shareholders, and congratulate him on the favorable settlement which has been mutually agreed upon.

A resolution was also passed that all the necessary expenses incurred in the prosecution of the suit, which has resulted in important advantages to all stockholders, be paid to Mr. Milliken by the Board of Managers.

A Steam Fire Engine for Guyaquil.

The Baltimore *American* describes a new fire engine, manufactured by Messrs. Poole & Hunt, at the Union Works, located at Woodbury, for the city of Guyaquil, Ecuador, South America. The weight of the engine, which is designed to be drawn by hand, is only 4,400 pounds with water, wood and everything complete for operating. It is provided with a four-inch Fulton pump. The steam cylinder is 11 inches, with 8 inch stroke. The engine is a beautiful specimen of Baltimore mechanism, and will sustain the reputation of the builders, who have already furnished several steam engines for South American cities. In addition they have also manufactured to the same order two hose carriages, capable of conveying two thousand feet of leather hose, which was manufactured by Mr. John H. Haskell, of Baltimore.

A public trial of the engine was made on Monument Square, when she worked in the most admirable manner, giving satisfaction to all present. Steam was raised in less than five minutes, and a

solid stream of water thrown to the distance of two hundred and thirty-eight feet through a nozzle measuring in diameter seven-eighths and one-sixteenth of an inch.

The Railroad to Alexandria.

The bill which has passed the House by an almost unanimous vote, to authorize the railroad to Alexandria to be extended to this side of the Potomac, and connected with the Baltimore depot, provides that the river shall be crossed upon a pile bridge below and immediately adjoining the Long Bridge, the rail tracks upon which are to be removed. The new railroad pile bridge is to be separated from the present bridge by a bulkhead eight feet high from the flooring, and is to be crossed by the cars at a speed not exceeding four miles per hour. The blowing of the steam whistle by the locomotive while crossing the bridge is expressly prohibited. These precautions will make it perfectly safe to drive restive or timid horses over the present bridge, which is hazardous now to do, with the rail track on it.

The road will cross Seventh street, just south of the canal, where there will be a depot for passengers belonging to this city, coming from or going to Alexandria. This depot will be but a few steps from Pennsylvania avenue.

In order to have a real railroad communication with Alexandria, we must have a road which will transact all the business, and therefore be able to do it at low rates of fare. The old road with its terminus at the other end of Long Bridge, was a perfect failure. With a connection with the Baltimore depot, and with this passenger depot on Seventh street, the whole thing will be changed. That it will be a great public benefit, both to Alexandria and Washington, is most apparent.

With our city railroad and this road to Alexandria secured, the next thing will be the Metropolitan road, to the Point of Rocks. The prospects of Washington are brightening in all directions.—*Washington Paper.*

The Madison and Indianapolis Railroad.

The Madison and Indianapolis Railroad was originally a part of the system of internal improvements of the State of Indiana, provided for by the act passed by the Legislature on the 27th of January, 1836, and the acts supplemental thereto, and for the prosecution of which some $12,000,000 was appropriated, to be raised by the sale of 5 per cent. State bonds. The construction of these works was placed under the sole control of a Board of Public Works, elected by the General Assembly. The Madison and Indianapolis Railroad was put under contract in the summer of 1837, and the work pushed forward with unwonted vigor for that early stage of such improvements in the West. In the year 1841 it was completed to what was called Griffith's Depot—a point 26 miles north of Madison, at a cost of about $1,200,000; and from this point north to Edinburg, a further distance of 30 miles, about $450,000 had been expended in grading and bridging. The section completed was laid with a T rail weighing 42 pounds to the yard. The terminus at Madison being over an inclined plane of 314 feet to the mile, giving an ascent of 420 feet in about one mile and a third, the construction of the road over it consumed the largest amount of the money expended on it. In 1837, great pecuniary difficulties came over all the States, particularly the West, and the State of Indiana, among others, failed to meet the interest on the debt already created under the act aforesaid; and as the credit of the State was through this reason completely paralized, and no further loans could be raised, operations were suspended on all the works. At this period none of them had become productive; in 1841 the Madison and Indianapolis Railroad, under State management, yielded a net income of only $1,152; and all were rapidly going to decay. Under these circumstances the Legislature at the session of 1841-2, (*vidi* Stat. 1842 p. 3) passed an act authorizing the organization of companies, to which the various public works should be conveyed for the purpose of completion. Under this act the Madison and Indianapolis Railroad Company was organized and the road so called transferred to it upon the conditions—1st, that the company should complete it to Indianapolis by the 1st January, 1848, and thereupon the $450,000 expended on the unfinished portion should become the property of the company; 2d, that the company should pay to the State until 1st January, 1845 (subsequently extended to the 13th January, 1853), the sum of $1,152 per annum as rent for the use of the finished part of the road; 3d, that the company might at any time purchase the interest of the State by paying in bonds the cost of constructing the finished section, viz. $1,200,000; 4th, that if the company should not purchase before the 13th January, 1853, then the State should be entitled to receive annually thereafter, such portion of the net revenues as the twenty-six miles constructed by it should bear to the whole length of line; and 5th, that the sole control and property of the road should be in the company, but reserving to the State, after 1st May, 1867, the right to purchase the road by paying the cost thereof with 6 per cent. interest thereon, unless the dividends in the meantime should have paid such rate of interest. This last reservation was overruled by the constitution of 1857, which prohibits the State from holding any interest in works of internal improvements. The new company was organized in 1842, and after great efforts capital sufficient to complete 10 miles additional was obtained. The company, indeed, was at this time in a very embarrassed condition—its resources being limited and its credit insufficient to raise the means for the further extension of the road. A few individuals in Madison, however, stepped forward, loaned it money and endorsed its paper so as to enable it to purchase iron (flat bar) sufficient to lay 13 miles, from Griffith's Depot, making in all 39 miles of completed road. This was opened for traffic in 1843, and so great was the increase of business consequent on the extension as to give confidence in future of the enterprise, when the road should be opened to Indianapolis. In the year following the road was completed to Columbus 45 miles from Madison. In 1845 a loan of $50,000 in 7 per cent. bonds was negotiated in New York, and in the following year a further loan of $100,000. Subsequently these were converted into stock. These loans (which were about the first Western railroad loans taken in New York), together with the sale of stock at par enabled the company to complete the work within the time specified by law—the road having been opened to Edenburg, 56 miles from Madison, in 1845, and to Indianapolis on the 1st October, 1847. Means were now wanted to relieve the company of the debt it had contracted during the progress of the work, to relay the track with heavy rail, and to provide additional equipment and rolling stock. For these purposes the stock was further increased in 1848 and 1849 The relaying of the track was accomplished during 1850 and 1851, and in the meanwhile large buildings were erected at Madison and Indianapolis, for depots, machine shops, engine houses, etc., wharves were constructed and ample grounds purchased to facilitate the transhipment of goods at Madison, and a union track was built at Indianapolis to connect the roads centering at that point. In the same year a second track was laid between Columbus and Edenburg. In 1857 the largely increased business called for additional equipment, and an issue was made of 7 per cent. bonds. The expenditure of this sum placed the road in good condition and supplied it abundantly with rolling stock. During the session of 1851-2, the Legislature passed a bill for the sale of the contingent interest of the State in the road for $600,000, payable in 2½ per cent. State stock, or $300,000 in cash—the payment to be divided into four annual instalments, to be made on the 1st January, 1854-57. The same act required the company to construct within four years a new terminus at Madison, so as to avoid the inclined plane. The provisions of this act were accepted by the directors at a special meeting held on the 4th March, 1852. The new track at Madison which reduced the grade to 100 feet and lengthened the road nearly one mile was completed in the spring of 1854. In 1853 the Martinsville and Franklin and the Columbus and Shelbyville Railroads were completed—the first on the 1st May, and the latter in December. Both these roads had been largely aided by this company, by which, from the date of opening, they were operated. In October of the same year a running arrangement was made with the Jeffersonville Railroad Company for the use of this company's track between Edenburg and Indianapolis. The arrangement was carried into effect on the 16th November, and during its existence the Jeffersonville Comdany was not to continue its line between the two points. The same year (5th Sept). the Madison and Indianapolis and the Peru and Indianapolis Companies agreed to consolidate their interests under the title of the Madison, Indianapolis and Peru Railroad Company, and the union was consummated on the 1st January, 1854. This connection however was short lived, and was terminated by mutual agreement on the 1st August following. On the 1st December, 1855, a new agreement was made the Jeffersonville Company for the use of the road between Edinburg and Indianapolis by which the cars of that company were to be drawn over the line by its own machinery, and this company to receive as rent therefor 60 per cent. of the gross earnings, provided the total receipts should not exceed $65,000; 55 per cent. if not exceeding $75,000 or 50 per cent. if exceeding $75,000. In the same year the City of Madison resigned to this company all its interest in the Columbus and Shelbyville Railroad for $24,000. At the session of the Legislature of 1855-6, an act was passed to compromise with the company the claim held by the State under the act of 1852, amounting to $300,000 with interest, neither of which had been met by the company, and subsequently the State agreed to accept $75,000 in 5 per cent. State stocks, in full liquidation. These stocks were delivered to the State on the 26th February, 1856, and a full release executed as prescribed by the act. Thus the company acquired, for a trifling sum, a property which had cost $1,650,000.

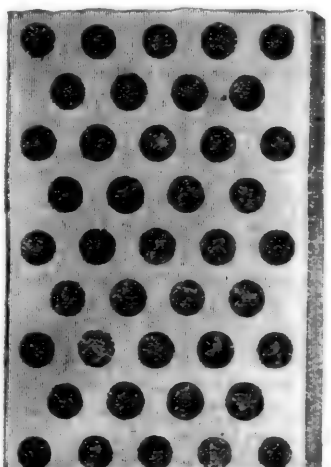
American Railroad Journal.

Saturday, July 5, 1862.

A Northern Pacific Railroad.

The Senate of the United States has passed a bill for the construction of a *Northern* Railroad to the Pacific, in addition to the great Central line which had previously been authorized. In this case, however, the aid extended does not consist of government bonds, but of public lands. The President of the United States is empowered to appoint three engineers, who shall immediately proceed to survey a route from Superior City on Lake Superior to a point on the Western boundary of Minnesota, and thence to the Pacific by way of Columbia river, with a branch to Puget's Sound. Provision is made for a suitable connection with other roads in Minnesota. To aid in its construction the government donators to the States and Territories, through which it shall pass, every alternate section of the lands on each side of the road for twenty miles. Mineral districts are excepted; but an equivalent amount of agricultural lands is granted in place of these. In disposing of this estate the price to purchasers within ten miles of the line is limited to $2 50, and for the residue to $1 25 per acre.



It will thus be seen that, assuming these lands would all be sold at the full prices stated, they would bring $24,000 per mile. It seems to us that in a route where so much of the surface consists of mountain or desert, the company ought not to be restricted in the price which they shall be allowed to charge. Nor should they be excluded from all the advantages derivable from mineral discoveries, seeing these must derive much of their value from the establishment of a railroad. Why deny to the holders of a great national work like this rights that are freely conceded to individuals who may not have contributed a dime to the national progress? There is a degree of stinginess in this concession that must go far to neutralize its apparent benefits, and perhaps defeat the object sought altogether.

In distributing the lands a curious provision has been inserted. One-half of them are to be donated to the States or Territories, as fast as successive sections of twenty-five miles of road are completed. This part of the arrangement gives to each land according to mileage. But as the work of crossing the mountains must be very difficult and expensive, while real estate there possesses the least value, it is provided that the remaining half of the lands shall not be given away until the completion of the road, when it is to be donated to the States and Territories in proportion to *the expenditure* in building the whole road. While the plan has something to recommend it, we think the retention of fifty per cent. of the lands until completion will deter capitalists from embarking in the enterprise. Troubles will also arise from keeping the accounts of outlay incurred, however stringent may be the law in respect to it. Of the proceeds of these lands seven per cent. is to be retained by the General Government to cover the expenses of surveying and transferring them.

One of the sections in the bill provides for extending the road southeastwardly from Superior City to some point on the Wisconsin river not further south than Grand Rapids, and thence to the valley of Fox river, on condition of allowing other roads to form running connections with this on fair and equal terms.

Vanderbilt's Polishing Belt.

The annexed engraving represents a polishing belt invented by George R. Vanderbilt, of this

city. It is formed by inserting plugs of emery in a leather in the manner represented. The holes are cut in conical form, being smallest at the polishing surface, and the plugs of emery are made to fit the wholes; a strip of cloth upon the back side holds the plugs in place. The emery is fastened together with a suitable cement, which wears away with the leather, and thus the plugs act as constant feeders to the entire surface of the belt. The belt, consequently, requires no replenishing with emery until it is entirely worn out. It may be connected at the ends to form an endless belt and run on two pulleys, or it may be secured to the periphery of a wheel to form a polishing wheel.

This belt has been tried at the Novelty Iron Works, in this city, and is pronounced by the foreman a good article.

Application for a patent for this invention has been made through the Scientific American

Patent Agency, and further information in relation to it may be obtained by adressing the New York Emery Wheel Company, at 116 Nassau street, New York city. [See advertisement on another page.]

Interest and Dividends.

The Terre Haute and Richmond Railroad Company has declared a semi-annual dividend of 5 per cent., payable July 1st, at the office of the Farmers' Loan and Trust Company.

The Milwaukee and Western Railroad interest coupons on the Sinking Fund Bonds, due July 1st, will be paid by Duncan, Sherman & Co.

The bonds and coupons of the city of Brooklyn, due July 1st, will be paid at the Long Island Bank.

The interest due July 1st, on the bonds of the State of Michigan, will be paid at the Metropolitan Bank.

The coupons of the Housatonic Railroad Company due July 1, will be paid at the office of Messrs. Ketchum, Son & Co., No. 40 Exchange Place, or at the Treasurer's office, at Bridgeport, Conn.

Interest coupons upon Minnesota 8 per cent. State bonds, due July 1, 1862, will be paid by H. W. Palmer, No. 24 Pine-street., New York.

The July interest on the third mortgage bonds of the New York and Harlem Railroad Company, will be paid at the Treasurer's office.

The Panama Railroad Company has declared a quarterly dividend of three per cent., out of the earnings of the road, and one per cent. additional from the earnings of steamers, &c., payable July 5.

The New York, Providence and Boston (Stonington) Railroad Company, a semi-annual dividend of three and a half per cent., payable on demand, at the office of Mathew Morgan & Son, No. 37 William-street.

The July interest coupons of the Long Island Railroad Company will be paid at the Bank of the State of New York.

Messrs. Duncan, Sherman & Co. will pay the following bonds and coupons, due July 1, 1862: Albany City bonds, $20,000, issue of July, 1849; Albany City coupons; Chicago City Municipal coupons; Chicago City Water Loan coupons; Buffalo City coupons; Utica City coupons; Buffalo and State Line Railroad coupons; Atlantic and Great Western Railroad, guaranteed by the Bank of London, coupons; Milwaukee and Western Railroad coupons. Also, interest on New York State 5½ per cent stock, loan to Tonawanda Railroad; interest on New York State 6 per cent stock, loan to Schenectady and Troy Railroad.

The Delaware, Lackawanna and Western Railroad Company has declared a dividend of 6 per cent payable June 30.

The July interest on the 7 per cent bonds of the State of Kansas will be paid at the Ocean Bank.

The coupons of the first mortgage bonds eastern division of the Lacross and Milwaukee Railroad, due May 1, 1862, will be paid on presentation at the office of the Receiver at Milwaukee, with exchange on New York.

The Paterson and Ramapo Railroad Company has declared a dividend of two per cent., the Paterson and Hudson River Railroad Company one of four per cent., both payable July 3.

The coupons on the bonds of the city of Covington, issued to the Covington and Lexington Railroad Company, due July, 1860, and July, 1861, will be paid, with interest accrued, at the Bank of America.

The July interest of the State of Kentucky is being paid by the Bank of America in currency. The bank is also paying the interest coupons of the cities of Louisville and Cincinnati.

The Bank of Commerce pays interest on Chicago, Burlington, and Quincy Eights, and the St. Louis County bonds.

The Waltham and Watertown Railroad Company have declared a semi-annual dividend of 4 per cent. Stoughton Branch, 3 per cent. Pittsfield and North Adams, 3 per cent. Michigan Central, 3 per cent. Concord and Portsmouth, 3½ per cent. Berkshire, 1¾. Agricultural Branch, 3 per cent.

The interest coupons due by the Northern Central Railway Company, on the first of July, will be paid on presentation at the Banking-House of John S. Gittings & Co. Baltimore.

The Taunton Branch Railroad Company pay a dividend of 4 per cent., on demand; and the Cape Cod Railroad Company one of 2½ per cent., payable 9th inst.

Railroad Earnings--Weekly.

The earnings of the Toledo and Wabash Railroad for 3d week of June, 1862, were . $27,814 94
Do., 1861 ..... 16,353 87

Increase $11,461 07

The Chicago and Rock Island Railroad earned the 3d week of June, 1862 ..... $40,140
Do., 1861 19,865

Increase $20,275

The Michigan Central earned in the 3d week in June, 1862 ..... $43,105 90
Do., 1861 ..... 31,464 70

Increase $11,641 20

The earnings of the Chicago and Northwestern Railroad the 3d week in June were ... $26,634 03
Corresponding week, 1861 ..... 19,162 18

Increase in 1862 ..... $7,471 85

The earnings of the Galena and Chicago Rail road the 3d week in June, 1862, were. $57,338 00
Do., 1861 ..... 38,535 37

Increase $18,802 63

The earnings of the St. Louis, Alton and Chicago Railroad for the 3d week in June, were:
1862 ..... $26,836 42
1861 ..... 14,242 80

Increase. $12,593 62

The earnings by the Chicago, Burlington and Quincy Railroad for the 3d week in June, 1862, were $56,828 42
Do., 1861 ..... 32,238 83

Increase $24,589 59

The traffic of the Great Western Railway of Canada for the week ending June 27, 1862, was as follows:

Passenger $20,404 54
Freight and live stock 21,320 76
Mails and sundries 1,362 13

Total $43,087 43
Corresponding week of last year. 32,963 97

Increase $10,123 46

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 3d week of June, 1862, were $31,319 24
Corresponding week, 1861. ..... 35,186 18

Decrease $3,866 94

The receipts of the Grand Trunk Railway of Canada for the week ending June 21, 1862, were:

14,578 passengers $21,027 10
Mails and sundries 2,837 68
13,066 tons of freight and live stock .. 44,256 47

Total $68,121 25
Corresponding week, 1861 ..... 58,226 76

Increase $9,894 49

Railroad Bridges.

The new bridges to be built across the West and Connecticut rivers at Brattleboro', in place of those swept away by this spring's flood, will be of the "Lock patent," and Brown & Hart of Claremont are contractors at $13 per lineal foot.

The new railroad bridge at Troy, the contract for which has been let to Fowler & Leighton, of Rochester, N. Y., will be 1,000 feet in length, and its entire cost will be about $75,000. It is to be a truss bridge, similar in character to those built by the same contractors for the New York Central and New York and Erie R. R. Companies.

Improvement on the Baltimore and Ohio Railroad.

Among the recent improvements on this road will be the construction of a new and substantial track between the Washington Branch and the main stem of the road, with a curve on the north side of the Patapsco, by which engines and cars will not be changed at present. The object is to increase the facilities of transporting Government stores and troops between the Capital and the Great West, Harper's Ferry and other local places. When this important improvement shall have been effected any body of soldiers can be taken on board of comfortable cars at Alexandria or Washington and carried to Harper's Ferry, Winchester, Wheeling or Parkersburg with great celerity, and without a change of cars. Military officers who have had much experience in the transportation of troops will at once perceive the excellence of this new arrangement.—*Baltimore American.*

QUARTZ MILLS
OF THE MOST APPROVED KIND,
MANUFACTURED BY **BURDON, HUBBARD & CO., 102** Front st., BROOKLYN, N. Y. Also Agents and manufacturers of the RUSS PATENT PREMIUM AMALGAMATORS, the best and simplest in use for saving both **fine** and **coarse** gold.

Vanderbilt's PATENT EMERY BELTING
FOR POLISHING METALS, ETC.

For circular pamphlet containing description, price list and testimonials, address

NEW YORK EMERY WHEEL COMP'Y,
No. 116 Nassau st., New York.

Solid Emery Vulcanite.

WE are now manufacturing wheels of this remarkable substance for cutting, grinding and polishing metals, that will outwear hundreds of the kind commonly used, and will do a much greater amount of work in the same time, and more efficiently. All interested can see them in operation at our warehouse, or circulars describing them will be furnished by mail.

NEW YORK BELTING AND PACKING Co.,
Nos. 37 and 38 Park Row, New York.

MACHINE BELTING,
STEAM PACKING, ENGINE HOSE.

THE superiority of these articles, manufactured of vulcanized rubber, is established. Every belt will be warranted superior to leather, at one-third less price. The Steam Packing is made in every variety, and warranted to stand 300 degs. of heat. The Hose never needs oiling, and is warranted to stand any required pressure; together with all varieties of rubber adapted to mechanical purposes. Directions, prices, etc., can be obtained by mail or otherwise at our warehouse.

NEW YORK BELTING AND PACKING CO.,
JOHN H. CHEEVER, Treasurer,
Nos. 37 and 38 Park Row, New York.

Messrs. MUNN & CO.,

PROPRIETORS OF THE SCIENTIFIC AMERICAN continue to solicit patents in the United States and all foreign countries, on the most reasonable terms. They also attend to various other departments of business pertaining to patents, such as Extensions, Appeals to United States Courts, Interferences, Opinions relative to Infringements, etc. The long experience Messrs. MUNN & CO. have had in preparing specifications and drawings, extending over a period of sixteen years, has rendered them perfectly conversant with the mode of doing business at the United States Patent Office, and with the greater part of the inventions which have been patented. Information concerning the patentability of inventions is freely given, without charge, on sending a model or drawing and description to this office.

Consultations may be had with the firm between 9 and 4 o'clock, daily, at their principal office, No. 37 Park Row, New York. We have also a branch office in the city of Washington, on the corner of F and 7th sts., opposite the United States Patent Office. This office is under the general superintendence of one of the firm, and is in daily communication with the principal office in New York, and personal attention will be given at the Patent Office to all such cases as may require it. Inventors and others who may visit Washington, having business in the Patent Offices, are cordially invited to call at their office.

MUNN & CO., are very extensively engaged in the preparation and securing of Patents in the various European countries. For the transaction of this business they have offices at Nos. 66 Chancery Lane, London, 29 Boulevard St. Martin, Paris, and 26 Rue des Eperonniers, Brussels. Probably three-fourths of all the European Patents secured to American citizens are procured through this Agency.

A pamphlet of information concerning the proper course to be pursued in obtaining Patents, the requirements of the Patent Office, etc., may be had gratis upon application at the Principal Office, or either of the Branches. They also furnish a Circular of information about Foreign Patents.

During the last sixteen years the business of procuring Patents for new inventions in the United States, and all foreign countries has been conducted by Messrs. MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN; and, as an evidence of the confidence reposed in them by the inventors throughout the country, we would state that we have acted as agents for more than FIFTEEN THOUSAND Inventors! In fact, they have become identified with the whole brotherhood of Inventors and Patentees, at home and abroad. We would state that we never had a more efficient corps of Draftsmen and Specification Writers than are employed at present in our extensive Offices, and we are prepared to attend to Patent business of all kinds, in the quickest time and on the most liberal terms.

Communications and remittances should be addressed to

"This Machine makes the 'LOCK STITCH,' and ranks highest, on account of the elasticity, permanence, beauty, and general desirableness of the stitching when done, and the wide range of its application."—[Report of American Institute, New York.]

This report was in accordance with the previous awards at the Fair of the

UNITED STATES AGRICULTURAL SOCIETY

At the Fairs of the
American Institute, New York.
Mechanics' Association, Boston.
Franklin Institute, Philadelphia.
Kentucky Institute, Louisville.
Mechanics' Institute, Baltimore.
Mechanics' Association, Cincinnati.
Mechanical Association, St. Louis.
Mechanics' Institute, San Francisco.
Metropolitan Mechanics' Institute, Washington.

At the State Fairs of

Maine,	Pennsylvania,	Ohio,	Illinois,
Vermont,	Virginia,	Indiana,	Kentucky,
Connecticut,	Mississippi,	Iowa,	Michigan,
New York,	Missouri,	Tennessee,	Wisconsin,
New Jersey,			California,

And at hundreds of County Fairs.

The LOCK STITCH made by this Machine, cannot be ravelled and presents the same appearance upon each side of the seam, a single line of thread extending from stitch to stitch. It is formed with two threads one upon each side of the fabric, and interlocked in the centre of it. In beauty and regularity, and in the firmness of the seam formed it excels hand sewing. The machine is preferred for the following qualities:

1. Beauty and excellence of stitch alike upon each side of the fabric sewed.
2. Strength, firmness, and durability of seam that will not rip nor ravel, and made with
3. Economy of thread.
4. Its attachments and wide range of application to purposes and materials.
5. Compactness and elegance of model and finish.
6. Simplicity and thoroughness of construction.
7. Speed, ease of operation and management, and quietness of movement.

THE

WHEELER & WILSON SEWING MACHINE

Is the machine for all kinds of Family Sewing, and for the use of Seamstresses, Dressmakers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks, Mantillas, Clothing, Hats, Caps, Corsets, Ladies' Gaiters, Linen Goods, Umbrellas, Parasols, Silk Goods, etc.

[From the 'Scientific American.']

A New Improvement has lately been added to the WHEELER & WILSON machine (which we considered long ago as nearly perfect,) being an attachment for sewing braid upon cloth or any other material.

If any of our friends have been through the tedious operation of braiding children's dresses, they will realize the great relief that awaits them in this invention. The braid follows the needle with perfect accuracy, taking any curve desired, so that the most intricate pattern may be braided with great rapidity. Every lady may now possess one of those lovely chambray morning robes, embroidered in vines and labyrinths of white braid, which have heretofore fallen to the lot only of the most industrious and ingenious. For summer dresses nothing can be more becoming. We hail this improvement as a confirming evidence of "a good time coming" for the ladies one and all. And we may as well include the gentlemen, for there will doubtless be an immediate harvest of elaborate smoking caps and velvet slippers embroidered with gold braid. Long live the sewing machines!

CUMBERLAND COAL.

THE BORDEN MINING COMPANY

ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL,** DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGE'S CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to

THE GREAT FIRE IN TROY.

Unparalleled Triumph

OF

LILLIE'S SAFES!

The following certificates explain themselves:

TROY CITY BANK, May 21, 1862.

LEWIS LILLIE, Esq.—Dear Sir: I am sure it will give you as much pleasure to know as it does me to say, that in the recent fire of the 10th inst., which desolated our city and destroyed our Banking-house, the contents of our Bank vault, though the building itself was a heap of ruins, remained entirely unharmed. This result we attribute entirely to the fact that our old Wrought Iron Doors were, about two years since, exchanged for a set of your celebrated Chilled and Wrought Iron Doors and Frames. With the old doors, not a book or paper in the Vault could have been saved; as it is, nothing in it was even damaged, though exposed to the most intense heat.

Yours, respectfully, S. K. STOW, Cashier.

TROY, N. Y., May 14, 1862.

The undersigned, using **Lillie's Chilled and Wrought Iron Fire and Burglar Proof Safes,** at the time of the late disastrous fire in this city, would state that our safes were subjected to a severe test by fire, the heat varying in intensity, according to the locality and surroundings. The time they were exposed to the fiery ordeal, unprotected by water, varied from 24 to 72 hours. We would say that our money, papers, books, etc. were well preserved, and the Safes are suitable for further use. By comparison with Safes of other manufacture, equally exposed, we have no hesitancy in recommending Safes of Lillie's manufacture to the public on their demonstrated merit as entitled to unparalleled confidence as fire-proofs.

James Kenyon,	S. Bachelder,
S. O. Gleason,	Gates H. Barnard,
Percy & King,	W. D. Haight,
McCoy & Beadle,	Denio & Freiot,
Coon & Van Valkenburgh,	Walsh, Petit & Anthony,
S. S. McClure,	D. H. Snyder,
Ross & Smith,	Jonathan Seaman.
Robert Green,	

Not dug out—nothing in them.

TROY, May 19, 1862.

The undersigned had one of **Lillie's Wrought and Chilled Iron Safes,** which went through the fire of the 10th of May. The Safe was exposed to a severe fire for over 24 hours. In falling it turned on its face, and when turned up to open the doors was red-hot. The back of the lower part of the Safe (behind the books) was filled with pennies, which, in falling over, pressed against the books, and brought them directly in contact with the doors. The wrappers on the pennies were mostly good. The books were unfit for further use, but the writing on them was partially legible and could be copied.

DUSENBURY & ANTHONY.

TROY, May 19, 1862.

This is to certify that we had in our store, in this city, when it burned, one of **Lillie's Small Safes,** which was in the fire, without water on the building or Safe. Most of the valuables were removed before the fire, and therefore we were not in haste to get the Safe out of the burning ruins. Some of the papers left in the Safe were legible when taken out, but most of them were charred.

I. M. SINGER & CO.,
Per G. W. BABCOCK, Agent.

This is to certify that the undersigned had one of LILLIE'S Patent Chilled Iron Safes in their store, which was burned during the late severe fire in this city, and we are happy to state, the Safe preserved all its contents in first-rate condition. All the papers were legible, and the books will do for further use, without even rebinding.

GRANT, NUTTING & CO.

The foregoing comprises all the Safes of my manufacture that were in the fire, and below will be found certificates from all the owners of Safes manufactured several years since, by World's Safe Company, who used my Patent Chilled Iron Shell, but not my Fire-Proof Cement.

WORLD'S SAFE COMPANY'S SAFES.

TROY, May 19, 1862.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire of the 10th inst., in this city, would state that our Safes were exposed to a severe heat, being confined in the burning ruins, unprotected by water, from one to three days. On opening the Safes the contents were mostly legible, and to a far greater extent than could be reasonably expected of any Safe. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectors against fire, and by this test we are prepared to recommend them as such to public patronage.

Lyman Bennett,	Silliman, Matthews & Co.,
Flood & Dunham,	E. L. Mallory,
John Hutchinson,	E. H. Virgil,
Sup't National Express Co.	

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire in this city, would state, that on opening our Safes the contents were mostly legible. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectives against fire, and we are happy to recommend them to public patronage.

W. & L. E. GURLEY,
R. L. & G. DRAKE,
LEONARD SMITH,
H. E. & W. ALENDORPH, Absent.

TROY, May 19, 1862.

To whom it may concern: We woul'd certify that when the recent fire broke out in this city, we took out from our Safe (which was made by World's Safe Company) all our books, papers, etc., and then left it to the flames without shutting the door, and the Safe will do for further use by being repaired, although the book case was destroyed by the door being left open through the fire.

ACKLEY & CO.

TROY, May 19, 1862.

The undersigned, using Safes manufactured by the World's Safe Company, at the time of the late disastrous fire on the 10th instant, in this city, would state that our Safes were filled with fire-brick for the fire-proof, and while several of this class preserved their contents, ours were considerably charred, and only a part legible. In justice to Mr. LEWIS LILLIE, we are pleased to state that Safes of his manufacture proved to be powerful protectors against fire, and have preserved their contents, after having been exposed to the fiery ordeal, unprotected by water, from one to three days.

Stephen Holton,	Luther Greenman,
Bennett, Strickland & Fellows,	E. W. Johnson,
Corloss & House,	J. H. Goodsell.

TROY, N. Y., May 17, 1862.

LEWIS LILLIE—Dear Sir: We were using at the time of the late severe fire of 10th inst., a Safe purchased in 1852 of the late World's Safe Company. The contents were considerably charred, but our Ledger is mostly legible, and we are able to copy it.

The Safe was subjected to a severe heat for over eighteen hours, and we are satisfied that if water had been thrown on the ruins, as is ordinarily the case, the contents would have come out uninjured. You will please repair our Safe, placing in it the improvements embraced in Safes of your manufacture, and oblige

SHELDON & GREENE.

N.B.—The above Safe is believed to have damaged the contents more than any of those named in this circular.

There were only seven Sheet Iron Safes, made by Herring and others, outside of the railroad depot, that were exposed to the fire, four of which were entirely burnt out; the fifth was saved by being early cooled off by water; the remaining two were not severely tested.

LEWIS LILLIE.

44 Exchange Place, New York.

Locomotive Engines.
DANFORTH, COOK & CO.,
PATERSON, N. J.,
HAVING erected an extensive Shop, with the most approved Machinery and Tools, are prepared to execute orders for the various classes of Freight and Passenger Locomotive Engines and Tenders, in the best manner and on the most favorable terms.
Also, Stationary Engines, and the various Tools suitable for furnishing Repair Shops.
The business of Machine making, heretofore carried on by Charles Danforth & Co., is continued by the present firm, and all orders will receive prompt attention.

THE
TAUNTON LOCOMOTIVE
MANUFACTURING COMPANY,
TAUNTON, MASS.,
HAVING large facilities, and having had a long experience in the business, are prepared to furnish
LOCOMOTIVES,
EITHER FOR BURNING WOOD OR COAL,
OF THE MOST APPROVED CONSTRUCTION.
ALSO ALL KINDS OF
RAILROAD MACHINERY,
STATIONARY ENGINES AND BOILERS,
SUGAR MILLS, SHAFTING, ETC.
W. W. FAIRBANKS, Agent.
HARRISON TWEED, Treas.

JACOB ROWE,
GENERAL COMMISSION MERCHANT,
Nos. 6 & 8 Broadway, and 8 Beaver St.
ORDERS received for all sizes MERCHANT BAR and RAILROAD IRON; AMERICAN and SCOTCH PIG IRON, SUPERIOR WROUGHT IRON RAILROAD CHAIRS, SPIKES, CAR WHEELS, NAILS, ETC., ETC.
OFFICE, 8 BROADWAY,
Corner Beaver st., opposite the Bowling Green, NEW YORK.
REFERS TO

LOCOMOTIVES FOR SALE.

THE JERSEY CITY LOCOMOTIVE WORKS have on hand and offer for sale at low prices and on reasonable terms, **TWO FIRST CLASS NEW LOCOMOTIVES,** as follows:

One Wood-Burner, Cylinders 15 by 22 inches, 5 feet Driving Wheels, Fire-Box 57 by 43 inches and 57 inches deep; 131 Flues, copper, 11 feet long; Gauge, 4 feet 8½ inches; weight, 24 tons, without tank. Price, $8,500 on six months approved notes. Ready for delivery.

One Coal-Burner, Cylinders 12 by 22; 5 feet Driving Wheels; Fire-Box 60 by 42½, and 50 inches deep, with Combustion Chamber 30 inches long; Flues of iron, 6 feet 6 inches in length. Weight, 20 tons. Gauge can be made to suit the purchaser. Can be ready for use within one month.

The above Engines have been constructed with the **latest improvements** and of the **best material and workmanship.**

The JERSEY CITY LOCOMOTIVE WORKS are also furnishing **LOW MOOR TIRES,** which they *warrant* to fit Centers without boring or turning. All sizes, and from 5½ to 6½ inches in width, and from 2 to 3 inches in thickness.

Also, **Portable** and **Stationary Steam Engines** of all sizes, with **DAVIS'S PATENT BALANCE PISTON-VALVE,** constantly on hand or made to order on the shortest notice.

WILLIAM G. HAMILTON,
3m14 Vice-President and Engineer.

Steam Engines for Sale.

THE JERSEY CITY LOCOMOTIVE WORKS have on hand and for sale Six Five-Horse Portable Steam Engines, and Two Ten-Horse Steam Engines and Boilers, all in complete order and ready for use.

THE JERSEY CITY LOCOMOTIVE WORKS manufacture Tires, rolled to fit centers without boring; all descriptions of Railway Machinery, and Engines for Land, Canal, and River service.

WILLIAM G. HAMILTON,
3m14 Vice President and Engineer.

ENGINEERING WORKS.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.				Sheet No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1½ to 1
3.	Base 12 ft. Slopes		1½ to 1	15.	" 24 "		¾ to 1
4.	" 14 "		1½ to 1	16.	" 24 "		1½ to 1
5.	" 15 "		¾ to 1	17.	" 25 "		1½ to 1
6.	" 15 "		1 to 1	18.	" 26 "		1½ to 1
7.	" 15 "		1½ to 1	19.	" 28 "		¾ to 1
8.	" 16 "		¾ to 1	20.	" 30 "		1 to 1
9	" 16 "		1 to 1	21.	" 30 "		1¼ to 1
10.	" 18 "		¾ to 1	22.	" 30 "		1½ to 1
11.	" 18 "		¾ to 1	23.	" 32 "		1 to 1
12.	" 18 "		1 to 1	24.	" 32 "		1¼ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

Ericsson and His Inventions.

In the July number of the "Atlantic Monthly" we find an article narrating at considerable length the career of Ericsson, whose celebrity as an inventor is now world-wide. As a worker in iron, it may be said that he was "born in the purple," having first seen the light (in 1803) among the iron mountains of Sweden, in which his father was a mining proprietor. At an early age he was a close student of the extensive and complicated machinery erected in that neighborhood, and which had been constructed by men of the highest scientific attainments. We accordingly hear of him inventing a saw-mill and other contrivances, when about the age of ten years. These together with some difficult drawings executed by instruments of his own invention, attracted the notice of Count Platen, who was an intimate personal friend of King Bernadotte and the Clinton of Sweden, having planned and executed the ship canal across the peninsula between the Cattegat and the Baltic. Platen earnestly urged him to persevere, assuring him that he "would one day produce something extraordinary." Accordingly Ericsson, then less than twelve years old, was made a cadet in the corps of engineers, and soon afterward appointed a "leveller" on the canal. He had actually to stand upon a stool to look through the instrument. Many of the important works in that canal were constructed after drawings made by this boy; and at the age of fifteen, we are told, he was in possession of accurate plans of the whole work, which had been drawn by his own hand.

But taking a fancy to military life, he was separated for a time from his friend and patron. He entered the army as an ensign; and his eminent skill at drawing soon placed him in the line of promotion. After a rigid examination, Ericsson was appointed to take charge of a new survey of the northern part of Sweden. In this occasion, it is said, he was able to repeat Euclid *verbatim* not by the exercise of memory, but by his perfect mastery of the science of geometry. He entered on the task with his accustomed energy and skill, as is shown by the fact that in the Swedish archives detailed maps of more than fifty square miles, were executed by his own hand, and are still shown. Having engaged to furnish drawings for an illustrated work on Canals, he brought out a new machine for the purpose, which worked very successfully.

The idea of producing mechanical power by means of *flame* presented itself shortly afterward to his mind, and experiments made in bringing out a new engine resulted so favorably that Ericsson applied to go to England to bring out his new invention. Thither he repaired in the early part of 1826. But it was found that, owing to the different kind of fuel used there, his engine would not work, and he was compelled to abandon it for the time. He next turned his attention to the production of an artificial draught on the steam-boiler, associating himself with Mr. Braithwaite for this purpose. By the time he had completed this invention (1829) an opportunity was presented to test its value. This was the celebrated offer of a premium made by the directors of the Liverpool and Manchester Railroad. In the brief space of *seven weeks*, according to Mr. Sargent, he planned an engine, executed the drawings and had the machine completed, which entered into competition with Mr. Stephenson's "Rocket" and Hackworth's "Sanspareil." On the day of trial Ericsson's "Novelty" "darted along the track at the rate of fifty miles an hour."

In 1842, Ericsson was first brought into notice in this country by his successful application of steam to fire engines, which gained him the large gold medal offered by the Mechanics Institute of this city. Nine years previously, however, he had brought out his Caloric engine, of which one of five horse power was set to work, its performances having been witnessed by Sir Richard Philips, Dr. Ure and Professor Farraday. The last named undertook to deliver a public lecture on the subject; but just before commencing he discovered that he had misunderstood the expansive principle of the machine! The government sent Mr. Brunel, then of Thames tunnel and since of Great Eastern fame, to examine the engine; but this celebrated engineer reported adversely. Indeed, the ones first built were far from being as perfect as the present; the high temperature which had to be kept up soon destroyed the working parts by oxydation. It was not till some years subsequently that the inventor finally succeeded in his long cherished design to accomplish motion without the use of steam, wind, or water.

We next hear of him in connection with the propeller—an idea which, it is said, he borrowed directly from Nature, in connection with the movements of birds, fishes and insects. The application of the screw as a means of propulsion, we are aware, is traced back as far as Archimedes, to say nothing of sundry modern claimants. Let the idea have originated with one or another, Ericsson was the first to bring it publicly to the test of actual experiment. He constructed a boat two feet long which he tried in a basin in London, the little vessel making three miles an hour on her first trip. A boat forty feet in length was next built and placed on the Thames, with the most satisfactory results, she having made *ten* miles an hour. This feat again excited attention, and the Lords of the Admiralty made a trip to test the qualities of the new motor. But all the recognition gained from that source was shrugs of the shoulders and shakes of the head. The Admiralty took no notice of the invention; and it is added that the whole engineering corps of the Kingdom arrayed itself against the innovation.

But keener eyes had been fixed upon the per-

formances of the "Little Flying Devil," as this boat was called by the populace. The American Consul at Liverpool, Mr. Francis B. Ogden, had seen and comprehended the value of the invention. He introduced Ericsson to Captain (now Commodore) Stockton of the American navy, who invited the inventor to this country, and brought the subject to the notice of Congress. He accepted the invitation and, in 1839, came to the United States, fixing his residence in this city. The "Princeton," built under his supervision, was completed in 1844.

We cannot here do more than glance at the various inventions and improvements made by Ericsson since that date. These comprise the telescopic smoke-pipe, the semi-cylindrical form of the steam-engine, a distance-measuring instrument for the navy, a self-acting gun-lock, the wrought iron gun carriage. It should be added that by virtue of his arrangements the boiler and engines of the "Princeton" were placed below the water line, for the first time. At the great exhibition in 1851, he received the prize medal for various other instruments than those named above—the hydrostatic gauge, the reciprocating fluid-meter, the alarm barometer, the pyrometer, the rotary fluid-meter, and a sea-level for taking soundings without rounding the vessel to the wind.

We need not refer to particulars connected with his caloric engine on board the vessel which was named after himself. Though that experiment resulted unsuccessfully, it is enough that now more than five hundred caloric engines are running in various parts of the country, being applied to nearly every use that requires but a moderate power. Still less is it necessary to refer to the "Monitor," whose performances saved to the nation its control of the Chesapeake and all the rivers running into it. Ericsson's usefulness and fame are established. We could wish that his pecuniary compensation had been still more liberal than it has been; and that a claim upon the Government, incurred while superintending the "Princeton," had been honorably discharged a dozen years ago, as it ought to have been. It is to be hoped that Congress will have no hesitation in ordering it paid, on the principle of better late than never.

Michigan Central Railroad.

The earnings of this road for the year ending May 31, 1862, were:

From freight	$1,559,060 98
" passengers	724,915 48
" miscellaneous	77,264 96
	$2,361,241 42

And the expenses were:

Repairs of road	$262,710 91	
" buildings	51,907 96	
" locomotives	97,523 94	
" cars	116,682 23	
Locomotive service	54,095 78	
Train "	42,733 76	
Station "	259,777 33	
Fuel	111,592 16	
Oil and waste	19,050 39	
Stationery and printing,	11,908 44	
Taxes	82,837 81	
Telegraph	12,489 45	
Miscellaneous	25,842 78	
		1,149,152 94
Net earnings		$1,212,088 48

The ratio of expenses to earnings, less taxes, is 41.1 per cent. Last year it was 51 per cent. In 1860, 53.7. In 1859, 53.4. In 1858, 59.6. In 1857, 64.6.

Compared with the year ending May 31, 1861, the following result is shown:

Increase in freight earnings	$340,874 69
" miscellaneous do.	12,627 17
	$353,501 86
Decrease in passenger earnings	50,313 05
Net increase of gross earnings	$303,188 81
Increase in expenses	11,428 59
Making the increase in net earnings	$291,760 22

The increase in the earnings of the past over those of the preceding year is equal to 14¾ per cent.; and over the year ending May 31, 1860, nearly 29 per cent.

The increase in earnings from freight shows a gain over last year of about 28 per cent.; and over the year ending May 31, 1860, of upwards of 61 per cent. The increase in this branch has been principally from eastward bound freight, which has formed so large a per centage of the amount moved, as to cause the mileage of freight trains to show an increase also of about 24 per cent. upon the previous year. The total tons moved as compared with last year, shows a gain of 23 per cent. The gain in earnings from freight is about equally divided between wheat and flour and other freights.

The total number of tons of freight moved has been 463,112. Average number of tons carried per train per mile, 121.15. Average distance freight is carried, 161 miles. Freight earnings per ton per mile, 1.91 cents. Tons carried one mile eastward, 64,863,488; westward, 16,869,986—total tons carried one mile, 81,733,474. The proportion of tonnage carried eastward is 79.36, against 20.64 carried westward.

The number of local passengers carried east was 124,527; do. west, 129,009; through passengers carried east, 23,252; do., west, 22,935; emigrants, 9,105—total 308,828. Average number of miles travelled by each passenger, 93.59. Passenger earnings per passenger per mile, 2.51 cents. Passengers carried one mile, 28,905,678.

The passenger traffic, both through and way, shows a considerable falling off, in comparison with the previous year. This line is not alone in unfavorable comparison in its passenger traffic: many others have exhibited similar results for the last twelve months. Upon some lines more favorably situated geographically, the transportation of troops has more than compensated for the falling off in the ordinary business, while upon this the transportation of troops and munitions of war has been almost exclusively of a local nature, and quite limited in amount.

The tonnage of wheat and flour is nearly double that of the year ending May 31, 1860. The movement of neat cattle varies but little from last year, amounting this year to 57,155 head, while the number of live hogs moved has more than doubled, reaching the number of 126,778.

The proportion of tonnage in each direction is more unequal than that of the previous year; the per cent. moved westward having fallen from 30 to less than 21, increasing quite largely the hauling of empty cars; but even with this disadvantage the average load has been raised from 113.83 to 121.15 tons, showing the machinery to have been in efficient condition, and the trains judiciously managed. The report says:

Our experience of the past year has strengthened our conviction that the more intelligent railroad managers become in respect to the details of their working expenses, and the less they act on general impressions, the more sure is their progress towards economical results; and when the same thorough and systematic attention to details is given to the management of this property throughout the country, which, applied to manufactures, has reduced the cost of making a yard of cloth from thirty to three cents, it will add much to the substantial value of this kind of investment.

The considerable improvement in the economy of working has not been made at the expense of the permanent property or rolling stock of the company, but rather by a careful attention in details, the ascertainment of the cost in detail, of working many well managed lines, and endavoring to bring each part of our expenditures as low as the lowest, and thus combining the good points of all as a model from which to improve, as much as our circumstances will allow.

We do not consider the fact that the gross earnings have been increased $303,188 81, with an increased expenditure of only $17,179 64, as evidence of greater economy, except in view of the fact that the average rates received for the work performed have not been higher than those of the previous year. Nor do we assume that the line is worked economically, because the working expenses are less than half the gross earnings.

We are aware that the short hand judgment ordinarily adopted, would decide a road to be well managed, which used 48 per cent. of its gross earnings in operating expenses, and another to be ill-managed if it used 60 per cent., and this even though the former received four and the latter but two cents a mile for its traffic, which would bring the expenses of the approved road 60 per cent. higher than the other.

The average rate received during the year was, for freight, per ton per mile, 1.91 cents; per passenger per mile, 2.51 cents. The statistics connected with the working expenses are not so fully made up as to furnish an exact division between the freight and passenger departments; but assuming it to be relatively as last year, the cost per passenger per mile has been 1.163 cents, and that of freight per ton per mile .893 of a cent.

In forming a judgment upon what the cost of operating ought to be, certain characteristics of the traffic which materially effect it should be carefully considered.

Where the physical character of roads is nearly similar, the application of the following considerations is quite apparent.

All other things being equal, the road which has the largest traffic per mile, can be worked at the cheapest rate, because its fixed expenses arising from the decay of perishable materials and the like, are spread over a larger amount of work to be performed.

All other things being equal, the road having the largest passenger business in proportion to the passenger trains it is obliged to run, can carry passengers the cheapest, the additional number adding comparatively little to the cost of the train. When the freight amounts to more than one train per day, the size of these trains should be more uniform than is practicable in the passenger traffic, for nothing can be gained by multiplying their number beyond the requirements of the tonnage.

Other things being equal, the road whose business in both directions is most equal, can work at the cheapest rate. The cost of carrying freight in cars which would otherwise return empty is comparatively small.

Other things being equal, the road whose average haul of freight is the longest, can carry it at the cheapest rate, as the receiving and delivering expenses will add less to the mileage cost.

Other things being equal, the road whose business throughout the year is most uniform, can do it at the cheapest rate.

INCOME ACCOUNT.

Balance from previous year		$38,434 24
Receipts from freight	$1,563,200 56	
" passen'rs	727,763 92	
" miscel	77,624 09	
		2,368,588 57
		$2,407,022 81
Expenses, as above		$1,149,152 92
Dividend, 3 per cent. Feb. 5, 1862		181,713 00
Payment to sinking funds		84,500 00
Interest and exchange		679,463 09
Balance to new account		312,193 78
		$2,407,022 81

From which it appears that after paying to the stockholders during the year a dividend of three per cent., making the annual payment of $84,500 to the sinking funds, together with the necessary disbursements for operating, taxes and interest, there stands to the credit of income account a balance amounting to $312,193 78. The sum to the credit of this account at the same period of last year was $38,434 24—thus showing a net improvement of $273,759 54.

		$14,371,173 67

The floating debt, which a year since was $125,000, has been liquidated; the company is now entirely free from unfunded debt. There has been paid during the year $250,000 of unconvertible plain bonds, which matured on the 15th of May last, and the same amount of sinking fund bonds has been sold at prices ranging very nearly at par.

The bonded debt has been increased during the year to the extent of $31,000, which increase has been caused by the sale of bonds heretofore held by the company. The bonded debt now stands at the limit of the mortgage, and all of the bonds are secured by the first and only mortgage upon the road for $8,000,000, while the principle part of those maturing in 1882 are also secured by the sinking funds.

The total bonded debt of the company is $7,999,488 89—maturing as follows:

In 1869	$3,071,000 00
In 1872	467,488 89
In 1882	4,461,000 00
	$7,999,488 86

Capital stock has been reduced $74 by the purchase and cancelment by the company of that amount of fractional stock scrip issued in 1855. There is still $610 of this scrip outstanding which the company will purchase at par when presented.

The reduction of $7,711 99 in "Steamboats" account is caused by the sale of sundry effects belonging to the same, the proceeds of which have been passed to the credit of their construction.

The equipment of the road consists of 98 locomotives; 85 passenger, 23 baggage, 1,284 freight, and 262 gravel and other cars.

The number of miles run by engines with passenger trains has been 507,635; with freight trains, 672,627; with working trains, 156,396—total 1,338,658.

The general condition of the road in all respects is fully up to the standard, and in some particulars beyond that of the commencement of the year. The renewals in the different departments have been in the aggregate about the same as the year previous. Some of the most prominent items are: 35 miles of new rails; 17 miles welded rails; 7,415 new chairs; 82 tons new spike; 66,499 ties; 1,400 cedar telegraph poles; 62 cattle guards; 4 highway bridges; 37 miles new fence; 3,571 feet new side tracks; enlargement of engine house at Michigan City; 4 new small passenger houses, 116 new large freight cars; besides a considerable amount of new work in smaller items.

The amount expended for repairs of locomotives is somewhat larger than last year, but the service rendered is also larger, and the improved condition of the machinery fully accounts for the increased cost.

The expenditures for repairs of cars differs but little from the aggregate of last year, but the service rendered in this branch is larger by 3,000,000 miles, or 21 per cent.

In the locomotive, train and station service the aggregate expenses are but 5 per cent. above the previous year, while the increase of freight earnings is 28 per cent., and 23 per cent. in tons hauled.

In the expenditures for fuel, oil and waste, there has been a decided change for the better, as with the largely increased service rendered by engines and cars—9 per cent. in mileage of engines and 21 per cent. in car mileage—there has been a saving in total cost of these items as compared with the previous year, of 18 per cent.

The directors chosen at the annual meeting June 23, 1862, are as follows:

President—JOHN W. BROOKS, Boston.

Vice-President—H. H. HUNNEWELL, Boston.

Directors—John W. Brooks, Nathaniel Thayer, R. B. Forbes, H. H. Hunnewell, Elon Farnsworth, Erastus Corning, D. D. Williamson, G. F. Talman.

Treasurer—ISAAC LIVERMORE, Boston.

Superintendent—R. N. RICE, Detroit.

Auditor—WILLIAM BOOT.

Delaware and Raritan Railroad.

This road is now approaching completion, and is expected to be soon open for travel. By this route passengers will be carried from New York to Philadelphia for $2. The depot in New York will be at the foot of Murray street, from which point the boat will run to Port Monmouth, on the Raritan Bay, a distance of 28 miles from the city. From the latter place the railroad will run to Kaighn's Point, near Camden. The following is the route with the distances:—From New York to Port Monmouth, by steamboat, 23 miles; Port Monmouth to Red Bank 5 miles; Red Bank to Eatontown, 3 miles; Eatontown to Farmingdale, 5 miles; Farmingdale to Squankum, 5 miles; Squankum to Bergen Iron Works, 5 miles; Bergen Iron Works to Manchester 5 miles; Manchester to Hilliard's 13 miles; Hilliard's to Butler House, 7 miles; Butler House to Atsion, 12 miles; Atsion to Jackson, 6 miles; and Jackson to Kaighn's Point, 21 miles—making a total of 110 miles.—*Trenton True American.*

Rights of Railroad Companies to Damages Resulting from the Taking of their Property for Public Uses.

CONSTRUCTION OF COMMON ROADS: RAILROAD COMPANIES ENTITLED TO DAMAGES CAUSED BY THE CROSSINGS OF SUCH ROADS OVER THEIR TRACKS.

The Old Colony and Fall Railroad Company filed two petitions, (one before their union and the other after) for the assessment of damages occasioned by the laying out of two highways across their railroad in Abington.

At the trial of each case before a Sheriff's Jury, the petitioners introduced warranty deeds from the former owners of a strip of land four rods wide, along which their railroad was laid, and which was crossed by the highway in question. They offered evidence of the value of the land, and claimed damages for the taking of said land; for increased liability to damage from accidents from collision and otherwise by reason of the laying out of said highway at grade over their track; for expense of making and maintaining sign boards at said crossings: for making and maintaining cattle guards alleged to be rendered necessary by reason of said crossing at grade; for expense of planking and keeping the planks in repair where the highway crosses their track; for increased expense for ringing bell as required by law; and for liability of being ordered by county Commissioners to build a bridge for the highway over the railroad track."

The respondents contended that although the deeds in form conveyed a fee, the petitioners had an easement only, so far as was necessary for the purposes of their railroad, and were not entitled to recover any damages of the county for merely crossing their railroad by a highway at grade; and that if the county was liable at all it was not liable for any of the items of damage claimed, and objected to all the evidence offered. No testimony was introduced by them to show any benefit to the petitioners by way of set-off. But the Sheriff, against the petitioners objection, permitted the respondents' counsel in the second case to argue that the jury might allow by way of set-off, the benefit, if any, which would result from said highway to the property of the plaintiffs, as a feeder to said railroad; and, at the request of the respondents, instructed the jury "that in estimating the damages sustained by the petitioners in their property by the laying out of said highway, they should take into consideration all the damage done to the petitioners, whether by taking their property or injuring it in any manner; and should allow by way of set-off, the benefit, if any, to the property of the plaintiffs, by reason of such laying out."

The jury, in each case, returned a verdict for the respondents, which was accepted by the Court of Common Pleas; and the petitioners then appealed to the Supreme Court of Massachusetts, who now set aside the verdicts of the Sheriff's jury; holding that a railroad company is entitled to damages for land taken, by the laying out of a public highway across its railroad, subject to its use for said road; and for the expense of erecting and maintaing railroad signs and cattle guards at the crossing, and of flooring the same, and keep-

ing it in repair; but not for any increased liability from accidents, for the increased expense of ringing the bell, or for its liability to be ordered by the county commissioners to build a bridge for the highway over its track.

The following is the opinion, rendered at the decision of the case.

SHAW, C. J.—We believe it has never yet been judicially determined that a railroad corporation who have, in the ordinary course of business, under an act of incorporation, built a road, and have it in full operation, can recover damages for injuries occasioned by laying out other ways, say public highways and townways, turnpikes and other railroads over it. But the tendency of judicial opinion has been that they may. The language of the constitution, in which the right to damages occasioned by the exercise of the power of *eminent domain*, is given to all persons, whose property is appropriated to the public use, and not previously acquired (as it lawfully may be) by purchase of the owner, is strong and decisive in favor of such a claim. Nor is it in our judgment material whether the property thus taken or appropriated is real estate held in fee, or an easement or lien upon real estate or personal property. The word "property" in the tenth article of the Bill of Rights, which provides that "whenever the public exigencies require that the property of any individual should be appropriated to public uses, he shall receive a reasonable compensation therefor," should have such a liberal construction as to include every valuable interest which can be enjoyed as property and recognized as such. Nor is it material whether the property is removed from the possession of the owner, or in any respect changes hands; if it is of such a character and so situated that the exercise of the public use of it, as warranted by the Legislature, does in its necessary natural consequences, affect the property, by taking it from the owner, or depriving him of the possession of some beneficial enjoyment of it, then it is "appropriated" to the public use by competent authority, and the owner is entitled to compensation. It is perfectly well settled that property thus taken for a railroad, though it is through the medium of a corporation, who provide the capital, build and conduct the works, and find their reimbursement in tolls, fares and freights given by statute, is taken for a public use. If it could be held that because the power and the property were given to a corporation, it was not for a public object or purpose, but for the benefit of the corporation and their members, like that of a bank or trading company, then it would be an appropriation of private property by the Legislature, under the pretence of the power of eminent domain, and plainly unconstitutional and void. No; the vague notion that damages cannot be given in favor of a railroad company whose road is crossed by another public way, we think, is founded on another consideration; that inasmuch as the track of a railroad has been already appropriated to one public use, the authorizing of its further public use is not an appropriation of private property to public use, and therefore affords no claim for damages. There is something plausable in this; but on examination we think it does not warrent the distinction in support of which it is relied on. The theory of railroad corporations is that their compensation in freights and passenger's fares is computed with reference to the entire cost of construction, including the land appropriated for the purpose. A similar view was taken of the subject by this court in the case of Commonwealth *vs.* Boston and Maine Railroad Company; in which the whole plan and scheme upon which the public easement of railroads is acquired in Massachusetts, as set forth in the revised statutes were stated; and these views we believe have been substantially adopted and acted upon since.

The petitioners in the present case were incorporated in the usual form, and were made subject to the duties and obligations and entitled to all the rights and privileges and immunities in the revised statutes. The court are therefore of opinion that a railroad company whose tracks have been crossed by public ways may sustain and recover damages in the usual modes provided for others sustaining damages by the appropriation of their property. Here were two distinct cases of so laying out a highway across the petitioners road, in each of which the jury found that the railroad company were not entitled to any damages; and these verdicts having been accepted by the Court of Common Pleas, this court is of opinion that these judgments are erroneous, and they must be set aside and new warrants issued. As instructions were given provisionally, in one or both of these cases, by the sheriff as to the nature and quantum of damages to be recovered, and these questions therefore, have been brought before the court in the argument; so far as the court have formed opinions, they are briefly stated, that they may have their proper influence on the new trials. The petitioners are entitled to recover damages for taking their land for the purpose of a highway, subject however to its use for a railroad; for the expense of erecting and maintaining signs required by law at the crossing; for making and maintaining cattle guards at the crossing, if necessary; and for the expense of flooring the crossing, and keeping the planks in repair.

The petitioners are not entitled to recover for the other elements of damage, which were allowed by the sheriff in the second case. The respondents are not entitled to set-off any supposed benefit which may accrue to the petitioners by reason of an increase of travel on the railroad, caused by the construction of the highway. *Verdicts set aside.*

A Large Iron Casting.

Messrs. I. P. Morris, Towne & Co., of the Port Richmond Iron Works, made yesterday at their Foundry in Kensington, the heaviest casting ever run in this State. The casting was for an anvil block for a seven ton steam hammer in course of construction by these gentlemen for the Lackawanna Iron and Coal Company at Scranton. The casting weighs 32 tons, which, together with the other work cast the same day, made the agregate weight of iron in the heat about ninety thousand pounds. This immense mass was melted in one of McKenzie's patent cupolas in four hours and five minutes.

The mould for the anvil block was put together under the immediate supervision of Mr. James T. Bradshaw, the foreman of the foundry. The fluid metal, about thirty-three tons, was contained in a large reservoir, holding about eighteen tons, and two kettles and two ladles swinging on the cranes, holding respectively nine and six tons. The time occupied in running this large casting was four minutes from the time the reservoir was tapped until the mould was full.—*Philadelphia Inquirer.*

The Iron Manufacture of Great Britain.

The iron manufacture of Great Britain has exhibited a rise more remarkable than that of any other human industry. In 1750, the quantity of pig iron produced did not exceed 30,000 tons. In 1800, it was increased to 180,000 tons, and in 1825, to 581,367 tons. In 1826, the duties upon the importation of foreign iron were removed or rendered nominal, since which the production of iron has most rapidly increased, as the following table will show:

Furnaces in Blast.		Pig Iron made, tons.	Furnaces in Blast.		Pig iron made, tons.
1835	...	1,000,000	1858	618	3,456,064
1840	...	1,396,400	1859	607	3,712,904
1847	433	1,999,608	1860	582	3,826,752
1852	497	2,701,000	1861	return not complete.	
1857	628	3,659,447			

During the last two or three years, the iron trade has been in a very depressed state, consequently the number of furnaces in blast has been diminished; but by the improvements made in the construction and in the working of iron furnaces, the production of iron from each has been largely increased. The first progress in the matallurgy of iron is the calcination of the ore, which is effected either in kilns or in the open air, in heaps; the object being to remove carbonic acid, water, sulphur, and all substances volatile at a red heat. The next process is that of smelting the ore. The only flux employed is limestone, and the fuel is either coal or coke, or a mixture of these. "In consequence there are four principal varieties of cast-iron, known respectively as Nos. 1, 2, 3, and 4, or *dark grey*, *bright grey*, *mottled*, and *white*; these terms although convenient, do not, however, indicate the intrinsic value of the iron thus denominated, as the variable qualities of ore, fuel, and limestone, may exercise such an influence on the resulting crude iron, as to render a low denomination of one manufacturer of greater commercial value than a higher denomination of other makers. The general characters of the four varieties are these: No. 1. Color, dark grey, in large rounded grains, obtained commoniy near the commencement of the casting when the furnace is in good working order, and when an excess of carbon is present; in flowing it appears pasty, and throws out blue scintillations. It exhibits a surface where crystalline vegetations develop themselves rapidly in very fine branches; it congeals or fixes very slowly; its surface, when cold, is smooth, concave, and often charged with plumbago; it has but a moderate tenacity, is tender under the file, and susceptible of a dull polish. When melted over again, it passes into No. 2, and forms the best castings. No. 2. Color, bright grey, of small grained structure, and interspersed only with small graphite laminæ; possesses great tenacity, is easily filed, turned, and bored; may even be hammered, to a certain extent; does not readily crack from change of temperature. No. 3 is a mixture of white and grey iron. On *strongly mottled* iron, little stars and spots of grey iron are found interspersed in bright or flowery iron; *weakly mottled* iron exhibits white specks on a grey ground. In *streaked iron*, grey iron is found above and below, and bright iron in the middle, with strong demarcations. No. 4. *White iron* varies from tin white or greyish white; it is very brittle, cracking easily, even by change of temperature; it is extremely hard, sometimes even more so than hardened steel, so that it will resist the strongest file, and scratches glass easily. Fracture sometimes laminar, sometimes lamino-radiating, sometimes finely splintered, sometimes dense and conchoidal. As the fracture changes from laminal to conchoidal, the color likewise varies from white to greyish. Mean specific gravity 7.5. Expands less than grey iron when heated, cannot be welded, because it becomes pasty at the very lowest welding heat. When heated in the melting point, it does not suddenly pass into the fused state, like grey pig iron, the whole of the carbon is united to the iron; it is never used for casting, but always for conversion into malleable iron. The bright iron obtained from spathic iron ore contains the

largest proportion of carbon (5.3 per cent according to Kasten.) A white iron is always the result of the derangement in the working of the furnace, though it by no means follows that, when the iron is white, the furnace must necessarily be in a disordered state; the presence of manganese, for example, has a tendency to make white cast iron; but the quality may be excellent. The white iron resulting from derangement flows imperfectly, and darts out in casting, abundance of white scintillations; it fixes very quickly, and on cooling, exhibits on its surface irregular asperities, which make it extremely rough. It is exceedingly hard, though it is easily broken, the fracture being radiated and lamellar; the bar iron it affords is of inferior description. This kind of iron is always produced when the furnace is carrying a heavy burden of forge cynders, containing sulphur and phosphorous. Thus there are two distinct kinds of white cast-iron. 1st. That obtained from ores containing a large proportion of manganese, crystalizing in large plates; this variety is highly prized for making steel. 2nd. That resulting from a heavy mineral burden, or from a general derangement of the furnaces, or from the rapid chilling of fused grey iron crystallizing in small plates; both are hard and brittle, the first more so than the last. Cast-iron, which by slow cooling is grey, becomes white when it is cooled rapidly. On the other hand, when white iron is melted and allowed to cool very gradually, a portion of the carbon crystallizes out as graphite, and grey iron is produced. In some iron works, *six* varieties of pig iron are recognized, which may be classified thus: 1st. First foundry iron, large crystals. 2nd. Second foundry iron, large and small crystals mixed. 3rd. Dark grey, all small crystals. 4th. Bright grey. 5th. Mottled. 6th. White, verging on mottled."—*Hunt's Hand-book to the Industrial Department.*

Fall of a Railway Bridge at Harrogate.

A large stone bridge on the new line of railway, now in course of construction through Harrogate by the Great Northern Railway Co., has fallen without a moment's warning, causing serious, if not fatal, injuries to the workmen engaged upon and beneath it. The bridge consisted of three arches, the central arch having a span of 40 feet, whilst the one on either side is for foot passengers only. The bridge has been built to enable a landowner to open a carriage road from High to Low Harrogate through his estate. The buttresses are of stone, and the arches of red brick, cemented together. Ballast and other trains had passed over the bridge without any indication of its giving way; and though, in the opinion of many persons, the crown of the arch looked too flat, there was no apprehension of an accident. The workmen had commenced removing the centres or supports beneath the arches, and at least one ballast train passed over the bridge without any appearance of giving way. Just as the last prop was being removed, an engine, tender, and train of empty wagons arrived at the bridge and proceeded to cross it. The engine and tender crossed in safety, when the whole arch, without the slightest warning, fell in, leaving two empty trucks standing upon the permanent rails. The cause of the accident is variously given. By some it is attributed to the crown of the arch being too flat; by others, to the removal of the supports before the cement was set hard; and by others, to the foundation of the buttresses being insufficient and insecure.—*London Artizan.*

Marquette Car Wheels.

Of all the hundreds of car wheels manufactured by Mr. Dorkersley, at Marquette, it is not known that one has ever yet been broken, and no fault has been found with either their quality or durability by the railroad company using them. If this is not sufficient recommendation, we should like to know what is. A large number of these wheels have been manufactured lately, and some fine specimens may be seen near the railroad bridge.—*Lake Superior Journal.*

Steam on Canals.

In the annual report of the Susquehanna and Tidewater Canal Company, submitted to the stockholders on the 14th ult., we find the subjoined letter from Mr. T. M. Abbett, Treasurer, to Mr. Wierman, Engineer and Superintendent of the Company's works:

OFFICE SUSQUEHANNA CANAL COMPANY,
Baltimore, October 12, 1861.

T. T. WIERMAN, Esq.—Dear Sir: I have gathered from the books and accounts of Mr. McConkey, the managing owner of the canal steamer J. Edgar Thomson, information which enables me to present the following statement:

The hull was built at Peachbottom, by Mr. Geo. Geiger, and cost $1200; length 85 feet; width, 16 feet; depth, 6 feet 6 inches; capacity, exclusive of the machinery, 85 t ns. The engine was built in Baltimore by Mr. Charles Reeder, and cost $1,600; its dimensions are as follows: cylinder diameter, 10 inches; length of stroke, 12 inches; upright boiler, 1½ inch tubes, 109 inches; propeller of 4 blades, diameter, 45 inches.

The steamer was put in service on the 22d of November, 1860, and up to October 1st, 1861, had been in service 211½ days, making 16½ round trips, and steaming 4,800 miles, at an average of 22.7 miles per day, including all delays.

The Thomson has generally a barge in tow, the Mary Lizzie, the same dimensions as the steamer, but having a freightage capacity of 112 tons.

The two boats in the seven months (or 16 trips) have transported downward freight amounting to 2,806 tons, averaging per trip 175 tons. This consisted of: Grain, 2,942,340 lbs.; slate, 8,400 lbs.; lumber, 656,250 lbs.; whiskey, 1,750 lbs.; floor, 177,768 lbs.; iron, 1,730,000 lbs.; bark, 95,800 lbs.; amounting to 2,806 net tons, or 5,612,308 lbs. The ascending trade of the two boats consisted of merchandise generally, and amounted to 856 tons, averaging 50⅛ tons per trip. The downward trade was distributed as follows:

To New York	350.75 tons.
To Wilmington, Del.	350.75 "
To Coop's Point, N. J.	175.375 "
To Baltimore	350.75 "
To Philadelphia	1,578.375 "
Total	2,806.00 tons

The engine consumed in the seven months of service 96 net tons of coal, bituminous and anthracite, averaging 40 pounds per mile, at an average cost of $3.45 per ton.

Expenses for the seven months.

96 tons of coal, at $3.45	$331 20
Wages, including board of one captain, one engineer, one steersman, and two deck hands, at $156 per month, 7 mos.	1,092 00
Interest on cost of 2 boats, engine, and furniture, (4,100.) ⅞ of $246	191 33
Wear and tear of two boats, $\frac{2400}{10}$ ⅞ of $240	186 66
Wear and tear of engine, $\frac{1600}{10}$ ⅞ of $100	77 77
Repair of engine, ⅞ of $100	77 77
Insurance of two boats and engine, $4,100 —2½ per cent.	102 50
Incidental expenses	5 00
Total amount	$2,064 23

From the foregoing data it will be found that the steamer and barge have transported 531,937 tons one mile, at a cost of 3⅞ mills per ton, or supposing that they had been engaged in a trade that offered no back loading, as is the case with nineteen-twentieths of the coal trade, then the whole expense would have to be distributed over the tonnage carried eastward to a market, which was 409,344 tons transported one mile at an expense of 5 mills per ton.

The above are the actual statistics of the steamer's operations, except in items of wear and tear, repairs and insurance—these I was compelled to estimate. Upon making the effort, it was found that the insurance of a canal steamer was such a novelty, that the insurance officers had no criteria upon which they could make a tariff, and consequently sought safety in offering to insure the boat at marine rates, say 10 per cent!

The subject of inquiry next in interest to us, is a comparison of the relative expenses by steam and horse-power.

Expenses of Steamer and Barge for one year.

1,234 tons of coal, at $3 45	$425 63
Nine months wages, at $156 per month.	1,404 60
Interest on $4,100, at 6 per cent.	246 00
Wear and tear of boats, $\frac{2400}{10}$	240 00
Insurance on engine, 5 per cent.	80 00
Wear and tear of engine, $\frac{1600}{16}$	100 00
Repairs of engine	100 00
Insurance, 2 boats, $2,400, at 1½	36 00
Incidental expenses	18 00
Expenses one year's service	$2,649 63
Monthly expenses, $\frac{2649}{9}$	$294 40
Expenses of 3-horse team towing a single boat for one year, say 20 trips. (paying different prices for towage to Philadelphia or to Baltimore, but) averaging $15	300 00
Nine months wages and board of crew, at $90	810 00
Feed and keep of 3 mules one year	360 00
Interest on boat and team. ($1,500)	90 00
Wear and tear of boat, $\frac{1200}{10}$	120 00
Wear and tear of teams, $\frac{300}{20}$	15 00
Insurance on boat, $1,200, at 1½	18 00
Incidentals	10 00
Yearly expenses	$1,723 00
Add for freightage capacity of steamboat, say ¾	1,292 25
	$3,015 25
Monthly expenses, $\frac{3015}{9}$	$335 03

	Per month.	Per year.
By teams	$335 03	$3,015 25
By steam	294 40	2,649 63
Difference in favor of steam.	$40 63	$365 62

The statistics which I have given you are reliable, the estimates I submit to your better judgment and correction, hoping that your opportunities of ascertaining the views and experience of practical boatmen may serve to confirm or confute them.

The result has left a very clear impression on my mind, that, to a certain extent, there is an advantage in steam canal navigation.

The $365 gain in the 1¾ boats is not an inconsiderable item, and may we not reasonably hope that further experience in a yet novel enterprise may lead to economies in the uses of steam not now thought of, but which the competing energies of many minds engaged in the same field of labor, may in time produce? I am, truly yours,

THOS. M. ABBETT.

It is proper to add, that the small upright boiler was found to be a false economy, and that in the spring of 1862 a horizontal flue boiler was substituted, with advantage.

Manufactories in Montreal.

Among the establishments are two rolling mills for making nail-plate iron, with a capital of $300,000. They employ 220 men and boys and turn out 3,600 tons of sheet iron annually. There are also several nail-making factories, giving employment to 120 persons, and producing every year about 3,000 tons of nails. Three establishments are engaged in the manufacture of saws, axles and other edge tools, and have earned a good reputation. Thirteen other foundries turn out large quantities of steam engines, patent safes and castings of all kinds. Besides these are numerous saw-mills and wood factories, shipyards, an extensive sugar refinery, two India rubber factories, a mill for making drugs and dyestuffs, a cotton mill, a woolen mill, a rope factory and several large grist mills.

The Food Question--Peace with the United States a Necessary Condition for other Countries.

However much England and France may suffer from the want of an abundant supply of raw cotton for their manufacturing establishments, it is very clear that they are, particularly England, quite as dependent upon this country for food, as they have been in times past for our other great staple. England is now compelled, with good seasons, to import annually no small proportion of the food her people consume. Every year adds to the amount, which increases in much greater ratio than her population. In wheat and flour alone, she took from us at least $50,000,000 during the year ending July 1, 1861. For that just closed she has taken a much greater amount, as the last crop in that country was a very meagre one. Should the present be good, still, as there is no surplus in that country, the demand from this will probably continue very nearly in ratio to the past, till several good crops shall, with imports from abroad, have enabled her people to accumulate such reserves as shall, by relieving all apprehension, seriously react upon prices. Such is the conviction of parties in the trade there, so that the prospect of a fair crop will, for the present, exert but very little influence in weakening prices, or demand from that.

It is certain, but for the United States the prices of bread-stuffs in England the past year would have created a much greater commotion than has the lack of cotton. The demand for food is far more imperative than clothing, especially a single variety of clothing, and must be had in very nearly the same quantity, whatever may happen; whether a people be prosperous or the reverse, or whatever may be the condition of commerce or trade. The Southern States have, heretofore, been the source of supply of cotton. This is now, temporarily perhaps, cut off. Shall the evil be aggravated by shutting out food from vast multitudes who are either unemployed, or who are working upon short time. Shall two ills be courted instead of one? If one is so vast as to defy almost, treatment or solution, will not a still graver one added, be too much for the strength or foresight of government? We do not refer to other matters; but it is clear that a state of things that would sever the commercial relations between the two countries, would interfere with other relations, mutually injurious very probably, but none the less to be considered than the question directly at issue.

This question is not whether England might not obtain supplies of breadstuffs from other sources sufficient to keep her people from starving, but whether she can obtain them at rates that will place them within reach of the working classes. Prices are controlled by a deficit or excess, however slight this may be. It might be supposed that a deficit equal to one-twentieth of the whole amount wanted, would raise prices only in an equal degree. But the necessary result is, that they augment in vastly greater ratio, as it places the holders in position to exact their own terms. Now prices are kept down in England by the certainty that the United States can be always relied on to make good any deficiency that may be found to exist in that country. Apprehension is relieved, and though there may be a brisk demand, prices will never advance very far beyond cost of production, including, of course, interest on the amount of capital employed.

In our crops of breadstuffs, consequently, we have a good guarantee for continued peace. The abundant supply from this country, steadily increasing, has unconsciously to nations of the Old World, rendered our own indispensable almost, to their comfort, and internal peace and quiet. We have during the past ten years been busily occupied in preparing this country to be the great grain mart for the world. We had abundant area, with soil and climate admirably adapted to the production of all the cereals at less cost than in any other country in the world. What we lacked was means of transportation, the best producing districts being 1,500 miles inland. The appropriate works have at length been constructed. Railroads traverse every portion of the interior, collecting at the great depots upon navigable water lines the bountiful products of the soil, which are borne to tide-water chiefly by means of one work—the Erie canal. There were transported over this route the past year, in grain and flour, what was equivalent to at least 70,000,000 bushels. The two great railroads of the State added 40,000,000 bushels more. The works which private and public enterprise have constructed in this State, are the most beneficent agents in ministering to the comfort and order of the Old World—agencies which are hardly more noticed than the operations of Nature, but which convert all these to the use and benefit of man.

Having labored so assiduously to promote the good of the people of the Old World, as well as ourselves, we do not think our good offices will be rudely thrown aside. Never was a grander achievement than our public works, which were made for mankind, instead of a comparatively isolated nation. Last year they saved both England and France all the horrors of a famine. They can continue to do so for all time. The people of those countries do not, of course, recognize their benefactors, but let them be cut off from these, and they will instantly learn their value and instantly demand the restoration of former relations, in tones that cannot be misunderstood or denied. We are now and are henceforth to be the granary of the world, and are almost as indispensable in the general economy, as food itself. The office we perform will not be lightly esteemed, nor will it long be rejected, as its benefits will be seen the moment they are withdrawn. Neither England nor France will long forego their customary amount of food for the sake of interfering in a matter which they will not appreciate—an interference which cannot result in a single compensating advantage for the thousand ills that must follow.—*Hallett's Financial Circular.*

Freshet Damages in the Coal Region.

The Philadelphia *Ledger* of the 27th ult., furnishes the following information as to the progress of repairs of the damages by the late freshet to the coal avenues:

"The share and loan holders of the Delaware Division Canal Company, as well as all who are interested in facilities for a full supply of coal at market, will be glad to learn that this section of navigation, extending from Bristol to Easton, and which was considerably injured by the late freshet so destructive of property in the Lehigh region, has been repaired, and that water will be let in its entire length on Saturday of this week. The Lehigh Navigation Company's works, having suffered much greater injury, will not be in working condition for some weeks yet; but the Lehigh Valley Railroad and some of its connections, extending to the heart of the anthracite coal fields, are now ready for business, and as the Delaware Division, two or three years ago, took the precaution of erecting *schutes* at Easton, for the more ready reception of coal from the Lehigh Valley Railroad, the most of the business from that road will probably be emptied into the Delaware Division Canal. From present indications, the coal trade will not be so seriously impaired as some have feared, and the Delaware Division Canal will not suffer so great a loss of tonnage as seemed almost inevitable, from the interruption of shipments on the Lehigh Canal.

The Rogers Locomotive Works.

The Rogers's Locomotive and Machine Works are very extensive. There are about four hundred hands employed at present, mostly on locomotives. A large and beautiful steam plow of the Fawkes class, is standing here all complete. It has two cylinders, eight by twelve inches; a corrugated driver roller, four and a half feet in diameter, and six feet broad in the face. It is capable of tearing through twenty acres of stiff land in one day. Beside it stands a large locomotive which was built for a railroad in South Carolina, but fortunately it was not sent away to Dixie. Two first class coal burning locomotives, with combustion chambers and copper-lined fire boxes, are now being constructed in Rogers's Works for Cuba; one wood burner for Dubuque, Iowa, and several orders for other places are in the course of being filled. A most favorable opportunity is afforded in this establishment for comparing the present with the past era in locomotive construction. Here on the outside of the shop is to be seen one of the old fashioned eight ton dumpy engines which were early used; and inside may be seen some elaborately-finished engines weighing from twenty-six to thirty five tons. American built engines have the preference in Cuba and in South America. Two locomotives furnished a few years since by this company for a railway in Chili, surpassed two English built engines in speed and power of haulage up steep gradients upon a fair trial. A splendid new engine for the same railroad was lately forwarded from this establishment.—*Scientific American.*

St. Louis, Alton and Terre Haute Railroad.

The Terre Haute and Alton and the Belleville and Illinoistown Railroad Corporations have been reorganized under the name of the St. Louis, Alton and Terre Haute Railroad Company. A Board of Directors has been appointed, consisting of Messrs. Bayard, Sage, Tilden, Butler, Richardson, Clark, Griswold, and several gentlemen resident on the line of the road. The new first mortgage bonds will be issued next week following, and consists of two classes, one called series A, bearing coupons for 7 per cent interest, due 1st January and 1st July, and one called series B, with coupons due 1st April and 1st October. The second mortgage bonds will also be divided into classes, and bear coupons due February and August and March and September.

Railroad Earnings--Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending June 28th, 1862, were:

17,168 passengers	$22,388 66
Mails and sundries	3,413 68
Freight and live stock, 12,473 tons	40,410 96
Total	$66,213 30
Corresponding week, 1861	61,001 44
Increase in 1862	$5,211 86

Newburgh to be a Coal Depot.

Through the efforts of Mr. Homer Ramsdell, Newburgh is to be placed in connection with the coal regions of Pennsylvania by the construction of a branch railroad from Hawley, the terminus of the Pensylvania Railroad, to some one of the Delaware River stations of the Erie Railroad, about thirteen miles distant. A contract has recently been completed between the latter company and the Pennsylvania Coal Company, providing for the construction of the connecting road. The projected improvement is expected to be completed by June 1, 1863.

AMERICAN RAILROAD BOND LIST.

(*) signifies that the road is in the hands of receivers. (†) that the company is in default in its interest. S. F.," Sinking Fund. "var," that the bonds fall due at different periods

American Railroad Journal.

Saturday, July 12, 1862.

Locomotives in Cities.

The substitution of steam for horse power on lines of railroad entering our large cities from the country, has long been a desideratum on many accounts. That which will most readily suggest itself to managers is the question of *economy*. Four or six horses being requisite to drag a single car, it will readily be seen what a large stock of animals must be kept on hand constantly by a company like the Hudson River to drag their cars for a distance of only two or three miles. Aside from this consideration is one of more importance to the public, the danger to individuals crossing the track. If a train consists of half a dozen cars, drawn separately, it is obvious that foot passengers crossing the street are exposed to precis ly six times the risk that they would be if the whole were drawn together. If steam can only be got as completely under control as horses, enabling cars to traverse the thoroughfares at a reasonable speed, yet stop readily, the danger to life and limb must be largely diminished by its introduction.

The public are further interested in the change from the circumstance that considerable time is lost in attaching the horses to, and detaching them from the cars, on entering the city. Should any accident befall a single vehicle, the whole are necessarily delayed until that one is put in order. The people of this city are too well aware that "time is money," to put up willingly with such an inconvenience, if it can be helped. On the other hand there were the smoke, the steam, the noise and the supposed want of control over the locomotive, which have frightened the residents of our streets and the city authorities into the prohibition of using steam below certain points. As the city kept extending, those points threatened to recede further, entailing still heavier losses on the companies and sacrifices on the part of travellers.

The Hudson River Railroad Company have just had two "dummy engines" constructed at the works of Danforth, Cooke & Co., Paterson, for that part of their road within the city limits. A third is nearly ready for turning out. We understand the trials to which those already placed on the road have been put resulted quite satisfactorily. On this point the public will soon have a full opportunity to witness for themselves the performance of those novel engines. The cost of one of them will not exceed that of a first-class locomotive. We annex a description of these dummies," corrected in one or two unimportant particulars, which appeared in the *Scientific American* of last week:—

The city of Paterson, N. J., has long maintained a high reputation for building locomotive steam engines. Last year this business was almost suspended, but it has since greatly revived, and is now rapidly improving. There are three large locomotive establishments in Paterson, viz:—The Rogers' Locomotive and Machine Works, the New Jersey Locomotive and Machine Company, and Danforth, Cooke & Co.'s Locomotive and Machine Works. In the latter there are about two hundred and thirty men now employed. One dummy engine for drawing the cars of the Hudson River Railroad through the streets of New York is now being built there. It is the third of this character provided for the same company. The two which were previously furnished have, after long trial of their qualities, given great satisfaction. The dummy is a condensing locomotive of peculiar construction, and its object is to supersede horses in the streets of the city. Outwardly it resembles a big box on wheels, like a freight car with a chimney. This long box is made of boiler iron; it has double hollow sides which contain water, and form the tank of the engine. The boiler, engine, condenser and pumps are placed within this box and supported on a suitable framing. The boiler is vertical and tubular, and spreads out toward the top. The engines consisting of two horizontal cylinders with their appurtenances, are placed in front of the boiler, and very nearly in the middle of the car, inside of the wheels. The cylinders are each eleven by fifteen inches, and their piston rods work a transverse double crank shaft situated close to the lower part of the boiler. On the outer ends of this shaft are grooved friction pinions, each twelve inches in diameter; these gear into large grooved friction wheels, each thirty inches in diameter, and from the shaft of the latter, motion is given by connecting rods to the two front and two back driving wheels at each side. This frictional gearing, as a substitute for cog gearing for reducing the speed of the driving wheels, is an excellent arrangement. One of these dummy engines will haul twenty-four cars. The speed, of course, is slow, but this is a necessary requirement for large cities. The object of using a condensing locomotive for such a purpose, is to obviate the noise peculiar to the exhaust in the smoke stack. The cylinders of the dummy exhaust in front into a small tubular condenser, the condensing water of which is supplied from the tank. The water to feed the boiler passes from the condenser by a tube into a cylindrical iron well situated under the two feed pumps, which are placed close together between the two cylinders, and are worked from the link motion. The feed is thus always proportioned to the amount of steam consumed, which is carried at from 110 to 140 lbs. on the inch, and is cut off short. The construction of such an engine is far more difficult than a common locomotive, because it embraces more parts, and these are required to be arranged in a very small compass. Coke is used as the fuel so as to obviate smoke, and a blower is employed to furnish the draft.

Illinois Southern Railroad.

The Lawrenceville *Globe* says such arrangements have recently been made with other railroad companies as to insure the completion of the first twenty-five miles (Lawrenceville to Mr. Carmel) during the present season; that Messrs. Stanton have just closed a contract that will en-

able them to commence delivering and laying iron immediately. It also provides for an amount of rolling stock sufficient to do the business of the road (I. S. R. R.) It decides that the iron can be procured and delivered as fast as the grade is prepared to receive it.

Railroad Earnings--Monthly.

The earnings of the Hudson River Railroad for

June, 1862, were	$151,427 24
Do., 1861	122,682 83
Increase	$28,744 41

The earnings of the Toledo and Wabash Railroad for June, 1862, were

	$112,677 09
Do., 1861	79,073 88
Increase	$34,503 21

The Chicago and Rock Island Railroad earned

in June, 1862	$86,841
Do., 1861	131,891
Increase	$35,050

The earnings of the Panama Railroad for June,

1862, were	$155,158
Do., 1861	112,000
Increase	$43,158

The receipts of the New York and Harlem Railroad for June are as follows:

June, 1862	$87,504 41
" 1861	97,337 23
Increase	$9,832 82

The earnings of the Galena and Chicago Railroad for June, 1862, were

	$162,823 22
Do., 1861	215,708 48
Decrease	$52.885 26
Corrected earnings for previous month,	158,194 03

The business of the Illinois Central Railroad for June, 1862, was:

Land Department.

Acres Construction Lands sold	5,439.64 for	$57,712 89
Acres Interest Fund L'ds sold	1,094.46 "	10,781 80
Acres Free Lands sold	2,526.09 "	27,137 59
Total sales during the month	9,060.19 for	$95,632 28
To which add Town Lot sales		1,493 40
Total of all		$97,125 68
Acres land sold since Jan'y 1, 1862	44,423.74 for	$515,677 44
Acres sold prev'sly (net sales)	1,260,273.46 for	16,147,983 91
Total	1,304,697.20 for	16,663,661 35
Construction bonds canceled previous to May 31		$2,112,500 00
Cash collected in June		28,085 66
158,000 bushels corn received on hand.		
Net collections to May 31, 1862		4,216,522 19

Traffic Department.

Receipts from Passengers	$61,033 90
" Freight	165,213 85
" Mails	6,358 34
" Rent of road	5,333 33
" Other sources	2,626 50
Total receipts for June, 1862	$240,565 92
Do. do. 1861	173,941 16
Increase	$75,895 23

The earnings by the Chicago, Burlington and Quincy Railroad for June, 1862, were

	$225,081 77
Do., 1861	149,186 54

Money Matters.

The feature in the money market of greatest interest during the last two days has been the sudden rise in the price of gold, or rather depreciation in that of currency. On Wednesday it advanced five per cent., closing at 116, which figure it maintained on Thursday; though without the unusual excitement which had prevailed the day before. As the matter now stands, every *six* dollars of indebtedness is discharged by about *five*, debtors of all description having that advantage at the cost of their creditors.

How, where, or when this alarming decline in the currency is to stop, seems to puzzle the wisest. It is pretty safe, however, to reckon that for a long time to come, gold and paper will not be in much closer relationship than at present. Nothing can bring the latter up to or near par except a general conviction that no more demand notes will be issued by the government, the market being already flooded with them at the West, as well as the East.

The late action of Congress, in authorizing a new issue of $150,000,000, has doubtless been the prime cause of this advance in the price of specie. We deprecated strongly that second issue, when the subject was first mooted. For the fact of putting into circulation hundreds of millions of dollars more than are needed must as inevitably lead to a depreciation in value as to glut the market with any other commodity, after it had been abundantly supplied. It deserves notice, too, that the Banks have lately been also increasing their circulation quite largely, as if one evil were not enough at a time.

Speculation is the occasion, not the cause of this alarming condition in monetary affairs. Its pernicious effects cannot now be wholly neutralized; but may be to some extent by an announcement on the part of the Secretary of the Treasury, that the new issue of notes will not be put in circulation while gold continues to sell at such a premium. Or if this be impossible, that no notes will be issued a second time, but destroyed as fast as they are received, as is done by the Bank of England.

The conversion of demand notes into "five-twenty" year bonds has almost entirely ceased.

Railroad securities have improved on the whole during the week; but as these are sold for currency, it is questionable whether this end of the scale has risen more highly than the other has sunk.

Sugar River Valley Railroad.

The contract for grading and bridging this road from Madison to Poynette has been let to Joseph Parkens of Madison, for $15,000. Mr. P. is an old contractor, and a man of great energy. The work will be prosecuted to an early completion. The balance of the road between Poynette and Portage will also be let in a few days.

Racine and Mississippi Railroad.

The managers of this road say it will certainly be opened during the present year to the Mississippi river. The Kenosha, Rockfort and Rock Island Railroad will be equipped for business. These roads will be important tributaries to local business of the Milwaukee and Chicago Railroad, as a large portion of their grain must go to Milwaukee as a commercial necessity.

Our Trade With the British North American Provinces.

It appears from an official report of the Secretary of the Treasury, showing the quantity and value of the different articles of merchandize imported into the United States from British North American provinces under the Reciprocity treaty, that the total value in 1859 was over $15,000,000, and in 1860 more than $12,500,000, and in 1861 $21,000,000. The table shows in the last year a falling off in fish, furs, fruits, hides and wool, an increase in animals, ashes, bark, butter, cheese, coal, eggs, flax, flour, grain, meats, oats, timber, etc. Animals of all kinds, $1,746,000; fish of all kinds, $1,362,000; flour and breadstuffs, over $3,000,000; grain, $6,500,000; timber of all kinsd, $3,289,000. The respective amounts of other imports are not enumerated.

☞ The *Scientific American* says that the extensive machinery manufacturing establishment of Messrs. SELLERS, in Philadelphia, was never more busily employed than at present in the manufacture of laths, planers, and all the various machines that are employed for making the parts of engines and machinery for general manufacturing purposes. This is a good indication of the wonderful prosperity and activity of some manufacturing operations amid the conflict now existing in our land. This firm has manufactured about 1,000 Giffard's injectors, about half the number of which were for stationery engines, and the others for locomotives. These ingenious boiler feeders are now employed, to some extent, on almost every railroad in this country.

RENSSELAER
POLYTECHNIC INSTITUTE,
TROY, N. Y.

THE thirty-ninth Annual Session of this Institution for instruction in the MATHEMATICAL, PHYSICAL, and NATURAL SCIENCES, will commence on Wednesday, Sept. 17th, 1862. Appropriate quarters, and a full supply of apparatus, will be provided, so that all the Courses of Instruction can be given precisely as heretofore. The new buildings for the Institute will be placed on a more commanding site, and be constructed as soon as possible.

The ANNUAL REGISTER, containing full information, can be obtained from

3m27 Prof. CHARLES DROWNE, Director.

IMPORTANT
TO
RAILROAD COMPANIES.
—o—
THE ATTENTION OF
RAILROAD MANAGERS
Is called especially to the Machines manufactured especially for the use of Railroad Companies by the proprietors of the
ALBANY AGRICULTURAL WORKS,
CONSISTING OF
EMERY'S PATENT
Railway Horse Power,
Made changeable for both right and left hand work, also with changeable degrees of forces and motions of the driving Pullies without changing the Speed and Labor of the Horses, thereby adapting them to the different uses required, as Sawing Wood, Pumping Water, Driving Elevators and Machine Shops, Foundries, etc. The Power is also adjustable to any degree of wear or use, so as to always insure its working with its greatest efficiency. All the running chains in these Powers are made of the best MALLEABLE IRON which gives to them triple the strength and durability of Grey Iron which last is universally used by all other Railway Horse Power Manufacturers—thereby at the same time lessening the weight of these several hundred pounds, making them less cumbrous for handling and transportation.

WOOD SAWING MILLS.
These Sawing Mills are made upon the most approved and convenient plans in use. Having a heavy plate fly-wheel fixed to the Mandrill with a Ratchet or catch pulley for the driving band on the outside of the fly-wheel—the journal bearings are fitted with Babbet Metal—the wood carriage traverses on iron ways and gibbs—a 24 or 26 inch Saw is fitted, filed and set in working order and the plates warranted. When desired, a 14 inch saw is fitted, also a table for the purpose of slitting boards, etc., for fencing and carpenter work.
The whole together forming one of the most complete and desirable sets of machines for their purposes. They are already in very general use on nearly all the principal Railroads in this country.

PRICE,	ONE HORSE POWER	**$90.00**
"	TWO " "	**120.00**
"	SAW MILL, 24 in. Saw	**37.00**
"	SETT BANDS and EXTRAS	**5.00**

PUMPING ENGINES
Of different kinds for Raising Water for Railroad tanks and other purposes, can be furnished on demand with Reciprocating or Rotary Pumps—fitted to be operated by these Horse Power and the best adapted for Railroad and Mining purposes. One of the SEVENTY-FIVE DOLLAR PUMPING ENGINES when driven by the TWO HORSE POWER has a capacity equal to any Four or Five Horse Power Steam Engine and Pumping Machine for the same purposes.

THRESHING MACHINES
Of the most approved kinds, for one and two horses and with simply Separators, or with Complete Cleaners which fit the grain for market in one and the same operations, and of the most approved construction.
They are very extensively introduced into all the grain-growing sections of this country and the world. They are especially adapted to the force of the above Horse Powers and can be driven by Steam or Water power with equal advantage. They will be furnished on the most liberal terms and warranty.
Liberal discounts made to RAILROAD COMPANIES from the above prices, and agents solicited for the sale of their manufactures.
For further particulars see the new Illustrated and Price Catalogue of the ALBANY AGRICULTURAL WORKS, furnished gratis on application to the proprietors.
EMERY BROTHERS,
No. 62 & 64 State st.,
ALBANY, N. Y.

CUMBERLAND COAL.

THE BORDEN MINING COMPANY

ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL**, DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGES CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to

WILLIAM BORDEN.

LEMUEL W. SERRELL,

SOLICITOR OF

AMERICAN & FOREIGN PATENTS,

No. 121 NASSAU ST.,

NEW YORK.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for **Buildings, Vessels, RAILROAD CARS,** etc., by which **spontaneous ventilation** can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing, on reasonable price.

Address **HENRY RUTTAN,**
Coburg, Canada.

THE GREAT FIRE IN TROY.

Unparalleled Triumph

OF

LILLIE'S SAFES!

The following certificates explain themselves:

TROY CITY BANK, May 21, 1862.

LEWIS LILLIE, Esq.—Dear Sir: I am sure it will give you as much pleasure to know as it does me to say, that in the recent fire of the 10th inst., which desolated our city and destroyed our Banking-house, the contents of our Bank vault, though the building itself was a heap of ruins, remained entirely unharmed. This result we attribute entirely to the fact that our old Wrought Iron Doors were, about two years since, exchanged for a set of your celebrated Chilled and Wrought Iron Doors and Frames. With the old doors, not a book or paper in the Vault could have been saved; as it is, nothing in it was even damaged, though exposed to the most intense heat.

Yours, respectfully, S. K. STOW, Cashier.

TROY, N. Y., May 14, 1862.

The undersigned, using **Lillie's Chilled and Wrought Iron Fire and Burglar Proof Safes,** at the time of the late disastrous fire in this city, would state that our safes were subjected to a severe test by fire, the heat varying in intensity, according to the locality and surroundings. The time they were exposed to the fiery ordeal, unprotected by water, varied from 24 to 72 hours. We would say that our money, papers, books, etc. were well preserved, and the Safes are suitable for further use. By comparison with Safes of other manufacture, equally exposed, we have no hesitancy in recommending Safes of Lillie's manufacture to the public on their demonstrated merit as entitled to unparalleled confidence as fire-proofs.

James Kenyon,	S. Bachelder,
S. O. Gleason,	Gates H. Barnard,
Percy & King,	W. D. Haight,
McCoy & Beadle,	Denio & Freiot,
Coon & Van Valkenburgh,	Walsh, Petit & Anthony,
S. S. McClure,	D. H. Snyder,
Ross & Smith,	Jonathan Seaman.
Robert Green,	

Not dug out—nothing in them.

TROY, May 19, 1862.

The undersigned had one of **Lillie's Wrought and Chilled Iron Safes,** which went through the fire of the 10th of May. The Safe was exposed to a severe fire for over 24 hours. In falling it turned on its face, and when turned up to open the doors was red-hot. The back of the lower part of the Safe (behind the books) was filled with pennies, which, in falling over, pressed against the books, and brought them directly in contact with the doors. The wrappers on the pennies were mostly good. The books were unfit for further use, but the writing on them was partially legible and could be copied.

DUSENBURY & ANTHONY.

TROY, May 19, 1862.

This is to certify that we had in our store, in this city, when it burned, one of **Lillie's Small Safes,** which was in the fire, without water on the building or Safe. Most of the valuables were removed before the fire, and therefore we were not in haste to get the Safe out of the burning ruins. Some of the papers left in the Safe were legible when taken out, but most of them were charred.

I. M. SINGER & CO.,
Per G. W. BABCOCK, Agent.

This is to certify that the undersigned had one of LILLIE'S Patent Chilled Iron Safes in their store, which was burned during the late severe fire in this city, and we are happy to state, the Safe preserved all its contents in first-rate condition. All the papers were legible, and the books will do for further use, without even rebinding.

GRANT, NUTTING & CO.

The foregoing comprises all the Safes of my manufacture that were in the fire, and below will be found certificates from all the owners of Safes manufactured several years since, by World's Safe Company, who used my Patent Chilled Iron Shell, but not my Fire-Proof Cement.

WORLD'S SAFE COMPANY'S SAFES.

TROY, May 19, 1862.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire of the 10th inst., in this city, would state that our Safes were exposed to a severe heat, being confined in the burning ruins, unprotected by water, from one to three days. On opening the Safes the contents were mostly legible, and to a far greater extent than could be reasonably expected of any Safe. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectors against fire, and by this test we are prepared to recommend them as such to public patronage.

Lyman Bennett,	Silliman, Matthews & Co.,
Flood & Dunham,	E. L. Mallory,
John Hutchinson,	E. H. Virgil,
Sup't National Express Co.	

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire in this city, would state, that on opening our Safes the contents were mostly legible. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectives against fire, and we are happy to recommend them to public patronage.

W. & L. E. GURLEY,
R. L. & G. DRAKE,
LEONARD SMITH,
H. E. & W. ALENDORPH, Absent.

TROY, May 19, 1862.

To whom it may concern: We would certify that when the recent fire broke out in this city, we took out from our Safe (which was made by World's Safe Company) all our books, papers, etc., and then left it to the flames without shutting the door, and the Safe will do for further use by being repaired, although the book case was destroyed by the door being left open through the fire.

ACKLEY & CO.

TROY, May 19, 1862.

The undersigned, using Safes manufactured by the World's Safe Company, at the time of the late disastrous fire on the 10th instant, in this city, would state that our Safes were filled with fire-brick for the fire-proof, and while several of this class preserved their contents, ours were considerably charred, and only a part legible. In justice to Mr. LEWIS LILLIE, we are pleased to state that Safes of his manufacture proved to be powerful protectors against fire, and have preserved their contents, after having been exposed to the fiery ordeal, unprotected by water, from one to three days.

Stephen Holton,	Luther Greenman,
Bennett, Strickland & Fellows,	E. W. Johnson,
Corlous & House,	J. H. Goodsell.

TROY, N. Y., May 17, 1862.

LEWIS LILLIE—Dear Sir: We were using at the time of the late severe fire of 10th inst., a Safe purchased in 1852 of the late World's Safe Company. The contents were considerably charred, but our Ledger is mostly legible, and we are able to copy it.

The Safe was subjected to a severe heat for over eighteen hours, and we are satisfied that if water had been thrown on the ruins, as is ordinarily the case, the contents would have come out uninjured. You will please repair our Safe, placing in it the improvements embraced in Safes of your manufacture, and oblige

SHELDON & GREENE.

N.B.—The above Safe is believed to have damaged the contents more than any of those named in this circular.

There were only seven Sheet Iron Safes, made by Herring and others, outside of the railroad depot, that were exposed to the fire, four of which were entirely burnt out; the fifth was saved by being early cooled off by water; the remaining two were not severely tested.

LEWIS LILLIE.

"This Machine makes the 'LOCK STITCH,' and ranks highest, on account of the elasticity, permanence, beauty, and general desirableness of the stitching when done, and the wide range of its application."—(Report of American Institute, New York.)

This report was in accordance with the previous awards at the Fair of the

UNITED STATES AGRICULTURAL SOCIETY

At the Fairs of the
American Institute, New York.
Mechanics' Association, Boston.
Franklin Institute, Philadelphia.
Kentucky Institute, Louisville.
Mechanics' Institute, Baltimore.
Mechanics' Association, Cincinnati.
Mechanical Association, St. Louis.
Mechanics' Institute, San Francisco.
Metropolitan Mechanics' Institute, Washington.

At the State Fairs of

Maine,	Pennsylvania,	Ohio,	Illinois,
Vermont,	Virginia,	Indiana,	Kentucky,
Connecticut,	Mississippi,	Iowa.	Michigan,
New York,	Missouri,	Tennessee,	Wisconsin,
New Jersey,			California,

And at hundreds of County Fairs.

The LOCK STITCH made by this Machine, cannot be ravelled and presents the same appearance upon each side of the seam, a single line of thread extending from stitch to stitch. It is formed with two threads one upon each side of the fabric, and interlocked in the centre of it. In beauty and regularity, and in the firmness of the seam formed it excels hand sewing. The machine is preferred for the following qualities:

1. Beauty and excellence of stitch alike upon each side of the fabric sewed.
2. Strength, firmness, and durability of seam that will not rip nor ravel, and made with
3. Economy of thread.
4. Its attachments and wide range of application to purposes and materials.
5. Compactness and elegance of model and finish.
6. Simplicity and thoroughness of construction.
7. Speed, ease of operation and management, and quietness of movement.

THE

WHEELER & WILSON SEWING MACHINE

Is the machine for all kinds of **Family Sewing**, and for the use of Seamstresses, Dressmakers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks, Mantillas, Clothing, Hats Caps, Corsets, Ladies' Gaiters, Linen Goods, Umbrellas, Parasols, Silk Goods, etc.

[From the 'Scientific American.']

A New Improvement has lately been added to the WHEELER & WILSON machine (which we considered long ago as nearly perfect,) being an attachment for sewing braid upon cloth or any other material.

If any of our friends have been through the tedious operation of braiding children's dresses, they will realize the great relief that awaits them in this invention. The braid follows the needle with perfect accuracy, taking any curve desired, so that the most intricate pattern may be braided with great rapidity. Every lady may now possess one of those lovely chambray-morning robes, embroidered in vines and labyrinths of white braid, which have heretofore fallen to the lot only of the most industrious and ingenious. For summer dresses nothing can be more becoming. We hail this improvement as a confirming evidence of "a good time coming" for the ladies one and all. And we may as well include the gentlemen, for there will doubtless be an immediate harvest of elaborate smoking caps and velvet slippers embroidered with gold braid. Long live the sewing machines!

ANDREWS' PATENT Centrifugal PUMPS

ARE the best and cheapest Pumps made for **RAILROAD STATIONS, MINES, FACTORIES, TANNERIES, PLANTATIONS, DRAINAGE, IRRIGATION, WRECKING,** and general use.

Made entirely of metal, without working valves or rubbing surfaces, they pass sand, fine ore and gravel, without injury. Capacity from 20 Gallons to 1,000 Bbls. per minute.

For descriptive pamphlet and Price List address

WM. D. ANDREWS & BRO.,
414 Water St., New York,
GENERAL DEALERS IN
Iron, Metals, new and second hand **Machinery.**

Prince's Metallic Paint,

AN INDESTRUCTIBLE COATING
FOR
IRON, TIN AND WOOD.

IT consists of seventy-two parts **Oxide of Iron,** and twenty-eight parts **Cement Lime Stone** in the one hundred pounds.

It has much more body than red or white lead. It is warranted perfectly water and fire-proof and to withstand a greater heat on metals, without scaling, than any other paint in use.

It is a perfect cover for all kinds of iron, tin or woodwork, out-houses and canvas coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone as has been proven at the largest foundries in the country.

For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zinc, and much less than the ordinary mineral paints. It is free from any waste, and possesses a **spreading and covering power unequalled.**

TERMS,
By the Barrel or Half Barrel, { **FOUR CENTS per pound.**

A liberal discount made to parties purchasing by the ton.
A Barrel or Ton will be forwarded to any Railroad companies desirous of testing its qualities, for which there will be no charge if it does not give entire satisfaction.

ENGINEERING WORKS.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

Sheet No.				Sheet No.			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20	"	1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24	"	¾ to 1
4.	" 14	"	1½ to 1	16.	" 24	"	1½ to 1
5.	" 15	"	¾ to 1	17.	" 25	"	1½ to 1
6.	" 15	"	1 to 1	18.	" 26	"	1½ to 1
7.	" 15	"	1½ to 1	19.	" 28	"	¾ to 1
8.	" 16	"	¾ to 1	20.	" 30	"	1 to 1
9	" 16	"	1 to 1	21.	" 30	"	1½ to 1
10.	" 18	"	¾ to 1	22.	" 30	"	1½ to 1
11.	" 18	"	¾ to 1	23.	" 32	"	1 to 1
12.	" 18	"	1 to 1	24.	" 32	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

American Railroad Journal.

New York, Saturday, July 19, 1862.

The Pacific Railroad.

Elsewhere we publish the Union Pacific Railroad bill in full, as it passed Congress. For the sake of those readers who may not find time to peruse it at length, we give herewith an abstract of its principal provisions. It is much more liberal than was represented in the first reports of it spread before the country. The issue of United States bonds granted, or rather loaned for thirty years, is $16,000 per mile for those portions of it on this side of the Rocky Mountains and beyond the Sierra Nevada; while for 150 miles in its passage over each of those mountains it is $48,000, and across the great interior basin, $32,000 per mile.

There is also granted the right of way for four hundred feet in width, with authority to use stone, timber, etc., on the public lands for construction. Besides these, the government donate five alternate sections of land on each side of the line, those containing minerals being excepted. The lands and bonds are to be transferred as fast as forty consecutive miles of road are completed and accepted, only in the mountains and the great basin the bonds will be issued as twenty mile sections are pronounced to be finished, the government reserving twenty-five per cent. of the ends and fifteen per cent. of the centre until the completion of the whole road.

The work will consist of three or more great links, the Central, known as "the Union Pacific Railroad," starting from some point on the 100th meridian between the south shore of the Republican and the North shore of the Platte, to be designated by the President of the United States. Thence it will proceed by the most central and practicable route to the Western border of Nevada territory, where it will terminate; connecting with the Central Pacific Railroad of California.

The Eastern connections will consist of two or three feeders, one extending from the mouth of the Kansas, passing up its south shore to Fort Riley and thence to the 100th meridian, where it will unite with the "Union" road. Another will proceed from some point of Western Iowa to the same terminus. The Hannibal and St. Joseph Railroad Company may also extend their line through Kansas or Nebraska one hundred miles, so as to connect with either of these roads. Still another connection is authorized from Sioux City, Minnesota, the government in each case offering lands and $16,000 per mile, on the same conditions. All these companies may consolidate.

The Central Pacific Railroad Company of California are recognized in the bill as the company who are to build the road in California and to whom the appropriations for that purpose are made.

This Company was organized in the spring of 1861, upon the new railroad route through Central California across the Sierra Nevada mountains discovered by T. D. JUDAH, Esq., of California, in the spring and summer of 1861. Railroad surveys were made from Sacramento City, developing a line across the Sierras, with maximum grades of 105 feet per mile, and all the profiles, maps, estimates, reports, etc., sent on to Washington, where they have been during the present session. These maps, profiles, etc., have been of the greatest assistance in the passage of the Railroad bill in convincing Senators and Members, of the entire practicability of the passage of these mountains. The line through California runs from the city of Sacramento, across the Sacramento Valley to Lincoln, thence passing up and near Virginiatown and Gold Hill follows Dry Creek, passing near to Auburn, through Neilsburgh, Illinoistown and Dutch Flat, upon the Divide between Bear River and the North Fork of the American, striking the valley of South Yuba at a point about 20 miles above Dutch Flat; thence following the Yuba, it reaches the summit at Donner Lake Pass, distant 112 miles from Sacramento. Thence it descends on the East side of Donner Lake, reaching the Truckee river in 12 miles from the summit, or 124 miles from Sacramento, where all difficulties cease. The line then follows down the Truckee River to Big Bend, a distance of 50 miles further, with no grade over 40 feet per mile, passing about 12 miles north of Virginia City, in Nevada Territory.

This line when built will perform the local trade of Placer, Nevada and Sierra counties, and from Sacramento to Lincoln the entire northern trade will pass over it. In addition to this the immense Washoe trade now employing 2,000 six and eight mule teams in carrying freight at $80 per ton for 160 miles will pass over this road.

This company have already filed with the Secretary of the Interior, the map and designation of their route as required by section 7, of the bill, and the lands for fifteen miles on each side of their line are to be immediately withdrawn from pre-emption, etc. These lands embrace some of the finest timber lands in the State and are of immense value.

The amount of bonds granted to this company for the portion of their road between Sacramento and the eastern boundary of the State, 140 miles, is $6,000,000, and of land about 900,000 acres, mostly timbered.

They contemplate an immediate prosecution of the work and intend to have the first 50 miles in operation by August or September, 1863.

It will be observed that this company after reaching the State line are authorized to proceed on in the construction of the road, across the territories, upon the same terms and conditions as are granted to the Union Pacific Railroad Company until the roads meet and unite, which virtually gives them one-half of the road to construct at their option.

The clause in the bill referring to the exemption from public favors of "that part of any road now

constructed," is entirely inapplicable—no portion of the line having yet been built.

There is no restriction upon the tariff of rates that may be charged, either for government service or otherwise. The only clauses looking to the protection of the public interests require that the general government shall be entitled to preference in using the railroad and telegraph. Congress may also interfere by reducing the rates whenever the net annual income shall exceed fifteen per cent.

The capital stock of the Union Pacific Railroad Company authorized is $100,000,000, in shares of $1,000 each. A permanent organization may take place on the *bona fide* subscription of 2,000 shares, on which ten per cent. shall have been paid down. One year is given for the company to accept the charter; another for locating the road and making out maps, and ten more for construction. In the event of its not being completed by July 1, 1876, the whole rights and property revert to the United States. The bonds granted to aid in its construction constitute a first mortgage on the road, the company to repay the some in services, transportation of mails, troops, munitions of war, etc., during the life of the bonds, and to redeem the balance of same unpaid at maturity.

These are some of the principal features of an enterprise which is one of the grandest that ever has been or will be undertaken by any community. That it should have been seriously proposed at the present time, shows the confidence which our richest, most sagacious and enterprising men have in the future of this country.

By a supplementary act passed by Congress, the time for the first meeting of the commissioners under the bill is fixed on the ——— Tuesday in September.

Municipal Subscriptions in aid of Railroads in Iowa Declared Unconstitutional.

The decision of the Supreme Court of this State on the right of cities and counties to take stock in Railroad Companies, is exhaustive of the question at issue. The decision sweeps out of legal existence every bond given for the construction of railroads in this State by cities and counties in their corporate capacity, and leaves those who hold those bonds remediless. This is a grevious hardship, albeit, it is a law. The people of those counties of Iowa which have become involved in railroad-bond debts will rejoice at this decision, but it is a terrible disaster to those who loaned their money on these securities on the faith of the counties and cities which issued the bonds.

As it is now, millions of dollars have been loaned to cities and counties, not a dollar of which can be recovered if the decision of the Supreme Court of Iowa should be confirmed by the United States Courts. We have no fault to find with the ruling of the Supreme Court, but there is a great deal of blame resting on the Judges of the same Court, who decided otherwise on a former occasion, on which decision many persons were induced to invest their money in bonds of towns and counties.

Dubuque, by the decision of the Supreme Court, is released from the payment by the county of $200,000 in bonds given to aid in the construction of the D. and P. R. R., and the city is released of liabilities amounting to $450,000—$200,000 to the D. and P. R. R. and $250,000 to the D. W. Railroad. Could this have been done without wronging creditors of what is justly due them it would be well. As it is, an inexorable rule of law subjects these creditors to a loss which may to many of them be ruinous.

We believe that every debt incurred by corporations is as binding as individual debts, and should by all rules of honor be paid, whether susceptible of legal enforcement or not.—*Dubuque (Iowa) Herald.*

St. Paul and Pacific Railroad.

The first division of the St. Paul and Pacific Railroad is finished, and the trains commenced to run from St. Paul to St. Anthony on June 28, 1862. This is the first link in the great chain of railroads which will in the course of a few years, spread all over this State, from the valley of the Mississippi to the Red River of the North, and from Lake Superior to the Iowa boundary line.

Above St. Anthony, contractors will carry on the work vigorously. The iron will be laid as far as Anoka in two or three months, and it is thought likely that the rails may reach St. Cloud before the Winter sets in.

Cleveland and Toledo Railroad.

The earnings and expenses of this road for the fiscal years ending April 30, 1861 and 1862, were as follows:

EARNINGS.

	1861.	1862.
From passengers	$453,254 66	$427,285 25
" freight and mail	466,716 42	576,352 07
	$919,971 08	$1,003,637 32

EXPENSES.

	1861.	1862.
Repairs of road	$110,298 14	$107,588 83
" bridges	16,922 90	9,014 06
" b'ld'gs, etc.	14,852 77	15,434 41
" locomotives	29,724 50	29,241 11
" cars	29,668 01	45,964 25
" machinery	2,264 58	2,704 54
Fuel	25,756 76	37,823 89
Oil and waste	4,612 91	7,263 28
Train hands	46,017 36	51,953 92
Watchmen	8,187 19	8,280 21
Agents, clerks, and expenses at stations	60,925 85	68,769 36
Taxes	21,373 45	16,126 54
Gen'l superintendence	31,035 24	30,265 02
Loss and damage	3,899 53	3,793 48
U. S. mail	600 00	652 00
Contingencies	19,776 21	25,278 32
	$426,015 40	$460,149 22
Earn'gs less expenses.	$493,955 68	$543,488 10
Interest, profit & loss, etc.	365,321 30	360,490 77
Net income	$128,634 38	$182,997 33

The net earnings of 1861-'62 have been applied as follows:

Dividend, 3 per cent.	$100,314 00
Reduction of floating debt	47,753 19
Contributed to sinking fund	16,108 75
New freight cars	18,821 39
	$182,997 33

—which is equal to a net of 5½ per cent. on the capital stock. The assets of the company on hand and being collected and converted, are sufficient to pay the remaining floating debt.

The earnings for the year ending April 30, 1861, compared with those of the preceding year, show an increase of $86,699 72, with an increase in expenses of $57,278 89—making the increase in net earnings $29,420 83.

The earnings for the year ending April 30, 1862, show an increase over those of 1860-'61, of $83,666 24, with an increase in expenses of $34,133 82—making the increase in net earnings $49,532 42.

The income account shows a balance of $211,317 71, as the undivided net earnings since the closing of construction account to May 1, 1862.

The following is a comparative statement of the bonded indebtedness of the company as given in their reports for the last and preceding years:

	1861.	1862.
Junction income bonds, due June 1, 1862	$44,000	
" Lloyds, due Oct. 1, 1862	6,000	6,000
" 2nd mort., due Nov. 1, 1862	265,000	221,000
Toledo, Norwalk and Cleveland, 1st mortgage bonds, due Aug. 1, 1868	521,000	521,000
Do. 2nd mortgage bonds, due Aug. 1, 1868	293,300	293,200
Cleveland and Toledo, income mortgage bonds, due Sept. 1, 1868	126,500	104,400
Do. income convert. July, '54, mortgage bonds, due July 1, 1864	300,000	174,000
Do. do. Sept. '54, do. due July 1, 1864	290,000	256,000
Do. dividend bonds, due Apr. 1, 1866	158,610	147,885
Do. do. certificates, due Apr. 1, 1866	4,160	3,610
Junction 1st mort. 1st division bonds, due Apr. 1, 1867	359,000	299,000
Cleveland and Toledo, income bonds of September, 1857, due Sept. 1, 1870	42,000	39,000
Junction 1st m. 2d div. b'ds, due Dec. 1, 1872	263,000	219,000
C. & T. sink. fund mort. b'ds, due July 1, 1886	1,173,000	1,545,000
	$3,850,570	$3,850,595

Deduct the amount held by the company in the sinking fund, $172,975, and there remains of bonds outstanding, $3,673,620.

The bonded debt has increased $25 by small differences received in exchanging bonds where the amounts were not equal.

The following statement will show the condition of the affairs of the company at the close of the fiscal years ending May 31, 1861, and 1862:

	1861.	1862.
Cost of road to date	$6,697,178 48	$6,699,373 33
Value of equipment	483,160 00	504,420 00
Stocks and bonds owned by Co.	89,298 94	95,678 94
Materials on hand	102,955 82	96,119 32
Real estate	29,252 92	29,821 92
Bills receivable	73,269 68	70,459 57
Due from other Co's, and P. O. Depart.	24,625 10	
Cash	15,701 58	15,488 97

Unpaid approv'd bills	16,788 53	9,608 57
Accrued interest not called for	7,374 16	6,997 49
Miscellaneous unsettled accounts	11,719 82	4,674 02
Receipts of May not adjusted	53,630 55	46,285 33
Income account to balance	128,634 38	211,317 71
	$7,216,406 39	$7,628,820 03

In 1855, the company made a new mortgage on its whole line of road, including machinery, tools, real estate and franchise, to secure an issue of $3,500,000 of bonds, with an additional security of

one per cent. sinking fund to be invested by Commissioners, and which sinking fund now amounts to $172,975. The bonds bear 7 per cent. interest, payable semi annually in New York, and mature in 1885.

This issue of bonds is intended to cover the entire issue of bonds of the company, and to be exchanged at par for the other classes of outstanding bonds, at the option of and on presentation by the holders of the other bonds. Exchanges have been made during the past year to the amount of $372,000, and the total amount now outstanding, which have been exchanged, is $1,545,000. None of the sinking fund bonds have ever been sold or put upon the market by the company.

Exchanges are continually going on, and can be made at the office of Messrs. Vermilye & Co., 44 Wall St., N. Y., or at the office of the company in Cleveland, O.

The company has been operating 112½ miles of road on the Southern Division, and about 60 miles on the Northern Division since January 1, 1859—that portion of the road west of Sandusky and east of Beria on the Northern Division having been abandoned since that date. The President in his report says:

In connection with the subject of the Northern Division, we would suggest the propriety, at some future day, of connecting the Northern and Southern Divisions of your road, between Oberlin on the Southern and Elyria on the Northern Division, being a distance of about eight miles, over a very level surface and easy of construction. This would bring Elyria upon the main line of the company's road without increasing the distance between Cleveland and Toledo, and would bring the company's main line into the line of the Cleveland, Columbus and Cincinnati Company at Berea, within twelve miles of Cleveland, instead of at Grafton, which is twenty-five miles. This line should have been unquestionably adopted when the road was originally built, and would save two trains between Elyria and Cleveland, as the trains of the two Divisions would connect at that point.

Should the policy of the company ever require, or its finances warrant a connection of its Northern Division between Sandusky and Fremont, by the construction of twenty-two miles of road between those points, it would, with the Oberlin and Elyria connection, bring the Northern Division into easy working order, by separating the through trains at Fremont, and uniting them again at Elyria, accommodating both divisions with through trains, by running two trains a distance of only fifty-six miles, between Elyria and Fremont, and consolidating them at those points.

This would secure a great saving to the company in working the two divisions, in mileage, maintenance of road, and wear of machinery, and is a subject that should not be over-looked in the future of the road.

The earnings of your road for the current year, amount to $1,003,637 32-100, showing an increase, as compared with the previous year, of $83,666 24-100, and the earnings would have shown probably one hundred thousand dollars additional increase, if the connecting roads east had been able during the past winter, to have furnished their proportion of freight cars for the Toledo business, and had promptly taken the freight away.

The cars of this company are loaded at Toledo, and pass from thence to Dunkirk and Buffalo, over the roads of the Cleveland and Erie and Buffalo and Erie Companies, and for the cars of this company used east of Cleveland, it is expected those roads will furnish their cars in return for the Toledo traffic; but while there was a large accumulation of freight at Toledo all of last winter, awaiting transhipment to the east, the car mileage was in favor of this company between Cleveland, Buffalo and Dunkirk, as follows:

December, 1861	268,127 miles.
January, 1862	245,888 "
February, 1862	253,272 "
March, 1862	308,937 "

—showing the use of the equipment of this company between Cleveland and Buffalo, equal to about forty-five cars per day each way, over the road of this company, the use of which, confined to the road of this company, would have relieved Toledo of its accumulated freight, and transferred the accumulation to Cleveland; and in addition to this, for the want of proper transfer platforms and storehouses at Dunkirk, quite a detention of cars occurred at that point, awaiting transhipment by the New York and Erie road; and the books of this company show that cars sent with freight to Dunkirk, averaged about two days longer time in returning than those sent to Buffalo, though the distance traveled was ninety miles greater to and from the latter place.

A large average number of the freight cars of this company, loaded with freight for the N. Y. and Erie road, have been permitted to stand at Dunkirk and Erie during the past winter, on the side tracks, waiting for the New York and Erie road to tranship the freight, when storehouses at that point, built at slight expense by the New York and Erie Company could have stored the freight and released the cars, the use of which was worth $20 a day each, to this company. This detention has been brought to the notice of the managers of the New York and Erie Company, and it is hoped that it will be remedied another winter.

An arrangement has been entered into between the Cleveland and Erie, and the Buffalo and Erie and this Company, to place in the line by the three companies, and designate them with proper marks, eight hundred and ten freight cars, for the next winter's business, to be used exclusively between Toledo, Dunkirk and Buffalo, which number of cars will greatly facilitate the forwarding of freight from that point, and unquestionably add largely to the tonnage of your road; particularly if proper facilities are afforded at Dunkirk and Buffalo for a prompt disposition of the freight forwarded, and a speedy return of cars.

The winter months show a large and increasing freight business over your road, requiring an additional freight equipment, and necessarily an increased number of freight cars. Thirty-one additional cars were built last fall at the shops of the company, and placed upon the road in time for the winter business, and we have now in process of construction at the company's shops, fifty more, which we now expect to have ready for service the coming winter. To provide the necessary motive power, as the business of the company is changing from a passenger to a freight business, we have adopted the plan of cutting down our surplus passenger engines, and converting them into freight locomotives. Two were re-built last year at the company's shops, and two more are going through the same process this year, and will be ready for next winter's business. We find them fully equal to any new locomotives constructed by the most approved builders.

The freight cars of the Michigan Southern Railroad Company, and the Toledo and Wabash Company, connecting roads of this company on the West, can pass over the compromise gauge of the road of this company to Cleveland, but no further; and could be used by this company during the winter months, in transporting freight loaded at Chicago, and on the Wabash in Indiana, over the roads of those companies and this, to Cleveland, and if necessary over the Mahoning Railroad to Braceville, where the Mahoning road is to intersect the Atlantic and Great Western Railroad now in rapid process of construction to that point. What relief this new line can give this company, as an outlet in the winter for its surplus freight, either by taking it at Cleveland, or at its intersection with the Cleveland and Mahoning road remains to be demonstrated, but should the same state of business occur as existed last winter (and I see no reason why it should not, with the continued increasing business of the country,) the surplus offered at Cleveland by this company, would nearly supply the Atlantic and Great Western road with freight to its full capacity,

We are disposed to conclude, from the rapid increased tonnage of freight passing over your road during the winter months, and the amount offered during the past winter which could not be forwarded for want of freight cars between Toledo and Buffalo, that the requirements will soon equal two hundred car loads of freight, daily, bound eastward during the winter months, over your road; and allowing the cars six or eight days to make the round trip, with the delays of loading and unloading, the requirements will equal from 1,400 to 1,600 freight cars in the line between Toledo, Dunkirk and Buffalo, which will be nearly double the number now apportioned by the line to this business. The distance from Toledo to Buffalo is 295 miles, with an allotment of 810 freight cars under our present arrangement with the line between Cleveland and Buffalo; while the New York Central, between Buffalo and Albany, a distance of 298 miles, has in service about 3000 freight cars, and is continually adding to their equipment.

It must be apparent to even a casual observer, that much greater facilities in the way of equipments must be afforded for the winter business from Toledo, or additional facilities offered at Cleveland for taking the freight from the cars of the Michigan Southern and Wabash Roads, which can reach that point over your road. We have dwelt more at length upon this point, from the fact that our receipts have been materially impaired during the past winter by the press of freight eastward from Cleveland, and the use of the cars of this Company between Cleveland and Buffalo, and their detention at Dunkirk.

The equipment of the road consists of 32 locomotives, 35 coaches, 10 second class, 12 baggage, 4 mail, 270 stock and box, 33 rack stock, 90 platform 19 gravel and 3 boarding cars.

The number of miles run by locomotives during the past year has been 610,292; by freight cars, 5,520,775; by passenger cars, 1,034,044. The increase in freight car mileage is 2,056,094, while the passenger car mileage remains about the same.

The total number of tons of freight carried over the road for the year was 311,252—an increase of 160,769, or 23½ per cent. over the previous year. The average distance each ton was carried was 92.2 miles. The amount received for each ton was $1 87.17. The amount received per ton per mile was 2.01 cents.

The total number of passengers carried for the year was 257,430—being a decrease of 10,284 from last year. The average amount received from each passenger was $1.66. The average distance each passenger traveled was 61.7 miles. Average amount received per mile, 2.69 cents.

The road, bridges and rolling stock are in good order. Of the amount expended for road repairs, $32,864 09 was paid to the C., C. & C. R. R. Co., for that portion of the track between Grafton and Cleveland, leaving $74,724 74 as strictly chargeable to this company. There have been placed in the track 43,208 cross ties, 8,813 chairs, 11 tons spike, and 750 tons new rails; 10,897 rails have been taken up and repaired. Eight new trestles, two new truss, and five new stone bridges have been built.

President—JOHN GARDINER, Norwalk, O.

Treasurer—H. C. LUCE, "

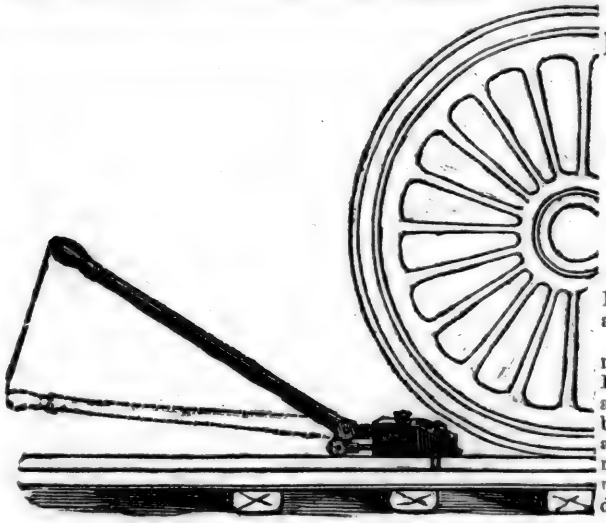
Railroad Companies' Lien for Freight ?

TRANSPORTATION OF COAL—WHAT DELIVERY IS NECESSARY IN ORDER TO DISCHARGE THE CARRIERS' LIEN. WHERE ONE OF SEVERAL CARGOES IS DELIVERED THE LIEN FOR THE WHOLE FREIGHT MAY BE UPON THE REMAINDER.

The plaintiffs were coal dealers in Abington, and had been accustomed to receive coal from Boston over the Old Colony and Fall River Railroad, paying for freight five and a quarter cents a hundred, with a deduction of twenty per cent., in consideration of the unloading of the coal from the cars at Abington, being done by the plaintiffs. Between July 1st and October 7th, 1857, the company transported for the plaintiffs from Boston to Abington five cargoes of coal, but no part of the wharfage at Boston or of the freight had been paid or offered by the plaintiffs to the company.

There were two places upon which the coal was unloaded, both of which were upon the land of the company. One of these was upon the west of their main track, just below the plaintiffs' store, and adjoining the plaintiffs' land, and was a bin made by laying boards upon the ground, so as to make the shoveling out of the coal easier, and planking up one end, the fence between the railroad and the plaintiffs' land forming the back of the bin; and the embankment for the track making the front of the bin. But one kind of coal was put in this enclosure, and by the coal breaking a peace of the back fence, between thirty and forty tons of coal had run over on to the plaintiffs land. The other bin was on a side track which ran out from the main track on the east side, and was similar to the first and was used to receive other kinds of coal. As the several cargoes arrived in the cars, the plaintiffs and their servants unloaded them into these bins, the cars being left on the main track, or switched off on to the side track for this purpose. From these bins the plaintiffs carried away coal to deliver to their customers in carts and wagons; half of the first cargo had been carried away before the second arrived; and the plaintiffs continued this course of selling and carrying away till Nov., 1857, when the plaintiffs having failed, the company forbade the plaintiffs from taking any more coal until the freight should be paid, and served upon them a notice "that they claimed a lien on the coal for the freight thereon, and would deliver the coal only upon payment of the freight;" and presented to them a bill for the freight and wharfage. The plaintiffs then brought an action against the company, and replevied the coal.

At the trial, held in the Supreme Court of Massachusetts, the presiding judge ruled that the evidence did not show that the defendants had so far parted with the possession of the coal, as to have lost their lien for the freight, and a verdict was taken in favor of the defendants. It was then agreed that if the whole court should be of opinion that, upon the evidence, the plaintiffs could recover, the verdict should be set aside and a new trial ordered; otherwise the case should be sent to an assessor to determine the amount of damages, with such instructions as the court might direct. The following is the opinion of the Appellate Court, sustaining the ruling of the court below, in favor of the defendants.



Hoar, J.—It is true that where there is evidence in a case, upon which it would be competent for a jury to find a verdict for a plaintiff, an instruction by the presiding judge to the jury at the trial, that they ought to return a verdict for the defendant, would be erroneous. The sufficiency and the preponderance of the evidence are matters wholly within the province of the jury, except upon a motion for a new trial after verdict. But where the facts are undisputed, and the evidence, with all inferences which a jury can rightfully draw from it, does not, as a matter of law, have any tendency to establish a proposition which is essential to the maintenance of the plaintiffs' case, it is the duty of the judge so to instruct the jury. In this case, the defendants having received upon their wharf, and transported over their railroad the plaintiffs' coal, had a lien upon it for wharfage and carriage. Their right to retain it for their lien was indisputable, unless they had lost the lien by parting with the possession of the coal. The plaintiffs, to maintain their action of replevin, must show that they were entitled to the possession. To establish this, it was incumbent on them to prove a complete delivery of the coal, sufficient in law to terminate the carriers' lien. This was the fact which the jury must find upon competent evidence, or their verdict must be for the defendants. The jury, at the trial, were instructed that this fact was not proved; and the whole court are of that opinion. The evidence submitted to the jury was the testimony of a single witness, with certain admissions of the parties. There was no evidence that the plaintiffs had paid or tendered any part of the money due to the defendants, or were ready or offered to pay it, before they replevied the coal; nor of any agreement to give credit for it; nor that enough of each cargo did not remain to be ample security for the freight due upon that particular parcel. The plaintiffs, by the agreement of the parties, were to perform the labor of unloading the coal from the cars; but this being done upon the premises of the defendants, did not divest the possession. The jury had no evidence of any lease of the bins to the plaintiffs. There was nothing to show that the defendants might not have used the bins for any other coal, or required the plaintiffs to unload the coal at some other place, at their pleasure. It was then material to consider what delivery of the coal would be effectual to determine the lien.

By the contract, no credit for the freight being stipulated, the delivery of the coal by the defendants, and the payment of the freight by the plaintiffs, were acts to be done at the same time. A delivery may be complete for one purpose and not for another. The cases cited by the plaintiffs' counsel to show what constitutes a complete delivery, are all cases which decide either what delivery is sufficient to pass the property as between vendor and vendee, or what is sufficient to terminate the liability of a carrier. A delivery may be complete so far as either of those purposes is concerned, and yet be upon an implied condition as to payments; and upon failure to perform this condition, the right of possession of the party, making the delivery will remain unimpaired. This is a familiar doctrine as between vendor and vendee. If a man purchases goods at a shop for cash, and they are handed to him, or put by the shopkeeper into his wagon, and he then refuses to pay for them, no doubt they may be taken back.

The same principle applies to the lien of a carrier. The right of a carrier to payment for the carriage first exists when he has performed the contract on his part; and his lien would not be lost, were the delivery even much more unequivocal than that on which the plaintiffs here rely. Suppose the railroad company should allow a customer for whom they had brought a lot of flour, to unload it from the cars on to his wagon, and, as he started with the load, should demand the freight, could it be supposed that they would have no right to retake the flour, if he should refuse to pay? But suppose, instead of one load, there should be a hundred barrels, and the first load should be allowed to go without payment, the rest being taken from the cars and put upon the platform in the freight house, the company knowing that enough was left to make them secure, and the demand should be made as the owner was about removing the last load, could this destroy the right to retain for the lien? Where two acts are to be done simultaneously, under a contract, the obligation to do each is dependent upon the performance of the other, and each is done upon the implied condition that the other shall be done likewise. The plaintiffs in the absence of express agreement or regulation, might say that they would not pay their money until they received their goods; and the defendants that they would not deliver the goods until they received their money. If the goods were, as in this case, not capable of instantaneous delivery, it would be impossible to perform the contract unless one or the other should begin. And we think the one who begins loses none of his rights by so doing, in the absence of evidence that he has agreed to wave them.

As there was nothing in the case to show that enough of each cargo was not left to satisfy the lien for the freight of that cargo, and as the plaintiffs made no demand of any seperate portion of the coal, and proved no readiness to pay any freight whatever, no question seems to arise as to the extent of the defendants' lien. But we think it clear for various reasons, that they had a lien on the whole, for the whole sum claimed. Although the different cargoes which were carried were perhaps at first so far distinct subjects of contract, that the defendants might have delivered and demanded the freight for one, before delivering another, and the plaintiffs might have demanded one without waiting for the arrival of the whole, yet we think the mingling them together, indiscriminately, in the bins, shows that the whole was regarded by the parties as a continuous carriage and delivery of an entire quantity. But if this were not so, and the defendants had a separate lien upon each cargo for its freight and wharfage, then, as the plaintiffs mingled the several parcels so that they could not be distinguished, they must be held to have extended the lien upon each to the whole quantity remaining. This principle is well settled in regard to two persons having the general ownership of two parcels of similar goods; and it seems equally applicable to a case where one of them has a special property.

According to the agreement at the trial, the case is to be sent to an assessor, with directions to assess as damages the whole sum due for freight, and wharfage, with interest from the date of the writ, unless that agreement is now changed by the parties.

J. E. WOOTTEN'S
HYDRAULIC PINCH BAR,

READING R. R. SHOPS,
PHILADELPHIA.

H. N. WINANS, Agent,
NEW YORK.

Total weight, 10 lbs.

In use on the Reading, North Pennsylvania, New Jersey Central and other roads.

Always in working order—One man with it will move with ease any Engine and Tender—No slipping, and faster than with ordinary crowbar—Works as well on chilled tyre as on wrought—The bite is on the rail, and the Engine is bound to move forward as the lever is brought down.

The Grain Trade of the Northwest.

The following table shows the total receipts of grain in Chicago and Milwaukee during the six months ending June 30:

	Chicago. bushels.	Milwaukee. bushels.
Wheat and flour reduced..	8,282,579	7,096,220
Corn	10,142,475	103,289
Rye	989,313	135,912
Oats	449,618	83,970
Barley	423,594	51,569
Total	20,284,579	7,479,960

The following table shows the comparative receipts of flour and grain in Chicago during the first six months of the past four years:

	Bushels.
1862	20,284,579
1861	17,536,763
1860	12,399,300
1859	5,386,169

The receipts of wheat and flour alone, in Chicago and Milwaukee, since the first of January last, amount in the aggregate to 15,378,799 bushels. If we take the receipts at Racine, Kenosha, Waukegan, and the more northerly ports on Lake Michigan, the receipts of wheat and flour would probably reach nearly twenty millions of bushels.

The following table shows the receipts of produce at Chicago for three years from the 1st of January:

	1862.	1861.	1860.
Flour, bbls.	757,457	613,165	229,022
Wheat, bush.	5,096,822	5,232,484	1,848,202
Corn, bush.	11,383,476	9,433,364	9,233,009
Oats, bush.	1,059,901	511,932	612,978
Rye, bush.	465,498	227,427	61,722
Barley, bush.	431,225	306,387	190,358
Seeds, lbs.	2,329,520	2,562,983	2,600,554
Pork, bbls.	36,660	31,333	12,379
Cut meats, lbs.	17,262,715	8,274,425	6,788,988
Lard, lbs.	17,438,255	5,870,688	3,934,495
Tallow, lbs.	238,826	358,450	137,678
Live Hogs, No.	233,608	132,534	78,974
Dres'd Hogs, No.	172,363	144,115	45,200
Beef Cattle, No.	97,634	79,222	67,245

St. Andrews Railroad.

We learn from the Aroostook *Times* that the St. Andrews Railroad will be opened to the Houlton Road on the 10th inst. The managers are to have a grand opening celebration on that day at St. Andrews, consisting of a review of five companies of volunteers, boat race, and public dinner, etc. The station on the Houlton Road is within four miles of the Houlton Village, and the opening of the road to the station, the *Times* well remarks, marks a new era in the progress of Aroostook.

Toledo and Wabash Railroad.

The gross earnings of this road for the six months ending with June, 1861 and 1862, have been as follows:

	1861.	1862.
January	$58,339 33	$82,234 81
February	46,842 61	47,141 92
March	61,050 77	56,005 88
April	75,273 76	83,582 40
May	78,277 61	106,845 44
June	79,073 88	113,577 66
Total	$398,857 96	$489,388 11
		398,857 96
Increase in six months		$90,530 15

Cleveland and Pittsburg Railroad.

The following table will compare the earnings of the Cleveland and Pittsburg Railroad for the first half of the two last fiscal years:

	1860-61.	1861-62.
December	$63,980	$113,175
January	62,208	99,675
February	59,964	78,447
March	83,408	90,308
April	99,511	100,694
May	101,792	116,973
Total	$470,863	$599,272
		470,863
Increase		$128,400

Racine and Mississippi Railroad.

The entire grading on the Racine and Mississippi Railroad, between Freeport and Savanna, is completed, and 14 miles of the iron are laid. The balance is being laid at the rate of one mile per day, the iron upon the ground.

Tyron and Clearfield Railroad.

At a meeting of parties connected with the Tyron and Clearfield Railroad, held in this city, to take into consideration a project for completing and stocking the road, eighteen miles of which are finished north of Tyrone, it was understood that a proposition was to be made to the Pennsylvania Central Company to take a certain amount of the bonds of the organization at sixty cents on the dollar, to be paid off in freight upon their road, and another amount at forty cents on the dollar, to be paid for in cash.—*Philadelphia Inquirer.*

Railroad Bridge over the Ohio.

The bill allowing the construction of a railroad bridge over the Ohio river at Steubenville, has passed. The draw is to be two hundred and seventy feet long.

The Compound Spiral Car Spring.

More than three months ago Mr. R. Vose of this city patented a new car spring, it being a combination of steel and India rubber. Since then it has been fully tested under passenger and freight cars on the Erie, the Hudson River and the Central Railroads, and in every case, we learn, with the most satisfactory results. A bar of steel of the requisite dimensions—say 5 feet long, by 1½ inch broad and ⅜ inch thick—is fluted on each side and then bent edgewise into a spiral coil with six inches in diameter and seven or eight inches in height. Between the spiral lines is placed a layer of rubber, say ¾ of an inch in thickness. Both are tapered at top and bottom, enabling the coil to sit perfectly level in the caps covering its extremities. The spring, however, can be made of any required length or weight.

The advantages claimed for this invention are obvious. The thorough packing between the layers and the fluted form of the bar combine to furnish the utmost strength, elasticity and durability. It is easily adjusted to a passenger or freight car, and at the same time is economical in price. Full particulars may be learned at the office of the Metallic Car Spring Company, 54 William street, in this city.

The Gold and Currency Question.

The recent rapid advance in gold is but the necessary result of a law which is as certain and unerring in its operation as that of gravity; of an attempt, a thousand times repeated, with no other end but signal failure. It is an attempt to make a shadow perform the office of substance; to lean upon a representative that has no constituent, while the catastrophe in the end must be as signal and disastrous as has been the mistake, or wrong, that has been committed.

The value of gold and silver depends simply upon their cost. They have other attributes fitting them for currency, but these are of minor importance. By adopting them as currency, we have a certain and definite standard whereby to measure the business transactions of society—a standard the fluctuations in which are so gradual that society can always adapt itself to them without injury or harm to any interest. In place of such standard we have now adopted one, the value of which rests entirely upon popular estimation. At one time its market value may be 20 per cent. below its nominal value, judged by the test of cost, whether this standard be gold, or food, or clothing. The market value of the national currency to-day is 16 or 17 per cent. below par. It may in a week fall to 25 per cent. discount. Its value will continue to depend entirely upon what people think it is worth. It cost nothing, or next to nothing. Its real value depends upon the degree of faith in the government, which faith, in all countries, and under all circumstances, may be termed an unknown quantity, always vibrating or oscillating, and never the same at two several periods, from the presence of these conditions which promise or threaten the stability and permanence of the power, or government, that issues it.

In this debasement of the government currency, unfortunately, that furnished by the States equally shares, assuming this to be $450,000,000, made up of the deposits and bills in circulation of the State banks, the total debased paper currency in the loyal States at the present time is $600,000,000. Seventeen per cent. on this amount is $100,000,000, which measures the loss already sustained by the pub-

lic. The Secretary of the Treasury recently congratulated the nation, that its whole debt was paying an interest of only 4½ per cent. He overlooked the vastly more important fact, that the people have already lost more than three times the present annual interest on the public debt, in being compelled to receive a depreciated currency, to say nothing of the financial embarrassments to which the adoption of a principle radically false must in the end lead.

While the rise in gold, and consequent depreciation of the currency was natural and inevitable, it is remarkable that property of all kinds remains very nearly at previous prices—in other words, has not yet, like gold, felt the effects of the inflation of the common measure of values. We can account for this solecism only on the ground of the brief period of time during which the disturbing causes have been in action. It was a long time before gold was affected by a redundant currency. It rose at first to 104½; then fell off to 101½, fluctuating constantly in price, although each succeeding wave rose higher and higher. Such must be the rule with securities of all kinds. Their prices above the gold standard must correspond to the premium paid for this article, and as by far the greater portion of those usually dealt in are no higher than they were when paid for in currency when gold was only at one to two per cent. premium, it necessarily follows that they must rise to correspond to the advance in gold, or, assuming this to be stationary at present prices, to some ten or fifteen per cent. above their present rates.

Such in the end must be the result. The immediate effect of the law stated may be temporarily evaded, or controlled, by the progress or condition of political, or military events. At present the market shows weakness under unsatisfactory news from the various fields of military operations and controversies in Congress. Similar questions for a long time controlled the gold question. The metal made up for a generally slow advance by several startling bounds, all of which, with some slight fluctuations were held. It will be so in the Stock Market. The natural relation of prices cannot be subverted, though for a time modified and controlled by interlering causes which must be temporary, no matter how powerful for the moment, they may be in their influence.—*Hallett's Financial Circular.*

Grain Trade of Buffalo.

The following comparative table will show the imports of flour and grain into Buffalo from the opening of navigation to July 1, in the years 1859, 1860, and 1861, and from January 1 to July 1, in 1862:

	Grain, bush.	Flours, bbls.	Total grain, including flour reduced to wheat.
1859	2,257,587	434,655	4,430,862
1860	6,543,256	327,056	8,178,536
1861	11,598,164	598,461	15,591,619
1862	14,908,908	1,037,349	10,095,653

The canal exports from the opening, May 1, to July 1, 1862, will be shown by the following:

Flour, bbls.	170,577
Wheat, bush.	7,730,067
Corn, bush	5,319,290
Oats, bush.	405,635
Barley bush.	93,502
Rye, bush.	241,695
Total grain	13,790,189

The revenues from canal tolls show a large increase—the receipts this year, from the opening to July 1, having been $825,583 83 against $428,078 in 1861, and $286,822 81 in 1860.

Reduction of Credit in the Iron Trade.

A well-considered general movement has been made among the manufacturers and dealers, having for its object the establishment of a uniform system of credit in the trade limited to four months. It is proposed to complete and to ratify this arrangement through a public meeting called at the board of Trade rooms of this city on Tuesday next, July 15, to which meeting leading houses in the iron trade have been invited from all parts of the country. The change proposed is not so much of a restriction as a regulation of credits, since many makers and dealers have insisted upon a near approximation to a cash business, making their customers pay liberally for credits of the old sort, or rather deducting liberally from the old credit prices for cash at the time of sale. The general credits given have, however, been six months heretofore between entirely responsible parties, and for such this movement is a reduction which it is believed all of this class can bear without inconvenience.—*Philadelphia North American, 12th July.*

Railroad Earnings--Weekly.

The earnings by the Chicago, Burlington and Quincy Railroad for the 1st week in July, 1862, were $58,096 65
Do., 1861 36,325 49

Increase $21,771 16

The Chicago and Rock Island Railroad earned the 1st week of July, 1862 $31,091
Do., 1861 23,956

Increase $7,135

The earnings of the Cleveland and Toledo Railroad for the 1st week in July, 1862, were $14,006
Do., 1861 12,220

Increase $1,876

The Michigan Southern road shows a gain of about $14,000 on the first week of July.

The traffic of the Great Western Railway of Canada for the week ending July 4, 1862, was as follows:

Passenger	$20,526 12
Freight and live stock	18,741 86
Mails and sundries	1,399 33
Total	$40,667 31
Corresponding week of last year	29,500 64
Increase	$11,166 67

The earnings of the Chicago and Northwestern Railroad the 1st week in July were $18,487 40
Corresponding week, 1861 14,767 32

Increase $3,720 08

The earnings of the Toledo and Wabash Railroad for 1st week of July, 1862, were $27,985 87
Do., 1861 20,056 03

Increase $7,920 84

The earnings of the Galena and Chicago Railroad the 1st week in July, 1862, were $48,144 77
Do., 1861 34,131 74

Increase $14,013 03

The earnings of the St. Louis, Alton and Chicago Railroad for the 1st week in July, were:
1862 $20,242 78
1861 14,089 43

Increase $6,153 35

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 1st week of July, 1862, were $24,897 24
Corresponding week, 1861. 22,745 29

Increase $2,151 95

The Michigan Central earned in the 1st week in July, 1862 $29,862 62
Do., 1861 88,989 00

Increase $9,126 98

Railroad Earnings--Monthly.

The earnings of the St. Louis, Alton and Chicago Railroad for June, 1862, were $88,222 80
Do., 1861 63,761 21

Increase $24,461 69
Total since Jan. 1, 1862 $518,447 46
Do. do. 1861 439,882 25

Increase $78,565 21

The earnings of the Buffalo, New York and Erie Railway, for the month of June were:
1862 $60,154 13
1861 45,993 11

Increase $14,161 02

The earnings of the Chicago and Northwestern Railroad in June, 1862, were $104,382
Corresponding month, 1861 83,229

Increase $21,153

The earnings of the Milwaukee and Prairie du Chien Railroad for June were $144,915 42
Corresponding month, 1861 141,771 03

Increase in 1862 $3,144 39
Total traffic from Jan'y 1st, 1862. $530,712 93
Corresponding period previous year. 445,048 05

Increase $85,664 88

The earnings of the Dayton and Michigan Railroad for June, 1862, were $40,405 36
Do., 1861 25,374 42

Increase $15,020 94

American Railroad Journal.

Saturday, July 19, 1862.

The War and Southern Railroads.

Before the outbreak of hostilities, about half the railroads that had been constructed in the Southern States for a number of years were paying dividends. One or two old lines, like the South Carolina, were indeed becoming less remunerative to their stockholders than formerly; but as a whole their condition was improving, and their prospects for the most part tolerably good. There was no reason to doubt that the principal works traversing Alabama, Mississippi, Louisiana, Tennessee, Arkansas and Texas, would ultimately pay reasonably well, any more than those of Georgia. In the cotton zone they enjoyed all but a monopoly of the transportation of the great staple of that section; and in hardly any case had a reckless competition sprung up between rival lines, as in too many States at the North. All the experience that had been gained here by years of heavy outlay and loss, operated in favor of the recently constructed works in the Gulf States. If, under such favorable circumstances, they should turn out unremunerative, when had the iron way a chance to vindicate its claims?

All these fine prospects have been rudely dashed to earth by the war. The railroad has suffered its full share in the devastation which has visited the South. Scores of costly bridges and depots have been burned; tracks have been torn up; engines and cars carried off, thrown into rivers, or in some other way rendered useless to the owners. This mad work of ruin began with the Baltimore and Ohio, which for many months was blockaded, its track torn up and its rolling stock rendered useless. To this day, though the general government has spent large sums in rebuilding it, the condition of that great work is not so good as it was in March, 1861, to say nothing of the non-payment of dividends and interest, or the losses which Baltimore has sustained in her foreign and domestic trade.

The fell spirit of mischief which wrought so much evil in Maryland and Virginia, also made itself felt along the different lines of travel in Missouri, Kentucky, Tennessee, and wherever else the demon of discord was let loose. The railroad and its equipment were invariably among the first victims.

Indeed, the war, original in so many respects, was in no respect more original than in the fact that it constituted these costly works of internal improvement so many bones of contention for the belligerent parties. The junction of two of them, though barely half a dozen houses stood alongside, more than once became a strategic position of prime importance. The points for whose possession armies stood longest in hostile array before each other, were nothing more or less than railroad junctions. Of these, three loom up in especial importance, though the existence of two of them was scarcely known previously to the traveling world. In Virginia, Manassas; in Kentucky, Bowling Green, and in Mississippi, Corinth, have become historical spots. We had almost said that more time and money were spent upon those three points, than half the cities and rivers in the South.

Such being the case, it necessarily followed that the railroad suffered in its bed, its superstructure, its equipment, its business. It was a most costly machine provided ready to the party which could first seize and possess it. It was perfectly helpless against such a perversity of purpose, however deeply its owners might deplore the use to which it was being put.

We could wish that this were the only manner in which the railroad interest of the South will suffer from the war. Unfortunately it is drying up the sources of Southern industry, leaving in places little else than a desert, from which directors may henceforth look for business. The crops of whole States are being trodden down or suffered to perish for want of labor to remove them. This is not well; for Europe is now heartily in earnest to supply herself with cotton independent of this country altogether. For this purpose the Indian Government is expending $10,000,000 per annum to complete the system of railways soon to spread over that great peninsula. Africa, Central and South America, the Polynesian Islands, Southern Europe, China—every country on the globe bordering on the tropics—will be tested as to its capability to grow this almost omnipotent fibre. With every day's prolongation of resistance, the loss of our monopoly of the world's cotton market becomes more certain as well as immediate. The utter demoralization of the labor system of the South only tends to aggravate the evil.

In such conditions the prospects of railroads at the South must be irritated enough for many years to come, in any supposable termination of the struggle. However we may all deplore the fact, there is no possible closing of the eyes to its existence. As to works only in progress, a veto power has been put upon their completion for a decade, if not a whole generation.

☞ The injuries sustained by the Delaware and Hudson Canal during the flood on 5th and 6th of June last, we understand, have been permanently repaired, and the navigation resumed. Boats are now passing through the Lackawaxen Suspension Aqueduct, which has been most substantially rebuilt.

La Crosse and Black River Railroad.

We learn from the La Crosse *Democrat* that the exploring party, Messrs. Spence, Bliss, Cramer, Barton and others, have returned from the survey of the railroad route from La Crosse to Black River Falls via Stevenstown, and their report is much better than was expected. The distance is but forty-six miles, and the route very easy. The road bed can be built ready for ties at about half the cost usually incurred even in the West. Measures will be taken to push the matter right ahead. The *Democrat* says:

"The completion of this railroad will be of the greatest benefit to La Crosse as the entire country through which it passes, and north of the terminus, Jackson county, of which Black River Falls is the county seat, has now 285,000 acres of land yet unentered! Of this, at least 190,000 would make excellent farms, if there were a means offered to ship the surplus produce raised, which now requires wagon or sleigh cartage of about fifty miles to convey it to a profitable market.

Again, the average amount of lumber yearly run out of Black River to La Crosse and lower ports is about 66,000,000. Much of this is cut in Clarke county, north of Jackson, but manufactured at or this side the Falls, and then rafted. There are forty-one saw mills now running on Black River and its tributaries, and two more in course of erection. Clark county has 9, Jackson county 30, and La Crosse county 2. The largest are in Jackson county. The building of this road will at once make this city the point where all the supplies for these mills will be purchased—will give it much profitable business in freighting supplies and passengers, as well as in hauling the manufactured lumber. Besides, the iron mines of that section can be profitably worked, and the natural result of this interprise, as sure to follow as day follows night, will be a large addition to the wealth and population of this and northern counties and a large increase of the business of this city."

Morris and Essex Railroad.

The annual meeting of this company was held at Newark on the 18th ult. The gross earnings of the road for the year ending December 31, 1861, were:

From passengers	$124,624 90
" freight	78,595 05
" mails and sundries	7,764 06
	$210,984 01

And the expenses were:

Repairs of road, building bridges, etc.	$31,645 62	
Repairs of engines and cars	20,478 48	
Wood, oil and waste	19,112 28	
Operating the road and transporting passengers and freight	43,466 47	
Salaries and insurance	7,246 56	
		121,949 41
Balance		$89,034 60
Balance of interest account		19,888 32

Two dividends, of 3½ per cent. each, have been paid amounting to $81,046.

The balance sheet of the company is as follows:

Capital stock	$1,157,800 00
Funded debt	340,000 00
Contingent fund	260,191 12
Total	$1,757,991 12
Cost of road and appendages	$1,627,362 52
Capital stock Newark & Bloomfield Railroad Co.	55,000 00
Capital stock Telegraph Co.	2,000 00
Wood on hand, paid for.	6,180 00
Cash and cash items	67,448 60
Total	$1,757,991 12

The commencement of the extension of the road from Hackettstown has been deferred on account of the unsettled state of affairs in the country; but the directors have been engaged in taking preliminary measures for the work when it shall be deemed expedient to commence it.

Imports of Dry Goods at New York.

The value of all the dry-goods imported during the month of June was—for consumption, $3,251,425; for warehousing, $283,677; total, 3,535,102. The value of dry-goods withdrawn from warehouse was $735,881. Compared with the imports of June, 1861, the imports and withdrawals are more than five to one, while the goods entered for warehousing show a decrease almost equally great. For the past six months the aggregate value of imports was $20,295,551, and of withdrawals, $8,048,139, making $28,343,740. This scarcely varies from the total amount for the corresponding period of last year, while the one before footed up to $50,483,134. The value of goods warehoused this year was $4,262,199.

The following statement shows the imports of foreign dry-goods at New York for six months and for the fiscal year ending with June:

Imports of Foreign Dry Goods at New York for six months from January 1.

	1860.	1861.	1862.
Entered for consumption:			
Manufactures of wool	$13,953,617	$5,163,334	$8,913,200
" cotton	8,795,760	2,417,774	3,530,184
" silk	16,734,144	6,168,432	4,102,162
" flax	3,705,704	1,203,402	2,843,940
Miscellaneous dry goods	2,580,998	1,445,971	906,065
Total	$45,770,123	$16,408,913	$20,295,551
Withdrawn from warehouse:			
Manufactures of wool	$1,278,609	$3,614,043	$2,721,467
" cotton	1,661,507	2,243,515	2,127,785
" silk	902,657	3,220,541	1,755,692
" flax	497,392	1,236,434	1,057,850
Miscellaneous dry goods	377,816	629,423	385,395
Total	$4,718,011	$11,943,966	$8,048,189
Add entered for consumption	45,770,123	16,408,913	20,295,551
Total thrown on the market	$50,488,134	$28,352,879	$28,343,740

Imports of Foreign Dry Goods at New York for six months Entered for warehousing:

	1860.	1861.	1862.
Manufactures of wool	$1,892,174	$4,395,122	$1,976,493
" cotton	1,426,929	3,446,798	1,175,844
" silk	955,609	3,766,773	638,564
" flax	215,477	1,288,342	396,282

" flax	8,548,281	3,944,214	3,783,191
Miscellaneous Dry Goods	6,469,600	4,806,586	1,374,001
Total entered for consumption	$97,477,801	$59,755,699	$30,148,668

Withdrawn from warehouse for consumption:

	1860.	1861.	1862.
Manufactures of wool	$3,388,431	$5,589,542	$5,657,751
" cotton	2,166,919	3,968,671	3,374,568
" silk	1,396,011	3,841,430	2,669,710
" flax	911,214	1,531,324	1,698,497
Miscellaneous Dry Goods	635,263	809,507	545,157
Total withd'n from warehouse	$7,497,868	$15,889,474	$14,975,683
Add entered for consumption	97,477,801	59,755,599	30,148,668
Total thrown on the market	$105,975,669	$75,545,173	$45,114,341
Entered for warehousing:			
Manufactures of wool	$3,981,742	$7,376,464	$3,570,921
" cotton	3,029,175	6,444,136	1,599,128
" silk	1,778,646	5,746,806	2,064,555
" flax	804,693	2,679,161	545,590
Miscellaneous Dry Goods	771,148	1,308,079	226,868
Total warehouse entries	$10,365,404	$23,554,646	$8,007,062
Add consumption entries	57,477,801	59,755,699	30,148,668
Total entered at the port	$107,943,205	$83,310,345	$38,155,720

Imports of Foreign Dry Goods for the fiscal year:

	1860.	1861.	1862.
July	$15,818,091	$12,707,213	$1,476,887
August	15,146,907	14,990,044	3,536,333
September	6,528,066	6,740,183	2,102,064
October	4,718,793	6,327,907	1,971,541
November	6,224,969	5,797,556	2,506,926
December	8,756,906	7,709,721	2,004,219
January	11,770,005	10,966,857	2,965,252
February	13,980,683	6,791,936	5,344,514
March	9,022,403	5,836,076	6,491,901
April	4,865,743	2,767,645	3,296,499
May	5,581,593	2,489,823	2,944,433
June	5,436,042	1,206,352	4,535,102
Total	$107,943,205	$83,310,345	$38,155,720

Imports of Dry Goods for the year ending with June:

	1860.	1861.	1862.
Manufactures of wool	$35,418,825	$28,687,676	$18,032,163
" cotton	21,368,306	14,057,141	6,033,980
" silk	35,462,352	27,827,488	8,139,932
" flax	9,252,974	6,623,375	4,328,781
Miscellaneous Dry Goods	6,240,748	6,114,665	1,600,859
Total imports	$107,943,205	$83,310,345	$38,155,720

Taking the whole year into account, the aggregate value of dry goods entered for consumption was $30,148,668, against $59,755,699 for the previous year, and $97,477,801 for 1859-60. If we add the amounts withdrawn from warehouse, these figures respectively will be $45,114,351, $75,545,173, and $105,975,669. It will be seen that the foreign dry goods thrown on the market last year amounted to only about forty-two per cent. of their value in 1859-60.

Annexed we give the imports of foreign dry goods at New York for a period of twelve years. It will be seen that those of last year are less than half the average:

Year.	Value Imported.
1850-1	$64,613,747
1851-2	57,221,062
1852-3	79,192,513
1853-4	92,389,627
1854-5	62,918,443
1855-6	85,898,690
1856-7	$92,669,088
1857-8	67,317,736
1858-9	93,549,083
1859-60	107,843,205
1860-1	83,310,345
1861-2	38,155,720

Commerce of the Port of New York.

Receipts of certain articles of domestic produce at New York for six months from January 1:

	1860.	1861.	1862.
Ashes, brls	12,334	10,353	10,253
Wheat flour, brls	1,140,774	1,577,696	3,252,616

Coinage at the U. S. Mint.

The following table shows the value of the Gold, Silver and Copper coined at the United States Mint in Philadelphia for the last six months:

	Gold.	Silver.	Copper.
January	$415,539 00	$124,411 50	$12,000
February	305,251 50	117,920 00	10,000
March	163,737 00	50,260 00	11,000
April	154,188 00	26,900 00	10,000
May	160,421 00	26,500 00	10,000
June	583,206 00	42,600 00	15,000
Total	$1,791,412 50	$388,591 50	$68,000

Aggregate value of whole, $2,248,004.

Value of fine gold bars made from January 1, 1862, to June 30, 1862, $31,738 16; number of bars, 46.

Value of fine silver bars made from Jan. 1 to June 30, 1862, $1,797 78; number of bars, 12.

The Union Pacific Railroad Bill,

AS IT PASSED BOTH HOUSES OF CONGRESS.

AN ACT to aid in the construction of a railroad and telegraph line from the Missouri river to the Pacific Ocean, and to secure to the Government the use of the same for postal, military, and other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Walter S. Burgess, Wm. P. Blodget, Benjamin H. Cheever, Charles Fosdick Fletcher, of Rhode Island; Augustus Brewster, Henry P. Haven, Cornelius S. Bushnell, Henry Hammond, of Connecticut; Isaac Sherman, Dean Richmond, Royal Phelps, William H. Ferry, Henry A. Paddock, Lewis J. Stancliff, Charles A. Secor, Samuel R. Campbell, Alfred E. Tilton, John Anderson, Azariah Boody, John S. Kennedy, H. Carver, Joseph Field, Benjamin F. Camp, Orville W. Childs, Alexander J. Bergen, Ben. Holliday, D. N. Barney, S. De Witt Bloodgood, William H. Grant, Thomas W. Olcott, Samuel B. Ruggles, James B. Wilson, of New York; Ephraim Marsh, Charles M. Harker, of New Jersey; John Edgar Thomson, Benjamin Haywood, Joseph H. Scranton, Joseph Harrison, George W. Cass, John H. Bryant, Daniel J. Morell, Thomas M. Howe, William F. Johnson, Robert Finney, John A. Green E. R. Myre, Charles F. Wells, junior, of Pennsylvania; Noah L. Wilson, Amasa Stone, William H. Clement, S. S. L'Hommedieu, John Brough, William Dennison, Jacob Blickensderfer, of Ohio; William M. McPherson, R. W. Wells, Willard P. Hall, Armstrong Beatty, John Corby, of Missouri; S. J. Hensley, Peter Donahue, C. P. Huntington, T. D. Judah, James Bailey, James T. Ryan, Charles Hosmer, Charles Marsh, D. O. Mills, Samuel Bell, Louis McLane, George W. Mowe, Charles McLaughlin, Timothy Dame, John R. Robinson, of California; John Atchison, John D. Winters, of the Territory of Nevada; John D. Campbell, R. N. Rice, Charles A. Trowbridge, Ransom Gardner, Charles W. Penny, Charles T. Gorham, William McConnell, of Michigan; William F. Coolbaugh, Lucius H. Langworthy, Hugh T. Reid, Hoyt Sherman, Lyman Cook, Samuel R. Curtis, Lewis A. Thomas, Platt Smith of Iowa; William B. Ogden, Charles G. Hammond, Henry Farnum, Amos C. Babcock, W. Seldon Gale, Nehemiah Bushnell, Lorenzo Bull, of Illinois; William H. Swift, Samuel T. Dana, John Bertram, Franklin S. Stevens, Edward R. Tinker, of Massachusetts; Franklin Gorin, Laban J. Bradford, John T. Lovis, of Kentucky; James Dunning, John M. Wood, Edwin Noyes, Joseph Eaton, of Maine; Henry H. Baxter, George W. Collamer, Henry Keyes, Thomas H. Canfield, of Vermont; William S. Ladd, A. M. Berry, Benjamin F. Harding of Oregon; William Bunn, junior, John Catlin, Levi Sterling, John Thompson, Elihu L. Philips, Walter D. McIndoe, T. B. Soddard, E. H. Broadhead, A. H. Virgen, of Wisconsin; Charles Paine, Thomas A. Morris, David C. Branham, Samuel Hanna, Jonas Votaw, Jesse L. Williams, Isaac C. Elston, of Indiana; Thomas Swann, Chauncey Brooks, Edward Wilkins, of Maryland; Francis R. E. Cornell, David Blakely, A. D. Seward, Henry A. Swift, Dwight Woodbury, John McCusick, John R. Jones, of Minnesota; Joseph A. Gilmore, Charles W. Woodman, of New Hampshire; W. H. Grimes, J. C. Stone, Chester Thomas, John Kerr, Werter R. Davis, Luther C. Challis, Josiah Miller, of Kansas; Gilbert C. Monell, Augustus Kountz, T. M. Marquette, William H. Taylor, Alvin Saunders, of Nebraska; and John Evans, of Colorado; together with five commissioners to be appointed by the Secretary of the Interior, and all persons who shall or may be associated with them, and their successors are hereby created and erected into a body corporate and politic in deed and in law, by the name, style, and title of "The Union Pacific Railroad Company;" and by that name shall have perpetual succession, and shall be able to sue and to be sued, plead and be impleaded, defend and be defended, in all courts of law and equity within the United States, and may make and have a common seal; and the said corporation is hereby authorized and empowered to lay out, locate, construct, furnish, maintain, and enjoy a continuous railroad and telegraph, with the appurtenances, from a point on the one hundredth meridian of longitude west from Greenwich, between the south margin of the valley of the Republican river and the North margin of the valley of the Platte river, in the Territory of Nebraska, to the western boundary of Nevada Territory, upon the route and terms hereinafter provided, and is hereby vested with all the powers, privileges and immunities necessary to carry into effect the purposes of this act as herein set forth. The capital stock of said company shall consist of one hundred thousand shares of one thousand dollars each, which shall be subscribed for and held in not more than two hundred shares by any one person, and shall be transferable in such manner as the by-laws of said corporation shall provide. The persons hereinbefore named, together with those to be appointed by the Secretary of the Interior, are hereby constituted and appointed commissioners, and such body shall be called the Board of Commissioners of the Union Pacific Railroad and Telegraph Company, and twenty-five shall constitute a quorum for the transaction of business. The first meeting of said board shall be held at Chicago at such time as the commissioners from Illinois herein named shall appoint, not more than three nor less than one month after the passage of this act, notice of which shall be given by them to the other commissioners by depositing a call thereof in the post office at Chicago, post-paid, to their address, at least forty days before said meeting, and also by publishing said notice in one daily newspaper in each of the cities of Chicago and St. Louis. Said board shall organize by the choice from its number of a president, secretary, and treasurer, and they shall require from said treasurer such bonds as may be deemed proper, and may from time to time increase the amount thereof as they may deem proper. It shall be the duty of said board of commissioners to open books, or cause books to be opened, at such times and in such principal cities in the United States as they or a quorum of them shall determine, to receive subscriptions to the capital stock of said corporation, and a cash payment of ten per centum on all subscriptions, and to receipt therefor. So soon as two thousand shares shall be in good faith subscribed for, and ten dollars per share actually paid into the treasury of the company, the said president and secretary of said board of commissioners shall appoint a time and place for the first meeting of subscribers to the stock of said company, and shall give notice thereof in at least one newspaper in each State in which subscription books have been opened at least thirty days previous to the day of meeting, and such subscribers as shall attend the meeting so called, either in person or by proxy, shall then and there elect by ballot not less than thirteen directors for said corporation; and in such election each share of said capital shall entitle the owner thereof to one vote. The president and secretary of the board of commissioners

shall act as inspectors of said election, and shall certify under their hands the names of the directors elected at said meeting; and the said commissioners, treasurer and secretary shall then deliver over to said directors all the properties, subscription books and other books in their possession, and thereupon the duties of said commissioners and the officers previously appointed by them shall cease and determine forever, and thereafter the stockholders shall constitute said body politic and corporate. At the time of the first and each triennial election of directors by the stockholders two additional directors shall be appointed by the President of the United States, who shall act with the body of directors, and to be denominated directors on the part of the government; any vacancy happening in the government directors at any time may be filled by the President of the United States. The directors to be appointed by the President shall not be stockholders in the Union Pacific Railroad Company. The directors so chosen shall, as soon as may be after their election, elect from their own number a president and vice-president, and shall also elect a treasurer and secretary. No person shall be a director in said company unless he shall be a bona fide owner of at least five shares of stock in the said company, except the two directors to be appointed by the President as aforesaid. Said company, at any regular meeting of the stockholders called for that purpose, shall have power to make by-laws, rules and regulations as they shall deem needful and proper, touching the disposition of the stock, property, estate and effects of the company, not inconsistent herewith, the transfer of shares, the term of office, duties and conduct of their officers and servants, and all matters whatsoever which may appertain to the concerns of said company, and the said board of directors shall have power to appoint such engineers, agents and subordinates as may from time to time be necessary to carry into effect the object of this act, and to do all acts and things touching the location and construction of said road and telegraph. Said directors may require payment of subscriptions to the capital stock, after due notice, at such times and in such proportions as they shall deem necessary to complete the railroad and telegraph within the time in this act prescribed. Said president, vice-president and directors shall hold their office for three years, and until their successors are duly elected and qualified, or for such less time as the by-laws of the corporation may prescribe; and a majority of said directors shall constitute a quorum for the transaction of business. The secretary and treasurer shall give such bonds, with such security, as the said board shall from time to time require, and shall hold their offices at the will and pleasure of the directors. Annual meetings of the stockholders of the said corporation, for the choice of officers (when they are to be chosen) and the transaction of annual business, shall be holden at such time and place and upon such notice as may be prescribed by the by-laws.

Sec. 2. And be it further enacted, That the right of way through the public lands be, and the same is hereby granted to said company for the construction of said railroad and telegraph line; and the right, power and authority is hereby given to said company to take from the public lands adjacent to the line of said road, earth, stone, timber and other materials for the construction thereof; said right of way is granted to said railroad to the extent of two hundred feet in width on each side of the line of said railroad where it may pass over the public lands, including all necessary grounds for stations, buildings, workshops and depots, machine shops, switches, side tracks, turntables and water stations. The United States shall extinguish as rapidly as may be the Indian titles to all lands falling under the operation of this act and required for the said right of way and grants hereinafter made.

Sec. 3. And be it further enacted, That there be and is hereby granted to said company, for the purpose of aiding in the construction of said railroad and the telegraph line, and to secure the safe and speedy transportation of the mails, troops, munitions of war, and public stores thereon, every alternate section of public land, designated by odd numbers, to the amount of five alternate sections per mile on each side of said railroad, on the line thereof, and within the limits of ten miles on each side of said road, not sold, reserved, or otherwise disposed of by the United States, and to which a pre-emption or homestead claim may not have attached, at the time the line of said road is definitely fixed: Provided, That all mineral lands shall be excepted from the operation of this act; but where the same shall contain timber, the timber thereon is hereby granted to said company. And all such lands, so granted by this section, which shall not be sold or disposed of by said company within three years after the entire road shall have been completed, shall be subject to settlement and pre-emption, like other lands, at a price not exceeding one dollar and twenty-five cents per acre, to be paid to said company.

Sec. 4. And be it further enacted, That whenever said company shall have completed forty consecutive miles of any portion of said railroad and telegraph line, ready for the service contemplated by this act, and supplied with all necessary drains, culverts, viaducts, crossings, sidings, bridges, turnouts, watering places, depots, equipments, furniture, and all other appurtenances of a first class railroad, the rails and all the other iron used in the construction and equipment of said road to be American manufacture of the best quality, the President of the United States shall appoint three commissioners to examine the same and report to him in relation thereto; and if it shall appear to him that forty consecutive miles of said railroad and telegraph line have been completed and equipped in all respects as required by this act, then, upon certificate of said commissioners to that effect, patents shall issue conveying the right and title to said lands to said company, on each side of the road as far as the same is completed, to the amount aforesaid; and patents shall in like manner issue as each forty miles of said railroad and telegraph line are completed, upon certificate of said commissioners. Any vacancies occurring in said Board of Commissioners by death, resignation, or otherwise, shall be filled by the President of the United States: Provided, however, that no such commissioners shall be appointed by the President of the United States unless there shall be presented to him a statement, verified on oath by the President of said company, that such forty miles have been completed in the manner required by this act, and setting forth with certainty the points where such forty miles begin and where the same end; which oath shall be taken before a judge of a court of record.

Sec. 5. And be it further enacted, That for the purpose herein mentioned, the Secretary of the Treasury shall upon the certificate in writing of said commissioners of the completion and equipment of forty consecutive miles of said railroad and telegraph, in accordance with the provisions of this act, issue to said company bonds of the United States of one thousand dollars each, payable in thirty years after date, bearing six per centum per annum interest, (said interest payable semi-annually,) which interest may be paid in United States treasury notes or any other money or currency which the United States have or shall declare lawful money and a legal tender, to the amount of sixteen of said bonds per mile for such section of forty miles; and to secure the repayment to the United States, as hereinafter provided, of the amount of said bonds so issued and delivered to said company, together with all interest thereon which shall have been paid by the United States, the issue of said bonds and delivery to the company shall ipso facto constitute a first mortgage on the whole line of the railroad and telegraph, together with the rolling stock, fixtures and property of every kind and description, and in consideration of which said bonds may be issued; and on the refusal or failure of said company to redeem said bonds, or any part of them when required so to do by the Secretary of the Treasury, in accordance with the provisions of this act, the said road, with all the rights, functions, immunities and appurtenances thereunto belonging, and also all lands granted to the said company by the United States, which, at the time of said default, shall remain in the ownership of the said company, may be taken possession of by the Secretary of the Treasury, for the use and benefit of the United States: Provided, This section shall not apply to that part of any road now constructed.

Sec. 6. And be it further enacted, That the grants aforesaid are made upon condition that said company shall pay said bonds at maturity, and shall keep said railroad and telegraph line in repair and use, and shall at all times transmit dispatches over said telegraph line, and transport mails, troops, and munitions of war, supplies, and public stores upon said railroad for the Government, whenever required to do so by any department thereof, and that the Government shall at all times have the preference in the use of the same for all the purposes aforesaid, (at fair and reasonable rates of compensation, not to exceed the amounts paid by private parties for the same kind of service;) and all compensation for services rendered for the Government shall be applied to the payment of said bonds and interest until the whole amount is fully paid. Said company may also pay the United States, wholly or in part, in the same or other bonds, treasury notes, or other evidences of debt against the United States, to be allowed at par; and after said road is completed, until said bonds and interest are paid, at least five per centum of the net earnings of said road shall also be annually applied to the payment thereof.

Sec. 7. And be it further enacted, That said company shall file their assent to this act, under the seal of said company, in the Department of the Interior, within one year after the passage of this act, and shall complete said railroad and telegraph from the point of beginning as hereinafter provided, to the western boundary of Nevada Territory before the first day of July, one thousand eight hundred and seventy-four: Provided, That within two years after the passage of this act said company shall designate the general route of said road as near as may be, and shall file a map of the same in the Department of the Interior, whereupon the Secretary of the interior shall cause the lands within fifteen miles of said designated route or routes, to be withdrawn from pre-emption private entry, and sale; and when any portion of said route shall be finally located, the Secretary of the Interior shall cause the lands hereinbefore granted to be surveyed and set off as fast as may be neccessary for the purposes herein named: Provided, That in fixing the point of connexion of the main trunk with the eastern connexions, it shall be fixed at the most practicable point for the construction of the Iowa and Missouri branches as hereinafter provided.

Sec. 8. And be it further enacted, That the line of said railroad and telegraph shall commence at a point on the one hundreth meridian of longitude west from Greenwich, between the south margin of the valley of the Republican river and the north margin of the valley of the Platt river, in the Territory of Nebraska, at a point to be fixed by the President of the United States, after actual surveys; thence running westerly upon the most direct central and practicable route, through the territories of the United States, to the western boundary of the Territory of Nevada, there to meet and connect with the line of the Central Pacific Railroad Company of California.

Sec. 9. And be it further enacted, that the Leavenworth, Pawnee and Western Railroad Company of Kansas are hereby authorized to construct a railroad and telegraph line from the Missouri river, at the mouth of the Kansas river on the south side thereof, so as to connect with the Pacific Railroad of Missouri, to the aforesaid point, on the one hundredth meridian of longitude west from Greenwich, as herein provided, upon the same terms and conditions in all respects as are provided in this act for the construction of the

railroad and telegraph line first mentioned, and to meet and connect with the same at the meridian of longitude aforesaid; and in case the general route or line of road from the Missouri river to the Rocky Mountains should be so located as to require a departure northwardly from the proposed line of said Kansas railroad before it reaches the meridian of longitude aforesaid, the location of said Kansas road shall be made so as to conform thereto; and said railroad through Kansas shall be so located between the mouth of the Kansas river, as aforesaid and the aforesaid point, on the one hundredth meridian of longitude, that the several railroads from Missouri and Iowa, herein authorized to connect with the same, can make the connection within the limits prescribed in this act, provided the same can be done without deviating from the general direction of the whole line to the Pacific coast. The route in Kansas, west of the meridian of Fort Riley, to the aforesaid point, on the one hundredth meridian of longitude, to be subject to the approval of the President of the United States, and to be determined by him on actual survey. And said Kansas company may proceed to build said railroad to the aforesaid point, on the one hundredth meridian of longitude west from Greenwich, in the Territory of Nebraska. The Central Pacific Railroad Company of California, a corporation existing under the laws of the State of California, are hereby authorized to construct a railroad and telegraph line from the Pacific coast, at or near San Francisco, or the navigable waters of the Sacramento river, to the eastern boundary of California, upon the same terms and conditions, in all respects, as are contained in this act for the construction of said railroad and telegraph line first mentioned, and to meet and connect with the first mentioned railroad and telegraph line on the eastern boundary of California. Each of said companies shall file their acceptance of the conditions of this act in the Department of the Interior within six months after the passage of this act.

Sec. 10. And be it further enacted, That the said company chartered by the State of Kansas shall complete one hundred miles of their said road commencing at the mouth of the Kansas river as aforesaid, within two years after filing their assent to the conditions of this act, as herein provided, and one hundred miles per year thereafter until the whole is completed; and the said Cenral Pacific Railroad Company of California shall complete fifty miles of their said road within two years after filing their assent to the provisions of this act, as herein provided, and fifty miles per year thereafter until the whole is completed; and after completing their roads, respectively, said companies, or either of them, may unite upon equal terms with the first-named company in constructing so much of said railroad and telegraph line, and branch railroads and telegraph lines in this act hereinafter mentioned, through the Territories from the State of California to the Missouri river, as shall then remain to be constructed, on the same terms and conditions as provided in this act in relation to the said Union Pacific Railroad Company. And the Hannibal and St. Joseph Railroad, the Pacific Railroad Company of Missouri, and the first named company or either of them on filing their assent to this act, as aforesaid, may unite upon equal terms, under this act, with the said Kansas company, in constructing said railroad and telegraph, to said meridian of longitude, with the consent of the said State of Kansas: and in case said first named company shall complete their line to the eastern boundary of California before it is completed across said State by the Central Pacific Railroad Company of California, said first-named company is hereby authorized to continue in constructing the same through California, with the consent of said State, upon the terms mentioned in this act, until said roads shall meet and connect, and the whole line of said railroad and telegraph is completed; and the Central Pacific Railroad Company of California, after completing its road across said State is authorized to continue the construction of said railroad and telegraph through the Territories of the United States to the Missouri river, including the branch roads specified in this act, upon the routes hereinbefore and hereinafter indicated, on the terms and conditions provided in this act in relation to the said Union Pacific Railroad Company, until said roads shall meet and connect, and the whole line of said railroad and branches and telegraph is completed.

Sec. 11. And be it further enacted, That for three hundred miles of said road most mountainous and difficult of construction, to wit: one hundred and fifty miles westwardly from the eastern base of the Rocky Mountains and one hundred and fifty miles eastwardly from the western base of the Sierra Nevada Mountains, said points to be fixed by the President of the United States, the bonds to be issued to aid in the construction thereof shall be treble the number per mile hereinbefore provided, and the same shall be issued, and the lands herein granted be set apart, upon the construction of every twenty miles thereof, upon the certificate of the commissioners aforesaid that twenty consecutive miles of the same are completed; and between the sections last named of one hundred and fifty miles each the bonds to be issued to aid in the construction thereof shall be double the number per mile first mentioned, and the same shall be issued, and the lands herein granted be set apart, upon the construction of every twenty miles thereof upon the certificate of the commissioners as aforesaid that twenty consecutive miles of the same are completed: Provided, That no more than fifty thousand of said bonds shall be issued under this act to aid in constructing the main line of said railroad and telegraph.

Sec. 12. And be it further enacted, That whenever the route of said railroad shall cross the boundary of any State or Territory, or said meridian of longitude, the two companies meeting or uniting there shall agree upon its location at that point, with reference to the most direct and practicable through route, and in case of difference between them as to said location, the President of the United States shall determine the said location; the companies named in each State and Territory to locate the road across the same between the points so agreed upon, except as herein provided. The track upon the entire line of railroad and branches shall be of uniform width, to be determined by the President of the United States, so that, when completed, cars can be run from the Missouri river to the Pacific coast; the grades and curves shall not exceed the maximum grades and curves of the Baltimore and Ohio railroad; the whole line of said railroad and branches and telegraph shall be operated and used for all purposes of communication, travel, and transportation, so far as the public and Government are concerned, as one connected, continuous line; and the companies herein named in Missouri, Kansas, and California, filing their assent to the provision of this act, shall receive and transport all iron rails, chairs, spikes, ties, timber, and all materials required for constructing and furnishing said first mentioned line between the aforesaid point, on the one hundredth meridian of longitude and western boundary of Nevada Territory, whenever the same is required by said first-named company, at cost, over that portion of the roads of said companies constructed under the provisions of this act.

Sec. 13. And be it further enacted, That the Hannibal and St. Joseph Railroad Company of Missouri may extend its roads from St. Joseph, via Atchison, to connect and unite with the road through Kansas, upon filing its assent to the provisions of this act, upon the same terms and conditions, in all respects, for one hundred miles in length next to the Missouri river, as are provided in this act for the construction of the railroad and telegraph line first mentioned, and may for this purpose use any railroad charter which has been or may be granted by the Legislature of Kansas: Provided, that if actual survey shall render it desirable, the said company may construct their road with the consent of the Kansas Legislature, on the most direct and practicable route west from St. Joseph, Missouri, so as to connect and unite with the road leading from the western boundary of Iowa at any point east of the one hundredth meridian of west longitude, or with the main trunk road at said point; but in no event shall lands or bonds be given to said company, as herein directed, to aid in the construction of their said road for a greater distance than one hundred miles. And the Leavenworth, Pawnee and Western Railroad Company of Kansas may construct their road from Leavenworth to unite with the road through Kansas.

Sec. 14. And be it further enacted, That the said Union Pacific Railroad Company is hereby authorized and required to construct a single line of railroad and telegraph from a point on the western boundary of the State of Iowa, to be fixed by the President of the United States, upon the most direct and practicable route, to be subject to his approval, so as to form a connection with the lines of said company at some point on the one hundredth meridian of longitude aforesaid, from the point of commencement on the western boundary of the State of Iowa, upon the same terms and conditions, in all respects, as are contained in this act for the construction of the said railroad and telegraph first mentioned; and the said Union Pacific Railroad Company shall complete one hundred miles of the road and telegraph in this section provided for in two years after filing their assent to the conditions of this act, as by the terms of this act required, and at the rate of one hundred miles per year thereafter, until the whole is completed; *Provided*, That a failure upon the part of said company to make said connection in the time aforesaid, and to perform the obligations imposed on said company by this section, and to operate said road in the same manner as the main line shall be operated, shall forfeit to the Government of the United States all the rights, privileges and franchises granted to and conferred upon said company by this act. And whenever there shall be a line of railroad completed through Minnesota or Iowa to Sioux City, then the said Union Pacific Railroad Company is hereby authorized and required to construct a railroad and telegraph from said Sioux City upon the most direct and practicable route to a point on, and so as to connect with the branch railroad and telegraph in this section hereinbefore mentioned, or with the said Union Pacific Railroad, said point of junction to be fixed by the President of the United States, not further west than the one hundredth meridian of longitude aforesaid, and on the same terms and conditions as provided in this act for the construction of the Union Pacific Railroad aforesaid, and to complete the same at the rate of one hundred miles per year; and should said company fail to comply with the requirements of this act in relation to the said Sioux City railroad and telegraph, the said company shall suffer the same forfeitures prescribed in relation to the Iowa Branch railroad and telegraph hereinbefore mentioned.

Sec. 15. And be it further enacted, That any other railroad company now incorporated, or hereafter to be incorporated, shall have the right to connect their road with the road and branches provided for by this act, at such places and upon such just and equitable terms as the President of the United States may prescribe. Wherever the word company is used in this act it shall be construed to embrace the words their associates, successors and assigns, the same as if the words had been properly added thereto.

Sec. 16. And be it further enacted, That at any time after the passage of this act all of the railroad companies named herein, and assenting hereto, or any two or more of them, are authorized to form themselves into one consolidated company: notice of such consolidation, in writing, shall be filed in the Department of the Interior, and such consolidated company shall thereafter proceed to construct said railroad and branches, and telegraph line, upon the terms and conditions provided in this act.

Sec. 17. And be it further enacted, That in case said company or companies shall fail to comply with the terms and conditions of this act, by not completing said road and telegraph and branches

within a reasonable time, or by not keeping the same in repair and use, but shall permit the same, for an unreasonable time, to remain unfinished or out of repair and unfit for use, Congress may pass any act to insure the speedy completion of said road and branches or put the same in repair and use, and may direct the income of said railroad and telegraph line to be thereafter devoted to the use of the United States, to repay all such expenditures caused by the default and neglect of such company or companies; Provided, That if said roads are not completed so as to form a continuous line of railroad, ready for use, from the Missouri river to the navigable waters of the Sacramento river, in California, by the first day of July, eighteen hundred and seventy-six, the whole of all of said railroads before mentioned, and to be constructed under the provisions of this act, together with all their furniture, fixtures, rolling stock, machine-shops, lands, tenements, and hereditaments, and property of every kind and character, shall be forfeited to and be taken possession of by the United States; Provided, That of the bonds of the United States in this act provided to be delivered for any and all parts of the roads to be constructed east of the one hundredth meridian of west longitude from Greenwich, and for any part of the road west of the west foot of the Sierra Nevada mountain, there shall be reserved of each part and instalment twenty-five per centum, to be and remain in the United States Treasury, undelivered, until said road, and all parts thereof provided for in this act, are entirely completed; and of all the bonds provided to be delivered for the said road, between the two points aforesaid, there shall be reserved out of each instalment fifteen per centum, to be and remain in the Treasury until the whole of the road provided for in this act is fully completed; and if the said road, or any part thereof, shall fail of completion at the time limited therefor in this act, then, and in that case, the said part of said bonds so reserved shall be forfeited to the United States.

Sec. 18. And be it further enacted, That whenever it appears that the net earnings of the entire road and telegraph, including the amount allowed for services rendered for the United States, after deducting all expenditures, including repairs and the furnishing, running, and managing of said road, shall exceed ten per centum upon its cost, exclusive of the five per centum to be paid to the United States, Congress may reduce the rates of fare thereon, if unreasonable in amount, and may fix and establish the same by law. And the better to accomplish the object of this act, namely, to promote the public interest and welfare by the construction of said railroad and telegraph line, and keeping the same in working order, and to secure to the government at all times (but particularly in time of war) use and benefits of the same for postal, military and other purposes, Congress may, at any time, having due regard for the rights of said companies named herein, add to, alter, amend, or repeal this act.

Sec. 19. And be it further enacted, That the several railroad companies herein named are authorized to enter into an arrangement with the Pacific Telegraph Company, the Overland Telegraph Company, and the California State Telegraph Company, so that the present line of telegraph between the Missouri river and San Francisco may be moved upon or along the line of said railroad and branches as fast as said roads and branches are built; and if said arrangement be entered into, and the transfer of said telegraph line be made in accordance therewith to the line of said railroad and branches, such transfer shall, for all purposes of this act, be held and considered a fulfillment on the part of said railroad companies of the provisions of this act in regard to the construction of said line of telegraph. And, in case of disagreement, said telegraph companies are authorized to remove their line of telegraph along and upon the line of railroad herein contemplated without prejudice to the rights of said railroad companies named herein.

Sec. 20. And be it further enacted, That the corporation hereby created and the roads connected therewith, under the provisions of this act, shall make to the Secretary of the Treasury an annual report, wherein shall be set forth—

First. The names of the stockholders and their places of residence, so far as the same can be ascertained;

Second. The names and residences of the directors, and all other officers of the company;

Third. The amount of stock subscribed, and the amount thereof actually paid in;

Fourth. A description of the lines of road surveyed, of the lines thereof fixed upon for the construction of the road, and the cost of such surveye;

Fifth. The amount received from passengers on the road.

Sixth. The amount received for freight thereon;

Seventh. A statement of the expense of said road and its fixtures;

Eight. A statement of the indebtedness of said company, setting forth the various kinds thereof. Which report shall be sworn to by the president of the said company, and shall be presented to the Secretary of the Treasury on or before the first day of July in each year.

Failures in the United States.

We annex some statistics of insolvencies as given by the Hon. Elijah Ward in a late speech in the House of Representatives of the United States.

The failures for $5,000 and upward have been as follows:

Years.	No. failures.	Liabilities.
1857	4,932	$291,750,000
1858	4,225	95,749,662
1859	3,913	64,394,000
1860	3,676	79,807,845
1861	6,993	207,210,427
Total	23,739	$738,911,984

It is estimated that in 1857, 1858, and 1859 the liabilities of swindling and absconding debtors were $10,635,500; liabilities paid in full, $39,315,000, and paid preferred creditors, $286,400,000.

In 1857, 1858, 1859, 1860, and 1861 the liabilities of insolvents were:

In the Eastern States	$120,521,921
In the Western States	153,787,978
In the Middle States	376,937,955
In the Southern States	86,910,628
Total	$738,158,482

The amount of the failures under $5,000 is estimated to be at least one-third of the above, or about $250,000,000, and the number of insolvents is considered to be quite as numerous, or say 24,000 firms.

J. C. LEFFERTS,

CUMBERLAND COAL.
THE BORDEN MINING COMPANY
ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL,** DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va.,** or **Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.
The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGE'S CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**
Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.
For prices and other information apply to
WILLIAM BORDEN.
3m21 **Nos. 70 and 71 West st., New York.**

RENSSELAER
POLYTECHNIC INSTITUTE,
TROY, N. Y.
THE thirty-ninth Annual Session of this Institution for instruction in the MATHEMATICAL, PHYSICAL, and NATURAL SCIENCES, will commence on Wednesday, Sept. 17th, 1862. Appropriate quarters, and a full supply of apparatus, will be provided, so that all the Courses of Instruction can be given precisely as heretofore. The new buildings for the Institute will be placed on a more commanding site, and be constructed as soon as possible.
The ANNUAL REGISTER, containing full information, can be obtained from
3m27 Prof. CHARLES DROWER, Director.

QUARTZ MILLS
OF THE MOST APPROVED KIND,
MANUFACTURED BY **BURDON, HUBBARD & CO., 102** Front st., BROOKLYN, N. Y. Also Agents and manufacturers of the RUSS PATENT PREMIUM AMALGAMATORS, the best and simplest in use for saving both **fine** and **coarse** gold.

Messrs. MUNN & CO.,

PROPRIETORS OF THE SCIENTIFIC AMERICAN continue to solicit patents in the United States and all foreign countries, on the most reasonable terms. They also attend to various other departments of business pertaining to patents, such as Extensions, Appeals to United States Courts, Interferences, Opinions relative to Infringements, etc. The long experience Messrs. MUNN & CO. have had in preparing specifications and drawings, extending over a period of sixteen years, has rendered them perfectly conversant with the mode of doing business at the United States Patent Office, and with the greater part of the inventions which have been patented. Information concerning the patentability of inventions is freely given, without charge, on sending a model or drawing and description to this office.
Consultations may be had with the firm between 9 and 4 o'clock, daily, at their principal office, No. 37 Park Row, New York. We have also a branch office in the city of Washington, on the corner of F and 7th sts., opposite the United States Patent Office. This office is under the general superintendence of one of the firm, and is in daily communication with the principal office in New York, and personal attention will be given at the Patent Office to all such cases as may require it. Inventors and others who may visit Washington, having business in the Patent Offices, are cordially invited to call at their office.
MUNN & CO., are very extensively engaged in the preparation and securing of Patents in the various European countries. For the transaction of this business they have offices at Nos. 66 Chancery Lane, London, 29 Boulevard St. Martin, Paris, and 26 Rue des Eperonniers, Brussels. Probably three-fourths of all the European Patents secured to American citizens are procured through this Agency.
A pamphlet of information concerning the proper course to be pursued in obtaining Patents, the requirements of the Patent Office, etc., may be had gratis upon application at the Principal Office, or either of the Branches. They also furnish a Circular of information about Foreign Patents.
During the last sixteen years the business of procuring Patents for new inventions in the United States and all foreign countries has been conducted by Messrs. MUNN & CO., in connection with the publication of the SCIENTIFIC AMERICAN; and, as an evidence of the confidence reposed in them by the inventors throughout the country, we would state that we have acted as agents for more than FIFTEEN THOUSAND Inventors! In fact, they have become identified with the whole brotherhood of Inventors and Patentees, at home and abroad. We would state that we never had a more efficient corps of Draftsmen and Specification Writers than are employed at present in our extensive Offices, and we are prepared to attend to Patent business of all kinds, in the quickest time and on the most liberal terms.
Communications and remittances should be addressed to

IMPORTANT
TO
RAILROAD COMPANIES,
—o—
THE ATTENTION OF
RAILROAD MANAGERS
Is called especially to the Machines manufactured especially for the use of Railroad Companies by the proprietors of the
ALBANY AGRICULTURAL WORKS,
CONSISTING OF
EMERY'S PATENT
Railway Horse Power,
Made changeable for both right and left hand work, also with changeable degrees of forces and motions of the driving Pullies without changing the Speed and Labor of the Horses, thereby adapting them to the different uses required, as Sawing Wood, Pumping Water, Driving Elevators and Machine Shops, Foundries, etc. The Power is also adjusta le to any degree of wear or use, so as to always insure its working with its greatest efficiency. All the running chains in these Powers are made of the best MALLEABLE IRON which gives to them triple the strength and durability of Grey Iron which last is universally used by all other Railway Horse Power Manufacturers—thereby at the same time lessening the weight of these several hundred pounds, making them less cumbrous for handling and transportation.

WOOD SAWING MILLS.
These Sawing Mills are made upon the most approved and convenient plans in use. Having a heavy plate fly-wheel fixed to the Mandrill with a Ratchet or catch pulley for the driving band on the outside of the fly-wheel—the journal bearings are fitted with Babbet Metal—the wood carriage traverses on iron ways and gibbs—a 24 or 26 inch Saw is fitted, filed and set in working order and the plates warranted. When desired, a 11 inch saw is fitted, also a table for the purpose of slitting boards, etc., for fencing and carpenter work.
The whole together forming one of the most complete and desirable sets of machines for their purposes. They are already in very general use on nearly all the principal Railroads in this country.

PRICE,	ONE HORSE POWER	$90.00
"	TWO " "	130.00
"	SAW MILL, 24 in. Saw	37.00
	SETT BANDS and EXTRAS	5.00

PUMPING ENGINES
Of different kinds for Raising Water for Railroad tanks and other purposes, can be furnished on demand with Reciprocating or Rotary Pumps—fitted to be operated by these Horse Power and the best adapted for Railroad and Mining purposes. One of the SEVENTY-FIVE DOLLAR PUMPING ENGINES when driven by the TWO HORSE POWER has a capacity equal to any Four or Five Horse Power Steam Engine and Pumping Machine for the same purposes.

THRESHING MACHINES
Of the most approved kinds, for one and two horses and with simply Separators, or with Complete Cleaners which fit the grain for market in one and the same operations, and of the most approved construction.
They are very extensively introduced into all the grain-growing sections of this country and the world. They are especially adapted to the force of the above Horse Powers and can be driven by Steam or Water power with equal advantage. They will be furnished on the most liberal terms and warranty.
Liberal discounts made to RAILROAD COMPANIES from the above prices, and agents solicited for the sale of their manufactures.
For further particulars see the new Illustrated and Price Catalogue of the ALBANY AGRICULTURAL WORKS, furnished gratis on application to the proprietors.

THE GREAT FIRE IN TROY.

Unparalleled Triumph

OF

LILLIE'S SAFES!

The following certificates explain themselves:

TROY CITY BANK, May 21, 1862.

LEWIS LILLIE, Esq.—Dear Sir: I am sure it will give you as much pleasure to know as it does me to say, that in the recent fire of the 10th inst., which desolated our city and destroyed our Banking-house, the contents of our Bank vault, though the building itself was a heap of ruins, remained entirely unharmed. This result we attribute entirely to the fact that our old Wrought Iron Doors were, about two years since, exchanged for a set of your celebrated Chilled and Wrought Iron Doors and Frames. With the old doors, not a book or paper in the Vault could have been saved; as it is, nothing in it was even damaged, though exposed to the most intense heat.

Yours, respectfully, S. K. STOW, Cashier.

TROY, N. Y., May 14, 1862.

The undersigned, using **Lillie's Chilled and Wrought Iron Fire and Burglar Proof Safes,** at the time of the late disastrous fire in this city, would state that our safes were subjected to a severe test by fire, the heat varying in intensity, according to the locality and surroundings. The time they were exposed to the fiery ordeal, unprotected by water, varied from 24 to 72 hours. We would say that our money, papers, books, etc. were well preserved, and the Safes are suitable for further use. By comparison with Safes of other manufacture, equally exposed, we have no hesitancy in recommending Safes of Lillie's manufacture to the public on their demonstrated merit as entitled to unparalleled confidence as fire-proofs.

James Kenyon,	S. Bachelder,
S. O. Gleason,	Gates H. Barnard,
Percy & King,	W. D. Haight,
McCoy & Beadle,	Denio & Frelot,
Coon & Van Valkenburgh,	Walsh, Petit & Anthony,
S. S. McClure,	D. H. Snyder,
Ross & Smith,	Jonathan Seaman.
Robert Green,	

Not dug out—nothing in them.

TROY, May 19, 1862.

The undersigned had one of **Lillie's Wrought and Chilled Iron Safes,** which went through the fire of the 10th of May. The Safe was exposed to a severe fire for over 24 hours. In falling it turned on its face, and when turned up to open the doors was red-hot. The back of the lower part of the Safe (behind the books) was filled with pennies, which, in falling over, pressed against the books, and brought them directly in contact with the doors. The wrappers on the pennies were mostly good. The books were unit for further use, but the writing on them was partially legible and could be copied.

DUSENBURY & ANTHONY.

TROY, May 19, 1862.

This is to certify that we had in our store, in this city, when it burned, one of **Lillie's Small Safes,** which was in the fire, without water on the building or Safe. Most of the valuables were removed before the fire, and therefore we were not in haste to get the Safe out of the burning ruins. Some of the papers left in the Safe were legible when taken out, but most of them were charred.

I. M. SINGER & CO.,
Per G. W. BABCOCK, Agent.

This is to certify that the undersigned had one of LILLIE'S Patent Chilled Iron Safes in their store, which was burned during the late severe fire in this city, and we are happy to state, the Safe preserved all its contents in first-rate condition. All the papers were legible, and the books will do for further use, without even rebinding.

GRANT, NUTTING & CO.

The foregoing comprises all the Safes of my manufacture that were in the fire, and below will be found certificates from all the owners of Safes manufactured several years since, by World's Safe Company, who used my Patent Chilled Iron Shell, but not my Fire-Proof Cement.

WORLD'S SAFE COMPANY'S SAFES.

TROY, May 19, 1862.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire of the 10th inst., in this city, would state that our Safes were exposed to a severe heat, being confined in the burning ruins, unprotected by water, from one to three days. On opening the Safes the contents were mostly legible, and to a far greater extent than could be reasonably expected of any Safe. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectors against fire, and by this test we are prepared to recommend them as such to public patronage.

Lyman Bennett,	Silliman, Matthews & Co.,
Flood & Dunham,	E. L. Mallory,
John Hutchinson,	E. H. Virgil,
	Sup't National Express Co.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire in this city, would state, that on opening our Safes the contents were mostly legible. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectives against fire, and we are happy to recommend them to public patronage.

W. & L. E. GURLEY,
R. L. & G. DRAKE,
LEONARD SMITH,
H. E. & W. ALENDORPH, Absent.

TROY, May 19, 1862.

To whom it may concern: We would certify that when the recent fire broke out in this city, we took out from our Safe (which was made by World's Safe Company) all our books, papers, etc., and then left it to the flames without shutting the door, and the Safe will do for further use by being repaired, although the book case was destroyed by the door being left open through the fire.

ACKLEY & CO.

TROY, May 19, 1862.

The undersigned, using Safes manufactured by the World's Safe Company, at the time of the late disastrous fire on the 10th instant, in this city, would state that our Safes were filled with fire-brick for the fire-proof, and while several of this class preserved their contents, ours were considerably charred, and only a part legible. In justice to Mr. LEWIS LILLIE, we are pleased to state that Safes of his manufacture proved to be powerful protectors against fire, and have preserved their contents, after having been exposed to the fiery ordeal, unprotected by water, from one to three days.

Stephen Holton,	Luther Greenman,
Bennett, Strickland & Fellows,	E. W. Johnson,
Corlous & House,	J. H. Goodsell.

TROY, N. Y., May 17, 1862.

LEWIS LILLIE—Dear Sir: We were using at the time of the late severe fire of 10th inst., a Safe purchased in 1852 of the late World's Safe Company. The contents were considerably charred, but our Ledger is mostly legible, and we are able to copy it.

The Safe was subjected to a severe heat for over eighteen hours, and we are satisfied that if water had been thrown on the ruins, as is ordinarily the case, the contents would have come out uninjured. You will please repair our Safe, placing in it the improvements embraced in Safes of your manufacture, and oblige

SHELDON & GREENE.

N.B.—The above Safe is believed to have damaged the contents more than any of those named in this circular.

There were only seven Sheet Iron Safes, made by Herring and others, outside of the railroad depot, that were exposed to the fire, four of which were entirely burnt out; the fifth was saved by being early cooled off by water; the remaining two were not severely tested.

LEWIS LILLIE.

New York, Saturday, July 26, 1862.

The Pacific Railroad--Favorable Auspices.

The struggle now going on has had the effect of settling many long pending disputes about the Pacific Railroad. Nothing remains but to provide the means, ascertain the most practicable route, organize labor and go to work. It is no longer a matter of bitter controversy whether we shall have only one line or shall have two or three, dividing up the business and cutting each other's throat, while depleting the public treasury to a corresponding extent. *That* question has received its quietus forever. We are to have only one main stem with two or three feeders, if the people of certain States are enterprising enough to construct them. Nor will the public be excited about whether this or that sectional route shall be preferred. The act of Congress accords with common sense and equity, in that it requires simply the route which is most central and at the same time most practicable. Then, again, the questions of extending aid by the general government and the character of that aid have been disposed of in a manner that must give universal satisfaction. The whole matter, though repeatedly discussed by the Press, was put through in a spirit of moderation, fairness and compromise to the interests of all parties, which argues the very best results. The circumstance is a very happy one, inasmuch as the project having become involved in politics, was in danger of being made a foot-ball to parties for years to come. Now there is no longer any fear of such an occurrence.

The twelve or fifteen years that have elapsed since Mr. Whitney's famous scheme was broached, have given sufficient time to find out the leading physical features of the country to be traversed. Numerous deposits of the precious metals have been discovered in the two vast mountain systems which bar our way across the continent. In these high ranges civilized communities exist with all the energy, the intelligence, the buoyancy, and we may add all the wants of American settlers; while the earth parts freely with the wealth which shall minister to those desires. Thousands of teams are constantly employed in wending their way across the desert or the Sierra to convey merchandise to the miners. These are most valuable stepping stones to begin with. But they are not all. In the Wahsatch range the discovery of *coal* supplies, if possible, a greater want than could have been by any other mineral. Let it only be shown that those beds exist in reasonable quantity and they will prove invaluable in view of a railroad to the Pacific. The difficulty about wood for fuel, which was supposed to be insurmountable, will thus receive a very easy solution.

A third point deserving notice in connection with this subject, is the settlement of the Mormon dispute in such a manner as to leave the people of Salt Lake friendly disposed to the country and the prosecution of this magnificent undertaking. Whatever may be said about the theological or political notions of those followers of Smith and Young, the fact that they speak our language, adopt our ordinary modes of life and are as industrious as beavers, is beyond dispute. Their presence will save an outlay of millions, if they are only properly dealt with by all parties who have an interest in gaining their friendship and co-operation.

Once more, after the termination of the war the energies and resources of our people must be turned in some direction, concentrated upon some great work or series of works. We shall have about ships enough, nearly mills enough, railroads and canals enough (in the East and West), with the various other instrumentalities for fostering production or exchange. But we cannot rest satisfied with past achievements or present welfare. We must keep onward, unless we would fall backward. Let the building of a railroad to the Pacific, then, be our chief undertaking for the next ten or twenty years. Let its opened sections be accepted as the true indices of our national growth in wealth and population. So far one cannot help feeling that time and events have been highly auspicious to the commencement of the great work.

The Internal Tax Act.

We publish in the present number a full abstract of that part of the Excise Act recently passed by Congress, which enumerates the articles taxed and the amount of duties levied on each of these. It is not popular to advocate measures which impose heavy pecuniary burdens on the citizen; but when foreigners undertake to predict that the people of this country will never submit to contribute liberally of their substance to uphold the government; we would remind them that the city of New York has for years been taxed on the average about $15 annually for each inhabitant. Though few communities have been quite so lavish of their means; yet one per cent. on property situated within the limits of cities, is little if anything in excess of the rate annually levied. The fact is, we have had an abundant training in the art of paying taxes voluntarily imposed upon ourselves.

What will, however, be more annoying than the magnitude, is the *multiplicity* of the articles subjected to taxation. Scarcely a pursuit can be found but is directly reached in a variety of ways. The professional man, for example, is required to pay for a license to prosecute his calling, and then a percentage on that part of his income exceeding $600 per annum. The manufacturer must contribute three per cent. on the gross receipts of his products sold; at the same time, he is also reached through the income tax. The publisher of a newspaper is taxed on income and advertisements. The corporation must pay on its business, and the stockholders on their individual incomes derived therefrom. Every object has been reached that could possibly be made to contribute without the

cost of collection exceeding the revenue therefrom derived.

Taking the experience of other countries as a guide, this is certainly not the best system of taxation that could be found; yet it may have been the best that could be adopted under existing circumstances. Taxation, in fact, is a science, and one which requires an intimate knowledge of the leading characteristics of a people, as well as of their situation, resources and capabilities. To be as perfect as possible, it cannot be got up ready made, like a suit of clothes, but must grow to fit the limbs by degrees. In Great Britain a very large share of the national revenue is collected by an excise on liquors of all kinds, and tobacco. Last year out of an aggregate of £69,685,789, no less than £18,047,000 was collected from the excise, the popular vices or extravagances going to supply the wants of government. Ardent spirits, under the operation of Mr. Gladstone's measures, are now taxed up to ten or twelve shillings sterling per gallon. But it is evident that such a scheme could not be made to apply to a country like the United States in a single year. Our national legislators, accordingly, began with imposing excise duties on spirits of only twenty cents per gallon, and on malt liquors of one dollar per barrel, leaving it to the future to develop the further production of revenue from that prolific source.

Those taxes which more immediately concern the transportation of passengers and freight by railroad and steamboat, are the following: (1) A license, costing $25 per annum, must be taking out for every vessel carrying passengers "upon waters of the United States." (2) A duty on railroad iron manufactured in this country of $1 50 per ton. (3) A duty of three per cent. on the gross receipts of railroads and steamboats, with the exception of ferry-boats which are to pay one and a half per cent. (4) A duty of three per cent. on dividends and interest paid to the holders of stocks and bonds. Companies which engage in the express business also come in for an additional tax for stamps; but this will not affect many of our railroads.

The managers of railroads and steamboat lines are required, within five days of the end of every month after August, to make out a list for the assistant assessor of their respective districts, stating the gross amount of receipts for the month next preceding, verifying it by oath or affirmation; at the same time paying over the full amount of tax then due. In case of neglect to comply with this for five days, the assessor or assistant shall make an estimate from their books of the amount and demand payment thereof. Should this not be complied with, five per cent. additional will be imposed as a penalty, and for any attempt at fraud the managers are made liable to a fine of $1,000. Companies are authorized to add the amount of such taxes to their rates of fare, any existing limitations to the contrary notwithstanding.

In case of the dividends on stock and the interest on bonds it is provided that the taxes shall be deducted from all payments to be made to any person or persons after the 1st of August. A certificate of the payment of such duties shall constitute a receipt to that amount, as regards the stock and bondholders. Within thirty days of the time when such dividends or interest may fall due, a return must be made to the Commissioner of Internal Revenue, and every six months thereafter, accompanied by a declaration by the principal officer of such railroad company, that the statement is true. Penalty for default, $500. It will be seen that the proposed taxes on passengers and freight per mile transported were striken out. The act as it finally passed, is much less objectionable than in its original form.

By a resolution adopted subsequent to the passage of the bill, Congress authorized the Executive Department to postpone the putting of the tax law into operation beyond the 1st of August. This step was rendered necessary by the number of appointments to be made, the different kinds of stamps to be prepared, etc. It has already been announced that the act will not go into effect before the 1st of September.

Chicago and Northwestern Railway.

The gross earnings of this road for the fiscal years ending April 1, 1861 and 1862, have been as follows:

	1861.	1862.
From passengers	$241,226 36	$309,309 46
" freight	451,494 99	505,187 62
" express, mail, etc.	27,983 88	35,222 19
	$720,705 23	$849,719 27

The expenses for 1862 were:

Repairs of track	$70,619 01	
" engines	37,274 24	
" cars	46,031 91	
" bridges	7,899 91	
" buildings, etc.	5,988 65	
" machinery, etc.	6,968 65	
Fuel	54,000 57	
Oil and waste	12,036 34	
Foreign agents	11,017 77	
Enginemen, firemen, etc.	38,042 23	
Conductors, brakemen, etc.	26,187 90	
Laborers and switchmen	32,435 11	
Agents and clerks	24,257 66	
Officers and clerks	26,536 05	
All other expenses	35,595 24	
		434,891 25
Leaving as net earnings		$414,828 02

Disbursed as follows:

Interest on Flagg Trust bonds	$19,600 00	
Interest on Preferred 1st Mortgage bonds	86,989 00	
Interest on Appleton Extension bonds	12,880 00	
Interest on debt	10,878 24	
Taxes	22,198 94	
Exchange	4,839 51	
Discount on currency	9,536 67

To which add proceeds of the following bonds sold, viz:

$5,000 preferred Sinking Fund Bonds	4,393 75
$4,000 Appleton Extension Bonds	2,800 00
$2,050 Neenan Town and Appleton City Bonds	1,619 92
	$247,843 38

Accounted for as follows:

Decrease in unfunded debt	$62,285 16
Expended for construction	90,270 12
On account of Green Bay Extension	1,042 20
On account of Appleton Extension	18,835 96
For new equipment and tools	16,252 83
Increase of materials on hand	26,507 22
Increase of cash and cash items	32,250 39
C., St. P. & F. du L. R. R. Co.—old claims paid	404 50
	$247,843 38

The balance to credit of income account, April 1, 1861, was $323,580 64; to which add surplus earnings of the past year, as above, $239,034 71—leaving balance to credit of income account April 1, 1862, $562,615 35. The report says:

Congress has recently authorized this company to extend this line northerly via Green Bay, instead of upon the old route, which the Commissioner of the General Land Office compelled us to adopt, from Appleton north, and has allowed us to receive and hold the lands granted and selected, the same as if our road had been constructed upon the former route, as laid down upon the Government land office maps.

Congress, at the same time, granted in aid of a railway from Appleton to Green Bay, eighty acres of ground, to be selected for depot purposes, from its Fort Howard military reservation, at the terminus of our road at Green Bay, provided such road should be extended to Green Bay within three years.

On the 18th July, 1861, the bondholders of this road in pursuance of authority vested in them, authorized the extension of the road from Appleton to Green Bay, provided the people of Green Bay, Fort Howard, or the towns and counties along the line of it, would contribute enough to grade it and prepare it for the iron; and, provided an issue of this company's bonds, secured upon the road, if not exceeding $12,000 per mile, could be sold to pay the balance of the cost of its construction.

During the past year careful and well guarded laws have been passed or amended, authorizing the county of Brown, of which Green Bay is the chief town, to issue its 7 per cent. bonds to this company for $50,000, in payment and exchange for a like sum of the stock of this company, and authorizing the Borough of Fort Howard, on the opposite side of the Fox River from the city of Green Bay, and at the mouth of said river, to issue its 8 per cent. bonds for $15,000, and making it the imperative duty of the officers of said town and country to levy and collect the tax annually, necessary to pay the interest and 5 per cent. of the principal of these bonds, and providing that accruing coupons and bonds of Brown county, should at all times be received in payment for all taxes levied by the county.

The city of Green Bay has been, in addition, authorized to levy and collect $15,000 in money and pay it over to this company, for a like amount of this company's stock.

All these provisions have been voted upon by the people and very generally approved.

In consideration of this favorable legislation by Congress, and of the fact that the aid proffered by the county of Brown, town of Fort Howard and city of Green Bay, would, together with the extensive rights of way and depot grounds granted along the line, without charge for the same, fully equal the cost of grading and preparing said extension of road for the iron, this Board on the 14th of March, last, authorized said issue and sale of bonds previously authorized by the bondholders, to the extent of $12,000 per mile, $300,000 of bonds in all, provided the same could be sold at not less than seventy cents on the dollar.

Said $300,000 of 7 per cent. bonds were accordingly issued, bearing date, April 1st, and drawing interest from and after August 1st, 1862, and all of said bonds have been sold at seventy cents for the dollar, and about half the proceeds of such sale have already been paid in money, the balance being payable as wanted, mainly on 1st July and August.

Since this sale of bonds was made, and it became known that the road was to be extended to Green Bay early this season, a large advance has taken place in the market value of all this road's securities; partly because of such proposed extension, and partly because of the generally improved and easy condition of the money market.

The route of the Green Bay extension from Appleton to Fort Howard, opposite the city of

Green Bay, is along the bank of the Fox River, past the large fine water powers of the Fox and Wisconsin Improvement Company, over very favorable ground and with very gentle grades.

The work of construction has been commenced—all of the iron has been purchased—most of it was purchased at low prices—and is now at Chicago, and, with favoring circumstances, cars may run over the road to Green Bay in August next. Besides the ordinary business to be done over this extension of road, between the growing interior country and the city and fine harbor of Green Bay, an important traffic and valuable through passenger business is expected to be opened by it with Lake Superior, via steamers through Green Bay to the head of Little Bay du Noquet, 140 miles, and from the head of Bay du Noquet, via stages across the upper peninsula of Michigan, 55 miles to Marquette on Lake Superior, the principal town, and depot of the great Lake Superior iron region, and thence by steamers to Hancock, Houghton, Ontonagon, Bayfield, Superior City and all other points on Lake Superior.

The "Lake Superior Forwarding Company," with whom we have a contract for running boats and stages over this route, in connection with our road, have provided suitable steamers to run on Green Bay, and are now perfecting the stage route between the head of Bay du Noquet and Marquette, which will be finished and equipped with stages, ready to carry passengers, before our road is completed to Green Bay.

The Lake Superior Forwarding Company have secured the contract with the Government for the carrying of the Lake Superior mails, via Chicago, our road and this route.

Passengers by this inland route will reach Lake Superior from Chicago with ease in 36 hours, passing over our road by daylight, through Green Bay in comfortable boats at night, and across the peninsula in stages the next day, arriving at Marquette by evening.

The passage through Green Bay is fully as inland and protected as Long Island sound, and the passenger route by steamers, can be maintained much earlier in the Spring and later in the Fall than by the St. Mary's River.

By this route one or two days will be saved over the steamboat route from Cleveland and Detroit, through Lakes Huron and Superior in fair weather with smooth seas, and three to five or more days are saved in stormy weather, besides the discomforts and personal hazards, occasioned by the sudden and severe storms upon the Great Lakes. The moment this inland route is opened, the people of Lake Superior will hail it as a boon to them, secondary only to the construction of the Sault St. Mary's Ship Canal.

Some fourteen steamers are now engaged in the Lake Superior Trade, the exports from which the past season was some three millions of dollars in value of copper and half a million in iron. A railroad has been chartered from Marquette and the Iron Mountains to Bay du Noquet, with a land grant in aid of its construction, which will very likely be built in a short time, by parties interested in it, when the passage from Chicago to Marquette will be made in twenty-four hours.

The funding of six coupons of the general first mortgage bonds of this company, as recommended by the bond-holders in July last, and as set forth in our last annual report, has progressed favorably.

New coupon bonds were prepared, and over two-thirds of the coupons, from the first mortgage bonds have already been exchanged, and exchanges are continually being made. By November 1st, 1862, the time when interest first becomes payable on the funded coupon bonds, it is believed, that about all of these coupons from the first mortgage bonds, except a few that may be prevented by some pending legal difficulty between owners, will have been exchanged, and with decided advantage to holders.

These funded coupon bonds are known in the market as the Chicago and North-western Railway "Interest Bonds," or "Coupon Bonds," and sell at present at about 79 to 80 cents, and the general first mortgage bonds with the six funded coupons to August 1st, 1864, off, are known as Chicago and North-western Railway "Assented Bonds," and sell at this time for about 45 cents.

The necessity for funding these six coupons, in order the more amply to equip and complete the road and pay its debts, (incurred chiefly for equipment,) and the better to secure larger and permanent future earnings from it, is fully stated and set forth in the last annual report of this company.

Another leading reason for the extension of this road to Green Bay at this time, when everything seemed to work together to favor it, was the belief on the part of many of the large holders of our general first mortgage bonds, that such extension would so increase the earnings of the existing road, as to more amply ensure the future payment of interest on the assented first mortgage bonds, from and after the termination of the period to which the coupons of the same have been funded. The opening of this extension to Green Bay, and its connections with Lake Superior will not be accomplished in time to develope its results fully this season, but will, we trust, so far establish it as to secure large benefits from it this year, and acquaint the public with its importance and advantages for the future.

It will be seen by the annexed statements, that the net earnings of the year ending April 1, 1862, over operating expenses and interest on preferred sinking fund, Flagg, Trust, and Appleton extension bonds, taxes and other items, chargeable to income account, amounted to..... $239,034 71

The interest for one year on the general first mortgage bonds of this company, $3,600,000, amounts to.... 252,000 00

Showing a deficit in the amount necessary to equal one years' interest on said general first mortgage bonds of $12,965 29

It will also be seen that there was included in the amounts referred to as charged to income account for the year ending April 1st, 1862:

For interest on unfunded debt,..	$10,878 24
Loss on Illinois currency	9,536 67
	$20,414 91

Showing, that except for interest on floating debt and unusual loss on currency from general failure of Illinois banks, the net earnings of the year would have been equal to the payment of the current years' interest on the general first mortgage bonds.

Should our earnings continue as heretofore, the floating debt of the company will soon be paid; further equipments, and more ample depots, shops, and buildings provided, and other permanent improvements made from net earnings pending the period for which the first mortgage coupons have been funded; and at the end of that period the road be left free again to apply its net earnings to the payment of coupons on its assented general first mortgage bonds. The first of which coupons falls due February 1st, 1864.

The amount of funded coupon bonds, when all the general first mortgage bonds are assented, will be $756,000, and the annual interest upon these bonds will be..... $52,920

The annual interest to be paid on the $300,000 of Green Bay extension bonds, is..... 21,000

Making the amount of additional annual interest to be paid by the company on these coupon bonds, and on the extension to Green Bay..... $73,820

The earnings of the present road for the past year, were $849.719 27.

If the Green Bay extension with its Lake Superior connections, and a larger equipment, more economical shops and arrangements, and larger ware-house facilities provided for by the funding of six coupons, together with the natural increase of the business of the country, shall swell the gross earnings of the entire line of road from Chicago to Green Bay to $1,000,000 per annum, then if nothing unforeseen or unexpected prevents, assented first mortgage bond-holders can count upon the regular payment of full interest on all their bonds. It would seem to be rational and quite reasonable to reckon upon such an amount of annual gross earnings by the next year after this.

A million of dollars of gross earnings on the entire road from Chicago to Green Bay, 242 miles, would only be equal to a gross earning of $4,133 per mile. A gross earning of a little more than $5,000 per mile will be necessary to the payment of the interest, ($120,000 per annum) on the two millions of second mortgage six per cent. bonds of this company. Whenever an earning of $7,000 per mile shall be attained, a dividend of five or six per cent. upon the stock of the company could be paid. Most of the roads leading out of Chicago, earned seven thousand per mile in 1856 and 57, and some of them more.

The equipment of the road consists of 32 first class and 4 second class locomotives; 19 first class, and 4 second class passenger cars; 8 baggage, 424 box freight, 206 platform freight, and 9 caboose cars.

CONDENSED BALANCE SHEET.

The officers and directors elected June 5, 1862, are as follows:

President—Wm. B. Ogden, Chicago.

Vice President—P. H. Smith, Appleton.

Directors—Wm. B. Ogden, Geo. Smith, G. L. Dunlap, P. H. Smith, M. C. Darling, A. L. Pritchard, J. J. R. Pease, Wm. A. Booth, Lowell Holbrook, C. S. Seyton, H. H. Boody, Austin Baldwin, Geo. M. Bartholomew.

Superintendent—Geo. L. Dunlap, Chicago.

Treasurer—Geo. P. Lee, "

Secretary—James R. Young, "

Transfer Agent in New York—H. H. Boody.

Atlantic and Great Western Railroad.

The annual election of the Atlantic and Great Western Railway Company was held last week, at the general office, Raveena, Ohio, and the following Directors chosen for the ensuing year:

Wm. Reynolds, Gaylord Church, Seth Hayes, F. W. Seymour, M. Kent. J. H. Chamberlain, F. W. Upson, Talmadge, Ohio, W. Bushnell, J. Riblet, T. J. S. Smith, J. Crall, E. B. Taylor. The Board organized by appointing M. Kent, President; F. W. Seymour, Secretary; E. P. Brainard, Treasurer and Acting Secretary; Executive Committee, M. Kent, E. B. Taylor, F. W. Seymour, Gaylord Church, and Wm. Reynolds.

Iron Trade Meeting.

A meeting of the iron manufacturers and dealers in this and others States was held yesterday at the rooms of the Board of Trade. Mr. John Welsh was called to the chair, and Mr. Charles Wheeler chosen Secretary. The Chairman announced that the meeting assembled under the following call from Morris, Tasker & Co., Thomas J. Potts, McCullough & Co., and other representatives of the iron manufacturing interests, dated July 8th, 1862:

"Referring to circular of 5th ultimo, having for its object a reduction of credits from six to four months, it has been decided to call a meeting of those interested in the iron business, to be held at the rooms of the Philadelphia Board of Trade, No. 505 Chesnut street, on Tuesday next, July 15th, 1862, at 12 o'clock noon, to which you are respectfully invited.

"We trust you will see the importance of this movement and strengthen it by your presence. Should you, however, be unable to attend, we request that you communicate your views to either of the undersigned by letter, which may be used at said meeting."

The Chairman remarked that the object of this meeting was to try to get the trade unanimously to consent to a reduction of credits for six months, as has been the rule heretofore, to four months. The object is so apparent, and so evidently for the general good; that there could be no necessity for saying much to enforce it. This circular was addressed to a great many parties, some of whom are here; others have forwarded communications which, if the meeting desire, will be read.

About seventy-five communications were received, the largest portion of which were read by the Secretary. The following is a list of parties from whom replies were received, all in favor of the views expressed in the call for the meeting:

FURNACES.

E. & G. Brooke, Hampton Furnace, Birdsborough.
Bloomsburgh Iron Company, Bloomsburg, Pa.
Carbon Iron Company, Parryville, Pa.
G. Dawson Coleman, Lebanon Furnace, Pa.
Clingan & Buckley, Hopewell "
Eckert & Co., Henry Clay Furnace, Reading.
Eagle, Beaver & Co., Eagle Furnace, Marietta, Pa.
Fuller, Lord & Co., Boonton, N. J.
Grove Bros., Columbia Furnaces, Pa.
D. O. & H. S. Hitner, Wm. Penn Furnaces, Pa.
F. S. Hunter & Bro., Moslem "
C. C. Alger, Hudson Iron Works, N. Y.
John Irwin, Jr., & Co., Howard Iron Works, Pa.
Lehigh Crane Iron Company, Catasaqua, Pa.
B. S. Le Van, Lehigh Valley Iron Works, Pa.
Leesport Iron Company, Leesport, Pa.
McKelvy & Neal, Bloom Furnace, Pa.
Musselman & Watts, Marietta Furnace, Pa.
Swede Iron Co., Conshohocken Furnace, Pa.
White, Ferguson & Co., Robesonia Furnace, Pa.
Jos. Whitaker & Co., Durham Iron Works, Pa.
Chas. Frederick Raun, Peekskill Blast Furnace, N. Y.
J. B. Moorehead, Merion Furnace, Pa.
Atkins & Bro., Pioneer Furnace, Pottsville, Pa.

ROLLING MILLS.

H. Abbott & Son, Canton Rolling Mills, Baltimore.
Allentown Rolling Mill Company, Allentown, Pa.
Charles L. Bailey & Bro., Central Rolling Mill, Harrisburg.
Horace A. Beale, Thorndale Iron Works, Chester county, Pa.
Bay State Iron Company, Boston, Mass.
Edward S. Buckley, Gray's Ferry Mills, Pa.
E. & G. Brooke, Rolling Mill and Nail Works, Pa.
H. N. Burroughs, Portage Iron Works.
O. W. Barnes, Fountain Green Rolling Mill.
Cumberland Nail and Iron Co., Bridgeton, N. J.
Camden Rolling Mill Company, N. J.
Duncannon Iron Company, Pa.
Richard Borden, Agent, Fall River Iron Works, Mass.
Fuller, Lord & Co., Boonton Rolling Mill, N. J.
R. P. Gibbons, Wilmington Rolling Mill, Del.
James Hooven, Norristown, Pa.
Huston & Penrose, Lukens Rolling Mill, Pa.
Samuel Hatfield, West Brandywine Rolling Mill, Pa.
Haywood & Co., Palo Alto Rolling Mill.
Hancock & Foley, Rough and Ready Rolling Mills, Danville, Pa.
Heylman & Co., Crescent Iron Works, Pa.
John Irwin, Jr., & Co., Howard Iron Works, Pa.
McCullough, Northeast, Shannon and Octoraro Mills, Del.
McDaniel, Adams & Co., Diamond State Rolling Mill, Del.
Morris, Tasker & Co., Pascal and Fairmount Iron Works, Phila.
Wm. McIlwan & Sons, Reading, Pa.
Hughes & Co., Mont Alto Mills, Pa.
McHose, Eckert & Co., Reading, Pa.
C. & E. Pennock, Valley Iron Works, Pa.
Quinsigamond Iron Works, Worcester, Mass.
Phœnix Iron Company, Philadelphia.
A. & P. Roberts & Co., Pencoyd Iron Works Philadelphia.
Seyfert, McManus & Co., Reading, Pa.
Hugh E. Steele, Laurel Rolling Mill, Pa.
Steele & Worth, Viaduct Iron Works, Pa.
Trenton Iron Company, Trenton, N. J.
David Reeves & Son, Safe Harbor Iron Works, Pa.
Trego, Thompson & Co., Baltimore Rolling Mill.
E. Yardley & Son, Pottsville Rolling Mill.
Wm. E. Coffin & Co., Pembroke Iron and Forge Company, Boston.
Park Smith & Co., Elk Rolling Mill, Elkton, Md.
Sanborn, Richardson & Co., Boston, Mass.
Craig & Koch, Keystone Iron Works, Reading, Pa.

DEALERS, FOUNDERS, &C.

Cabeen & Co., Philadelphia.
E. J. Etting, & Bro., "
Morris, Wheeler & Co., Philadelphia.
Naylor & Co., New York, " and Boston.
Nathan Trotter & Co., "
Robert Taylor & Co., "
Kemble & Warren, New York.
Samuel & William Welsh, Philadelphia.

Mr. Hugh E. Steele then offered the following preamble and resolutions, which, after the addition of the fourth resolution as proposed by Mr. Samuel J. Reeves, read as follows:

Whereas, a reform in the credit system of the iron trade is desirable for the interest of the consumer as well as of the manufacturer and dealer; and whereas, concert of action is necessary to consummate the same, it is therefore resolved,

First. That the credits on sales on and after the first of August, 1862, be reduced to four months.

Second. That sales for cash should in all cases be held to imply a settlement within ten days.

Third. That the discount for cash should not exceed four per cent.

Fourth. That settlements of bills, whether by cash or note, shall be made in currency equal in value to the United States legal tender notes.

Fifth. The foregoing resolutions are recommended by the meeting as a rule of action for the iron trade, and the individuals and firms consenting thereto pledge themselves that they will give these resolutions their united and hearty support.

Sixth. That the proceedings of this meeting be published, and copies sent to all members of the trade.

These resolutions were fully discussed and unanimously adopted.

Mr. Reeves offered the following resolution:

Resolved. That we recommend the trade to establish the uniform custom of adding the excise at the foot of the bill of sale, and that, when quotations of price are made it shall be understood that the tax will be an additional charge.

The Chairman remarked, in reference to this resolution, that he thought it ought not to be adopted. It would appear to be setting a bad example to a large community of manufacturers, most of them who would immediately follow in our steps. Every manufacturer of every description would take this action as his guide, and from the smallest article up to the largest the price would be quoted irrespective of the tax, and every account would be rendered with the tax separately stated. The true principle is to look upon the tax as a part of the cost of production, and estimate it in that way. We had better look upon it as a part of the production in all instances. It is a tax upon profits, upon manufactures, and it would be rendered odious if distinguished as the resolution proposes. The chairman thought none of the gentlemen in the trade would, under any circumstances, take a position likely to embarrass the government, or to render its claims on us in the way of taxation in the least degree distasteful. All should concur in efforts to show that these taxes are cheerfully paid.

Mr. Reeves disclaimed any idea of rendering taxation odious, and if such a result could by any possibility follow the adoption of his proposition he would withdraw it. As there seemed to be some opposition to the views expressed in his resolution, he withdrew it.

After making provision for paying the expenses incurred, the meeting adjourned.—*Philadelphia North American, July* 16.

Transportation of Baggage.

PARTIES MAY PROVE THE CONTENTS AND LOSS OF BAGGAGE, BUT NOT THE VALUE. A REASONABLE AMOUNT OF MONEY MAY BE CARRIED IN A TRUNK. COMPANIES SELLING THROUGH TICKETS CONTINUE LIABLE TO THE POINT OF DESTINATION.

On the 21st of October, 1857, the plaintiff and his wife paid their fare and took passage on the train of the Illinois Central Railroad at Chicago for St. Louis. They owned a large leather trunk containing a number of valuable articles. The trunk was carried to Mattoon, at the point of intersection of the defendants road by the Terre Haute and Alton Railroad, and there safely delivered to and placed upon the cars of the said Terre Haute and Alton Railroad Company, which was the proper route, and the one over which it was intended by the plaintiff, that the baggage should be conveyed to St. Louis, and subsequently lost. The plaintiff then brought an action against the Illinois Central Railroad Company in the Superior Court of Chicago to recover the value of the trunk and contents.

The plaintiff swore to each and all of the articles contained in the trunk; and stated that they were worth in the aggregate the sum of $420. The plaintiff also introduced in evidence a brass "check," admitted by the defendants to be a "baggage check," which was marked "Chicago and St. Louis." It was further admitted by the defendants that such checks were never given out except to passengers, who are required to exhibit their tickets for the place to which the check is given, before they can get a check for their baggage to such place.

The jury returned a verdict in favor of the plain-

tiff for the sum of $410; and the defendants then appealed to the Supreme Court of the State of Illinois; and moved for a new trial, on the several following grounds: First, The deposition of the plaintiff and his wife was improperly admitted as evidence of the delivery of the trunk alleged to have been lost, and of the value of its contents. Second, Bank bills carried in a passenger's trunk are not "baggage"—and without notice to the carrier, and in the absence of fraud, the carrier will not be liable, in case of loss, for their value. Third, the liability of the defendant as a common carrier, did not extend beyond its own route, and the safe delivery of the baggage to the next carrier, unless the plaintiff proves a special contract extending its general liability. Fourth, The defendant, as a common carrier, is restricted to the powers defined in its charter, and is incompetent to contract for the transportation of goods beyond the terminus of its route." The following is the main portion of the opinion rendered at the decision of the case.

BREESE, J.—The owner of a trunk containing baggage can, from the necessity of the case prove the contents of the trunk, but not their value; and so can the wife, in all cases where her husband can be a witness. This rule is repudiated in some of the States, and it can only be defended on the alleged necessity of the case. We have always endeavored to restrain the rule within the narrowest possible limits, and to caution juries when they receive such testimony. We have allowed the interested parties to go so far as to prove the contents and loss; but not the value of the articles. Any dealer in such articles can establish their value, so that there is no necessity for the evidence of the owner on that point. * * * *

In declaring for lost baggage it is not indispensible that it should be alleged the owner was a passenger on the road with the baggage. A check is not only *prima facie* evidence that the baggage was delivered to the company, and so intended, but it is also evidence that the party holding it has purchased the rights of a passenger. The fact that it is the usage of the company to give out no check for a passenger's baggage, until a regular ticket for the trip is exhibited by the owners or custodian of the baggage makes the check evidence of his being a passenger. * * *

The court properly instructed the jury in this case that the bank bills might be considered baggage. * * * * * * * *

Upon the remaining points, we are satisfied, under the tickets issued by this company, their liability as common carriers extended from Chicago to St. Louis, no matter how many intervening routes there may have been. The presumption, from the check and ticket, is, they were running in connection with such routes.

Redfield in his treatise on the law of railways, says, where different railways, forming a continuous line, run their cars over the whole line, and sell tickets for the whole route, and check baggage through, an action lies against either company for the loss of baggage. The English rule on this subject is well settled. The courts of that country regard parties who receive goods, and book them for a certain destination, as carriers throughout the entire route. The courts of this country have, some of them, doubted this rule, preferring to hold, when goods are delivered to a carrier, marked for a particular place, but unaccompanied by any other directions for their transportation and delivery, except such as might be inferred from the marks themselves; the carrier is only bound to transport and deliver them according to the established usage of the business in which he is engaged, whether that usage was known to the party from whom they were received or not, and that no implication arises from any further liability.

It is not necessary, perhaps, for this court to express any opinion on this point, as it does not arise in this case, but we may say, we are inclined to yield to the force of the reasoning of the English courts on principles of public convenience, if no other, and to hold, when a carrier receives goods to carry, marked for a particular place, he is bound to carry to and deliver at that place. By accepting the goods so marked, he impliedly agrees so to do, and he aught to be answerable for the loss.

In this case we hold the ticket and the check given by this company and produced in evidence, simply a special undertaking to carry the passenger by Mattoon to St. Louis *via* the Terre Haute and Alton Railroad, and his baggage also. The ticket is what is known as a through ticket and the check denotes that the baggage is checked through from Chicago to St. Louis, and both inform the passenger that the Illinois Central Railroad Company has running connections with the Terre Haute and Alton Road, and that they can and will deliver the passenger and baggage, by means of this connection at St. Louis. The ticket and check are both issued by the Illinois Central, they are the evidence of the contract made with them, and in effect speak this language: if you will buy this ticket, we will carry you safely to St. Louis, and your baggage also;—the terminus of our road, by means of our connection with the Terre Haute and Alton road, is at St. Louis, and we guarantee to you, your safe arrival there with your baggage, you having no further care or concern about it, whether we run our own cars through, or take those of the other road at the point of intersection—you pay through, and you and your baggage shall be carried through. This is the contract, evidenced, as we think, by the ticket and check. There are three tickets on a small piece of paper, all connected together, and all headed "Illinois Central Railroad," thereby implying that they are issued by that company.

But the appellants insist that the company has no chartered power to enter into such arrangements and make such contracts; and the case of Hood *vs.* New York and New Haven R. R. Co., is cited.

We have not examined to see if that case has not been overruled by the court deciding it, in some subsequent case; but be that as it may, the court seem to have overlooked the consideration, that in all legislative grants many things must of necessity be taken by implication, as necessary to the enjoyment of the grant itself. The grant to the Illinois Central was to construct and operate a railroad from Chicago to Cairo, and to cross and intersect other roads, not for the benefit of the company alone, or its stockholders, but for the benefit of the public, and for the accommodation of the immense traffic and commerce, of which this State might reasonably be expected to become a most important theatre. Hence, by confining the road to a simple traffic between the *termini*, and the points directly on its route, the country remote from its direct line, would be benefitted in a very trifling degree, or not at all, if these *quasi* partnerships with other roads were not allowed. The great object of their charters could not be accomplished if they were so restricted, and it may well be deemed an indispensable incident to the powers, expressly granted. The object to be attained is within the general objects of their incorporation. They are instrumentalities of commerce and of trade in which the entire public are interested, and which are essential to their prosperity. But, be this as it may, the Legislature of this State passed an act entitled, "An act to enable railroad companies to enter into operative contracts, and to borrow money," (Private Laws, 1855, p. 304), by the provisions of which such running connections are expressly authorized. Even without this act, we should feel no disposition to deny the power.

For the reasons, however, which we have given, the judgment is reversed, and the cause remanded.

American Securities held abroad, and Foreign Exchange.

Foreigners, particularly Englishman, seem to be busily occupied in winding up their interests in the United States, under a conviction, doubtless, that the nation, with all its interests, is rapidly going to ruin, and that they must make haste to save what they can out of the wreck. Credits are not only withdrawn, but vast amounts of securities of all kinds are sent back by every steamer, with peremptory orders for sale, and that the proceeds be remitted with all convenient dispatch. Foreigners have been told by their great oracle, the "*Times*," that everything is going wrong with us; and such is our distance from them, that we present but a speck to the vision they extend to us, and are regarded as a whole, both North and South being equally involved in the rebellion. They do not see that the war is as foreign to all the Free States, as it is to their own country; that, in fact, the people of the former suffer much less than themselves from its effects, and that there is really no more danger to the traffic on the public works of the loyal States, than upon their own, and that industrial interests nowhere rest upon more stable foundations.

But nothing of this kind is believed, and they will not have our securities, which like our institutions they believe may any day collapse. We certainly ought not to complain. We had their money at the right time. It has done for the nation all that money could do—by giving the highest possible value to all our resources and products. Having reaped the full advantage of the investment, which has increased our means more than five-fold, we were never in a better position to commence its return. The securities are still very low; on an average from ten to fifty per cent. below what they were originally sold for. To this discount is to be added something over twenty per cent. in the present price of exchange. We are getting back our securities at about one-half what we parted with them for. As money is plenty, the foreigner paying the premium on gold, we are certainly driving a very good bargain. We can without the least inconvenience part with $100,000,000 in specie, which is lying idle in the vaults of our Banks and the hands of our people, and get back nearly twice the amount of interest paying securities, which is equivalent to the payment of a debt to, and stopping the interest on an equal amount, assum-

ing securities of this country to a similar amount were held abroad, which is an excessive estimate, the aggregate not probably exceeding $100,000,000.

The country was well supplied with gold previous to the breaking out of the war. Since that period we have produced from our mines at least $75,000,000, and have imported $25,000,000 more than we have exported. This gives the surplus estimated. The amounts we are weekly raising would very speedily supply an accidental deficiency. Gold consequently is the thing of all others that we can best part with. We can neither eat, drink, nor wear it; nor is it necessary for the prosecution of the war. The advanced price paid for it seems to be felt only when exchange comes to be bought. The securities of the country are yet lower than their average price with a specie standard prevailing, and with money active at 7, which is now a drug at 5. The anomaly is scarcely credible, did not figures prove it to be so. The inflation of the currency is not yet felt, or at least only to a very slight degree, in the value of stocks or property. The reason why it is not felt in the Share Market, is undoubtedly the steady flow of securities from abroad. People hold off from purchasing in expectation of lower prices from forced sales, and from an indisposition to invest till definite prices are rendered certain by the closing up of all the lots held on foreign account.

Such is an explanation of the condition of the Exchange Market, and of the low prices of railroad securities. No relation to values is maintained, nor has the inflation in the currency yet shown itself in prices. It is not improbable that such a state of things may continue for a time; this, of course, depends upon the return of securities. Foreigners will shrug their shoulders at the enormous cost at which they are getting home their money, but will not this very cost excite their apprehensions still more, as evidence of the unstable condition of our affairs? That the flow homeward is still active, is shown by the constant advance in gold. But Englishmen having once made up their mind upon a particular course are not apt to count cost; because, as in the present instance, they may say, "I had better take what I can get now. By delaying I may lose all." With such reasoning he is likely to clear his portfolio—the sooner, the better for our people.

But for the securities returned to us, exchange would largely rate in our favor. The shipments of produce are on an enormous scale, and are likely to increase, rather than diminish. The tendency of the grain market in England is steadily upward, which shows that the crop there will not exceed an average one, if it comes up to it. The wheat crop, which is now being harvested in this country, is unquestionably much more abundant than it was last year. The new crop will soon be in the market. Other crops look equally promising, so that with cotton counted out of our exports, these will undoubtedly for the coming year far exceed our imports—a remarkable phenomenon for a country engaged in a civil war.—*Hallett's Financial Circular.*

☞ The *Scientific American* notes a very simple and beautiful arrangement of frictional gearing applied to a new lathe in the establishment of Messrs. William Sellers & Co., in Philadelphia. Instead of using a complicated train of toothed wheels to obtain different speeds, any speed required is obtained by the use of three frictional plate wheels, placed one above the other. By moving any of these wheels nearer to or farther from the center of the intermediate wheel, the speed is varied accordingly. The middle wheel is composed of two circular plates, the upper and lower ones of single plates, fitting into the middle plate wheel as into a deep groove.

Annual Commencement of the Rensselaer Polytechnic Institute at Troy, New York.

The annual commencement of the Rensselaer Polytechnic Institute of Science took place at Rand's Hall, Troy, on Tuesday evening, July 8. The occasion was marked by the delivering of a salutatory oration by Mr. N. W. Buckhout, C. E., and a valedictory by William S. Auchincloss, C. E., and the usual baccalaureate address by President Beman, surcharged with wise counsel and beneficent views for the future guidance of the young laureates in science and practical learning.

The degree of Civil Engineer was then conferred, at the earnest recommendation of Mr. Director Downe, upon the following named young gentlemen: Peter D. Vroom (son of ex-Governor Peter D. Vroome, Sr., of New Jersey,) John C. Underwood (son of ex-United States Senator Underwood, of Bowling Green, Ky., and the last colleague in the Senate of the late Henry Clay,) Aniceto G. de Menocal, Havana, Cuba; William L. Adams, Jr., Greene Island, N. Y.; William S. Auchincloss, New York city; Nathan W. Buckhout, Oswego, N. Y.; Richard H. Buel, Poughkeepsie, N. Y.; Horace Crosby, Bangor, Me.; Arba R. Haddock, Troy, N. Y.

On Tuesday, 8th inst., the graduating class delivered their scientific theses, in Rand's Hall, upon the following themes:

Review of the Niagara International Railway Suspension Bridge—William D. Adams, Jr., Green Island, N. Y.

Review of the condensing engine of the steamboat Francis Skiddy—William S. Auchincloss, New York.

Review of an iron girder bridge on the Morris and Essex Railroad, at Newark, N. J.—Nathan W. Buckhout, Oswego, N. Y.

Review of the non-condensing engine of Messrs. Eaton, Gilbert & Co., Green Island N. Y.—R. H. Buel, Poughkeepsie, N. Y.

Review of the Hydraulic motor of the Messrs. Burden, at the Troy Iron Works—Horace Crosby, Bangor, Me.

Review of the locomotive engine Excelsior—Arba R. Haddock, Troy, N. Y.

Review of the locomotive engine Empire—Aniceto G. de Menocal, Havana, Cuba.

Design for an iron arched truss bridge over the Hudson River at Troy, N. Y.—John C. Underwood, Bowling Green, Ky.

Review of the Whipple iron bridge over the Erie Canal, on the Albany and Vermont Railroad, near Troy, N. Y.—Peter D. Vroom, Jr., Trenton, N. J.

Pacific Railroad of Missouri.

The St. Louis *Republican* of the 17th instant furnishes the following information relative to the continuation of the Pacific Railroad of Missouri:

"We are gratified to learn as we do from information communicated by George R. Taylor, Esq., President of the Pacific Railroad, that work will be resumed on the southwest branch of that road along the whole line between Rolla and Lebanon, a distance of fifty-six miles. The work will be carried on in pursuance of an order of the President of the United States, under the authority of the act which empowers him to direct that certain railroads named therein shall be repaired and continued. The Secretary of War is charged with the execution of this order, and will, no doubt, immediately take steps to have it complied with in the most expeditious manner.

"By far the heaviest grades on the entire road from St. Louis to the southwestern angle of the state occur in the division between Rolla and Labanon. These being surmounted, and the road finished to the last named point, the continuation of it to Springfield and thenceforward will be a comparatively easy matter. The road is one of great importance in a military point of view, and it was a wise decision of the President to intervene in its favor as he has seen fit to do. Of course, the relief and benefit to the company will be a very important matter.

"It operates as so much direct aid to the road, and will greatly assist, by leaving other means at command, to the completion both of the southwest branch and of the main trunk to Kansas, and its connection with the National Pacific road."

RAILS AT BOSTON.

400 TONS RAILS—50 lbs. per lineal yard—T pattern—now ready for delivery at Boston. For sale by

Railroad Earnings--Weekly.

The traffic of the Great Western Railway of Canada for the week ending July 11, 1862, was as follows:

Passenger	$20,313 25
Freight and live stock	18,973 85
Mails and sundries	1,607 72
Total	$40,894 82
Corresponding week of last year	29,423 10
Increase	$11,471 72

The receipts of the Grand Trunk Railway of Canada for the week ending July 5th, 1862, were:

Passengers	$28,906 64
Mails and sundries	2,933 68
Freight and live stock	31,253 80
Total	$63,094 12
Corresponding week, 1861	57,516 12
Increase	$5,578 00

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 2nd week of July, 1862, were | $26,959 78
Corresponding week, 1861 | 19,918 38
Increase | $7,041 40

The Chicago and Rock Island Railroad earned the 2d week of July, 1862 | $26,271
Do., 1861 | 20,514
Increase | $5,757

The earnings of the Galena and Chicago Railroad the 2d week in July, 1862, were. | $54547, 38
Do., 1861 | 80,145 76
Increase | $24,401 62

The Michigan Southern road shows a gain of $15,483 in the 2d week of July.

The earnings of the St. Louis, Alton and Chicago Railroad for the 2d week in July, were:

1862	$21,316 30
1861	16,776 93
Increase	$4,539 37

The earnings of the Toledo and Wabash Railroad for 2d week of July, 1862, were | $23,679 24
Do., 1861 | 18,191 82
Increase | $5,487 42

The first half of the year ending June 30, shows a gain of $90,000 on the same period of last year.

The Michigan Central earned in the 2d week in July, 1862 | $38,779 00
Do., 1861 | 24,826 00
Increase | $13,953 00

The earnings of the Chicago and Northwestern Railroad the 2d week in July were | $22,009 03
Corresponding week, 1861 | 19,079 10
Increase | $2,929 93

AMERICAN RAILROAD BOND LIST.

(*) signifies that the road is in the hands of receivers. (†) that the company is in default in its interest. S. F.," Sinking Fund. "var.," that the bonds fall due at different periods

American Railroad Journal.

Saturday, July 26, 1862.

Railroads in Southern Austria and Italy.

Some interesting statements respecting what may be termed the Austrian system of railroads were made at the recent meeting of stockholders in Paris. These works were originally undertaken by the government; but transferred to a company of capitalists about seven years ago, in consequence of the financial condition of the country. They comprise six groups, known as those of Trieste, Hungary, the Tyrol, Venetia, Lombardy and Central Italy. It will be seen that they extend to some of the provinces in the new Kingdom of Italy as well as the States of Austria.

The whole roads will be, when completed, 1,907 miles in length; of these, 1,327 miles are already finished. Beginning at Vienna, one line stretches south-westward through Upper Austria, Styria, Carinthia and Carniola, to the port of Trieste on the Adriatic; this has been in operation for several years. A second connects the cities of Trieste and Venice by an exceedingly curved line. A third traverses the great plain of Northern Italy about midway between the Alps and the river Po, terminating at Milan. Another extends from Milan southward to the Po opposite Piacenza, crossing the river by a temporary structure, while a more permanent one is in course of construction. From Piacenza this is continued to Bologna, nearly parallel with the old Æmilian way, which though built over 2,000 years ago, is still in tolerable condition. We believe the Italian Government is extending this great avenue to the Adriatic, if it has not already reached it at Ravenna. Ultimately it will traverse the peninsula in the direction of its entire length.

A second avenue between Vienna and Northern Italy is to be built, the work of surveying it having begun some time ago. It will cross the Tyrolese Alps, at the head of the Adige river, where the pass is between 5,000 and 6,000 feet high. Passing down that valley, which is famous in the wars of the first Napoleon, it will strike the great Venetian line at or near the fortress of Peschiera, and pass down the river to Mantua.

The principal Hungarian line, when completed, will pass from Vienna down the Danube, by way of Presburg and Buda-Pesth, and thence proceed across the central plain to two or three points on the Theiss. A portion of this was opened last year. A number of subordinate lines are also provided for in connection with the great trunks mentioned above.

The report of last year's operations is highly satisfactory in a financial point of view. On the 1,327 miles in operation the gross receipts amounted to 63,516,556 francs, equal to $12,500,000 in round numbers; while the working expenses were only 24,598,351 francs, or less than 39 per cent. Compared with the previous year these figures show a very large gain in receipts, with an actual decline of expenses. The dividends declared were ten per cent. leaving still a handsome sum as surplus.

The prosperity of this great work, of course, is owing to the fact that, traversing very popular and rich districts of country, it has practically no rivals. Concentrate the whole travel and traffic of any great country upon a single line, and it will be badly managed indeed if it does not enrich its stockholders.

Penobscot and Kennebec Railroad.

The annual meeting of this company was held at Bangor, Me., on the 9th inst., at which the report of the directors for the fiscal year ending May 31, 1862, was presented. During the past year, and since December 1, 1856, this road has been operated under lease by the Androscoggin and Kennebec Railroad Company. The net earnings of both roads after paying all expenses incident to their operation, are divided in the proportion of three-sevenths to the former and four-sevenths to the latter company. The earnings of the whole line during the past year have been:

From 90,441 passengers	$130,316 32
" 53,061.23 tons freight	106,040 30
" express, mail, etc.	17,885 64
	$254,242 26

And the expenses were:

Repairs of track	$45,295 19	
" equipment	13,923 30	
" buildings, etc.	5,327 80	
Train expenses	13,453 03	
Station expenses	13,768 44	
Fuel	17,001 52	
Oil and waste	2,318 69	
All other expenses	11,469 65	
		124,557 62

Net earnings for the year:

Androscoggin and Kennebec Railroad Company, 4-7ths	$74,105 51	
Penobscot and Kennebec R. R. Co., 3-7ths	55,579 13	
		129,684 64

Compared with the previous year the gross earnings show a decrease of $64,263 14
With a decrease in expenses of 29,293 92

Making the decrease in net earnings $34,969 22 —the amount received by this company is therefore $14,986 81 less than that of the previous year. The report says:

In consequence of the great falling off in the earnings of the road from the commencement of the year to March last, and the uncertainty of any immediate increase, your Directors were compelled (they having no other means to meet the claims of the company) to give notice to the City of Bangor that they were unable to provide for the pay-

ment of the bonds and coupons outstanding, over due and unpaid, and for those becoming due in April then following, and which were issued in aid of the construction of your road. The whole amount over due and unpaid at that date, and those falling due in April, was $66,580.

Since notice to the city, the earnings received from the Androscoggin and Kennebec Railroad Company have been paid into the city treasury, and amount to $13,281, leaving a balance of bonds and coupons outstanding and unprovided for by the company, of $53,299.

In consideration of the payment weekly of the earnings into the City treasury as stated, and by the request of your Directors, the City council have deferred any action in the premises, for the purpose of giving all parties interested, time and opportunity to make arrangements to relieve the city from its liability for the over due and unpaid bonds and coupons.

You are aware that an act was obtained from the Legislature in 1856, authorizing the consolidation of the Penobscot and Kennebec and the Androscoggin and Kennebec Railroad Companies. There was inserted in that act, against your wishes and consent, a provision, which in case of consolidation under it would have operated adversely to the interests of the new corporation, and has heretofore prevented the uniting the two corporations.

The last Legislature repealed the objectionable provision, so that, as far as relates to the act, there is no obstacle in the way of consolidation.

To consummate that purpose, the Directors of the two companies respectively, in accordance with the provisions of the act, have agreed upon the terms and conditions of consolidation, the mode of carrying the same into effect, the name of the new corporation, and other things to be done as specified therein.

The contract we believe to be satisfactory to all parties interested, as they have, most of them, acceded to the proposition, by signing written agreements to abide by its provisions.

To carry the agrement into effect, and consolidate the two companies permanently and effectually, it will be necessary to raise the sum of $75,000 to pay the outstanding and over due bonds and coupons of the City of Bangor which now remain unpaid, and to pay the notes given by the Penobscot and Kennebec Company for the property purchased of the owners of the Pier Corporation, a large amount of which falls due the first day of January next, which will have to be provided for, or the company will lose their rights to a large and valuable real estate, which is indispensable for the use of the company.

In case the agreement is not carried out and consolidation not effected, your road and all the property connected therewith will pass out of the possession of the stockholders, and the title by foreclosure will become vested in the mortgagees.

The foreclosure of the mortgage to secure the third bonds, so called, expires on the 12th of the current month.

A large number of the third bondholders, however, have agreed to comply with the terms of consolidation, provided it is perfected before the first day of August next, and have signed an agreement to that effect.

The foreclosure of the second mortgage expires on the 12th day of February, 1863.

The company has of second mortgage bonds which are pledged as collaterals for $13,033 75; of bills payable, $23,000; of third mortgage bonds unsold $143,000; and 1,140 shares of stock, received mostly from sale of third mortgage bonds.

The coupons outstanding amount to $109,233; and the unsettled land damages, etc., to $5,800; to which add interest scrip, bills payable, etc., as below, $89,244 98—making the floating liabilities of the company $204,277 98.

The assets consist of bonds of city of Bangor, $1,000. Bills receivable and accounts, $3,933 08; city of Bangor, $13,281; cash, 1,251 22—total $19,465 30.

The funded debt consists of the three classes of bonds enumerated below, amounting in the aggregate to $1,213,600.

General Account.

Capital stock	$557,829 45
1st mort. for city of Bangor bonds	780,000 00
2d mortgage bonds sold	277,000 00
3d mortgage bonds sold	156,600 00
Interest scrip due to stockholders	15,333 24
Bills payable and accounts	73,911 74
	$1,860,674 43
Construction	$1,613,473 58
Equipment	104,019 21
Stock in Pen. & Ken. R. R. Co.	78,014 20
City of Bangor bonds unsold	1,000 00
Bills receivable and accounts	3,933 08
City of Bangor	13,381 00
Cash	1,251 22
Profit and loss—balance	45,702 14
	$1,860,674 43

The office of the company is at Bangor, Me. The officers are:

President—Hollis Bowman, Bangor, Me.
Treasurer—Elias Merrill, " "
Superintendent—Edwin Noyes, Waterville, Me.

Interest and Dividends.

The New York Central Railroad Company have declared a semi-annual dividend of three per cent (free of the U. S. Income Tax, which will also be paid by the company) payable on the 20th of August next in New York, at the Banking House of Messrs. Duncan, Sherman & Co.; in Boston, at the office of J. E. Thayer & Brother; in Albany, at the Albany City Bank; and on the 20th September, in London, at the Union Bank of London. The transfer books will be closed on the 31st inst., and re-opened on the 23d of August.

The New Jersey Railroad and Transportation Company have declared a semi-annual dividend of five per cent., payable on the 31st inst. The transfer books will be closed from to-day until the 2d of August.

The interest on the first mortgage bonds of the Hudson River Railroad Company, due August 1, will be then paid at the Treasurer's office.

The Delaware and Raritan Canal and Camden and Amboy Railroad and Transportation Companies have declared a dividend of 5 per cent.

The directors of the Cleveland, Columbus and Cincinnati Railroad Company have declared a dividend of five per cent. out of the net earnings of the six months ending 30th June, and a stock dividend of five per cent. out of the accumulated surplus, both payable on and after July 28th. Stockholders registered in New York will be paid at the office of the United States Trust Company of New York. The dividend certificates to be issued for fractional shares, will not be entitled to future dividends, until converted into full shares.

The Central Railroad Company of New Jersey, have declared a quarterly dividend of two and a half per cent., payable on the 16th inst.

The interest warrants or coupons of the Cleveland and Toledo Railroad Company, due 1st August, will be paid at the Corn Exchange Bank, on the 25th inst.

The Farmers' Bank of Kentucky has declared a dividend of three per cent.; the Bank of Kentucky one of two and a half per cent.—payable at the Bank of America. The New Orleans Canal and Banking Company advertise to pay its Northern stockholders their last two dividends at Messrs. M. Morgan & Son's, No. 37 William street.

The Brooklyn City Railroad Company has declared a dividend of four per cent., payable on the 31st inst.

The Connecticut River Railroad Company has declared a dividend of $3.09 per share, payable August 1, the odd nine cents to be paid to the United States for the tax on dividends.

A dividend of three per cent. has been declared by the Galena and Chicago Railroad Company payable on and after the 30th inst., in exchange on New York at par. The Income Tax of three per cent will be reserved from all dividends paid on and after the 1st of August next.

Postage Stamp Currency Bill.

Annexed is a copy of the act to authorize payments in postage stamps, and to prohibit the circulation of notes of less denomination than one dollar:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be and is hereby directed to furnish to the Assistant Treasurers and such designated depositories of the United States as may be by him selected, in such sums as he may deem expedient, the postage and *other stamps* of the United States, to be exchanged by them, on application for United States notes; and *from and after the first day of August next*, such stamps shall be receivable in payment of all dues to the United States less than five dollars, and shall be received in exchange for United States notes when presented to any Assistant Treasurer or any designated depository selected as aforesaid, in sums not less than five dollars.

Sec. 2. *And be it further enacted*, That from and after the first day of August, eighteen hundred and sixty-two, no private corporation, banking association, firm or individual shall make, issue, circulate or pay any note, check, memorandum, token, or other obligation, for a less sum than one dollar, intended to circulate as money, or to be received or used in lieu of lawful money of the United States; and every person so offering shall, on conviction thereof in any district or circuit court of the United States, *be punished by fine not exceeding five hundred dollars, or by imprisonment not exceeding six months, or by both, at the option of the court.*

Approved July 17, 1862.

By the above it will be seen that postage stamps are not made a legal tender, excepting for dues to the Government, but as they are to be at all times redeemable by the Government in sums of five dollars, and even smaller amounts, when the new small notes are issued, they will circulate as freely as if they had been made a legal tender.

Chicago Manufactories.

In Chicago, an extensive iron-working establishment is now being erected by Messrs. Chas. Kellogg & Co., of Detroit. Its site is on the east side of the river, near the locality of Ward's Chicago Iron Rolling Mills. These new iron works of Messrs. Kellogg & Co. are to be devoted to manufacturing iron and railroad bridges, engines and machinery, and other work, and they expect to have the establishment in full blast in less than a year from the present time. The firm have enterprise, skill, experience and capital to carry on a large business successfully. They have just completed for Ward's Iron Rolling Mills, in Chicago, two immense Nasmyth steam hammers, each striking blows of 70 tons, or less, as may be required.

In order to keep pace with the rapidity increasing demand for railroad iron, Capt. E. B. Ward has determined to erect, in Chicago, another Rolling Mill, of still greater capacity than his present one in that city. For this purpose he purchased

on 10th ult. a tract of land above the site of the present works, and will at once contract for the building and machinery.

The Pacific Railroad.

An Act to amend an act entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri river to the Pacific ocean, and to secure to the Government the use of the same for postal, military, and other purposes," approved July 2, 1862.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first meeting of the commissioners named in the act entitled "An act to aid in the construction of a railroad and telegraph line from the Missouri river to the Pacific ocean, and to secure to the government the use of the same for postal, military, and other purposes," approved July second, eighteen hundred and sixty-two, and of the five commissioners directed by said act to be appointed by the Secretary of the Interior, shall be held at Bryan Hall, in the city of Chicago, in the State of Illinois, on the first Tuesday of September next at twelve o'clock at noon. A notice of said meeting, to be signed by at least ten of the commissioners named in said act, shall be published at least once a week during the six successive weeks commencing on the twentieth of July, one thousand eight hundred and sixty-two, in one daily newspaper in each of the cities of Boston, New York, Philadelphia, Cincinnati, Chicago, and St. Louis, and no other notice of said meeting shall be requisite.

Approved, July 12, 1862.

Railroad Bridge in Portugal.

Railway works are marching on in Portugal. A fine bridge, which crosses the Tagus, on the Lisbon and Badajoz Line, has just been terminated. The bridge, which has been constructed in 18 months, is formed entirely of iron, and it has 16 openings, each of 100 feet span. The piles on which the structure is placed are composed of two cylindrical iron tubes, 5 ft. 4 in. in diameter, and they have been sunk at a distance of about 6 ft. 8 in. from each other. For the purpose of securing greater solidity and strength they are strongly bound together with ironwork. In two months locomotives will thus be enabled to cross the Tagus at a height of more than 50 feet above the ordinary level of the river, and with the same security as on any other part of the line. The Lisbon and Badajoz line forms part of the Royal Portugese system now in course of rapid construction, under the direction of of French engineers. The system must not be confounded with the South-Eastern of Portugal, which exhibits a locomotive in the machinery annexe of the International Exhibition. From Badajoz the line will be carried by another company to Cindad Real, across the South of Spain, while in another direction it will be connected with Madrid. The railway navvy is now hard to work throughout the Spanish peninsula, and although personally he is rather a tough diamond, he cannot but be regarded as the agent of modern civilization.

The British Revenue.

The total revenue of the United Kingdom for the year ending June 30th, 1862, amounted to £69,685,789, derived from the following sources:

Customs	£23,644,000
Excise	18,047,000
Stamps	8,657,945
Taxes	3,154,000
Property tax	10,549,000
Post Office	3,535,000
Crown lands	296,000
Miscellaneous	1,802,844
	£69,635,789

Compared with the preceeding year the revenue shows a net decrease of £2,177,305, the falling off having taken place in the excise duty on paper, which has been abolished, and in property tax, which has been reduced during the year. The items of customs, stamps, post office, and miscellaneous show a fair increase over those of 1861. The last quarter differs but slightly from the corresponding one of last year.

The National Tax Bill.

INTERNAL TAXES OF THE UNITED STATES.

The following is a complete list of the new internal taxes which will come into operation on the first of August. It has been carefully prepared from an official copy of the act, and is arranged in a manner most suitable for ready reference.

LICENSES.

[Any number of persons may carry on business in copartnership under one license; but, with the exception of auctioneers and peddlers, a license is available for one place of business only, storage alone being permitted elsewhere.]

Amusements.—Theatres	$100 00
" Circuses	50 00
" Jugglers	20 00
" Other public exhibitions	10 00

No license procured in one State is held to authorize exhibitions in another State, but a separate license is required for each State.

Apothecaries, except where annual gross receipts do not exceed $1,000, or where a wholesale or retail dealer's license has been taken out	10 00
Auctioneers	20 00

Not allowed to sell at private sale under this license. No license required for auction sales made by judicial or executive officers, or public sales by executors or administrators.

Bankers not incorporated or legally authorized to issue notes as circulation	100 00
Billiard Rooms and Bowling Alleys open to the public, for each table or alley	5 00
Brewers	50 00
" of less than 500 bbls. per year	25 00
Brokers in Stocks, Shares, Money and Exchange	50 00
Brokers, Commercial, Shipping, Real Estate, etc.	50 00
Exempt—Parties having taken out Wholesale Dealer's, or Banker's License.	
Brokers in Land Warrants	25 00
Cattle Brokers	10 00
Claim and Patent Agents	10 00
Coal-Oil Distilleries	50 00
Confectioners, Retail, except where the annual gross receipts do not exceed $1,000, or where a wholesale or retail dealer's license has been taken out	10 00
Dealers, Retail, except where the annual gross receipts do not exceed $1,000.	10 00
" Wholesale, who may also sell at retail	50 00
Distilleries of Spirituous Liquors	50 00
" ditto, if of less than 300 bbls. per year	25 00
" of Apples and Peaches, manufacturing less than 150 bbls. per year	12 50
" ditto, if greater quantity, same rate as Distillers of Spirits.	
" Pharmaceutical and Chemical.	*free.*
Eating Houses, except where the annual gross receipts do not exceed $1,000	10 00
Confectionery may be sold without an extra license.	
Hotels, Inns, and Taverns, if rental or annual value of premises is $10,000 and over	200 00
——$5,000 and less than $10,000	100 00
—— 2,500 " " " 5,000	75 00
—— 1,000 " " " 2,500	50 00
—— 500 " " " 1,000	25 00
—— 300 " " " 500	15 00
—— 100 " " " 300	10 00
—— less than 100	5 00
Lawyers	10 00
Livery Stable Keepers and Horse Dealers	10 00
Manufacturers of goods, wares or merchandise, exceeding annually $1,000 in value	10 00
Pawnbrokers	50 00
Peddlers traveling with more than 2 horses	20 00
" " " 2 horses	15 00
" " " 1 horse	10 00
" " on foot	5 00
Peddlers of Dry-goods, who sell or offer one or more original packages or pieces at one time to same person	50 00
Peddlers of Jewelry	25 00
Photographers when receipts do not exceed $500	10 00
Over $500 and under $1,000	15 00
Over $1,000	25 00
Physicians, Surgeons and Dentists	10 00
Rectifiers, who do not exceed 500 barrels or casks of 40 gallons each	25 00
For each additional 500 such bbls., or fractional part thereof	25 00
Spirits, Fermented Liquors, and Wines, wholesale dealers in	100 00
Retail ditto, not to be drank on the premises	20 00
Steamers or Vessels upon waters of the United States, on board of which passengers or travelers are provided with food or lodging	25 00
Tallow Chandlers and Soap Makers	10 00
Tobacconists, except where the annual gross receipts do not exceed $1,000, or where a license has been taken out as wholesale or retail dealer, or keeper of Hotal, Inn, or Tavern	10 00

Penalty for carrying on a business requiring a license, without the same, three times the amount of license.

Penalty for any fraud in return of actual rental of hotel, etc., to the assessor, double the amount of license.

Exemptions.—No license is required for the sale of goods, wares and merchandise, made or produced and sold by the manufacturer or producer at the manufactory or place where the same is made or produced; nor for the sale by vintners of wine of their own growth at the place where it is made; nor by apothecaries as to wines or spirituous liquors used exclusively for medicinal purposes. Physicians who keep on hand medicines for the sole purpose of making up their own prescriptions do not require an apothecary's license in addition to their own.

SPIRITS, ALE, BEER, AND PORTER.

Spirituous Liquors, proof and under, per gallon	$00 20
Above proof duty increased in proportion.	
Beer, Lager Beer, Ale, Porter, and other fermented liquors at the rate of per barrel of 31 gallons	1 00

Ten per cent. added to the amount of duty upon spirituous and fermented liquors if not paid when due.

Penalty for Distillers making false statements as to number and capacity of stills upon application for license, $100.

Penalty for altering inspector's mark of quantity and strength, or for using a cask or barrel bearing inspector's mark of proof for selling spirits of different strength, $500.

Penalty for neglect or refusal to make true and exact entries and reports, $500 and forfeiture of all stock on hand, and utensils of trade; for refusal or neglect to furnish abstracts of accounts to assessor, $500.

MANUFACTURER'S PRODUCTS, ETC.

I. *Specific Duties.*

	m.
Chocolate and Cocoa, prepared, per lb.	$0 01
Cigars, valued at not over $5 per 1,000, per 1,000	1 50
At over $5 and not over $10 per 1,000, do.	2 00
At over $10 and not over $20 per 1,000, do.	2 50
At over $20 per 1,000, do.	3 50
Clock movements, made to run one day, each	0 05

More than one day, each 0 10
Coal, except Pea and Dust, per ton 0 03 5
Cotton, raw, (from Oct. 1, 1862,) per lb. . 0 00 5
Penalty for removal from place of production, without sanction, before the tax is paid, double duty.
Gas, when product not above 500,000 cubic feet per month, per 1,000 cubic ft. 0 05
Above 5,000, and not above 5,000,000, ditto 0 10
Above 5,000,000, ditto 0 15
Private Gas Works are subject to duty. Coal Tar produced in the manufacture of Gas and the products of its re-distillation, free from duty.
Glue and Gelatione, of all descriptions, in solid state, per lb. 0 00 5
Glue and Cement, made wholly or in part of glue, to be sold in liquid state, per gallon 0 25
Ground Coffee, and all preparations of which coffee forms a part, or which is prepared for sale as a substitute therefor, per lb. 0 00 3

Penalty for not defacing or fixing stamp so that it shall be destroyed in opening the bottle, box or package, $50; for making, preparing or selling any of the above without a proper stamp affixed thereto, $100; for removing stamps from one package to another with intent to evade duty, $50; for manufacturers neglecting to make a declaration, monthly, that no articles have been sent out unstamped, $100; for making false or untrue declaration, $500.

Allowance on Quantities.—Any proprietor of a medicine, etc., furnishing his own die or design for stamps will be allowed a discount on amounts purchased at one time of not less than $50 nor more than $500, of five per cent.; on amounts over $500, of ten per cent.

LEGACY DUTIES.

Legacies and distributive shares, arising from Personal Property, when the same shall exceed $1,000, pay duty according to the following propinquity to the deceased:

1. To lineal issue or lineal ancestor, brother or sister, for every $100 .....$0 75
2. To a descendant of a brother or sister, ditto 1 50
3. To a brother or sister of father or mother, or a descendant of a brother or sister of father or mother, ditto 3 00
4. To a brother or sister of grandfather or grandmother, or a descendant of brother or sister of grandfather or grandmother, do. 4 00
5. To any other degree of collateral consanguinity, or to a stranger in blood, or to a body politic or corporate. ditto 5 00

Exempt—Property passing to husband or wife.

Penalty for any person having in charge any record containing information as to the property of the deceased, withholding same from the proper officials, $500. When Executors or Administrators refuse or neglect to deliver a proper statement of personal property, or to pay the duty when due, the highest rate of duty will be enforced.

DRAWBACK.

An Allowance or Drawback will be made on all articles on which any internal duty or tax shall have been paid, *except raw or unmanufactured cotton*, equal in amount to the duty or tax paid thereon, when exported, upon evidence being furnished that such duty or tax has been paid.

*** No drawback will be allowed on any amount claimed less than $20.

Additional Drawback.—In computing the allowance or drawback upon articles manufactured exclusively of cotton, when exported, there shall be allowed, in addition to the 3 per cent. duty which shall have been paid on such articles, a drawback of 5 mills per pound upon such articles, in all cases where the duty imposed by this act upon the cotton used in the manufacture thereof has been previously paid; the amount of said allowance to be ascertained in such manner as may be prescribed.

Penalty for fradulently claiming drawback upon goods upon which no duty have been paid, or a greater allowance than shall have been actually paid, $500, or triple the amount wrongfully claimed, at the election of the Secretary of the Treasury.

GENERAL PENALTIES.

Penalty for delivering or disclosing false or fraudulent Lists or Statements of taxable articles to the assessors, not to exceed $500, in addition to the duties on omitted articles.

Penalty for neglect or refusal to give a proper List or Statement of taxable articles within the time required (except in case of sickness) $100, with 50 per cent. additional duty. The assessor is empowered to enter the premises of negligent or recusant parties for the purpose of making his assessment.

Penalty for the non-payment of annual taxes at the time and place appointed by the collector for the receipt thereof, an addition of 10 per cent. to the amount.

Penalty for refusing officers admission to places where taxable articles are manufactured, or for in any way obstructing them in the performance of their duty, $500.

Penalty for any attempt at fraud in the evasion of duty, seizure and condemnation of the articles; for the possession of any such articles for the purpose of selling the same with the design of avoiding payment of duties, $100.

STATE TAXES AND RIGHTS.

No license provided for by the act, if granted, shall be construed to authorize the commencement or continuation of any trade or business, occupation or employment within any State or Territory of the United States in which it is or shall be specially prohibited by the laws thereof.

Nothing in the act shall be held or construed so as to prevent the several States, within the limits thereof, from placing a duty, tax or license for State purposes, or any business, matter or thing, on which a duty, tax or license is required to be paid by the act to provide Internal Revenue.

Burdon, Hubbard & Co.,
MACHINISTS,
MANUFACTURERS of Steam Engines, Sugar Mills, Saw and Grist Mills, Boilers, Hydraulic Presses, Pumps and Gearing for working mines, etc., etc. No. 102 Front st., BROOKLYN, N. Y.

THE NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, July 19, 1862.

CUMBERLAND COAL.

THE BORDEN MINING COMPANY
ARE now prepared to fill orders and to make contracts for the season of 1862, for **CUMBERLAND COAL,** DELIVERABLE ON BOARD VESSEL AT **Baltimore, Md., Alexandria, Va., or Georgetown, D. C.** Purchasers may rely upon the Coal proving equal in quality to that heretofore furnished.

The Company also have the pleasure of announcing that they have completed, after two years' labor, their shaft and machinery upon their new property in the VALLEY OF GEORGE'S CREEK, and are lifting from the very heart of the Coal Basin a superior and perfect article of **BITUMINOUS COAL,** remarkably free from impurities of every description, and possessing qualities peculiarly adapting it to Locomotive use, and to generating steam under all circumstances. This Coal will be known in market as **"BORDEN'S PIT COAL."**

Our Railroad friends, and others requiring a superior Coal, will find it to their interest to give this a trial before contracting elsewhere.

For prices and other information apply to
WILLIAM BORDEN.
3m21 **Nos. 70 and 71 West st., New York.**

RENSSELAER
POLYTECHNIC INSTITUTE,
TROY, N. Y.

THE thirty-ninth Annual Session of this Institution for instruction in the MATHEMATICAL, PHYSICAL, and NATURAL SCIENCES, will commence on Wednesday, Sept. 17th, 1862. Appropriate quarters, and a full supply of apparatus, will be provided, so that all the Courses of Instruction can be given precisely as heretofore. The new buildings for the Institute will be placed on a more commanding site, and be constructed as soon as possible.

The ANNUAL REGISTER, containing full information, can be obtained from
3m27 Prof. CHARLES DROWNE, Director.

NOTICE TO HOLDERS OF
Construction Bonds of Dubuque & Pacific R. R. Co.

IN accordance with the order of the District Court of Dubuque County, Iowa, you are hereby required to present your bonds, on or before the 8th day of October, 1862, at the office of the Dubuque and Sioux City R. R. Co., in Dubuque, for conversion into preferred stock of last said company; otherwise the company will be under no obligation to convert the same.

JAMES M. McKINLAY,
July 12, 1862. 4t29 Secretary, D. & S. C. R. R.

CAR DUCK.

HEAVY 4-PLY FITCHBURG DUCK OF ALL WIDTHS, 11 to 144 inches. PLUSHES. BURLAPS. CAR HEAD LININGS. and all kinds of RAILROAD SUPPLIES.

IMPORTANT

TO

RAILROAD COMPANIES.

—o—

THE ATTENTION OF

RAILROAD MANAGERS

Is called especially to the Machines manufactured especially for the use of Railroad Companies by the proprietors of the

ALBANY AGRICULTURAL WORKS,

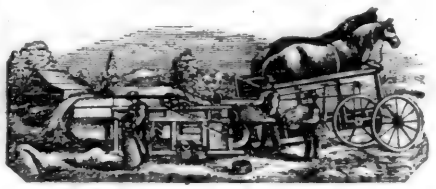
CONSISTING OF

EMERY'S PATENT

Railway Horse Power,

Made changeable for both right and left hand work, also with changeable degrees of forces and motions of the driving Pullies without changing the Speed and Labor of the Horses, thereby adapting them to the different uses required, as Sawing Wood, Pumping Water, Driving Elevators and Machine Shops, Foundries, etc. The Power is also adjustable to any degree of wear or use, so as to always insure its working with its greatest efficiency. All the running chains in these Powers are made of the best MALLEABLE IRON which gives to them triple the strength and durability of Grey Iron which last is universally used by all other Railway Horse Power Manufacturers—thereby at the same time lessening the weight of these several hundred pounds, making them less cumbrous for handling and transportation.

WOOD SAWING MILLS.



These Sawing Mills are made upon the most approved and convenient plans in use. Having a heavy plate fly wheel fixed to the Mandrill with a Ratchet or catch pulley for the driving band on the outside of the fly-wheel—the journal bearings are fitted with Babbet Metal—the wood carriage traverses on iron ways and gibbs—a 24 or 26 inch Saw is fitted, filed and set in working order and the plates warranted. When desired, a 14 inch saw is fitted, also a table for the purpose of slitting boards, etc., for fencing and carpenter work.

The whole together forming one of the most complete and desirable sets of machines for their purposes. They are already in very general use on nearly all the principal Railroads in this country.

PRICE,	ONE HORSE POWER	$90.00
"	TWO " "	120.00
"	SAW MILL, 24 in. Saw	37.00
	SETT BANDS and EXTRAS	5.00

PUMPING ENGINES

Of different kinds for Raising Water for Railroad tanks and other purposes, can be furnished on demand with Reciprocating or Rotary Pumps—fitted to be operated by these Horse Power and the best adapted for Railroad and Mining purposes. One of the SEVENTY-FIVE DOLLAR PUMPING ENGINES when driven by the TWO HORSE POWER has a capacity equal to any Four or Five Horse Power Steam Engine and Pumping Machine for the same purposes.

THRESHING MACHINES

Of the most approved kinds, for one and two horses and with simply Separators, or with Complete Cleaners which fit the grain for market in one and the same operations, and of the most approved construction.

They are very extensively introduced into all the grain-growing sections of this country and the world. They are especially adapted to the force of the above Horse Powers and can be driven by Steam or Water power with equal advantage. They will be furnished on the most liberal terms and warrants.

Liberal discounts made to RAILROAD COMPANIES from the above prices, and agents solicited for the sale of their manufactures.

For further particulars see the new Illustrated and Price Catalogue of the ALBANY AGRICULTURAL WORKS, furnished gratis on application to the proprietors.

THE GREAT FIRE IN TROY.

Unparalleled Triumph
OF
LILLIE'S SAFES!

The following certificates explain themselves:

TROY CITY BANK, May 21, 1862.

LEWIS LILLIE, Esq.—Dear Sir: I am sure it will give you as much pleasure to know as it does me to say, that in the recent fire of the 10th inst., which desolated our city and destroyed our Banking-house, the contents of our Bank vault, though the building itself was a heap of ruins, remained entirely unharmed. This result we attribute entirely to the fact that our old Wrought Iron Doors were, about two years since, exchanged for a set of your celebrated Chilled and Wrought Iron Doors and Frames. With the old doors, not a book or paper in the Vault could have been saved; as it is, nothing in it was even damaged, though exposed to the most intense heat.
Yours, respectfully, S. K. STOW, Cashier.

TROY, N. Y., May 14, 1862.

The undersigned, using **Lillie's Chilled and Wrought Iron Fire and Burglar Proof Safes,** at the time of the late disastrous fire in this city, would state that our safes were subjected to a severe test by fire, the heat varying in intensity, according to the locality and surroundings. The time they were exposed to the fiery ordeal, unprotected by water, varied from 24 to 72 hours. We would say that our money, papers, books, etc. were well preserved, and the Safes are suitable for further use. By comparison with Safes of other manufacture, equally exposed, we have no hesitancy in recommending Safes of Lillie's manufacture to the public on their demonstrated merit as entitled to unparalleled confidence as fire-proofs.

James Kenyon,	S. Bachelder,
S. O. Gleason,	Gates H. Barnard,
Percy & King,	W. D. Haight,
McCoy & Beadle,	Denio & Freiot,
Coon & Van Valkenburgh,	Walsh, Petit & Anthony,
S. S. McClure,	D. H. Snyder,
Ross & Smith, }	Jonathan Seaman.
Robert Green, }	

Not dug out—nothing in them.

TROY, May 19, 1862.

The undersigned had one of **Lillie's Wrought and Chilled Iron Safes,** which went through the fire of the 10th of May. The Safe was exposed to a severe fire for over 24 hours. In falling it turned on its face, and when turned up to open the doors was red-hot. The back of the lower part of the Safe (behind the books) was filled with pennies, which, in falling over, pressed against the books, and brought them directly in contact with the doors. The wrappers on the pennies were mostly good. The books were unfit for further use, but the writing on them was partially legible and could be copied.
DUSENBURY & ANTHONY.

TROY, May 19, 1862.

This is to certify that we had in our store, in this city, when it burned, one of **Lillie's Small Safes,** which was in the fire, without water on the building or Safe. Most of the valuables were removed before the fire, and therefore we were not in haste to get the Safe out of the burning ruins. Some of the papers left in the Safe were legible when taken out, but most of them were charred.
I. M. SINGER & CO.,
Per G. W. BABCOCK, Agent.

This is to certify that the undersigned had one of LILLIE'S Patent Chilled Iron Safes in their store, which was burned during the late severe fire in this city, and we are happy to state, the Safe preserved all its contents in first-rate condition. All the papers were legible, and the books will do for further use, without even rebinding.
GRANT, NUTTING & CO.

The foregoing comprises all the Safes of my manufacture that were in the fire, and below will be found certificates from all the owners of Safes manufactured several years since, by World's Safe Company, who used my Patent Chilled Iron Shell, but not my Fire-Proof Cement.

WORLD'S SAFE COMPANY'S SAFES.

TROY, May 19, 1862.

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire of the 10th inst., in this city, would state that our Safes were exposed to a severe heat, being confined in the burning ruins, unprotected by water, from one to three days. On opening the Safes the contents were mostly legible, and to a far greater extent than could be reasonably expected of any Safe. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectors against fire, and by this test we are prepared to recommend them as such to public patronage.

Lyman Bennett,	Silliman, Matthews & Co.,
Flood & Dunham,	E. L. Mallory,
John Hutchinson,	E. H. Virgil,
Sup't National Express Co.	

The undersigned, having Safes manufactured by the late World's Safe Company, and which were subjected to the great fire in this city, would state, that on opening our Safes the contents were mostly legible. We concur in the opinion that the Safes manufactured by LEWIS LILLIE, which were subjected to the fire for a longer time and preserved their contents, are superior and powerful protectives against fire, and we are happy to recommend them to public patronage.
W. & L. E. GURLEY,
R. L. & G. DRAKE,
LEONARD SMITH,
H. E. & W. ALENDORPH, Absent.

TROY, May 19, 1862.

To whom it may concern: We would certify that when the recent fire broke out in this city, we took out from our Safe (which was made by World's Safe Company) all our books, papers, etc., and then left it to the flames without shutting the door, and the Safe will do for further use by being repaired, although the book case was destroyed by the door being left open through the fire.
ACKLEY & CO.

TROY, May 19, 1862.

The undersigned, using Safes manufactured by the World's Safe Company, at the time of the late disastrous fire on the 10th instant, in this city, would state that our Safes were filled with fire-brick for the fire-proof, and while several of this class preserved their contents, ours were considerably charred, and only a part legible. In justice to Mr. LEWIS LILLIE, we are pleased to state that Safes of his manufacture proved to be powerful protectors against fire, and have preserved their contents, after having been exposed to the fiery ordeal, unprotected by water, from one to three days.

Stephen Holton,	Luther Greenman,
Bennett, Strickland & Fellows,	E. W. Johnson,
Corloss & House,	J. H. Goodsell.

TROY, N. Y., May 17, 1862.

LEWIS LILLIE—Dear Sir: We were using at the time of the late severe fire of 10th inst., a Safe purchased in 1852 of the late World's Safe Company. The contents were considerably charred, but our Ledger is mostly legible, and we are able to copy it.
The Safe was subjected to a severe heat for over eighteen hours, and we are satisfied that if water had been thrown on the ruins, as is ordinarily the case, the contents would have come out uninjured. You will please repair our Safe, placing in it the improvements embraced in Safes of your manufacture, and oblige
SHELDON & GREENE.

N.B.—The above Safe is believed to have damaged the contents more than any of those named in this circular.
There were only seven Sheet Iron Safes, made by Herring and others, outside of the railroad depot, that were exposed to the fire, four of which were entirely burnt out; the fifth was saved by being early cooled off by water; the remaining two were not severely tested.
LEWIS LILLIE.

Large Iron Railway Bridge for India.

There is in course of construction in Manchester, England, an iron railway and carriage-way bridge combined, of whose character and dimensions probably very few of the inhabitants have any conception. Messrs. Ormerod, Grierson & Co., of the St. George's Ironworks, Hulme, have just completed the first of a series of 12 spans, which are to constitute an iron lattice bridge over the river Jumna, near Delhi. The bridge is for the East India Railway Company, and is from designs by Mr. A. M. Rendel, C. E. London. It is so constructed as to answer the double purpose of a railway and an ordinary road, the railway being along the top and the roadway beneath it. Each girder is 216 ft. long, and this gives a clear span of 205 ft. between the piers, of which there will be 11. The 12 spans will, therefore, form a structure having a total length of over half a mile. The first span has been completely riveted up in the works, and loaded with nearly 450 tons of pig-iron. The deflections were carefully noted, but the details would not be of general interest, and it may be sufficient to state that the result of the test was even more favorable than was anticipated. The iron has been supplied by the Shelton Bar Iron Company, near Stoke, and was required to bear a tensile strain of 21 tons to the inch of section. The breaking strain is estimated at from 2,500 to 3,000 tons, equally distributed, which leaves ample margin beyond any weight to which it will be subjected. The bridge, notwithstanding its great length, has a light and airy appearance.

Eaton and Hamilton Railroad.

We are indebted to E. W. McGUIRE, Esq., Treasurer, for the following statement of the revenue and current expenses of the Eaton & Hamilton railroad for the years ending December 31, 1859, 1860 and 1861:

	1859.	1860.	1861.
Received from tonnage	$80,016 35	$90,688 28	$71,108 49
" passenger, mail, etc.	58,333 46	61,640 44	57,001 80
	$138,349 81	$152,328 72	$128,170 29
CURRENT EXPENDITURES:—

Taxes	3,819 69	2,520 92	1,950 14
Sundries	5,342 61	3,923 15	1,465 75
NET EARNINGS	$17,383 96	$108,463 00	$94,758 38
	$120,965 85	$43,865 72	$33,411 91

The Eaton and Hamilton Railroad Company was chartered in Ohio on the 8th of February, 1847, to construct a railroad from Hamilton, Ohio, to the State line of Indiana; and the Richmond and Miami railroad company was chartered in Indiana about the same time, to construct a railroad from Richmond, Ind., to connect therewith. These roads were built by the companies separately—that portion between Hamilton Junction and Eaton having been completed and opened for business on the 1st of July, 1852, and the remainder to the State line and Richmond on the 1st of May, 1853. On the 1st of December following the two companies were consolidated. The company has an agreement with the Cincinnati, Hamilton and Dayton railroad company for the use of its road between the Junction and Hamilton, for which it pays $10,000 a year. Its cars are also drawn over that road between Cincinnati and Hamilton by the engines of the same company.

No regular annual reports of the operations of this road have been issued since December 31, 1858, hence we are unable to give the "Abstract of Balance Sheet" to a later date than January 1, 1859. It is not probable however that any material change has since taken place in its financial condition. The capital stock authorized was $600,000; of which $469,763 had been paid in. Funded debt, $683,731—classified as follows:

Sterling 7 per cent. bonds, $130,734—issued in 1851 and payable principal in 20 years and interest semi-annually in London. Amount issued $157,464.

1st Mortgage (E. & H. R. R. Co.) 6 per cent. bonds, $150,000—issued to the city of Cincinnati in exchange for a like amount of city bonds, 1st January, 1851, and payable principal in 30 years and interest semi-annually 1st January and 1st July in Cincinnati.

1st Mortgage (R. & M. R. R. Co.) 7 per cent. bonds, $60,000—issued 1st November, 1852, and payable principal in 10 years and interest semi-annually 1st May and 1st November in Cincinnati.

2d Mortgage (E. & H. R. R. Co.) 7 per cent. bonds, $300,000—issued 1st January, 1852, and payable, principal in 10 years and interest semi-annually 1st January and 1st July in Cincinnati.

3d Mortgage (R. & M. R. R. Co.) 7 per cent. bonds, $3,000—issued 1st January, 1854, and payable, principal in 10 years and interest semi-annually 1st January and 1st July in Cincinnati. Amount provided $40,000.

3d Mortgage real estate (E. & H. R. R. Co.) 8 per cent. bonds, $40,000—issued 1st December, 1853, and payable, principal in 20 years and interest semi-annually 1st June and 1st December in Cincinnati. Amount provided $150,000.

The road is 42.50 miles in length, extending from Richmond to Hamilton Junction. Cost of road and appurtenances, $1,217,859.

Railroads of South America and the West Indies.

In Mexico a short line is open from the City of Mexico towards Vera Cruz.

WEST INDIES.—In Cuba upwards of 500 miles of railway are open and in use, the average cost of which may be taken at £10,000 per mile, equal to, in all, £5,500,000.

NEW GRANADA.—The Panama Railway across the Isthmus of Panama (Darien) is 49½ miles long, and cost £1,600,000, or say, £32,000 per mile. The net receipts have averaged about £400,000 or 25 per cent. on the cost.

VENEZUELA.—Two or three lines have been commenced—one from Puerto Cabello to San Felipe, a distance of 53 miles, and another running from Laguayra toward Caraccas.

BRAZIL.—In Brazil 27 miles of the Bahia line are open, and up to the 30th June last, £1,236,405 had been expended on the whole line, open and in progress.

There are also open 36½ miles of the Pernambuco line, the cost of which thus far has been £1,409,000.

The Don Pedro II Railway is open for 38 miles from Rio de Janeiro to Belem, and 220 miles are in course of constrnction.

On 88 miles of the San Pablo line £314,000 had been expended up to the date of the last report.

CHILE.—In Chile, the Copiapo Railway extends from Caldera on the Pacific coast 74 miles inland, via Copiapo to Pabellon, whence the Copiapo Extension Railway, 26 miles long, extends to the Chanarcillo silver mines. This road has an altitude of 4,500 above the sea level, and a grade of 268 feet to the mile for several miles; some of the curves have a radius of 500 feet. A branch of 53½ miles is in course of construction by the Copiapo Extension Railway Company. A line from Coquimbo was recently opened as far as Serenas, and is in course of extension about thirty miles interior to the copper mines.

From Valparaiso a line of railway has been opened for nearly one half the distance of 110 miles to Santiago, the capital of the Republic. Another line is in progress from Santiago southward to Talca, a distance of 162 miles, upwards of 60 miles being open.

PERU.—Three lines are open in Peru—the Arica and Tacna, 28½ miles long, one of 8¾ miles from Callao to Lima, and one from Chorillas to Lima.—*Panama Star.*

Racine and Mississippi Railroad.

The third year of the operations of this road by the trustees for the first mortgage bondholders expired May 10th, 1862. We have been favored with a copy of the report of the General Manager, Superintendent and Secretary, giving a detailed account of the operations of the road during that year. The earnings and expenses of the road during the past, in comparison with those of the preceding year, have been as follows:

Earnings:	1861.	1862.
From freight	$165,738 26	$187,910 31
" passengers	49,087 53	51,477 37
" mails, etc.	6,024 25	6,426 11
	$220,850 04	$245,813 79
Expenses:		
Repairs of road	$21,429 02	$25,029 62
" equipment	11,166 88	17,325 49
" cars	12,403 70	16,591 21
" bridges, etc.	2,805 78	7,318 36
Fuel	18,343 16	25 197 25
Oil and waste	3,261 11	3,359 39
Damages to persons	12,889 62	684 93
Station service	20,474 83	20,467 86
Train bands	24,665 68	25,818 92
Taxes	4,144 22	5,273 09
All other expenses	20,127 48	30,107 67
	$152,411 48	$177,173 79
Net receipts	$68,438 56	$68,640 00

The Northern Illinois railroad was opened to Lanark, 20 miles west of Freeport, Oct. 1, 1861, and has been operated since that date, by the trustees of the Racine and Mississippi railroad. In comparing the results of the past year's business with that of the previous year, the net earnings of the N. I. R. R., amounting to $10,490 31, must be passed to the credit side of operating account. The debit side of the account shows the total expenses of operating both roads, with the exception of the track repairs of the N. I R. R., which are paid by the latter company. The statement of earnings will then stand thus:

Gross earnings as above		$245,813 79
Northern Illinois railroad net receipts		10,490 31
		$256,304 10
Operating expenses	$177,173 79	
N. I. R. R. track repairs.	3,331 06	
		180,504 85
Total net receipts		$75,799 25

The following will show the result of the three years' management by the trustees, treating the N. I. R. R. as part of the R. & M. R. R., since Oct. 1, 1861:

	1860.	1861.	1862.
Receipts	$166,916 03	$220,850 04	$256,304 10
Expenses	131,790 14	152,411 48	180,504 85
	$35,125 89	$68,438 56	$75,799 25
Operating to gross rec'pts.	78.9 per ct.	69.0 per ct.	70.4 per ct.

The business to and from stations on the Northern Illinois railroad for the 7 months and 10 days of the fiscal year, amounted to $34,312 95. The per centage of business originated by the N. I. R. R. amounted to $24,156 31, which leaves a surplus of $10,156 64. The amount allowed the N. I. R. R. was $10,490 31. The amount paid by that company for road repairs was $3,331 06, leaving net to the N. I. R. R., $7,159 25, which deducted from the surplus of business derived from the N. I. R. R., leaves a balance in favor of the R. & M. R. R., of $2,997 39. The report says:

The business of the past year shows an increase over the previous year, although it was greatly reduced by the unremitting competition and opposition of the Illinois Central and Galena & Chi. Railroads. Fortunately the competition is now at an end, and satisfactory relations are established with the Illinois Central Railroad Co. by which your road is allowed the same privileges for the interchange of business as are allowed to the Galena Co. An arrangement has also been made with the Galena Company for the maintainance of a tariff on fair and remunerative rates. Since these arrangements took effect, on the 15th May, the business has been working very satisfactorily for your road. A large amount of produce from the Mississippi, at Dunleith, the terminus of the Illinois Central Railroad, has been carried over your road to Chicago, Racine and Milwaukee. With this business there has been a greater demand for rolling stock than could be supplied by the trustees; but the business has been materially assisted by the Illinois Central and Chicago and North Western Companies having, by agreement, provided their proportion of cars for the extent of mileage in which they are respectively interested.

The local business of the road in the winter was light; but the business derived from the 20 miles of the Northern Illinois Railroad, which was opened on the 1st of October, more than made up for what might have been expected from the Illinois Central, had the running arrangements of the previous year been in operation. The Northern Illinois Railroad will be completed to the river so as to be opened to the public on 1st September. The grading is nearly completed; the material for the track is on hand, and is now being laid down; in the course of ten days the track will be laid to Mount Carroll, and from there it will be continued to Savanna ten miles further, at the rate of three-quarters of a mile a day, so that engines may run through to the river by the first week in August. The month of August will be taken for finishing up and completing grading necessary to be done in the town of Savanna, which could not well be accomplished if interrupted by business.

On the opening of the Northern Illinois Railroad on 1st October, a working arrangement was entered into for one year, by which the entire control of the road was secured, so that it could be operated as freely as if it was in fact an extension of your road. Fifty per cent. of the gross earnings were allowed to the company, calculating the whole receipts from Lanark (the western terminus of the road) to Racine, and allowing the company its proportion of 20 miles, the company undertaking to maintain its own road bed in good running order. It will be necessary to enter into a new arrangement with the company on completion of its road to the river.

With the opening of the Northern Illinois to Savanna, your road will be placed in the position of having two friendly connections with the Mississippi River, by the Illinois Central at Dunleith, and the Northern Illinois at Savanna. The advantages of the other connections of your road will be fully demonstrated in the coming year when a greater field to draw business from will be opened to it. The fact that you can offer at two ports on the Mississippi the shortest route to the three Lake ports, Chicago, Racine and Milwaukee, and the shippers may choose ther market and send their business as they may think most advantageous, cannot fail to draw to your road a large amount of the business of the Mississippi River, from North and South as well as from the country on the west side of the river, which is one of the richest and most cultivated counties of Iowa. It appears to your Manager, that the prospect of business is only limited by the powers at command for operating it. The rolling stock will not be sufficient at first, but it has been increased and will be added to gradually to keep up with the demand, as far as may appear prudent. It is hardly known yet, but will soon be appreciated after the road is in operation to Savanna, that the distance to the Mississippi River by your road from Milwaukee is 27 miles shorter than the Milwaukee and Prairie du Chien road, and 35 miles shorter than by the La Crosse road. The distance from lake to river at Racine is 23 miles less, making a route 50 miles shorter than the Prairie du Chien, and 58 miles shorter than the La Crosse.

Another favorable result has already been attained by the extension of the Northern Illinois Railroad; at the letting of the mail contracts for the next four years, from July 1st, the contract has been granted for the through route from Racine to Savanna and the classification of your road as a mail route has been raised.

The number of cars added to the road was essential, and still their is a deficiency. Two new freight locomotives have been ordered, to be delivered in the month of October. The order has been given to the Rogers Locomotive Works, upon a carefully made up specification for two coal burners. At the relative prices of coal and wood, the former is undoubtedly the most economical fuel for use on your road; and the difference in its favor will increase from year to year, as there is little likelihood of coal increasing much in price without wood advancing in greater proportion.

The increase of work in repairs of locomotives has recently become difficult to accomplish, from the imperfect accommodations for the purpose, which have been the cause of increased cost upon all work done, and it became necessary to provide better arrangements. The most feasible plan of providing what was needed, appeared to be to complete the original design of a workshop of brick upon a stone foundation, which had been put in by the company and left unfinished. The building is now erected, making a workshop of ample dimensions for all the work the road can require for two years to come, most conveniently placed, connecting the Engine House with the blacksmith shop, and having an independent track for engines to enter it. The cost of the building is $2,500, and that amount will be more than saved in repairs in one year from the conveniencies provided.

The risk of fire has been the subject of anxious consideration with reference particularly to the engine house, workshops, and material and rolling stock accumulated about the buildings. Your Manager considered the risk too great to run at one point, and opened a policy for the sum of $20,000 as a partial insurance on the property, and as a further protection purchased a fire engine to be worked by the operatives of the road. In regard to the scattered risks on the line of road, your Manager deems it the most economical arrangement to let them be held uninsured, as the premium of insurance on all would be more than sufficient to replace such property as it is probable might be destroyed by fire from time to time. There has as yet been no destruction by fire upon the road, beyond a small amount of fencing burnt up during the dry season in summer, when the grass is frequently on fire, and an occasional slight damage to the bridge. The bridges are all carefully watched and are provided with water to be at hand in case of sparks igniting.

The currency difficulties alluded to in last year's report, are now at an end, but continued for some time during the last year. Exchange on New York was for months as high as 10 per cent., causing the item of Exchange to amount to $2,188 60 on the debit side, as against $362 85 on the credit side in the previous year. The bank issues of Wisconsin and Illinois are now of very limited amount and pass current at par with Eastern Bank bills and Treasury notes, and exchange is at par. The Treasury notes, if kept within limits of what is required for the business of the country, will be a great boon to the west, by affording a safe circulating medium, current all over the country. This money will not only be serviceable as affording safety in the daily transaction of business, but by the facilities it provides for business, will tend to develope the resources of the country, and add largely to the volume of business.

The north-west has undoubtedly been affected by the lamentable war now raging in the country, but in a manner which no casual observer would detect. It cannot be but that prices have been lower than they would have been had the condition of the country been one of peaceful industry, and the arts of peace, which cannot be carried on without contributing to the profits of railroads, must have been greatly discouraged. In passenger business, there is a very marked falling off, attributable in a degree to the number of men who have joined the army and gone out of the State, and to some extent to the limited amount of trading as compared with ordinary times, when agents in all branches of business industriously seek custom in every town and settlement, even of the most humble pretensions. Many of the roads have had some compensation for the deficiencies alluded to, in carrying troops and munitions of war for the government, but your road is not situated so as to participate in such source of revenue beyond a very limited amount. Your road is eminently intended to work to greatest advantage in aid of the labors of peace and good will, the end devoutly prayed for by all good citizens, and which we may loyally anticipate as the greatest gain to be achieved at the present time.

The anticipations expressed in my last report of the advantages to be derived from the extension of the Northern Illinois Railroad have been fully realized from the first 20 miles, and I have now to congratulate you upon the speedy completion of the line to the Mississippi, which cannot fail to raise the character of your property so that its immediate prospects will afford assurances of its ranking with the most prosperous of the roads connecting the Mississippi and the lakes. I have already dwelt upon the advantages of having two points on the Mississippi, and three points on the lakes, connected by shorter lines than any other route can offer, but the situation is so important, I would impress it upon all interested in the property as a subject for profitable anticipations.

Your property has passed through trying times, and now enters upon a phase in its history affording well grounded and brighter prospects than at any previous time, and I close my report in the anticipation of the coming year enabling your manager to submit to you results of the most satisfactory character.

The company have 9 passenger, 5 baggage, 3 mail, 56 platform and 296 house freight cars. The number of locomotives is not stated. The number of miles run by engines with passenger trains was 77,658; with freight trains, 165,656; with other trains, 10,910—total 254,224; an increase over the previous year of 25,597 miles. Number of passengers carried, 73,618. Tons of freight, 122,354.

General Manager—G. A. Thomson.
Superintendent—Matt. Taylor.
Secretary—James C. Hill.

Coquimbo Railway.

This railway, which bids fair to eventually become one of the most profitable and useful in the Republic of Chile, South America, was formally inaugurated upon the 21st of April, 1862, with all the ceremonies usually observed in Catholic countries. Its length, including two branches, is about thirty and a half English miles, and the object of its construction is not only to connect the city of Serena, the capital of the province, with its spacious and well sheltered Port Coquimbo, eight miles distance but to facilitate the conveyance of the mineral riches from the districts lying to the south of the latter.

The line forms a letter V, and commencing upon the coast of the Pacific at the port of Coquimbo, it thence runs for a few miles in a north-easterly direction to the city of Serena, beyond which place it is continued for two and a quarter miles, as far as the large copper smelting works of the Compania Lambert, where it terminates for the present, on this side of Coquimbo, the intention, however, being to extend it ultimately up the rich and fertile valley of Elgin to the town of Vienna, about forty miles further.

From Coquimbo, southwards, the railway runs for twenty-eight and a half miles, passing first in its course the extensive smelting works of Don Jose Tomas Urmenata, at Guayacan, where twenty-four reverberating furnaces are constantly at work, and to these works a branch has been formed nearly two miles in length. Beyond this, after traversing a distance of eighteen miles from Coquimbo, the great mineral districts of Andacollo and Tambillos are reached, and thence to the present termination of the railway at the foot of the Cardas range of mountains. The entire country is rich in copper and other minerals.

This line is intended to be continued hereafter thirty miles further to Ovalle, the chief town of a department containing immense resources, both mineral and agricultural. Within this province is situated the wonderful copper mines of Tamaya,

which probably are the most productive in the world, the chief of which belongs to the proprietor of the large smelting works at Guayacan already mentioned. To the foot of the mountain of Tamaya the railway has already been surveyed, and although the line will be somewhat difficult, yet there exists no serious obstacle to its execution, and arrangements are being already made to raise the additional capital required.

The Coquimbo Railway is the first line in Chile yet made exclusively with capital raised in the country; it has cost, including rolling stock, stations, land, and every other expense, £5,680 per mile, or £230,000 for the entire length of forty and a half miles, and the estimated expense of continuing it to Ovalle at £250,000.

The works upon the line are of a simple though durable character; a kind of calcareous limestone found in the district has been employed in the construction of the various bridge abutments and in the culverts; and cast iron piles, with wrought iron girders, have been generally adopted for the principal bridges, one of which, over the Coquimbo river, is 500 ft. in length.

The gauge adopted is that of the remainder of the lines of Central Chile, viz., 5 ft. 6 in., the rails being 61 lb per lineal yard.

The curves of the main lines in no case exceed 1,000 ft. radius, and the steepest gradient is 1 in 70.

The Coquimbo Railway is the cheapest yet made in Chile. It has been carried out for an amount considerably below the estimate, and the execution of the works has occupied only sixteen months.—*Railway Times.*

Androscoggin and Kennebec Railroad.

The annual meeting of this company was held at Waterville, Me., on the 25th of June, at which the report of the directors for the fiscal year ending May 31, 1862, was presented. From this we learn that the gross earnings of the whole line—including those of the Penobscot and Kennebec Railroad, which is operated under lease to this company—were:

From 90,441 passengers	$130,316 32
" 53,061.23 tons freight	106,040 30
" express, mail, etc	17,885 64
	$254,242 26

And the expenses were:

Repairs of track	$45,295 19	
" equipment	13,923 30	
" buildings, etc	5,327 80	
Train expenses	13,453 03	
Station expenses	13,768 44	
Fuel	17,001 52	
Oil and waste	2,318 69	
All other expenses	11,469 65	
		124,557 62

Net earnings for the year:

Androscoggin and Kennebec Railroad Company, 4-7ths	$74,105 51	
Penobscot and Kennebec R. R. Co., 3-7ths	55,579 13	
		129,684 64
Compared with the previous year the gross earnings show a decrease of		$64,263 14
With a decrease in expenses of		29,293 92
Making the decrease in net earnings		$34,969 22

—the amount received by this company is therefore $19,982 41 less than that of the previous year. The report says:

It will be seen from this exhibit that the net earnings have fallen far below the sum necessary to pay the interest on the indebtedness of the Company. Nevertheless your Directors have paid all the interest obligations, as they have matured, from their private means or credit, trusting in the good faith of the company to protect them in so doing.

The bonds, payable in the stock of this company, remain in amount the same as at our last report. A large portion of those, it will be recollected, mature in July, 1863, and the remainder principally in the year following.

Of the loan of 1860, ($1,100,000,) the bonds of which run thirty years, $804,600 have been disposed of during the year now closed and during the year previous at their par value, and for the following purposes:

In exchange for bonds of million dollar loan	$792,900
For interest bonds of the company	7,700
For bonds of the $350,000 loan	3,000
For furniture bonds	500
For interest due from the company	500
	$804,600

And there remain of the bonds of the loan of 1860, to be disposed of, $295,400. A portion of these bonds thus remaining undisposed of, are pledged for the debts of the company.

Of the bonds issued prior to the million dollar loan, there remain outstanding $26,557 00; of the million dollar loan, $192,100 remain outstanding; of the interest bonds, $600 remain. The bonds secured by a mortgage of the furniture of the road have all been taken up during the past year, and the mortgage discharged. The remaining bonds of the million dollar loan, and those of an earlier issue, as well as those known as Interest bonds, your directors believe may all be exchanged during the next year. Some difficulty is found in ascertaining where the bonds are held, and delays from this cause have occurred.

The relation of your company with other companies with which they are directly or indirectly connected in business, are among the most difficult subjects to deal with.

With the Grand Trunk Company they are and have been harmonious and satisfactory. With the Androscoggin Railroad Company, difficulties exist, which now must be reconciled by the Courts of law. In September last, having been informed that it was the intention of that company to sever the connection of their road with yours, which had been formed under their respective charters, in 1852, and to change the gauge of their road, your Directors caused a bill in equity to be filed in the Supreme Judicial Court, to restrain that company from so doing. On a hearing for a temporary injunction, the Court granted the injunction, restraining them from changing the gauge. But notwithstanding the injunction so granted, that Company, in disregard of the order of the Court, and on Sunday, when process could not be served, changed the gauge of their road, and so practically have broken up all present connection of the roads. This bill in equity is still pending, and has not yet come before the Court for a final hearing. Your board have good reason to believe that your rights of connection in that road will be sustained, and that that company will be compelled to restore the gauge and connection as it was before.

It will be recollected by most of you, that in 1856 a law was passed by the Legislature of this State authorizing the consolidation of your Company with that of the Penobscot and Kennebec Railroad Company; and that into this act a section was inserted against the consent of the parties asking the Legislation, and particularly to secure rights to rival corporations, which this Company and the Penobscot Company were unwilling to concede. Efforts have been made at each succeeding session of the Legislature for the repeal of the obnoxious section, but without avail until the last winter, when those interested in this line of road succeeded in obtaining the desired amendment of the act of consolidation. The act is now as it was originally desired; and it now remains with the stockholders and others interested in the two roads, to determine whether they will avail themselves of the act. Your Directors cannot too earnestly urge the importance, to every party interested in the road, of uniting the two companies permanently, The value of the stock is in the future growth of the State, and future increase of population and business upon the line of the road; but without a permanent union of the two roads, the stock will not be likely to be of any value, present or future. The holders of the Bonds of this Company are interested in accomplishing the union referred to, inasmuch as it will greatly enhance the value of their security.

The miles run by engines for all purposes during the year were 171,593, viz: with passenger trains, 75,965; with freight trains, 71,694; with other trains, 23,934.

The number of passengers transported over the whole road during the year has been 90,441; tons of merchandise, 53,061. Computing the miles these passengers and tons of merchandise have been transported, and it appears that it is equal in all to the transportation of 3,227,976 passengers one mile: of these, 1,457,566 were transported one mile on the P. & K. R. R., and 1,770,410 on the A. & K. R. R.

The superintendent recommends the erection of a new passenger and merchandise depot at Auburn, and a new turntable and engine house at Danville Junction; and trusts that some way may be devised by which both of these improvements may speedily be made.

The balance to credit of income account at the commencement of the year was $83,725 57; at close it was $134,543 31.

Steam Engine and Boiler.

Mr. Giffard, of Paris, has just specified, as a communication to Mr. Henry, patent agent, Fleet street, London, an improved boiler and engine. The boiler is characterized by the employment of a reservoir of hot water and steam, consisting of a strong chamber, or water space, into which lead a number of sloping tubes, placed above the fire-bars of the furnace, and plugged at their outer ends. The engine consists of a pair of tubes, or narrow cylinders, in which work plungers connected at their outer ends by side rods. The tubes are supplied with steam through a block, which closes their inner ends, and on the face of which works a slide-valve, balanced by a rod and spring. A supplementary link-motion is combined with the ordinary link-motion, so that the valve-rod is worked through the intervention of this extra link and its gear, which constitute what is termed by Mr. Giffard a "correcting apparatus." The combined engine, boiler and valve gear constitute a machine for producing and employing steam at very high pressures.

Companies Ownership in Lands taken for Railroad Purposes.

RESPECTIVE RIGHTS OF COMPANIES AND THE FORMER LAND OWNERS. RAILWAY FARM CROSSINGS —COMPANIES MAY MAINTAIN TRESPASS.

The Supreme Court of the State of Vermont, have recently decided in the case of the Connecticut and Passumpsic Rivers Railroad Company *vs.* Buckley Holton, that one whose land has been taken, for railroad purposes, has no right to enter upon or use such land for any purpose which in the least degree endangers or embarrasses its use, by the company, for any of the objects which the railway is intended to accomplish; and also, that under sec. 43 chap. 26, Comp. Stat., in regard to "railway farm crossings," neither the railway company nor the adjacent land owners have the right to determine separately, and without the consent of the other party, the number, character and location of the "farm crossings."

At the time the plaintiffs' railroad was constructed, a portion of their road bed and the land adjoining on each side was taken by them from the defendant, and the damages for such taking were duly appraised and paid according to the provisions of the plaintiffs' charter. After this land so taken and paid for, had been enclosed by the plaintiffs, and while it was in their possession, the defendant at different times, entered thereon with his servants, oxen and carts, through the fences enclosing it, and cut and carried away the turf from a portion of it lying between the railroad track and the fence. This portion was about two rods wide and fifty rods long. This entry and removal of the turf was committed under a claim of right by the defendant, who owned the land adjoining the enclosure, but it was against the will and protest of the plaintiffs.

The referee proved that such entries by the defendant on this land enhanced the danger of accident to the passengers and employees on the plaintiffs' road, on account of the liability of the oxen from fright or otherwise to run upon the railroad track; and he also found that the removal of the turf increased the dust about the cars and engines when in motion, thereby annoying the passengers and to some extent injuring the machinery of the locomotives; but that if the defendant had the right to enter the enclosure with his team and remove the turf, he had done so in a safe and prudent manner.

The referee also reported that the defendant, without the consent and against the wishes of the plaintiffs, had taken down one length of the plaintiffs' fence on each side of the railroad track on his farm, and made a "crossing" about twenty rods south of the crossing made by the plaintiffs for the accommodation of the defendant. The defendant did this for his own convenience, to enable him to draw manure and produce across the track, which could be done more conveniently at the new than at the old "crossing." In making this crossing the defendant filled the ditch on the side of the track, which had a tendency to dam up the water and saturate the embankment on which the track was laid. He also laid *loose* planks between the rails, which rendered the passage of the engine and cars less safe than if the planks were fastened; and this also enhanced the danger of accident on the railroad.

The county court held the acts of the defendant were trespasses, and rendered judgment in favor of the plaintiffs, from which the defendant appealed. The following is the opinion delivered at the decision of the case by the Supreme Court.

ALDIS, J.—Although the right which a railroad acquires to land taken under their charter is said to be merely an easement, yet the nature of their business, their obligations to the community and the public safety, require that their possession of the land so taken should be absolute and exclusive against the adjacent land owner, so made as to secure fully every purpose for which the railroad is made and used.

The possession of the railroad company cannot be limited to any point of occupation less absolute and exclusive than this; that the corporation may do any act upon the land conducive to those public uses for which their charter was granted, and may exclude the land owner from taking any possession or doing any act upon the land which may in the least degree tend to jeopardize the safe transportation of passengers and freight upon the road, or which may in any way interfere with or embarrass their use of the road and land for any of the purposes which the railway is intended to accomplish. This possession in Massachusetts has been said to be "practically exclusive." 2 Gray, 574. * * * * Without stopping to inquire whether a possible case may not exist where the land owner might enter to obtain mines or minerals, or to take herbage or other vegetable growth, it is obvious that the possession of the railroad company must ordinarily and practically be absolute and exclusive. Hence any entry by the land owner or any act done by him upon the land which tends in the least to impair the structure of the road, to endanger the running of trains, to lessen the safety or comfort of passengers, or generally to embarrass the use of the road for the purposes for which it was built, or the power of the railroad company to keep it in repair, must be deemed wrongful.

The removal of turf from the sides of the road and the adjacent strips of land is clearly an unlawful act on the part of the land owner. Where the road bed and adjacent soil are bare, dust is increased by the motion of the engine and cars as they pass along. This becomes a great annoyance to passengers at certain seasons of the year and especially in the dry, hot weather of summer. To prevent or remedy this evil the railroad companies are sometimes obliged to incur expense. To some extent doubtless, the dust is injurious to the machinery of the engines. The railroad companies have the right to preserve and promote, as far as practicable, a growth of turf along their road bed and its sides, and upon the adjacent strips of land; and an entry by the adjoining land owner to cut and carry away the turf must be held to be a trespass.

The compiled statute provides that if the parties cannot agree upon the plan, manner or number of farm crossings, the same shall be determined by commissioners. This, by implication, clearly precludes both the railroad companies and the land owners from determining separately and without the consent of each other, where and what and how many the farm crossings shall be. They must agree or submit the question to the decision of commissioners. From the operation of this general law the defendant claims to be exempt by virtue of the language employed in the plaintiffs' charter, which it is claimed secures to him a right independent of all subsequent legislation, to build and use farm crossings as in his own judgment he may think his convenience requires. The right as expressed in the charter, to cross the railroad with teams or otherwise, is to be used "in such a manner as shall be calculated not to injure the same." We think the right is to be used not merely so that the track or road bed should not be injured, but that a larger meaning, a more liberal construction, should be put upon this language, viz, that the right to cross the railroad should be used so as not to injure the proper and reasonable enjoyment of the road by the corporation. It is obvious that the manner in which such a right should be exercised must be settled by agreement of both parties, or else be regulated by law. Hence the subject necessarily becomes a fit subject for legislation, and neither party can claim any vested rights in the matter beyond the control of legislation. The general law on this subject was required, both to settle the conflicting claims between land owners and railroad companies, and to secure more fully the safety of the public in traveling upon railroads. If every land owner could build and use farm crossings wherever he pleased and as many as he pleased, the dangers of railroad travel would be alarmingly increased. The question of convenience or inconvenience to the land owner in using his farm crossings, sinks into insignificance when compared with the question of safety or danger to all who travel on railroads. The land owner has no right to build a farm crossing at any other point than the one fixed by commissioners, or agreed upon with the company. He has no right to cross the track at any other point than the established crossing.

We consider all these acts which the defendant has done under a claim of right to be wrongful. They endanger the safety of all who travel; and in deciding upon the questions here involved, the public safety is the paramount consideration.

For these injuries to the plaintiffs' rights and possession, trespass is the proper remedy. The judgment of the County Court is affirmed.

Wheat Crops of Ohio.

The wheat crop has just been gathered in the Miami country, and for the most part throughout the State. It is the best and largest crop of wheat produced in Ohio since 1850. The crop that year was the largest ever grown in the State, and the largest average per acre. The crop of 1850 was 31,500,000 bushels. That of this year may safely be put down at 30,000,000. After 1850 the wheat crop of Ohio declined till it reached only 11,000,000 bushels in 1854, which was but a little more than one-third the maximum. The maximum and minimum crops have been as follows:

In 1850	31,500,000 bushels.
In 1854	11,889,110 "
In 1857	25,397,614 "
In 1860	23,640,356 "
In 1861	20,000,000 "
In 1862	30,000,000 "

The consumption of the State for both food and seed does not exceed 13,000,000. We have, then, the following *surpluses* of wheat:

For 1860	10,640,356 bushels.
For 1861	7,000,000 "
For 1862	17,000,000 "

Railroad Earnings--Weekly.

The traffic of the Great Western Railway of Canada for the week ending July 18, 1862, was as follows:

Passenger	$18,021 06
Freight and live stock	20,785 04
Mails and sundries	1,518 71
Total	$40,324 81
Corresponding week of last year	28,094 36
Increase	$12,230 45

The earnings by the Chicago, Burlington and Quincy Railroad for the 2d week in July, 1862, were $47,879 38
Do., 1861 30,986 89
Increase $16,892 49

The earnings of the Galena and Chicago Railroad the 3d week in July, 1862, were $36,980 46
Do., 1861 36,670 83
Increase $309 63

The earnings of the Chicago and Northwestern Railroad the 3d week in July were $20,930 81
Corresponding week, 1861 17,420 83
Increase $3,509 98

The earnings of the Toledo and Wabash Railroad for 3d week of July, 1862, were $22,896 49
Do., 1861 18,793 20
Increase $4,103 29

The earnings of the Cleveland and Toledo Railroad for the 3d week in July, 1862, were $15,619
Do., 1861 12,849
Increase $2,770

The Chicago and Rock Island Railroad earned the 3d week of July, 1862 $29,861
Do., 1861 24,795
Increase $5,066

The earnings of the St. Louis, Alton and Chicago Railroad for the 3d week in July, were:

1862	$21,964 16
1861	20,412 08
Increase	$1,552 08

The Michigan Central earned in the 3d week in July, 1862 $35,024 00
Do., 1861 24,829 00
Increase $10,195 00

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 3nd week of July, 1862, were $22,030 60
Corresponding week, 1861 25,140 30
Increase $3,109 70

The receipts of the Grand Trunk Railway of Canada for the week ending July 19th, 1862, were:

16,763 Passengers	$25,072 58
Mails and sundries	2,933 68
Freight and live stock, 12,378 tons	40,577 24
Total	$68,588 50
Corresponding week, 1861	62,798 07
Increase	$5,785 43

New Passenger Tariff on Board European Steamers.

By general agreement the price of passage on board these steamers has been raised nearly 15 per cent. The Cunard line has raised its rates from $130 to $150 first class, and $70 to $90 second class, by the steamers leaving New York, and from $110 to $125 first class, and $60 to $75 second class, by the steamers sailing from Boston—this arrangement to take effect August 1st. Other lines advance in a similar proportion.—*Boston Traveller.*
